# Agenda Item 7

## Adult Ambulatory Pathways

Deep Vein Thrombosis (VTE Pathway)	PEG Problems
Deliberate Self Harm	Lower respiratory tract infections without COPD
Abscess requiring surgical drainage	Community acquired pneumonia
Acute abdominal pain not requiring operative intervention	COPD
Urinary Tract Infections	Asthma
Acute painful bladder outflow obstruction	Pneumothorax
Gross Haematuria	Pleural Effusion
Chronic indwelling catheter related problems	Pulmonary embolism
Stroke	Insulin dependent diabetes
Transient ischaemic attack	Hypoglycaemia
Appendicular fractures not requiring immediate internal fixation	End of Life Pathways
Low risk pubic rami fractures	Acute headache
Non traumatic vertebral fractures	First seizure / seizure in known epileptic
Upper gastro intestinal haemorrhage	Congestive Cardiac Failure
Lower gastro intestinal haemorrhage	Supraventricular tachycardias
Gastroenteritis (adults)	Chest pain
Hyperemesis gravidarum	Cellulitis
Early pregnancy bleeding	Falls including syncope and collapse
Ectopic pregnancy	Painless obstructive jaundice
Acute scrotal pain	Anaemia
Oesophagol stenosis	Acutely hot painful joint
Renal / uteric stones	Bartholin's abscess
Head injury
