#### **Third Party Recording**

Recording of this meeting is allowed to enable those not present to see or hear the proceedings either as they take place (or later) and to enable the reporting of those proceedings. A copy of the recording protocol is available from the contacts named on the front of this agenda.

Use of Recordings by Third Parties— code of practice

- a) Any published recording should be accompanied by a statement of when and where the recording was made, the context of the discussion that took place, and a clear identification of the main speakers and their role or title.
- b) Those making recordings must not edit the recording in a way that could lead to misinterpretation or misrepresentation of the proceedings or comments made by attendees. In particular there should be no internal editing of published extracts; recordings may start at any point and end at any point but the material between those points must be complete.

Our reference: site visits

Date 18<sup>th</sup> August 2014

To all Members of City Plans Panel

Dear Councillor

**SITE VISITS – CITY PLANS PANEL – THURSDAY 28<sup>TH</sup> AUGUST 2014**

Prior to the meeting of City Plans Panel on Thursday 28<sup>th</sup> August 2014, the following site visit will take place:

10.15am		Depart Civic Hall
10.45am	Adel and Wharfedale	Land at Breary Lane Bramhope – Outline application for residential development (up to 380 dwellings), a convenience store and public open space – 13/05134/OT Depart site at 11.30am
12.00 noon approximately		Return to Civic Hall

For those Members requiring transport, a minibus will leave the Civic Hall at **10.15am**. Please notify Daljit Singh (Tel: 247 8010) if you wish to take advantage of this and meet in the Ante Chamber at **10.05am**.

Yours sincerely

Angela M Bloor  
Governance Officer

## CITY PLANS PANEL

THURSDAY, 7TH AUGUST, 2014

**PRESENT:** Councillor J McKenna in the Chair

Councillors P Gruen, D Blackburn,  
S Hamilton, T Leadley, E Nash, M Ingham,  
J Lewis, C Campbell, C Gruen, A Castle,  
D Cohen and M Rafique

### 27 Chair's opening remarks

The Chair welcomed everyone to the meeting and asked Members and Officers to introduce themselves

### 28 Declarations of Disclosable Pecuniary Interests

Councillor Nash declared a disclosable pecuniary interest in application 13/04885/OT, Land at Regent Street/Skinner Lane, through being a Committee Member of the Co-operative Society as the proposals related to a mixed use development, which included a food store (minute 33 refers)

Councillor Leadley brought to the Panel's attention that in respect of application 13/05423/OT, land off Bradford Road East Ardsley, he knew the agricultural tenant of the land (minute 32 refers)

### 29 Apologies for Absence

Apologies for absence were received from Councillors Walshaw, G Latty and R Procter, with Councillors Rafique, Castle and Cohen substituting for their respective colleagues

### 30 Minutes

**RESOLVED** - That the minutes of the City Plans Panel meeting held on 17<sup>th</sup> July 2014 be approved

### 31 Matters arising from the minutes

With reference to minute 20 of the City Plans Panel meeting held on 17<sup>th</sup> June 2014, it was confirmed that the North Bar Stone had been located. Regarding its future and the need for it to be removed before development commenced, a request was made for the feature to be put back as soon as practicable

Draft minutes to be approved at the meeting  
to be held on Thursday, 28th August, 2014

**32 Application 13/05423/OT - Outline application for means of access from Bradford Road and to erect residential development - Land off Bradford Road East Ardsley WF3**

Further to minute 177 of the City Plans Panel meeting held on 10<sup>th</sup> April 2014, where Panel considered a position statement on an outline application for means of access from Bradford Road and to erect a residential development, Members considered a further report of the Chief Planning Officer setting out the formal application

Plans, photographs and drawings were displayed at the meeting

The South Area Planning Manager presented the report and outlined the reasons for refusal of the application of the 13.50 hectare PAS site, as set out in the report before Panel. In relation to the first reason, a minor amendment was recommended to Panel to include reference to policy GP5, T2, the Street Design Guide SPD and Neighbourhoods for Living. It was noted that in respect of the third reason for refusal, which related to highways matters, that further detailed plans had been submitted very recently and although some issues remained outstanding, it was possible these could be resolved at a later stage

When Panel had considered the site in April 2014, concerns had been raised about the coalescence of communities; however it was felt that a reason for refusal on these grounds could not be sustained, in view of the UDP Inspector's comments about land separating local communities and the applicant's agreement to address this concern at Reserved Matters stage, through the proposed layout

The Panel heard representations from the applicant's agent who provided information which included:

- the likelihood of an appeal being lodged if the application was refused; that the S106 Agreement was not disputed and could be signed at this stage
- that additional information in respect of highways had been submitted to Officers over several months, with increased dialogue in the days before the meeting
- the travelling times on public transport from the site to Leeds and Wakefield, included in the report, with concerns these were not accurate
- that the location of the site was highly accessible

The Panel then heard representations from two speakers who were supporting the Officer's recommendation to refuse the application and who provided information which included:

- the current pressure on infrastructure, including health and education facilities
- the impact of additional traffic on the roads and in terms of additional carbon emissions
- concerns about suitable access to the site for emergency vehicles

- no additional bus routes were being incorporated into the proposals and that residents of the proposed development would need to rely heavily on cars for daily journeys
- concerns about the proposed highways measures to accommodate the development
- the need for a holistic approach to development in the area
- the lack of accommodation for older people
- that the development was not sustainable and would lead to coalescence of East Ardsley and West Ardsley

The Panel discussed the application, with the main issues relating to:

- highways issues
- the local concerns raised about sustainability and lack of infrastructure which supported the argument that the application was premature
- that the application was not in line with Interim PAS policy
- the comments of the agent regarding the S106 Agreement and that the reason for refusal relating to this could be expected to fall away if the S106 was signed
- alternative uses for the site, particularly for education use in view of an additional high school being required for the area in the future

**RESOLVED** – That the application be refused for the following reasons:

1 The Local Planning Authority considers that the release of the site for housing development would be premature, being contrary to Policy N34 of the adopted Leeds Unitary Development Plan Review (2006) and contrary to Paragraph 85, bullet point 4 of the National Planning Policy Framework. The suitability of the site for housing needs to be comprehensively reviewed as part of the preparation of the ongoing Site Allocations Plan. The location and/or size of the site means that the proposal does not fulfil the exceptional criteria set out in the interim housing delivery policy approved the Leeds City Council's Executive Board on 13<sup>th</sup> March 2013 to justify early release ahead of the comprehensive assessment of safeguarded land being undertaken in the Site Allocations Plan. Furthermore, the ongoing Site Allocations Plan identifies other potential sites which are directly related and share a boundary with the application site which if allocated will need to be comprehensively planned, including any infrastructure requirements, which may be prejudiced if not considered together, with reference to policy GP5, T2, the Street Design Guide SPD and Neighbourhoods for Living

2 The proposal is contrary to the Core Strategy which seeks to concentrate the majority of new development within and adjacent to the main urban areas and major settlements. The Site Allocations Plan is the right vehicle to consider the scale and location of new development and supporting infrastructure which should take place in East Ardsley which is consistent with this size, function and sustainability

credentials. Furthermore, the Core Strategy states that the 'priority for identifying land for development will be previously developed land, other infill and key locations identified as sustainable extensions' which have not yet been established through the Site Allocations Plan, and the Core Strategy recognises the key role of new and existing infrastructure in delivering future development which has not yet been established through the Site Allocations Plan e.g. doctors surgeries, schools, roads. As such the proposal is contrary to Core Strategy Policy SP1

3 The Local Planning Authority considers that the applicant has so far failed to demonstrate that the local highway infrastructure is capable of safely accommodating the proposed access and absorbing the additional pressures place on it by the increase in traffic, cycle and pedestrian movements which will be brought about by the proposed development. The proposal is therefore considered to be contrary to Policies GP5, T2, T2B and T5 of the adopted UDP Review

4 In the absence of a signed Section 106 agreement, the proposed development so far fails to provide necessary contributions for the provision of affordable housing, education, Greenspace, public transport, travel planning and off site highway works contrary to policies of the Leeds Unitary Development Plan Review (2006) and related Supplementary Planning Documents and contrary to policies of the Draft Leeds Core Strategy and the National Planning Policy Framework. The Council anticipates that a Section 106 Agreement covering these matters will be provided prior to any appeal Inquiry but at present reserves the right to contest these matters should the Section 106 Agreement not be completed to cover all the requirements satisfactorily

**33 Application 13/04885/OT - Outline application for retail (A1) and gym (D2) development with demolition of existing building and new pedestrian and vehicle access - Land at Regent Street/Skinner Lane LS9**

Having declared a disclosable pecuniary interest in this matter, Councillor Nash left the meeting

Councillor Leadley also left the meeting at this point

Plans, graphics and precedent images were displayed at the meeting. A Members site visit had taken place earlier in the day

Officers presented the report which sought approval in principle of an outline application for a mixed use development on a long-standing, vacant site on the north-eastern edge of Leeds City Centre, with the proposals being for two retail units, comprising discount food store and bulky goods and a 24 hour gym

Regarding the design of the food store, Members were informed that a store design suitable for a prominent edge of City Centre site and which was in keeping with the surrounding buildings, would be sought

In terms of opening hours and hours of delivery, Members were informed that the gym operator required 24 hour opening, which was a fundamental element of their business model. Having considered this; the proximity of the gym to the entrance of the nearby residential accommodation and the low level of gym use at late night/early morning hours, Officers were of the view that there would be no adverse impact on the amenity of nearby residents from the gym use

Opening hours of the food store as set out in condition no 21 of the draft conditions appended to the submitted report were reported, although a request had been received for one additional hour of trading on Sundays and Bank Holidays, i.e. 10.00 – 17.00 and the same opening hours as normal trading days for Bank Holidays. While this could be accommodated, Officers had concerns about the delivery hours sought, these being 07.00 – 23.00 and had proposed a draft condition limiting these to 08.00 – 20.00, Monday to Saturday and no deliveries on Sundays and Bank Holidays unless agreed in writing by the LPA

Details of the representations received to the proposals were outlined in the report before Panel with Members being informed that the request made by West Yorkshire Combined Authority (Metro) for the provision of a real-time display to be provided in the foyer of the food store had been put to Aldi, the proposed food store operator. Aldi had stated their other stores did not provide this facility and there was limited space around the foyer and beyond the checkout areas to accommodate this, so considered the request to be unreasonable. Members were informed that all other measures set out in the travel plan had been agreed

An error in paragraph 10.1.3 of the submitted report was highlighted, with this being clarified to Members, that based on the retail impact assessment submitted by the applicant, on balance, it was considered that the proposed food store was unlikely to have significant adverse impact on the existing centre at Lincoln Green due to the diversity of their retail offers

At this point Councillor Cohen brought to the Panel's attention that Aldi was a customer of the company which he worked for

Members commented on the application, with the main issues relating to:

- highways, with particular concerns being raised about the level of congestion currently experienced at the junction of Skinner Lane and that little was being provided by way of highway improvement works as part of the proposals. The Transport Development Services Manager stated that widening works along the front of the site to accommodate a right-hand turn lane were proposed and in terms of the wider area, a full traffic assessment had been carried out which showed that the proposals were acceptable. Concerns continued to be raised about highway issues with better reassurances sought on the impact of the proposals and the need for a contribution towards

any highways remediation works which were required. Confirmation was given that as part of the deferral and delegation to Officers, the highway impacts as reported would be verified, prior to the grant of permission

- streetscene; that ground floor active uses were welcomed but that further work should be required to make the area attractive as well as encouraging footfall and that a meaningful pedestrian access on to Regent Street should be provided. Members were informed that Officers had specified that the windows of the foodstore should not be covered by adverts or vinyl stickers
- the need for the standard employment and training wording to be used in relation to the S106 Agreement
- the need for a good quality and imaginative landscape scheme to be provided
- delivery timings; the impact of these on residential amenity and whether the service area could be re-sited to the rear of the building. Members were informed there would be the opportunity to amend the illustrative layout at the Reserved Matters stage. Members considered it appropriate that local Councillors were involved in the next stages of the scheme of development
- the impact of the proposals on small businesses in the area. Officers advised that policy required consideration of the impact on local centres, rather than all retail businesses in the immediate area. Discussion on the impact of the proposals continued with some concerns continuing to be raised about the impact on local, independent retailers and the shops at the Lincoln Green local centre
- the comments of Yorkshire Water as set out in the report
- the need to value Lady Beck within the scheme and make a feature of it. Members were informed this could be considered as part of a Reserved Matters application
- the need for further work on the layout of the car park
- the need for a Real-Time display to be provided
- the view there was not a need for a 24 hour gym
- that the site was in a Ward regarded as being deprived, with particular health inequalities and that the opportunity for local people to purchase cheap, fresh food was important in tackling this issue

The Panel considered how to proceed

**RESOLVED** - To defer and delegate the application to the Chief Planning Officer for approval in principle, subject to the specified conditions set out in the submitted report, the removal of draft condition 20 to allow Pure Gym to operate 24 hours a day, an amendment to draft condition 21 to allow the retail units to open 10am – 5pm on Sundays and 8am – 10pm on Bank Holidays, an amendment to draft condition 22 to specify delivery hours of 07.00 – 20.00 Monday – Saturday and no deliveries on Sundays and Bank Holidays (and any others which he might consider appropriate) and following the completion of a Section 106 Agreement to cover the following matters:

- the provision of a Real-Time display in the food store - £5,000
- public transport contribution prior to occupation - £45,133
- travel plan implementation and monitoring fee prior to occupation - £2500
- employment and training opportunities for local people in City and Hunslet, or any adjoining Ward
- management fee payable within one month of commencement of development - £1500

In the circumstances where the Section 106 Agreement has not been completed within 3 months of the resolution to grant planning permission, the final determination of the application shall be delegated to the Chief Planning Officer and to note that the Reserved Matters application should be considered by Panel in view of the many issues raised about the layout appearance and landscaping shown on the illustrative scheme

#### **34 Date and Time of Next Meeting**

Thursday 28<sup>th</sup> August 2014 at 1.30pm in the Civic Hall, Leeds

## Report of the Chief Planning Officer

### **CITY PLANS PANEL**

**Date: 28<sup>th</sup> August 2014**

**Subject: Application 14/01211/OT: Outline application for mixed use development comprising residential development (C3) of up to 700 houses, including Extra Care residential accommodation (C2); retail and community uses (A1 to A5); health care (D1); and education uses (D1); car parking; means of access; infrastructure; open space; landscaping; and other associated works including demolition of existing house and agricultural building**

**Land at East Scholes, Scholes, Leeds 15**

#### **APPLICANT**

Scholes Dev Co Ltd And  
Barratt David Wilson Homes  
-Mr D Hudson

#### **DATE VALID**

05.03.2014

#### **TARGET DATE**

25.06.2014

#### **Electoral Wards Affected:**

**Harewood / Crossgates & Whinmoor**

☐ Yes

Ward Members consulted  
(referred to in report)

#### **Specific Implications For:**

Equality and Diversity ☐

Community Cohesion ☐

Narrowing the Gap ☐

### **RECOMMENDATION: Refusal of Planning permission for the following reasons;**

1. The LPA considers that the release of the site for housing development would be premature, being contrary to policy N34 of the adopted UDP Review (2006) and contrary to Paragraph 85, bullet point 4 of the NPPF. The suitability of the site for housing purposes as part of the future expansion of Scholes needs to be comprehensively reviewed as part of the preparation of the ongoing Site Allocations Plan and Neighbourhood Plan. The location of the site and its substantial scale means that the proposal does not fulfill the criteria set out in the interim housing delivery policy approved by Leeds City Council's Executive Board on 13th March 2013 to justify early release ahead of the comprehensive assessment of safeguarded land being undertaken in the Site Allocations Plan. It is anticipated that the Site Allocations Plan work will identify which sites will be

brought forward for development in the life of the Plan together with the infrastructure which will be needed to support sustainable growth, including additional schools provision and where that would best be located. It is considered that releasing this site in advance of that work would not be justified and would prejudice the comprehensive planning of future growth and infrastructure of the village in a plan-led way.

2. The proposal is contrary to the Draft Core Strategy which seeks to concentrate the majority of new development within and adjacent to the main urban area and major settlements. The Site Allocations Plan is the right vehicle to consider the scale and location of new development and supporting infrastructure which should take place in Scholes which is consistent with its size, function and sustainability credentials. Furthermore, the Draft Core Strategy states that the “priority for identifying land for development will be previously developed land, other infill and key locations identified as sustainable extensions” which have not yet been established through the Site Allocations Plan, and the Draft Core Strategy recognizes the key role of new and existing infrastructure in delivering future development which has not yet been established through the Site Allocations Plan eg. Educational and health infrastructure, roads and public transport improvements. As such the proposal is contrary to Policy SP3 of the adopted UDP Review and Policy SP1 of the Draft Core Strategy. In advance of the Site Allocations Plan the proposal represents such a substantial expansion of the existing settlement that it is likely to adversely impact on the character and identity of Scholes contrary to Policy SG2 of the adopted UDP Review, Policy SP1 of the Draft Core Strategy and guidance on the core planning principles underpinning the planning system as set out in the NPPF.

3. The development of this substantial site for residential purposes has poor sustainability credentials and does not meet the minimum accessibility standards set out in the Draft Core Strategy in terms of the frequency of bus services to give access to employment, secondary education and town / city centres. In the absence of any planned or proposed improvements it is considered that the proposal is contrary to Policy T2 of the adopted UDP Review (2006), Policy T2 of the emerging Core Strategy and to the sustainable transport guidance contained in the NPPF and the 12 core planning principles which requires that growth be actively managed to make the fullest possible use of public transport, walking and cycling, and focus significant development in locations which are or can be made sustainable.

4. The Local Planning Authority considers that the applicant has so far failed to demonstrate that the local highway infrastructure, including the wider network which will be affected by additional traffic as a result of this development, is capable of safely accommodating the proposed access points and absorbing the additional pressures placed on it by the increase in traffic, cycle and pedestrian movements which will, be brought about by the proposed development. The proposal is therefore considered to be contrary to Policies GP5, T2, T2B and T5 of the adopted UDP Review, Policy T2 of the emerging Core Strategy and the sustainable transport guidance contained in the NPPF which combined requires development not to create or materially add to problems of safety on the highway network.

5. In the absence of a signed Section 106 agreement the proposed development so far fails to provide necessary contributions for the provision of affordable housing, education, greenspace, public transport, travel planning and off site highway and drainage works contrary to the requirements of Policies H11, H12,

**H13, N2, N4, T2, GP5 and GP7 of the adopted UDP Review and related Supplementary Planning Documents and contrary to Policies H5, H8, P7, P9, T2, G4 and ID2 of the Draft Leeds Core Strategy and guidance in the NPPF. The Council anticipates that a Section 106 agreement covering these matters could be provided in the event of an appeal but at present reserves the right to contest these matters should the Section 106 agreement not be completed or cover all the requirements satisfactorily.**

## **1.0 INTRODUCTION**

- 1.1 The City Plans Panel received a pre-application presentation regarding this proposal at the 12<sup>th</sup> December 2013 City Plans Panel. The Panel also visited the site and Scholes in the morning prior to that meeting. At that Panel Members made it clear that they felt the proposed development on this PAS site was premature and also raised significant concerns regarding the highways implications. The full minutes from that item are included as Appendix 1 to this report.
- 1.2 The application was valid on 5<sup>th</sup> March 2014. The applicants had agreed an extension of time until 24<sup>th</sup> July 2014. Under The Planning Guarantee the Government has introduced regulations so that if a planning application submitted from 1<sup>st</sup> October 2013 onwards is not determined within 6 months by a Local Planning Authority and there is no written agreement from the applicant or agent to extend that time limit further then the planning fee authority will be refunded. That 6 month period in this case comes up on 5<sup>th</sup> September 2014. The planning fee is £43,797. Whilst the application submitted is complex and has raised many issues we now need to reach an in principle decision.

## **2.0 PROPOSAL:**

- 2.1 Outline permission is sought for a mixed use development comprising residential development up to 700 dwellings, including Extra Care residential accommodation, retail and community uses, health care and education uses with car parking, means of access , infrastructure, open space , landscaping and other associated works including demolition of existing house and agricultural building. Permission is sought for the principle of development and means of access only with all other matters reserved. An existing dwelling on Belle Vue Avenue is to be demolished to provide a new pedestrian and access link to proposed community uses. The site currently comprises agricultural fields in use for arable farming and is split by an existing un-adopted road ( Rakehill Road) which runs west – east through the site. The site lies adjacent to the Scholes Conservation Area which was designated in April 2012.
- 2.2 Means of access to the site is proposed via the provision of three access points ;
  - via the existing Rakehill Road junction in the centre of the site. Rakehill Rd will be widened to 6.75m between the application site and the junction with Scholes Lane / Station Road
  - via a new dedicated junction on Main Street to the south of the site; and
  - via the existing Arthursdale Drive, which will be extended to provide an additional point of vehicular access to the site

2.3 The application is accompanied by the following documents;

- Planning Statement
- Statement of Community Involvement
- Design and Access Statement
- Housing Needs Assessment
- Sustainability Assessment
- Building for life Assessment
- Preliminary Infrastructure Appraisal
- An Environmental Statement covering land use, socio-economic, transport, landscape and visual impact assessment, ecology, arboriculture, water management, noise, air quality, cultural heritage and archaeology and ground conditions.

2.4 The key principles of the proposed development are set out on the indicative masterplan submitted as part of the application. This illustrates the way in which the site could be developed to provide a development of up to 700 residential units alongside associated infrastructure, about 4 hectares of public open space and recreational facilities. The applicants set out that in direct response to pre-application discussions with the Parish Council and local residents the scale of the proposal represents a medium density of circa 22 dwellings per hectare ( gross developable area) in keeping with surrounding residential areas. The indicative masterplan demonstrates the provision of new community services including a one form entry primary school, GP surgery and dispensing chemist, alongside small scale retail units within the centre of the development. 15% of the dwellings are proposed as affordable housing in accordance with the Interim affordable Housing Policy of 2011 and the applicant is willing to provide a range of delivery options for the Council to consider.

2.5 The application site was removed from the Green Belt and allocated as a Protected Area of Search (PAS) site to allow for the possibility of longer term development beyond the plan period. The safeguarded land was retained both to retain the permanence of Green Belt boundaries and to provide some flexibility for the City's long-term development. The suitability of the protected sites for development was always intended to be comprehensively reviewed as part of the preparation of the Local Development Framework.

### **3.0 SITE AND SURROUNDINGS:**

3.1 The application site adjoins the eastern boundary of the settlement of Scholes and extends to an area of circa 32 hectares. Residential development lies on 3 sides of the application site from ribbon development along Nook Road to the north towards the A64 ( York Road) , the existing estate roads of the village to the west, and Main Street and associated residential development to the south. To the east is further arable farmland

## 4.0 RELEVANT PLANNING HISTORY:

- 4.1 14/00716/OT: Outline application for residential development for up to 45 dwellings, laying out of access road, car parking , landscaping and associated works on land off Morwick Grove to the west of Scholes. This application was also presented pre application to the Plans Panel in December 2013. The application was made by the same applicants as this larger scheme to the east of Scholes and involved the other PAS site in Scholes. The application was refused permission on 6<sup>th</sup> August under delegated powers for the following 4 reasons;

- 1. The LPA considers that the release of the site for housing development would be premature, being contrary to policy N34 of the adopted UDP Review (2006) and contrary to Paragraph 85, bullet point 4 of the NPPF. The suitability of the site for housing or educational purposes as part of the future expansion of Scholes needs to be comprehensively reviewed as part of the preparation of the ongoing Site Allocations Plan and Neighbourhood Plan. The location of the site means that the proposal does not fulfill the criteria set out in the interim housing delivery policy approved by Leeds City Council's Executive Board on 13<sup>th</sup> March 2013 to justify early release ahead of the comprehensive assessment of safeguarded land being undertaken in the Site Allocations Plan. It is anticipated that the Site Allocations Plan work will identify which sites will be brought forward for development in the life of the Plan together with the infrastructure which will be needed to support that growth, including additional schools provision and where that would best be located. It is considered that releasing this site in advance of that work would not be justified and would prejudice the comprehensive planning of future growth and infrastructure of the village in a plan-led way.*
- 2. The development of this site for residential purposes does not meet the minimum accessibility standards set out in the Draft Core Strategy in terms of the frequency of bus services to give access to employment, secondary education and town / city centres. In the absence of any planned or proposed improvements it is considered that the proposal is contrary to Policy T2 of the adopted UDP Review (2006) and to the sustainable transport guidance contained in the NPPF which requires new developments to be capable of being adequately served by public transport so as to provide residents with a real choice of travel options.*
- 3. It is considered that the proposed access arrangements for the site on Morwick Grove, including the relationship of the access junction to the development with the pedestrian entrance to the nursery at the adjoining primary school and the proposed drop off lay-bys will encourage additional manoeuvring and give rise to the potential for pedestrian and vehicular conflicts in this sensitive location. The detailed access arrangements which are sought as part of this outline application are therefore contrary to Policies T2 and GP5 of the adopted UDP Review (2006) and the sustainable transport guidance contained in the NPPF which combined requires development not to create or materially add to problems of safety on the highway network.*
- 4. In the absence of a signed Section 106 agreement the proposal currently fails to provide the necessary contributions for the provision of affordable housing, greenspace Improvements, metrocards and education ( if over 50 units) contrary to the requirements of Policies H11, H12, H13, N2, T2, GP5 and GP7 of the adopted UDP Review (2006) and related Supplementary Planning Documents and contrary to policies of the Draft Leeds Core Strategy and the NPPF. The Council anticipates*

*that a Section 106 agreement covering these matters could be provided in the event of an appeal but at present reserves the right to contest these matters should the Section 106 agreement not be completed or cover all the requirements satisfactorily.*

## **5.0 HISTORY OF NEGOTIATIONS:**

- 5.1 Planning officers have had meetings with the developer and there was one Ward Member presentation at pre-application stage. Officers have continually stressed it would not be appropriate to bring forward these PAS sites at this stage but that they should be promoted through the Site Allocations process.
- 5.2 The developer has also carried out public consultation in Scholes in May 2012 and September 2013. Separate meetings with the local MP, Ward Members, Parish Council plus other local groups and service providers have also taken place.
- 5.3 The applicants document that following public consultation a number of amendments were made to the scheme to address the concerns of local residents. These included a reduction in the number and density of the new development from 800 to 700 dwellings in order to reflect the appearance and character of the existing settlement whilst providing for family housing with gardens and generous on-site public open space and including both extra care and elderly accommodation as part of the scheme proposals.

## **6.0 PUBLIC/LOCAL RESPONSE:**

- 6.1 The planning application has given rise to a significant volume of representations – 1,547 of which 1,546 object and 1 neither supports or objects ( as at 14<sup>th</sup> August). Of these representations some 215 are standard printed letters where a name and address have been added.

**Alec Shelbrooke MP** writes on behalf of his constituents to raise awareness of their concerns which relate to the adequacy of the existing drainage systems and flooding is likely, highway capacity as the A64 is already jammed at peak times, actual housing of this scale in the village is questioned in terms of need, practicality and viability, impact on ecology and pressure on school places and health services. A development of this size would radically change the character of the existing village, doubling it in size and put unprecedented pressure on local highways and services.

**Councillor Ann Castle** strongly objects. At present Scholes is a village of about 1,000 properties and has grown organically over time with a variety of property styles, types and ages so is full of character. If a volume house builder were to build 700 houses to the east of the village the area would become a soulless suburb of Leeds. At the consultation event the applicants seem to believe that Scholes is a village in decline – nothing could be further from the truth as there is a popular school, two lively churches, a doctor's surgery, a dentist's surgery, two pubs, a number of meeting rooms and halls to cater for all of the lively groups in Scholes, sporting clubs and a public library. Cllr Castle is concerned about the plan to provide retail units within the development as there is an excellent village store at present in the village and retail in close proximity at Seacroft and Crossgates.

The Campaign to Protect Rural England (CPRE) have objected as the proposal is an unwarranted, speculative development which would pre-empt the emerging Site Allocations Plan and the Scholes Neighbourhood Plan; it is wholly out of proportion with the existing size and extent of Scholes and at odds with the settlement hierarchy; it would be unsustainable due to poor public transport connections, inadequate local amenities and large volumes of additional traffic generation; there are serious shortcomings with the Transport Assessment which downplay the demonstrable harm to local amenity and sustainable development that the proposals would constitute.

The standard and individual letters raise the following main issues among many:

- Prematurity/sustainability/failure to meet PAS policy.
- Highways issues in terms of the width of existing roads, capacity, junctions and safety concerns.
- Existing drainage is already working at capacity due to inadequate historic combined sewers and there are flooding problems.
- Change to the character of the village –it would be overwhelmed.
- Transport assessment factually incorrect and cannot be relied upon.
- Education and health facilities already under pressure and offers from developer may not resolve or be timely.
- Other major developments in the area and cumulative impacts should be considered.
- Ecology – adverse impact on local natural habitat and wildlife. Net gains should be made to improve the situation.
- Failure to consider the neighbourhood plan.
- Adverse impact on existing residents from traffic and growth/ construction over a prolonged period ( 10 years) plus loss of residential and visual amenity, adverse impacts on the character and amenities of the cricket ground.
- Adverse impact on public rights of way and open countryside views from them.

## **7.0 CONSULTATIONS RESPONSES:**

### **7.1 Statutory:**

**7.2 Environment Agency:** No objection subject to conditions to ensure development is carried out in accordance with approved Flood Risk Assessment and mitigation measures and any dwellings adjacent to Rake Beck or Carr Beck must have finished floor levels raised at least 600mm above the adjacent bank level of the watercourse or 150mm above existing ground levels, whichever is greater.

**7.3 Yorkshire Water:** Suggest a number of conditions. Separate systems for foul and surface water required – local public sewer network does **not** have capacity to accept any surface water discharge from the site. Substantial off-site works required to supply water to the site ( approx. 370m of off-site main laying)

### **7.4 Non-statutory:**

**7.5 Natural England:** Proposal unlikely to affect any statutory protected sites or landscapes – referral to standing advice regarding protected species.

**7.6 West Yorkshire Combined Authority -** The scale of the development will significantly increase the size of the settlement. As with a number of villages on the periphery of the suburbs of Leeds, public transport access presents challenges for bus operators. The scale of the development, when completed, may provide bus operators with the increased patronage that will improve the frequency of services but in the short term it is unlikely that bus operators would be prepared to increase frequencies or routes without external funding. The Transport Assessment (TA) acknowledges that based on the current network the site does not meet the standards set out in the SPD or the emerging Draft Core Strategy accessibility criteria. Commitments have been included in principle to address this. Further discussion is required with the Council and developer to agree the level of service required and how it can be sustained. The indicative site layout indicates that bus penetration can be achieved through the site but the rest of Scholes would need to be well served and stops, real time information will be required at regular intervals. Residential Metrocard scheme recommended at £475 per dwelling. The TA states the developer is willing to pay the SPD contribution to public transport as well as fund bus service improvements. The SPD contribution would be £858,349 or £1226 per dwelling.

**7.7 Affordable Housing** – Falls within the Outer Suburbs area where 15% affordable housing required , split 50% social rented / 50% sub market. The developer has suggested a number of approaches from all on site to an off site contribution equivalent to 15% on site. The starting point in policy terms is to provide the affordable housing on site unless there is a justification due to local housing demand for example, to do otherwise. For 700 dwellings the 15% equates to 105 units.

**7.8 Highways: Cannot be supported as submitted. Recommend refusal**

In terms of accessibility the TA does not make a full assessment of the site in terms of the Core Strategy draft accessibility standards. There is only one bus service presently running through the village along Main Street / Station Road and this is only an hourly service. No assessment has been made as to distances to existing bus stops on the A64 York Road or Leeds Road or the suitability of the routes. No specific bus offer has been made to ensure that an acceptable frequency and journey time is made available to the proposed development site, albeit the spine road within the site has been designed to take buses should one divert through the site. There is no discussion of the frequency of rail services at Crossgates station and the timing of connections with bus services. As submitted the accessibility of the site is poor.

There are 3 vehicular access points proposed to the site – From Main Street, from an extension to Rakehill Road and from an extension to Arthursdale Road. There are details which need to be resolved on all these and it has not been demonstrated that they can operate satisfactorily with capacity and without safety issues.

Off site highway works are proposed at the access points onto Main Street, at the junction between Rakehill Road and Station Road, the widening of Rakehill Road to provide a 6.75m carriageway and 2m footpaths and the signalization with widening of the junction of the A64 York Road and Scholes Lane.

A traffic impact assessment has been included as part of the TA which considers the performance at 11 junctions ( within Scholes, on the A64 to the Ring Road at Seacroft and in Barwick and Crossgates ). There is no discussion of the junction

between The Approach and Rakehill Road – the layout and capacity of this junction needs to be assessed given that The Avenue will be used by vehicles travelling to and from the northern part of the site. As this junction is close to the Station Road / Rakehill Road junction the interaction between them should also be examined.

An assessment of the Crossgates roundabout / Manston Lane / Austhorpe Road junction has not been included nor has a review of the network with full ELOR /partial ELOR or the proposed development of 2000 houses at ELE as requested at pre-application stage. The junction assessments have only been carried out with MLLR and not in the scenario before it is operational. On this basis no development would be considered appropriate until after the MLLR is built and open to the public.

There are some significant concerns with the methodology used in the detailed assessment of network growth, trip generation and trip assignment. The growth factors are very low and do not appear to reflect local circumstances. The detail of the junction assessments will need to be redone with different trip rates and assignments.

No assessment has yet been made in relation to road safety. A road safety audit will need to be undertaken and responded to satisfactorily of all junction proposals and off-site highway works before planning permission could be granted.

**7.9 Contaminated Land:** No objection subject to conditions.

**7.10 Children's Services:** Scholes (Elmet) primary school currently full with exception of some spare capacity in years 5 and 6. Full S106 contribution for education required. Current school accommodation needs to be extended – constraints on current site. Look for contribution in form of land from either or both Scholes applications. John Smeaton Community College is nearest secondary school in Leeds 15 (Crossgates). Contributions of £2,214,380 for primary and £3,334,670 for secondary required.

**7.11 Conservation :** The site is immediately north of the Scholes Conservation Area and so it is important that any proposals respect the setting and character. Key views are mainly to the south but there needs to be a strong and generous landscape buffer to the north to protect the setting – this is supported in the Heritage section of the Environmental Impact Assessment but is not currently shown on the illustrative master plan.

**7.12 Landscape / Ecology:** Main concern is ensuring adequate buffer to the Green Belt and the impact on the PROWs from development.. The illustrative master plan indicates that the PROWs will be retained but their landscape character will change with impact on users from open countryside views to urban environment. The effects of this can be mitigated by locating footpaths to the outside of the buffers to the Green Belt – the master plan suggests this in parts..

**7.13 West Yorkshire Archaeological Advisory Service:** within an area of archaeological interest – site lies to north of Scholes moated site – earthwork remains of medieval moated manor site. Geophysical survey carried out in early 2014 – clear evidence of ridge and furrow and cropmark sites. Recommend application is deferred until applicants have carried out an archaeological evaluation but if minded to approve suggest a planning condition.

**7.14 Flood Risk Management:** The recommended Flood mitigation measures set out in the Flood Risk Assessment as well as the principles of the proposed surface water

drainage arrangements are acceptable. Condition recommended for scheme of surface water drainage to be submitted and approved before commencing on site and will need to include investigation of five highway / culvert crossings between the site and Main river / Cock Beck. May necessitate off site watercourse improvement works to be included in S106 agreement. Intrusive investigations yet to be carried out to determine if ground conditions in specific areas can accommodate some aspects of infiltration drainage.

- 7.15 Public Rights of Way:** Public footpaths 38,40 & 46, Public bridleway 37 and public byway 41 cross the site. The PROW have been included into the development .
- 7.16 Retail :** Town centre uses totalling 750 sq m are shown outside a designated centre. Whilst not strictly in compliance with policy P7: the creation of new centres within the emerging Core Strategy it is in line with the spirit of the policy which is that large new housing extensions should provide local services to better create sustainable settlements, reduce private car journeys and encourage walk-in trade. The proposal passes the sequential test and would add to the sustainability and livability of the wider housing development provided that there are a number of small units within the 750 sq m total. Conditions suggested to limit the size of each unit and that the centre should consist of at least 3 units.
- 7.17 Local Planning:** Recommend refusal as contrary to N34 and the Interim PAS policy and should be looked at through the Site Allocation Plan. Barwick and Scholes is one of the Council's neighbourhood plan areas and has been designated as a neighbourhood area. Work is progressing locally on the preparation of a Neighbourhood Plan and this is being undertaken in tandem with work on the Site Allocations Plan. Scholes falls in the Outer North East housing market area where the Core Strategy target under Spatial policy SP7 is 5,000. As at 31st March 2012, the outer north east had 1,067 units still to be built from existing permissions and allocations. That leaves a residual requirement to find 3,933 units. The pool of sites for consideration identify a total of 5,848 units with 2,323 green and 3,525 amber. This is substantially over the target and gives local choice and consideration of sustainability options when choosing which sites to allocate. The East of Scholes site is amber. The publication of sites is likely to take place at the end of this year / early next before the Preferred Draft is issued and placed on deposit prior to examination. Allowing this site to come forward at this stage in advance of the Site Allocations Plan and Neighbourhood Plan would not be genuinely plan-led or empower local people to shape their surroundings.( NPPF Core Planning Principle para17).
- 7.18 Barwick in Elmet & Scholes Parish Council – object.** Fails interim policy on PAS sites. Scholes is a small settlement in emerging LDF and this development is massive and will change the character and identity of the village and be at odds with the aims of the NPPF. It fails to take account of the full impact of the East Leeds Extension or the circa 2000 dwellings on the Bramley Fields site and the resultant highway impacts on the village. It is considered that the Transport Assessment is seriously flawed in a number of ways and the flows will have significant impacts on junctions ,the network and the village as a whole. Drainage in Scholes is already subject to regular problems from the foul and surface water. Affordable housing at 15% is below the planned target figure of 35%. The timing of new educational provision is critical for the village and there is a lack of information about the Section 106 moneys on offer. If the application is taken forward the Parish Council would look for a new access/exit to be taken from the York Road to the north of the present

village. The residents are working hard to prepare a Neighbourhood Plan and this should be taken account of as an emerging plan – the timing of this application in advance of that process seeks to circumvent the Localism Act as well as the Site Allocations Plan and Core Strategy.

## **8.0 PLANNING POLICIES:**

### **Development Plan**

- 8.1** The development plan consists of the adopted Leeds Unitary Development Plan (Review 2006) (UDP) and the adopted Natural Resources and Waste DPD (2013). The Local Development Framework will eventually replace the UDP and this draft Core Strategy has had some weight in decision taking since it was published in 2012 but it is now considered to have significant weight for the following reasons

The NPPF states that decision-takers may give weight to policies in emerging plans according to:

i) The stage of preparation

- On 12th June 2014 the Council received the last set of Main Modifications from the Core Strategy Inspector, which he considers are necessary to make the Core Strategy sound. These have been published for a six week consultation between the 16th June and 25th July 2014. The Inspector has indicated that following this he will publish his Report in August. The Plan is therefore at the lost advanced stage it can be prior to the receipt of the Inspectors Report and subsequent adoption by the Council.

-There is a distinction in the weight to be given to those policies that are still subject to consultation and those that are not –i.e. those policies that are unmodified should be given even greater weight.

ii) The extent to which there are unresolved objections

- No further modifications are proposed and the Plan can only be changed now exceptionally because it is sound as modified and there is no requirement for the plan to be made 'sounder'

iii) The degree of consistency with the NPPF

- In preparing his main modifications the Inspector has brought the Plan in line with the NPPF where he considers that this is necessary. The Plan as modified is therefore fully consistent with the NPPF.

- 8.2** The site is allocated within the UDP as a 'Protected Area of Search' (PAS). Other policies which are relevant are as follows:

SG2: To maintain and enhance the character of Leeds

SP3: New development will be concentrated largely within or adjoining main urban areas and settlements on sites well served by public transport

SA1: Secure the highest possible quality of environment.

GP5 all relevant planning considerations

GP7 planning obligations

GP11 sustainability

GP12 sustainability

H4: Residential development.

H11-H13: Affordable Housing.

N2: Greenspace

N4: Greenspace

N12: Relates to urban design and layout.

N13: New buildings should be of a high quality design and have regard to the character and appearance of their surroundings.

N19: New buildings within or adjacent to Conservation areas should preserve or enhance character or appearance

N23: Relates to incidental open space around new developments.

N24: Seeks the provision of landscape schemes where proposed development abuts the Green Belt or other open land.

N25: Seeks to ensure boundary treatment around sites is designed in a positive manner.

N26: Relates to landscaping around new development.

N35: Development will not be permitted if it conflicts with the interests of protecting the best and most versatile agricultural land.

N37A: Development within the countryside should have regard to the existing landscape character.

N38B: Relates to requirements for Flood Risk Assessments.

N39A: Relates to sustainable drainage systems.

N50: Seeks to protect, amongst other assets, Leeds Nature Areas.

N51: New development should wherever possible enhance existing wildlife habitats.

T2: Development should be served by adequate access and public transport / accessibility

T2B: Significant travel demand applications must be accompanied by Transport assessment

T2C: Requires major schemes to be accompanied by a Travel Plan.

T2D: Relates to developer contributions towards public transport accessibility.

T5: Relates to pedestrian and cycle provision.

T24: Parking guidelines.

BD2: The design of new buildings should enhance views, vistas and skylines.

BD5: The design of new buildings should give regard to both their own amenity and that of their surroundings.

LD1: Relates to detailed guidance on landscape schemes.

#### **Policy N34 – PROTECTED AREA OF SEARCH :**

The Unitary Development Plan (UDP) was originally adopted in 2001 and its Review was adopted in 2006. The original UDP allocated sites for housing and designated land as PAS. The UDP Review added a phasing to the housing sites which was needed to make the plan compliant with the national planning policy of the time, Planning Policy Guidance 3. The UDP Review did not revise Policy N34 apart from deleting 6 of the 40 sites and updating the supporting text. The deleted sites became the East Leeds Extension housing allocation.

Policy N34 and supporting paragraphs is set out below:

#### **Protected Areas of Search for Long Term Development**

The Regional Spatial Strategy does not envisage any change to the general extent of Green Belt for the foreseeable future and stresses that any proposals to replace existing boundaries should be related to a longer term time-scale than other aspects of the Development Plan. The boundaries of the Green Belt around Leeds were defined with the adoption of the UDP in 2001, and have not been changed in the UDP Review.

To ensure the necessary long-term endurance of the Green Belt, definition of its boundaries was accompanied by designation of Protected Areas of Search to provide land for longer-term development needs. Given the emphasis in the UDP on providing for new development within urban areas it is not currently envisaged that

there will be a need to use any such safeguarded land during the Review period. However, it is retained both to maintain the permanence of Green Belt boundaries and to provide some flexibility for the City's long-term development. The suitability of the protected sites for development will be comprehensively reviewed as part of the preparation of the Local Development Framework, and in the light of the next Regional Spatial Strategy. Meanwhile, it is intended that no development should be permitted on this land that would prejudice the possibility of longer-term development, and any proposals for such development will be treated as departures from the Plan.

N34: WITHIN THOSE AREAS SHOWN ON THE PROPOSALS MAP UNDER THIS POLICY, DEVELOPMENT WILL BE RESTRICTED TO THAT WHICH IS NECESSARY FOR THE OPERATION OF EXISTING USES TOGETHER WITH SUCH TEMPORARY USES AS WOULD NOT PREJUDICE THE POSSIBILITY OF LONG TERM DEVELOPMENT

**8.3** In the Natural Resources and Waste Development Plan Document (2013) developments should consider the location of redundant mine shafts and the extract of coal prior to construction.

**8.4** Relevant Supplementary Planning Guidance includes:

Supplementary Planning Document: Street Design Guide.

Supplementary Planning Document: Public Transport Improvements and Developer Contributions.

Supplementary Planning Document: Travel Plans.

Supplementary Planning Document: Designing for Community Safety: A Residential Guide.

Supplementary Planning Guidance: Neighbourhoods for Living.

Supplementary Planning Guidance: Affordable Housing (Target of 15% affordable housing requirement).

Supplementary Planning Document: Sustainable Design and Construction "Building for Tomorrow, Today."

Supplementary Planning Guidance 4: Greenspace Relating to New Housing Development.

Supplementary Planning Guidance 11: Section 106 Contributions for School Provision.

Supplementary Planning Guidance 25: Greening the Built Edge.

### **Interim PAS Policy**

**8.5** A report on Housing Delivery was presented to Executive Board on the 13th March 2013. The report outlines an interim policy which will bolster and diversify the supply of housing land pending the adoption of Leeds Site Allocations Development Plan Document which will identify a comprehensive range of new housing sites and establish the green belt boundary. The Interim Policy is as follows:-

*In advance of the Site Allocations DPD, development for housing on Protected Area of Search (PAS) land will only be supported if the following criteria are met:-*

*(i) Locations must be well related to the Main Urban Area or Major Settlements in the Settlement Hierarchy as defined in the Core Strategy Publication Draft;*

*(ii) Sites must not exceed 10ha in size ("sites" in this context meaning the areas of land identified in the Unitary Development Plan ) and there should be no sub-division of larger sites to bring them below the 10ha threshold; and*

*(iii) The land is not needed , or potentially needed for alternative uses*

*In cases that meet criteria (i) and (iii) above, development for housing on further PAS land may be supported if:*

*(iv) It is an area where housing land development opportunity is Demonstrably lacking; and*

*(v) The development proposed includes or facilitates significant planning benefits such as but not limited to:*

*a) A clear and binding linkage to the redevelopment of a significant brownfield site in a regeneration area;*

*b) Proposals to address a significant infrastructure deficit in the locality of the site.*

*In all cases development proposals should satisfactorily address all other planning policies, including those in the Core Strategy.*

**8.6** Leeds City Council Executive Board resolved (Paragraph 201 of the Minutes 13th March 2013 ) that the policy criteria for the potential release of PAS sites ,as detailed within paragraph 3.3 of the submitted report be approved subject to the inclusion of criteria which

(i) Reduces from 5 years to 2 years the period by which any permission granted to develop PAS sites remains valid: and

(ii) Enables the Council to refuse permission to develop PAS sites for any other material planning reasons.

**8.7** It has been confirmed following a High Court challenge from Miller Homes that the Council's interim PAS policy is legal. However, the case is due to be heard in the Court of Appeal in March 2015.

**8.8** The policy has been used to support the release of land at four sites at Fleet Lane, Oulton, Royds Lane, Rothwell, Owlers Farm, Morley and Calverley Lane, Farsley. The policy has also been used to resist permission for PAS sites at Kirkless Knoll and Boston Spa which were subject of a public inquiry late last year and early this year respectively with the Kirklees Knowl inquiry due to re-open in the Autumn. The decision on Boston Spa is expected in late October with the Kirklees Knowl decision not due until the end of the year. PAS sites at Bradford Road, East Ardsley and West of Scholes have also been recently refused.

**8.9** The Council's interim PAS policy does not supersede the Development Plan but is a relevant material consideration. The starting point remains the Development Plan and in particular policy N34.

### **Local Development Framework**

**8.10** The Council submitted its Core Strategy to the Secretary of State in April 2013 and an examination in public was held in October 13 and May 2014. The Council has

consulted on a further set of Main Modifications to the Core Strategy. Following consultation and no arising outstanding matters, it is anticipated that the Core Strategy will be adopted in autumn 2014 following receipt of the Inspectors final report. The Core Strategy is considered by the Council to be sound and in line with the policies of the NPPF and the Planning and Compulsory Purchase Act 2004 as amended by the Localism Act 2011. The Core Strategy Inspector has proposed two sets of Main Modifications, which he considers are necessary to make the Plan sound, including in line with the NPPF. The Council is currently progressing a Site Allocations Plan. Following extensive consultation, including 8 weeks of formal public consultation from 3/6/13 to 29/7/13 the Council is currently preparing material for Publication of a draft plan

- 8.11** The supporting text to Policy N34 of the Unitary Development Plan expects the suitability of the protected sites for development to be comprehensively reviewed through the Local Development Framework (para 5.4.9). The Site Allocations Plan is the means by which the Council will review and propose for allocation sites which are consistent with the wider spatial approach of the Core Strategy and are supported by a comparative sustainability appraisal. It will also phase their release with a focus on: sites in regeneration areas, with best public transport accessibility, the best accessibility to local services and with least negative impact on green infrastructure. This application is contrary to this approach. The Site Allocations Plan process will determine the suitability of this site for housing development. This approach is in line with para 85 of the NPPF which states that “Planning permission for the permanent development of safeguarded land should only be granted following a Local Plan review which proposes the development.” It is also in line with the NPPF core planning principle 1, which states that planning should “be genuinely plan-led, empowering local people to shape their surroundings, with succinct local and neighbourhood plans setting out a positive vision for the future of the area.”
- 8.12** The NPPF states in paragraph 47 that local authorities should boost significantly the supply of housing. It sets out mechanisms for achieving this, including:
- use an evidence base to ensure that the Local Plan meets the full objectively assessed needs for market and affordable housing;
  - identify and update annually a supply of specific deliverable sites sufficient to provide for five years’ worth of supply;
  - identify a supply of specific deliverable sites or broad locations for growth for years 6 to 10 and years 11 to 15,
- 8.13** The Core Strategy housing requirement has been devised on the basis of meeting its full objectively assessed housing needs. These are set out in the Strategic Housing Market Assessment (SHMA), which is an independent and up to date evidence base, as required by paragraph 159 of the NPPF and reflects the latest household and population projections as well as levels of future and unmet need for affordable housing.
- 8.14** **Relevant policies within the Core Strategy include:**  
 Spatial policy 1 – Location of development  
 Spatial policy 6 – Housing requirement and allocation of housing land  
 Spatial policy 7 – Distribution of housing land and allocations  
 Spatial policy 10 – Green Belt  
 Policy H1 – Managed release of sites  
 Policy H3 – Density of residential development  
 Policy H4 – Housing mix  
 Policy H5 – Affordable housing

Policy H8 – Housing for Independent Living  
 Policy P7 – The creation of new centres  
 Policy P9 - Community facilities and other services  
 Policy P10 – Design  
 Policy P11 – Conservation  
 Policy P12 – Landscape  
 Policy T1 – Transport Management  
 Policy T2 – Accessibility requirements and new development  
 Policy G4 – New Greenspace provision  
 Policy EN2 – Sustainable design and construction  
 Policy ID2 – Planning obligations and developer contributions

The Examination into the Draft Core Strategy has now taken place and the Inspectors report is expected imminently. Of particular relevance is the issue of affordable housing. This was examined in May 14 and the Council is seeking to include the levels of affordable housing within the Core Strategy as required by the Inspector. The 35% outer north level is proposed to extend to Scholes and Barwick and this is a change from the current level of 15%.

### **Five Year Supply**

- 8.15** The NPPF provides that Local Planning Authorities should identify and update annually a supply of specific deliverable sites to provide five years' worth of housing supply against their housing requirements with an additional buffer of 5% to ensure choice and competition in the market for land. Deliverable sites should be available now, be in a suitable location and be achievable with a realistic prospect that housing will be delivered on the site within 5 years. Sites with planning permission should be considered deliverable until permission expires subject to confidence that it will be delivered. Housing applications should be considered in the context of the presumption in favour of sustainable development, articulated in the NPPF.
- 8.16** In the past, the Council has been unable to identify a 5 year supply of housing land when assessed against post-2008 top down targets in the Yorkshire and Humber Plan (RSS to 2026) which stepped up requirements significantly at a time of severe recession. During this time (2009-2012) the Council lost ten appeals on Greenfield allocated housing sites largely because of an inability to provide a sufficient 5 year supply and demonstrate a sufficiently broad portfolio of land. This was against the context of emerging new national planning policy which required a significant boosting of housing supply.
- 8.17** Nationally the 5 year supply remains a key element of housing appeals and where authorities are unable to demonstrate a 5 year supply of deliverable sites, policies in the NPPF are considered to be key material considerations and the weight to be given to Council's development plan, policies should be substantially reduced.
- 8.18** The context has now changed. The RSS was revoked on 22nd February 2013 and when assessed against the Council's Unitary Development Plan (2006) there has been no under delivery of housing up to 2012. Furthermore for the majority of the RSS period the Council met or exceeded its target until the onset of the recession. The Council has submitted its Core Strategy to the Secretary of State with a base date of 2012 and a housing requirement that is in line with the NPPF and meets the full needs for objectively assessed housing up to 2028.
- 8.19** In terms of identifying a five year supply of deliverable land the Council identified that as of 1st April 2014 to 31st March 2019 there is a current supply of land equivalent to 5.8 years' worth of housing requirements.

- 8.20** The current five year housing requirement is 24,151 homes between 2014 and 2019, which amounts to 21,875 (basic requirement) plus 1,094 (5% buffer) and 1,182 (under delivery).
- 8.21** In total the Council has land sufficient to deliver 28,131 within the next five years. The five year supply (as at April 2014) is made up of the following types of supply:
- allocated sites
  - sites with planning permission
  - SHLAA sites without planning permission
  - an estimate of anticipated windfall sites – including sites below the SHLAA threshold, long term empty homes being brought back into use, prior approvals of office to housing and unidentified sites anticipated to come through future SHLAAs
  - an element of Protected Area of Search sites which satisfy the interim PAS policy
- 8.22** The current 5 year supply contains approximately 24% Greenfield and 76% previously developed land. This is based on the sites that have been considered through the SHLAA process and accords with the Core Strategy approach to previously developed land as set out in Policy H1. This also fits with the Core Planning principles of the NPPF and the Secretary of State's recent speech to the Royal Town Planning Convention (11 July 2013) where he states that not only should green belts be protected but that "we are also sending out a clear signal of our determination to harness the developed land we've got. To make sure we are using every square inch of underused brownfield land, every vacant home and every disused building, every stalled site."
- 8.23** In addition to the land supply position, the Site Allocations Document is in the process of identifying specific deliverable sites for years 6 to 10 of the Core Strategy plan period and specific sites for years 11 to 15.

### **National Guidance - National Planning Policy Framework**

- 8.24** The National Planning Policy Framework (NPPF) came into force on 27th March 2012. The introduction of the NPPF has not changed the legal requirement that applications for planning permission must be determined in accordance with the development plan unless material considerations indicate otherwise.
- 8.25** Paragraph 47 of the NPPF requires that local planning authorities should identify a supply of specific, deliverable sites sufficient to provide five years' worth of housing against their housing requirements with an additional buffer of 5%. Where there has been a record of persistent under delivery of housing the buffer should be increased to 20%.
- 8.26** Paragraph 49 requires that housing applications be considered in the context of the presumption in favour of sustainable development. Whether the development is sustainable needs to be considered against the core principles of the NPPF. Relevant policies for the supply of housing should not be considered up to date if the local planning authority cannot demonstrate a five year supply of deliverable housing sites.

- 8.27** Paragraph 85 sets out those local authorities defining green belt boundaries should:
- ensure consistency with the Local Plan strategy for meeting identified requirements for sustainable development;
  - not include land which it is unnecessary to keep permanently open;
  - where necessary, identify in their plans areas of ‘safeguarded land’ between the urban area and the Green Belt, in order to meet longer-term development needs stretching well beyond the plan period;
  - make clear that the safeguarded land is not allocated for development at the present time. Planning permission for the permanent development of safeguarded land should only be granted following a Local Plan review which proposes the development;
  - satisfy themselves that Green Belt boundaries will not need to be altered at the end of the development plan period; and
  - define boundaries clearly, using physical features that are readily recognisable and likely to be permanent.

### **Neighbourhood Plan**

- 8.28** Barwick-in-Elmet and Scholes Parish has been designated a neighbourhood area and the Parish Council are currently preparing a neighbourhood plan.

## **9.0 MAIN ISSUES**

- Compliance with the Development Plan**
- Development in advance of Site Allocations Plan.**
- Five Year Supply**
- Sustainability criteria**
- Highway considerations.**
- Layout/design/landscaping.**
- Other issues**
- Section 106 issues**

## **10.0 APPRAISAL**

Section 38(6) of the Planning and Compulsory Purchase Act 2004 requires that proposals be determined in accordance with the Development Plan unless material considerations indicate otherwise. Other material considerations include the National Planning Policy Framework, the emerging Core Strategy, the requirement for a five year supply of housing and matters relating to sustainability, highways, layout/design/landscaping, residential amenity, flood risk and Section 106 matters.

### **Compliance with the Development Plan**

- 10.1** The application site is designated as a “Protected Area of Search “(PAS) in the adopted UDP. Such sites are designated under Policy N34 which specifies that PAS sites are to be retained for possible long term development and any intermediate development should be resisted that would prejudice the potential for long development in the longer term should the need arise. The supporting text to Policy N34 states that, “The suitability of the protected sites for development will be comprehensively reviewed as part of the preparation of the Local Development

Framework...” By not waiting for the comprehensive review, a decision to approve this application now would be a departure from the Development Plan. The proposal to develop the East of Scholes application site would be premature in advance of the conclusions of the comprehensive assessment of all PAS sites and alternative land supply opportunities that is being undertaken now through the Site Allocations Plan. Policy N34 and its supporting text should be given considerable weight because it is part of the statutory development plan for Leeds and is consistent with bullet 4 of paragraph 85 of the NPPF which expects local authorities to make clear that “...planning permission for the permanent development of safeguarded land should only be granted following a Local Plan review...”

- 10.2** As set out above, the Council has put in place an Interim Policy pending the further progress of the Site Allocations Plan the application site needs to be assessed against the interim policy to see if it meets the criteria for possible early release.

### **Development Timing in advance of the Site Allocations Plan**

- 10.3** The criteria of the interim policy are intended to ensure that PAS sites are considered against the spatial development strategy of the Core Strategy. Within that context some sites have been released by virtue of their scale and relationship to the settlement hierarchy in advance of the Site Allocations Plan, to help bolster the delivery of housing in Leeds by diversifying the land supply. PAS sites in excess of 10ha, those with alternative potential uses or those not adjacent to the main urban area or major settlements have been considered more likely to give rise to harm to the spatial development strategy and raise more sustainability issues. These sites will only be identified as housing sites through the Site Allocations Plan, where a full and comparative sustainability appraisal can be undertaken, which includes exploring cumulative and synergistic effects and the implications of the release of sites on infrastructure provision. This process will also consider whether PAS sites are needed in the context of specific housing requirements for individual housing market areas. This leaves the smaller PAS sites that comply with the interim policy criteria as capable of being released for development in advance of the Sites DPD process. The Interim Policy is a relevant material planning consideration that should be afforded weight in the determination of this application. The performance of the East of Scholes site against the interim policy criteria is considered below to see if the proposal meets the criteria to be released early.
- 10.4** Under Criterion (i) , the site is an extension to Scholes, a ‘Smaller Settlement’ in the settlement hierarchy as defined in the Core Strategy Publication Draft, and therefore fails the first policy test. Under criterion (ii) sites must not exceed 10ha in size and there should be no sub division of larger sites to bring them below the 10ha threshold. The application site is well above this threshold. Under criterion (iii) of the Interim Policy Land consideration is to be given to whether the land is needed, or potentially needed, for alternative uses. Childrens Services have considered there is demand to expand school provision in Scholes and the indicative proposals include a primary school so there is no conflict with criterion (iii). It is through the Site Allocations process that the amount and location of new development in Scholes will be decided and in that context where the best site for expanding school provision should be made in the village. As the site fails criteria i and ii criteria iv and v do not need to be considered. It is worth noting however that development at Grimes Dyke is now under way within reasonable distance of Scholes in the Main Urban Area.

- 10.5** To summarise, the application does not meet the interim policy criteria to be released early. This is a substantial PAS site in the smaller settlement of Scholes - work is ongoing looking at sites through the Site Allocations Plan so to take a decision now on this site would not be to take a plan-led approach looking at what sites should come forward, what infrastructure is needed to support them and where that would best be located. In addition work is progressing on a neighbourhood plan and it is considered that the release of this site early would also not sit well with that process which is being co-ordinated with the Site Allocations Plan. In addition the development represents a substantial enlargement which threatens to substantially change the character and identity of the village – the amount which Scholes should grow needs to be considered as a whole against other sites and taking into account character / identity and sustainability issues and all points to a plan-led and considered approach.

### **Five Year Supply**

- 10.6** The Council has a supply of 28,131 net homes between 1st April 2014 and 31st March 2019, which when assessed against the requirement for 24,151 homes provides a 5.8 year housing land supply. This supply has been sourced from the Strategic Housing Land Availability Assessment Update 2014 and includes over 21,000 units, including sites for students and older persons housing. In addition identified supply consists of some safeguarded sites adjacent to the main urban area which meet the Council's interim policy on Protected Areas of Search (approved by Executive Board in March 2013). The supply also includes evidenced estimates of supply, based on past performance, from the following categories: windfall, long term empty homes returning into use and the conversion of offices to dwellings via prior approvals. The supply figure is net of demolitions.
- 10.7** The Core Strategy Inspector's latest set of Main Modifications (16th June 2014) which he considered were necessary to make the Core Strategy sound confirm that the Council should supply land at a rate of 4,375 homes per annum throughout the life of the plan. However given market conditions moving out of recession, the need to plan for infrastructure and demographic evidence his latest modifications have also included a lower target of at least 3,660 homes per annum between 2012 and 2016/17 against which delivery should be measured for performance purposes. This basic requirement is supplemented by a buffer of 5% in line with the NPPF. The requirement also seeks to make up for under-delivery against 3,660 homes per annum since 2012. It does this by spreading under-delivery, since the base date of the plan, over a period of 10 years to take account of the circumstances under which the under-delivery occurred i.e. the market signals and the need to provide infrastructure to support housing growth.

### **Sustainability criteria**

- 10.8** Whilst there are some local facilities within the village ( doctors surgery, pub, shop) and a local bus service it is infrequent at only 1 an hour giving poor accessibility to employment, town and city centres and secondary education. Whilst there have been discussions in relation to the East of Scholes development about possible improvements to bus services there is no proposal on the table yet about how that can be achieved and without significant improvement of bus services it is not considered that substantial further development in Scholes can be supported. Sustainability issues will be clearly examined as part of the Site Allocations process

in designating sites together with what infrastructure improvements are required to make them acceptable. The additional health, retail and educational facilities proposed as part of this scheme are benefits but this does not detract from the fact that the site scores poorly in relation to access to public transport which is contrary to the strategic approach of the UDP and Core Strategy and guidance in the NPPF in terms of the core planning principles which underpin the planning system.

### **Highway considerations**

- 10.9** There remain significant concerns about the methodology used in the TA and the impact of the scheme on both the wider network and also the local road network. Highways colleagues recommend refusal at this stage because an acceptable means of access in terms of both safety and capacity has not been demonstrated and significant issues remain outstanding which must be addressed before any development can proceed. The scheme is significant in scale and there will be substantial impacts within Scholes and on the wider network where there are already significant schemes being brought forward in East Leeds including ELOR, and the Manston Lane Link Road (MLLR). These issues do not just relate to vehicular traffic but also all other modes of transport including walking , cycling and public transport.

### **Layout/design/landscaping**

- 10.10** The masterplan submitted is indicative at this stage but indicates a well designed connected layout with structure. It offers a good basis on which to progress detailed discussions if the principle is agreed. We are not yet at that stage. Where additional facilities for the village should be located including shops, education and health uses should be debated through the Site Allocations and Neighbourhood Planning process involving local people. It will be important in any growth of the village to ensure it's identity and character is maintained and that the addition of a significant suburban extension with facilities is not just bolted on to the existing village infrastructure but is integrated.
- 10.11** There are two matters of detailed concern which need to be flagged up and which should be addressed if this proposal is progressed. One relates to the need for a landscape buffer to the north of the Conservation Area which if not provided will adversely impact on the setting of the Conservation Area. The other is to do with the impact on the Public Rights of Way through the site which will change significantly from having open countryside views to being urban in nature. This could be overcome by the provision of new footpaths / bridleway on the landscaped edge of the development so that open countryside views are retained and their amenity value is preserved.

### **Other issues**

- 10.12** Flood Risk Management colleagues and Yorkshire Water / Environment Agency raise no objection subject to conditions and appropriate detail with some off site mitigation. There are no other technical grounds at this stage to resist the development subject to the imposition of relevant conditions.

## **Section 106 Package**

**10.13** The Community Infrastructure Levy Regulations 2010 set out legal tests for the imposition of planning obligations. These provide that a planning obligation may only constitute a reason for granting planning permission for the development if the obligation is -

- (a) necessary to make the development acceptable in planning terms;
- (b) directly related to the development; and
- (c) fairly and reasonably related in scale and kind to the development. .

**10.14** The proposed obligations in relation to green space, affordable housing, education, public transport and possible off site highway and drainage works have been considered against the legal tests and are considered necessary, directly related to the development and fairly and reasonably related in scale and kind to the development. Accordingly they can be taken into account in any decision to grant planning permission for the proposals. The applicants will be required to submit a signed Section 106 Agreement to address the policy requirements for this application should permission be granted. It is understood that the applicants are not objecting to these requirements in principle but in the absence of any signed agreement the Council should protect its position at present. The position in relation to affordable housing is subject to likely change. At present 15% is required but this could increase substantially in the coming months to 35% dependent on the report of the Core Strategy Inspector expected shortly. Whilst the higher rate cannot be given substantial weight at present if this is supported by the Inspector and then adopted by the Council then the higher rate would need to be given substantial weight at that stage.

## **11.0 CONCLUSION**

**11.1** The release of the East of Scholes PAS site for housing development at this time is premature , being contrary to Policy N34 of the UDP Review (2006) and the NPPF. To grant permission would undermine the plan-making process by predetermining decisions about the scale, location or phasing of new development, supporting infrastructure and sustainability that are central to the emerging Site Allocations DPD and the neighbourhood planning process. The Council considers it has a 5.8 year housing land supply and so there is no need to release additional sites of this scale in advance of the Site Allocations process. The location of the site in a smaller settlement and the size of the site compared to the overall size of the village mean that this is a substantial expansion and it does not meet the criteria in the interim housing delivery policy to justify early release ahead of the comprehensive assessment of safeguarded land being undertaken in the Site Allocations Plan. There are concerns about the access arrangements proposed and the poor sustainability of the site given the infrequency of the local bus service. Refusal is therefore recommended for the reasons set out at the start of this report.

## **12.0 BACKGROUND PAPERS**

**Application file 14/01211/OT / Certificate of Ownership.**

**APPENDIX 1 : EXTRACT FROM MINUTES OF CITY PLANS PANEL  
ON 12<sup>TH</sup> DECEMBER 2013**

**PRESENT:** Councillor N Taggart in the Chair

Councillors P Gruen, R Procter,  
D Blackburn, M Hamilton, T Leadley,  
E Nash, N Walshaw, J Lewis, R Grahame,  
M Harland and J Procter

**119 Preapp/13/01175 - Scholes PAS site - Wood Lane, Scholes and land East of Scholes - Pre-application presentation**

The report of the Chief Planning Officer introduced a pre-application presentation for residential development of up to 745 dwellings, plus new school and commercial uses at Scholes PAS Site, Wood Lane, Scholes and land east of Scholes.

The applicant's representative presented details of the application to the Panel. Issues highlighted included the following:

- Sites such as this needed releasing and developing to meet the housing requirements of Leeds.
- The pre-application consultation had been going for over 2 years and had included discussions with Parish Councils and the City Council.
- West Scholes – proposals for up to 45 homes – this had been reduced from initial proposals following consultation and amendments had been made to proposed access.
- East Scholes – this had also been reduced following consultation and proposals were for up to 700 properties including extra care bungalows and 15% on or off site affordable housing or contribution. There would also be open space, a village hub and a school site.
- Close work had been carried out with Highways and there was confidence that highway mitigation could be achieved.
- Community facilities to include a GP practice and a pharmacy.
- Wider economic benefits – the scheme would provide up to 100 construction jobs and over 100 jobs once the scheme is complete. There would also be skills and training opportunities with an established apprentice programme and graduate induction programme.
- In response to Members questions further discussion was held regarding highways and the the proposed rate of development.

The local MP, a representative of Barwick & Scholes Parish Council and a local resident addressed the Panel with objections to the proposals. These included the following:

- The proposals were premature and there were many issues still to be resolved.
- Sewerage and flooding issues had not been given full consideration – Yorkshire Water had stated there was a need for upgrades to the sewerage system.
- Highways issues – roads into the site were narrow and double parked, work was needed on the East Leeds orbital road, significant increase in traffic.
- It was felt that the proposals would not be sustainable particularly with regard to school provision, GP facilities and highways issues.

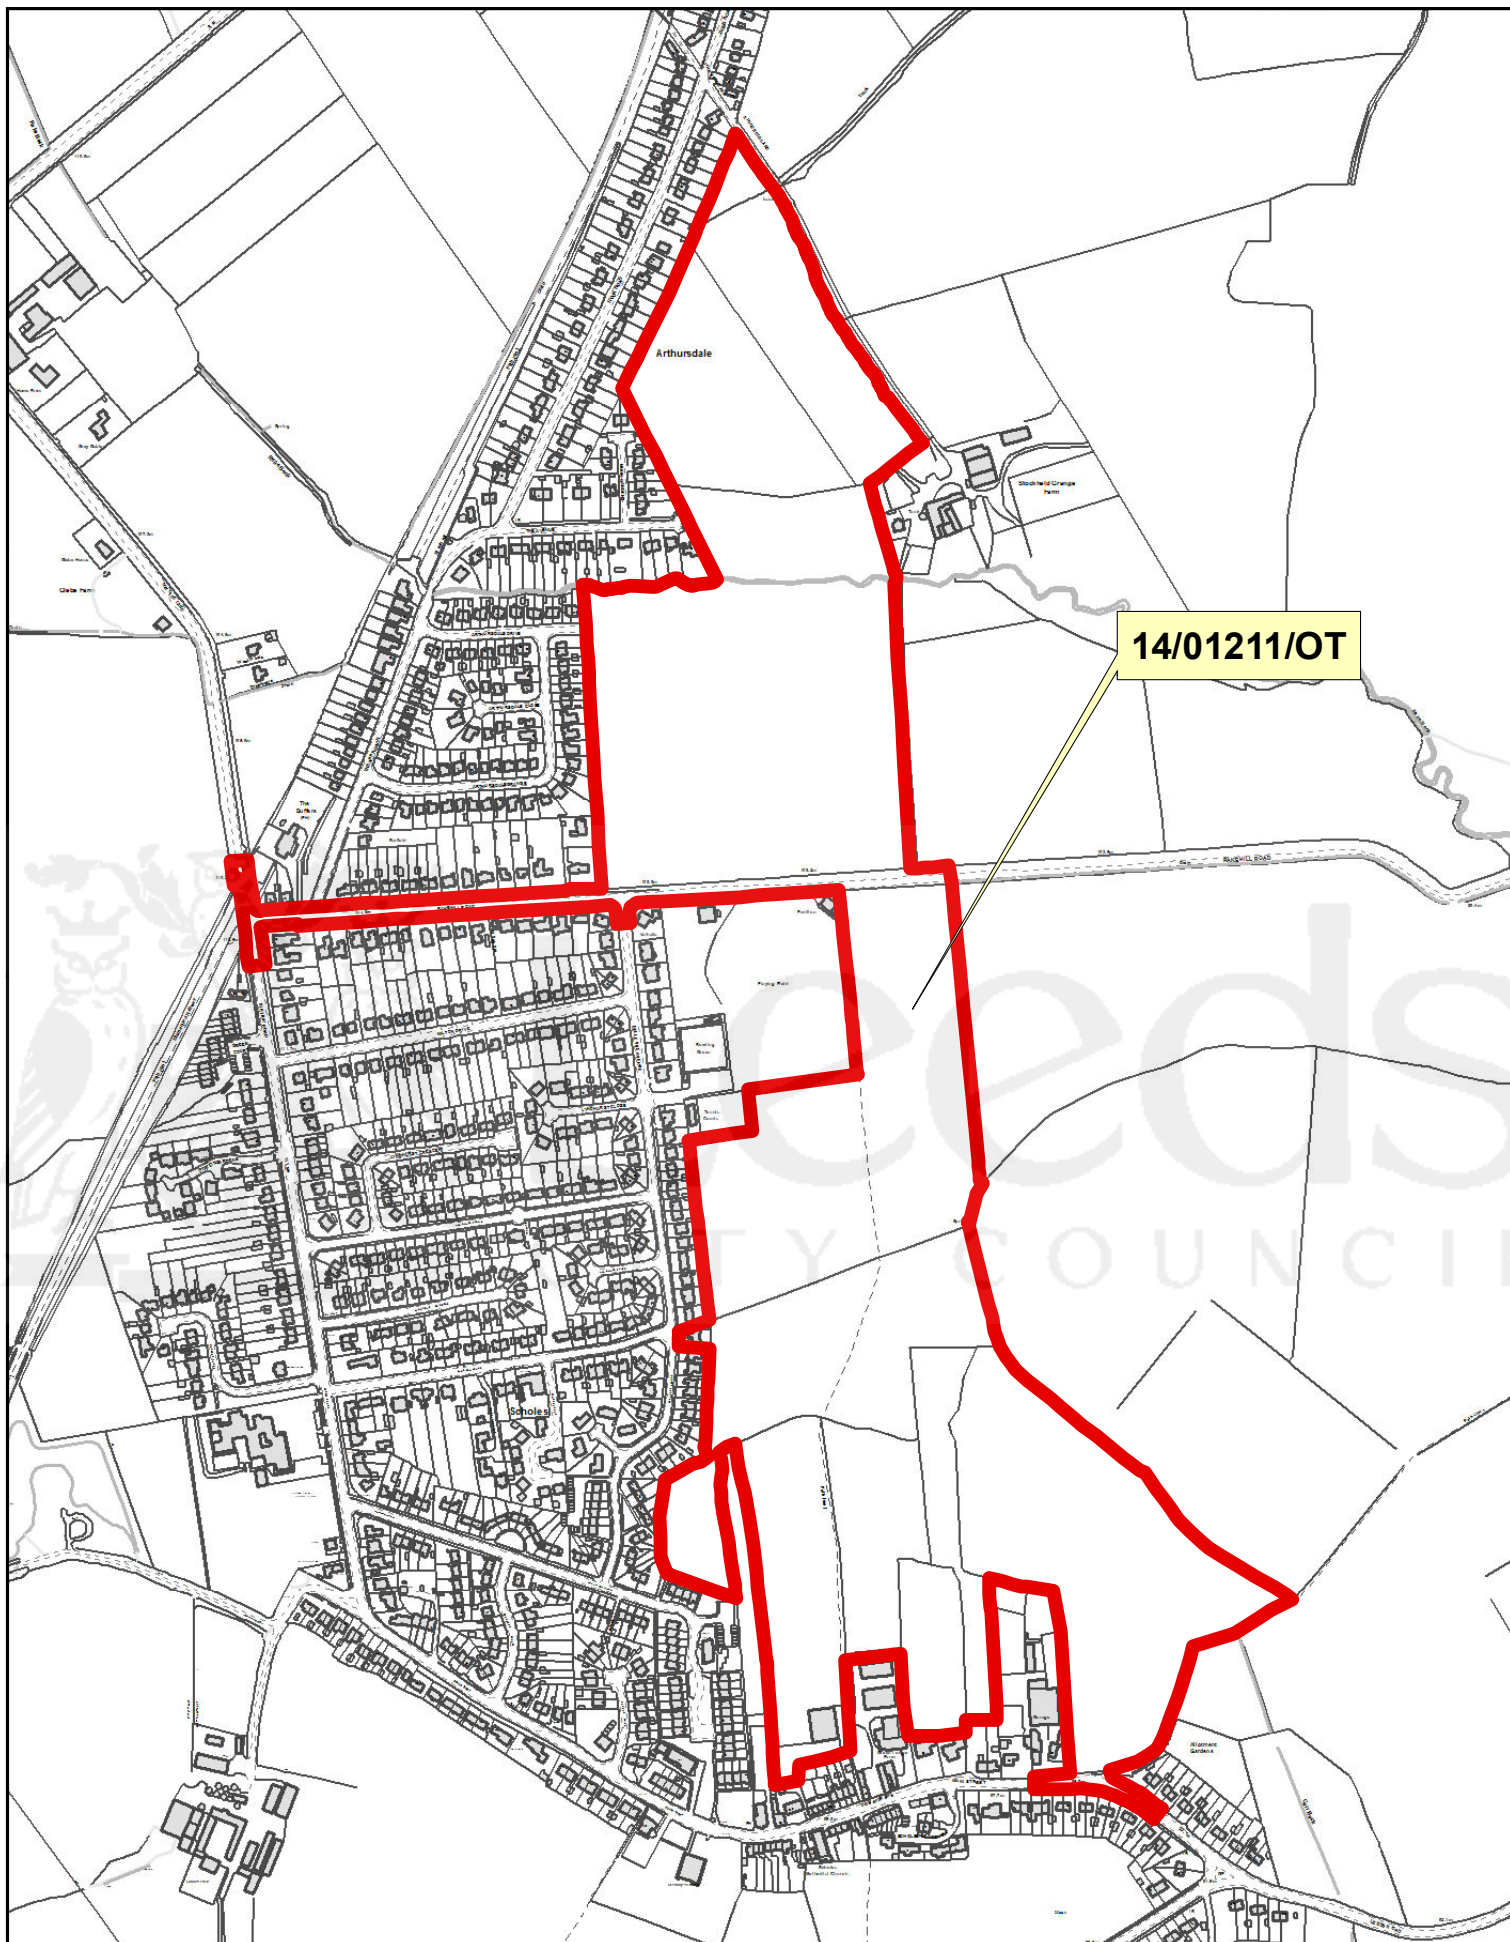

- The proposals would create a village of two separate halves.
- The site was not allocated in the UDP.

In response to Members comments and questions, the following was discussed:

- Poor public transport links – residents of the area were dependant on cars.
- Problems with flooding and sewage following the last development – the drainage system was old, damaged and could not cope with existing waste.
- Highways issues - a transport study had been submitted but not yet assessed. There would be a need to install some kind of junction control to the A64.
- Members agreed that the release of these PAS sites was premature and should be progressed through the Site Allocations DPD.

**RESOLVED** – That the report and pre-application presentation be noted.

## Report of the Chief Planning Officer

### **CITY PLANS PANEL**

**Date:** 28<sup>th</sup> August 2014

**Subject:** Application number 13/05134/OT – Outline application for residential development (up to 380 dwellings) a convenience store and public open space at Breary Lane East, Bramhope.

#### **APPLICANT**

Miller Homes

#### **DATE VALID**

4 November 2013

#### **TARGET DATE**

29<sup>th</sup> August 2014

#### **Electoral Wards Affected:**

Adel and Wharfedale

☐ Yes

Ward Members consulted  
(referred to in report)

#### **Specific Implications For:**

Equality and Diversity ☐

Community Cohesion ☐

Narrowing the Gap ☐

### **RECOMMENDATION: Refusal of Planning permission for the following reasons;**

1. The Local Planning Authority considers that the release of this site for housing development would be premature being contrary to Policy N34 of the adopted Leeds Unitary Development Plan Review (2006) and contrary to Paragraph 85 bullet point 4 of the National Planning Policy Framework. The suitability of the site for housing purposes needs to be comprehensively reviewed as part of the preparation of the ongoing Site Allocations Plan. The location and size of the site means that the proposal does not fulfil the criteria set out in the interim housing delivery policy approved by Leeds City Council's Executive Board on 13<sup>th</sup> March 2013 to justify early release ahead of the comprehensive assessment of safeguarded land being undertaken in the Site Allocations Plan. It is anticipated that the Site Allocations Plan work will identify which sites will be brought forward for development in the life of the Plan together with the infrastructure which will be needed to support sustainable growth, including additional schools provision and where that would best be located. It is considered that releasing this site in advance of that

work would not be justified and would prejudice the comprehensive planning of future growth and infrastructure of Bramhope in a plan-led way.

2. The Local Planning Authority considers that the applicant has so far failed to demonstrate that the proposals can be accommodated safely and satisfactorily on the local highway network. The proposal is therefore considered to be contrary to Policies GP5 and T2 of the adopted UDP Review and Policy T2 of the emerging Core Strategy and the sustainable transport guidance contained in the NPPF which requires development not to create or materially add to problems of safety on the highway network.

3. The local planning authority considers that the proposed development does not provide a suitable means of access into the site and that as such the proposals would be detrimental to the safe and free flow of traffic and pedestrian and cycle user convenience and safety. For these reasons the application does not comply with policies GP5, T2, T2B and T5 of the adopted Leeds Unitary Development Plan (Review ) 2006, policies T2 of the emerging core strategy and guidance contained within the adopted Street Design Guide SPD,

4. The site does not meet the minimum accessibility standards for residential development as set out in the Council's emerging Core Strategy. The applicant has so far failed to offer suitable mitigation and as such it is considered that the proposal is contrary to policy T2 of the emerging Core Strategy and to the sustainable transport guidance contained in the NPPF and the 12 core planning principles which requires that growth be actively managed to make the fullest possible use of public transport, walking and cycling, and to focus significant development in locations which are or can be made sustainable.

5. In the absence of a signed Section 106 agreement the proposed development so far fails to provide necessary contributions for the provision of affordable housing, education, greenspace, public transport, travel planning and off site highway works contrary to the requirements of Policies H11, H12, H13, N2, N4, T2, GP5 and GP7 of the adopted UDP Review (2006) and related Supplementary Planning Documents and contrary to Policies H5, H8, T2, G4 and ID2 of the Draft Leeds Core Strategy and guidance in the NPPF. The Council anticipates that a Section 106 agreement covering these matters could be provided in the event of an appeal but at present reserves the right to contest these matters should the Section 106 agreement not be completed or cover all the requirements satisfactorily.

6. From the information submitted, the Local Planning Authority is not satisfied that the development of the scale indicated can achieve satisfactory standards of design, landscaping and residential amenity and provision of on-site Greenspace, contrary to Policies GP5, N2, N4, and N12 of the adopted UDP Review (2006) and related Supplementary Planning Documents and contrary to Policies P10, P12 and G4 of the Draft Leeds Core Strategy and guidance in the NPPF.

7. It has so far not been demonstrated that part of the site is not required for the provision of a school, contrary to Policy SG3 of the adopted UDP Review (2006) and Policy P9 of the Draft Leeds Core Strategy.

## **1.0 INTRODUCTION**

- 1.1 An outline planning application for residential development was submitted to the council on 4 November 2013. The 13 week expiry date was 25<sup>th</sup> February 2014. The 26 week expiry date was 2<sup>nd</sup> May 2014 when the fee would have to be paid back to the applicant if no extension of time was agreed. The agent has agreed an extension of time so the application now needs to be determined before 29<sup>th</sup> August 2014.
- 1.2 Members are asked to note the content of this report and accept the officer's recommendation of refusal with the proposed reasons for refusal listed above.
- 1.3 The application relates to two parcels of land. The first is designated as a Protected Area of Search in the adopted UDP and forms SHLAA site 1080. Such sites are designated under policy N34 of the adopted UDP and are intended to ensure the long term endurance of the Green Belt and to provide for long term development needs if required. The second is designated as green belt in the adopted UDP and forms SHLAA site 3367a. The application proposes residential development on the PAS (SHLAA 1080) and Greenspace or a new school on the green belt site (SHLAA 3367a). The application adjoins a further SHLAA site (3367b) which is outside of the red-line boundary and is categorised as "red" in the Issues and Options Site Allocations Plan. The application is recommended for refusal and key considerations in reaching this recommendation are matters of housing land supply, sustainability and prematurity vis-à-vis preparation of the Site Allocations Plan.
- 1.4 Section 38(6) of the Planning and Compulsory Purchase Act 2004 sets out the need to determine applications in accordance with the development plan unless material considerations indicate otherwise.
- 1.5 The proposal does not accord with the current development plan which comprises the UDP Review (2006) in that the proposal is designated as a Protected Area of Search. The development is also considered unacceptable in terms of the impact on the existing highway network, the proposed access is also unacceptable in terms of its design and impact on the safe and free flow of traffic and the site does not presently meet the Council's sustainability criteria. In addition, the scheme as shown fails to provide adequate on site Greenspace and from the information provided it has not been demonstrated that a satisfactory design and layout can be achieved for the scale of development proposed. If a school is required on this site it would need to be on the PAS site and not on land in the Green Belt where it would be inappropriate development requiring very special circumstances to be justified.
- 1.6 The National Planning Policy Framework is a material consideration and Annex 1 sets out that whilst relevant policies adopted since 2004 may be given full weight depending on their degree of consistency with the NPPF, decision takers may also give weight to relevant policies in emerging plans according to the stage of preparation, the extent to which there are unresolved objections and the degree of consistency with the NPPF.

## **2.0 PROPOSAL:**

- 2.1 The application is made in outline to consider the principle of the development. All matters are reserved except for access to the site. An indicative masterplan showing details of the layout, scale, appearance and landscaping have been provided and refer to a development of up to 380 dwellings (ranging from 2 bedroom houses through to 5 bedroom detached houses) with associated road infrastructure, parking provision, amenity space and landscaping. These details would be considered under future applications for approval of Reserved Matters were permission to be granted.
- 2.2 The submitted plans indicate that the main access will be off the main A660 taking the form of a roundabout. The initial 130 metres of the access road would be designed to accommodate a bus service and then there would be a second roundabout. There will then be a loop through the site with residential streets off this loop. There will be a pedestrian/cycle access onto Breary Lane East and pedestrian/cycle/emergency vehicle access off High Ridge Way. To the north of the site onto Breary Lane East will be a community orchard, village green and community park. To the south of the site (SHLAA site 3367a) there will be a new park, play area and woodland with paths allowing access into this area and this is referred to on the plan as 'Bramhope Park'. To the east of the site is 'Spring Wood' (SHLAA site 3367b) which is ancient woodland with very little public access at the moment. There will be an access path from 'Bramhope Park' through Spring Wood to the proposed allotments to the north of the site. A small retail unit will be located to the south of the access road with its own car park. The floor space for this retail unit has been reduced to 372 square metres.
- 2.3 Children's Services have indicated that because of the size of the site in relation to the settlement there would be an expectation that on-site school provision would be assessed. There is generally no capacity in local schools and a lack of land available around existing schools for extensions. In seeking to address this issue the applicant has offered a piece of land adjacent to the PAS site, but within the red line boundary of the application, to be made available for a school. This land was originally proposed by the applicants as potential Greenspace over and above the Greenspace standards of the Core Strategy and in addition to the Greenspace provided within the PAS site. The applicants have stated that this land could instead be used for a school and have offered it for 5 years and if not taken up for a school to revert back to a proposed park / Greenspace as detailed in relation to this application. This land is currently designated as greenbelt.
- 2.4 Within a wider local context infrastructure needs and future provision, such as schools and Greenspace, are being considered as part of the preparation of the Site Allocations Plan. This work is ongoing and at this stage no conclusions have yet been reached on the level of need for schools in the area and the potential for new schools to be delivered at the right time and on the most appropriate and sustainable sites in relation to local needs and future pupil places. To that end, the offer of part of the site for a new school is premature to the plan-making considerations of the Site Allocations process. Moreover, should the Site Allocations process conclude that a school is needed and that the application site is a suitable location, decisions on releasing land from the green belt for the purposes of a new school would need to be taken through the plan-making process of the Site Allocations Plan. This is in line with the NPPF. For both these reasons the proposal is premature in advance of the Site Allocations Plan and by seeking to limit the offer of land for a school for 5 years, affects and constrains the school place and investment planning of the Council.

- 2.5 In addition, the Site Allocations Plan process assesses the surpluses and deficiencies of Greenspace against Core Strategy standards. Adel and Wharfedale ward is surplus in most Greenspace and only deficient in amenity space and allotments. Decisions around new areas of Greenspace, and the future use of the adjacent site, are best considered through the Site Allocations plan-making process.
- 2.6 The application is accompanied by a draft S106 agreement (Heads of terms) which will make provision for Greenspace on site and a contribution towards off site Greenspace, 15% affordable housing, contribution to education provision, land available for a new school, highway works detailed above (and any additional works required yet to be agreed) and a contribution towards the Public Transport Infrastructure SPD, landscaping maintenance, metrocards, funding to bus stops in the area, Travel Plan measures and contributions and any other matters that arise through the course of the application.

### **3.0 SITE AND SURROUNDINGS:**

- 3.1 The site is an area of open fields located to the south of Breary Lane East and east of the A660. The site is used for agriculture at the current time. The land slopes upwards from the southern part of the site (A660) to the north of the site (Breary Lane East). To the east of the site is existing ancient woodland and beyond this open countryside. There is a line of residential properties which front part of the northern boundary and the western boundary. Beyond these rows of houses are the main areas of housing in Bramhope.
- 3.2 Part of the site is allocated as PAS land within the Unitary Development Plan. It is categorised as “amber” within the Issues and Options Site Allocations Plan. The area of land adjacent to the site proposed by the applicant for a ‘Bramhope Park’ or potential new school is within the green belt. This piece of land has been submitted through the Council’s Strategic Housing Land Availability Assessment process as having potential for further residential development in the site allocations plan. This parcel of land is also categorised as “amber” in the Site Allocations Plan.
- 3.3 In relation to the PAS site the site allocation document states that the site is a  
  
‘Protected area of search (PAS) site in the UDP. Potential for development on part of the site for 200 dwellings with single access from A660 or all site (434 dwellings) if combined with adjacent site 3367A due to access issues’.
- 3.4 The site for the park or proposed school (4.17HA) is within green belt and has been put forward as a potential housing site through the Site Allocations process. Development of this site could provide an extension to the adjoining PAS site and assist access into that site.
- 3.5 The Site Allocations Plan document states:  
  
‘By itself, the site is an isolated site, but with the adjacent PAS site it could effectively ‘round off’ the settlement. If furthered the site should be viewed as a single allocation with 1080 for the purposes of access requirements – one access to the A660, shared with site 1080, would restrict the combined capacity of the sites to 200 units. Two access points would allow a total capacity of 434. ‘

#### **4.0 RELEVANT PLANNING HISTORY:**

- 4.1 There are no previous planning applications of relevance
- 4.2 The site was originally designated as Green Belt in the Bramhope Local Plan. Then in the 2001 adopted UDP the originally UDP Inspector removed the site from the Green Belt after he concluded that the land was needed to help long term planning for growth and development and he considered that the site did not fulfill the function of Green Belt. In 2006 the site was reviewed again by the Planning Inspector who retained the PAS land designation but differed in his view from the 2001 Inspector in that he felt the site did have the potential to fulfill some of the Green Belt objectives.

#### **5.0 HISTORY OF NEGOTIATIONS**

- 5.1 Council Officers have met with the applicant a number of times to discuss the application both at pre application stage and during the processing of this planning application. The discussions revolved around the principle of development, highways, education, ecology and design.
- 5.2 The developer arranged a public consultation event and wrote to local residents to advise of the intention to submit an application for the proposed development. Letters were sent to local residents at the adjoining properties and the surrounding area.
- 5.3 The letters invited local residents to attend a public consultation event. The event took place on Tuesday 1st October from 4pm until 7pm and was held at the West Park Leeds RUFC. The event gave local residents an opportunity to look at the proposals for the site and discuss them with the development team. A comments sheet was provided for residents to formally provide feedback. In total there were over 80 attendees at the exhibition with 29 responses either received at the exhibition or sent following the event. The developer has summarised the responses received as:
- The impact on Bramhope due to the increase in the number of houses;
  - The impact on wildlife and the loss of greenspace;
  - The impact on the local highway network;
  - The lack of community facilities for local residents;
  - The application was premature in terms of the plan making process; and
  - The impact on existing shops in Bramhope.

#### **6.0 PUBLIC/LOCAL RESPONSE:**

- 6.1 The application was advertised by site notice posted on site on the 22 November 2013 and an advert was placed in the Wharfe Valley Times on the 14 November 2013.
- 6.2 Publicity expiry date was the 16 December 2013.

Councillor, Anderson and the late Councillor Fox objected to the application on the following points:

- Release of the PAS site is premature and contrary to policy N34 and para 85 bullet point 4 of NPPF
- Detrimental to highway safety
- Should be refused as key considerations in reaching this recommendation are matters of housing land supply, sustainability and prematurity vis a vis preparation of the Site Allocations Plan
- Proposal does not accord with current development plan and is designated as a Protected Area of Search
- Site allocation DPD is the vehicle being pursued by Leeds City Council for taking decisions on the suitability of such sites for development
- After consultation with local residents and my own concerns a number of issues have been raised
- Site is PAS land and shouldn't be developed
- The site should be returned to green belt
- There are too many houses already for the area in terms of available infrastructure and its ability to cope with additional pressures
- The highway infrastructure is inadequate and will not cope with further development
- The extra houses will change the character of the area
- There are already a number of new housing developments in the area and also a supply of brownfield sites that could be developed
- The schools cannot cope with extra houses in the area, in particular the local primary schools have no space available and in the short to medium term secondary school provision will be at dangerously low levels
- There are highway safety issues
- The surrounding roads are already congested and the capacity on the Harrogate railway line into Leeds is already well over what that line can cope with
- There is a need for appropriate infrastructure developments by Leeds City Council and its partners
- With the introduction of NGT the local bus services will be greatly affected and probably reduced in frequency
- The development is contrary to the NPPF
- This local site is neither environmentally nor socially sustainable and as such should be returned to the green belt

Councillor Les Carter has objected on the following points:

- It would mean that the size of Bramhope expanding by around a quarter. Two thirds of the existing village is a conservation area, and creating what is essentially an urban housing estate will completely change the character of the village
- The inappropriate proposed roundabout faces onto the A660, which will exacerbate
- existing traffic problems in terms of peak hour vehicular flow plus the impact of further traffic on the A660 through to the centre of Leeds.
- This is PAS land, not allocated for development, which leaves the application premature ahead of the final housing site allocations.
- The lack of an appropriate second access for an estate of this size. Breary Lane East, which is in the conservation area, is not an appropriate access even for emergency vehicles.
- The site is not well related to the urban area, is poorly served by public transport, has few local facilities with no education provision beyond the

primary school, which is full. That means people living there will have to rely on the car for every day transport.

Councillor Campbell has objected on the following grounds:

- A660 already congested so additional traffic will cause more delays and congestion.
- Addition of a retail unit will add to traffic numbers and it's an out of centre shop
- Need more information to assess the scheme fully
- Needs affordable housing

Bramhope and Carlton Parish Council have submitted a detailed objection regarding the following:

- Application states the development will be 32 Dwellings Per Hectare which increases the development numbers to 398 dwellings
- New SUD ponds proposed to the south of the site are substantial engineering operations within an area designated as Green belt.
- Wood is not within the application site but new footpaths are proposed through it which have not been evaluated
- Site is not sustainable
- Greenspace proposed is in land designated as green belt
- Proposed car park for retail and new park is within green belt so inappropriate
- Doesn't comply with the following policies within the UDP N34, N29, T2, T5, T7a, T7b, T24
- Retail development is out of centre
- Detrimental impact on adjoining conservation area and listed building High Ridge House to the north of the site
- Detrimental impact on the community infrastructure such as schools, shops
- Impact on drainage and potential for flooding

The Bramhope and Carlton Parish Council have also submitted a detailed highway objection done by Pell Frischmann raising concerns regarding the transport assessment that has been submitted. This issues raised are the following:

- It would appear that the scope of the TA has not been agreed with the Local Highway Authority.
- The scope of the TA is not suitably robust to correctly assess a development of this nature.
- The method of traffic generation in the TA significantly underestimates the developments peak hour trip generation particularly in the AM peak period.
- TA acknowledges there is an existing accident problem at the Dyneley Arms junction and increasing in traffic requires improvements to this junction which are not contained in the TA.
- The site is not within a 400m walking distance to a bus stop ... whilst the proposal involves the bus routes being diverted into the site this will have a negative impact on existing residents in the area who will have to walk further and some being outside of the required 400m.
- No evidence of agreements with Metro to divert the buses into the site

- Bus X84 is a 20minute frequency when core strategy policy requires a 15 minute frequency.
- Nearest train service is 6.5km away at Horsforth so outside the feasible walking distance and recommended 5km cycle distance
- In terms of walking to local facilities most are outside the recommended 800m. The primary school is outside of this and involves children to cross the busy A660.
- .. the secondary school s 4.5km away outside the upper 2km walking distance
- In terms of pedestrian access there is a pedestrian link onto Breary Lane east but this has no footways or street lighting to connect to the rest of the area.
- The TA provides details of destinations that are accessible by cycle but these are all small settlements with limited level of services and facilities.
- There is over 5km cycle ride to access park and ride facilities.
- Cycle access to schools also involves the busy A660.
- The TA doesn't include the traffic generation from a number of committed developments in the vicinity.
- The existing congestion on the A660 corridor is not reflected in the analysis.
- No junction assessments have been undertaken to assess the impact of the development on the A6120 Outer ring road with the A660.
- Layout of the roundabout intrudes onto land classified as green belt.

Arthington Parish Council have objected concerned with the following matters

- Impact on character of their parish as southern boundary would radically change from open fields to large urban housing estate
- Application premature and should wait for site allocation process
- Use of Breary Lane East as second (emergency ) access is inappropriate
- Impact of extra traffic volumes on the A660 will be severely affected
- Roundabout will create more congestion and slower moving traffic

To date 866 objections have been received to the publicity of this application. The following issues have been raised:-

- Development is premature as site allocations document is not approved and this site should not be used till 2016.
- Site is green belt
- Site is greenfield and other brownfield sites should be used first
- Significant residential development already approved in this area
- Bypassing site allocations process
- Out of scale with current village of Bramhope with the proposal increasing the size of the village by 25%
- A660 can't take any more traffic
- Further impact on the places along the A660
- No local jobs so will increase commuting, additional traffic on the A660
- No school places
- Pressures on doctors, dentists and other local amenities
- Providing expensive houses and not affordable housing for new entrants to the housing market.
- Loss of ecosystem

- Detrimental impact on rural characteristics of Bramhope
- Detrimental impact on adjacent conservation area
- Cramped and crowded layout will have major social and environmental impact
- Car park for retail element too small
- Detrimental impact on wild deer and red kites.
- Drainage problems and increases the risk of flooding
- A660 popular cycle route so increase in traffic effects safety of cyclists
- Buses already full in Bramhope make situation worse
- Creating additional noise and disturbance
- Shop will impact on the other retail units within the area
- Extension of urban sprawl
- Water to existing streams will be diverted with the streams drying up and ecology lost
- Loss of privacy and views
- No details on the houses in terms of eco homes
- No school near so can't walk to school and impact on environment
- Should contribute to electrifying train line between Harrogate and Leeds
- Should contribute to the opening of Arthington Railway station which is 2k walking distance from the site
- TPO of trees needed
- No consideration of the comments from public consultation

## 7.0 CONSULTATION RESPONSES:

### Highways

The proposals cannot be supported as submitted for the following reasons:

The site does not meet the minimum accessibility standards for residential development in the emerging Core Strategy. Only part of the site is within an acceptable distance of access to the existing bus services. The services themselves do not offer sufficient service frequency during the daytime and the evening and weekend services are considerably worse. Distances to city centre, education and employment is substandard.

Concerns are also raised regarding traffic impact and the proposed vehicular access to the site. The TA traffic generations figures are low and do not reflect the numbers on the highway network at busy times.

Access arrangements would be subject to detailed design however there are initial concerns about the design/location of the proposed roundabout. The deflection looks to be too severe and a better location would be at the point where The Poplars meets the A660. This would allow for a better approach and alignment.

A plan is required to demonstrate that the roundabout meets all of the geometrical Requirements of the Design Manual for Roads and Bridges and that it can safely Accommodate the swept paths of HGV's and abnormal loads.

The submitted plan appears to show a connection to the existing cul-de-sac known As High Ridge Way – other than as an emergency access incorporating pedestrians And cycles, a vehicular link to the development site would not be acceptable at this Location.

A link is also shown to Breary Lane East. This would not be suitable for use by

vehicles and would have to be for pedestrian and cycle use only.

#### Flood Risk Management

Support the conditions indicated by the EA but need to provide further information to ensure that the proposed development can go ahead without posing an unacceptable flood risk to on and off site.

#### Travelwise

Travel plan should be included in a section 106 agreement along with monitoring fee, provision of residential metrocard scheme (bus only) and £10,000 for cycle storage for pupils at Bramhope Primary School.

Public transport improvements and developer contributions require a contribution of £465,961

#### Metro

The site does not meet guidelines in terms of distances to bus stops and frequency of the bus services. Application proposes a diversion into the site for buses which has not been discussed with metro and there have been no discussions regarding increasing the frequency of the bus services. Metrocards should be available for the whole of the site.

#### Public Rights of Way

No objections and welcomes access into the site.

#### Yorkshire Water

Conditions required in relation to foul and surface water drainage, no buildings or trees within a buffer around existing sewers, no surface water discharge to public sewers with SUDs drainage required.

#### Environment Agency

No objections providing conditions attached in relation to surface and foul water drainage.

#### Children's Services LCC

We would be interested in securing land for a 1FE primary school, as this size of development would generate 95 primary aged children that could not be accommodated in the local primary schools.

#### Policy

Greenspace – adequate provision on site for N2.1 and N2.2 with financial contribution required for N2.3

Affordable housing – 15% required with 50% social rented and 50% submarket/intermediate housing.

Retail – the shop floor area has been reduced to 372 square metres (gross) which complies with policies in the UDP and Core Strategy.

#### WYAS

The site is within an area of archaeological significance. Condition required for archaeological investigation of the site to be undertaken before the application is determined.

### Ecology officer

Spring wood on eastern boundary is ancient woodland with no access. Major residential development will put additional pressure on this woodland. Allotments to north of wood will put pressure on trees to be removed to prevent shading.

Therefore need woodland area management plan, woodland edge planting and fence on western boundary and allotments moved further away from woodland.

New park allows for compensation planting and meadow creation/enhancement

Crossing over wet ditches need to be appropriate design.

If park area is used for a school then there will be loss of grassland and meadow which need to be planting elsewhere on the site. Need to have a buffer between the new school and ancient woodland plus new hedgerows down to Otley Road to allow for ecological linkages.

### Landscape officer

Design refinements are required but have the following concerns:

Impact of the proposed roundabout on this stretch of road has a soft stretch of road with domestic feel ... roundabout gives impressions of an industrial development not residential. Roundabouts kill local identity and should be last resort.

Due to levels some of retained hedgerows might be lost and needs some additional buffers especially adjacent to hedgerow areas and around some of the specimen tree features.

Need to restrict access to ancient woodland with no formal paths and 3 access points.

Need topographical survey and follow up tree survey of all the outer edge trees that interface with development as the current edge is too vague and potential impacts are unknown

Tree verges are characteristic of the locality and need to be incorporated into any development.

New park has lack of supervision in the current location. The area is unlikely to have natural surveillance as a result of busy usage like a public park.

There is a holly hedge that needs to be retained.

Parts of the hedges retained are sparse so reinforcement planting of the hedges is a requirement

A bridge solution would be required where the Highway crosses this feature as this would ensure ecological connectivity. Culverting would not be an acceptable solution

SUDS AREA: at least some of this needs to be engineered to retain water throughout the year for ecological purposes.

Ecological management required and a management plan must be for 20 years as this will take in the need for periodic thinning of the new woodland planting

School will need buffer to the adjoining Green belt and Ancient woodland policy N12

School will require a substantial frontage open space to keep the character of openness rather than have a building close to the road. Soft areas could be at the front and perhaps car parking if well screened

Rather avoid impact of a second roundabout in quick succession if possible

## **8.0 PLANNING POLICIES:**

### **Development Plan**

- 8.1 The development plan consists of the adopted Leeds Unitary Development Plan (Review 2006) (UDP). The Local Development Framework will eventually replace the UDP and this draft Core Strategy has had some weight in decision taking since it

was published in 2012 but it is now considered to have significant weight for the following reasons

. The NPPF states that decision-takers may give weight to policies in emerging plans according to:

i) The stage of preparation

- On 12<sup>th</sup> June 2014 the Council received the last set of Main Modifications from the Core Strategy Inspector, which he considers are necessary to make the Core Strategy sound. These have been published for a six week consultation between the 16<sup>th</sup> June and 25<sup>th</sup> July 2014. The Inspector has indicated that following this he will publish his Report in August. The Plan is therefore at the lost advanced stage it can be prior to the receipt of the Inspectors Report and subsequent adoption by the Council.

-There is a distinction in the weight to be given to those policies that are still subject to consultation and those that are not –i.e. those policies that are unmodified should be given even greater weight.

ii) The extent to which there are unresolved objections

- No further modifications are proposed and the Plan can only be changed now exceptionally because it is sound as modified and there is no requirement for the plan to be made 'sounder'

iii) The degree of consistency with the NPPF

- In preparing his main modifications the Inspector has brought the Plan in line with the NPPF where he considers that this is necessary. The Plan as modified is therefore fully consistent with the NPPF.

## 8.2 Leeds Unitary Development Plan (UDP) Review:

The site is allocated as a 'Protected Area of Search' and as Green Belt. Other relevant policies are:

SA1: Secure the highest possible quality of environment

SG3: Community land needs

GP5: General planning considerations.

GP7: Use of planning obligations.

GP11: Sustainable development.

N2/N4: Greenspace provision/contributions.

N10: Protection of existing public rights of way.

N12/N13: Urban design principles.

N23/N25: Landscape design and boundary treatment.

N24: Development proposals abutting the Green Belt.

N29: Archaeology.

N34: Protected Areas of Search

N38 (a and b): Prevention of flooding and Flood Risk Assessments.

N39a: Sustainable drainage.

BD5: Design considerations for new build.

T2 (b, c, d): Access and accessibility issues.

T5: Consideration of pedestrian and cyclists needs.

T7/T7A: Cycle routes and parking.

T24: Parking guidelines.

H1: Provision for completion of the annual average housing requirement.

H2: Monitoring of annual completions for dwellings.

H3: Delivery of housing on allocated sites.

H11/H12/H13: Affordable housing.

LD1: Landscape schemes.

### Policy N34 Protected Areas of Search for Long Term Development

The Unitary Development Plan (UDP) was originally adopted in 2001 and its Review was adopted in 2006. The original UDP allocated sites for housing and designated land as PAS. The UDP Review added a phasing to the housing sites which was needed to make the plan compliant with the national planning policy of the time, Planning Policy Guidance 3. The UDP Review did not revise Policy N34 apart from deleting 6 of the 40 sites and updating the supporting text. The deleted sites became the East Leeds Extension housing allocation.

Policy N34 and supporting paragraphs is set out below:

The Regional Spatial Strategy does not envisage any change to the general extent of Green Belt for the foreseeable future and stresses that any proposals to replace existing boundaries should be related to a longer term time-scale than other aspects of the Development Plan. The boundaries of the Green Belt around Leeds were defined with the adoption of the UDP in 2001, and have not been changed in the UDP Review.

To ensure the necessary long-term endurance of the Green Belt, definition of its boundaries was accompanied by designation of Protected Areas of Search to provide land for longer-term development needs. Given the emphasis in the UDP on providing for new development within urban areas it is not currently envisaged that there will be a need to use any such safeguarded land during the Review period. However, it is retained both to maintain the permanence of Green Belt boundaries and to provide some flexibility for the City's long-term development. The suitability of the protected sites for development will be comprehensively reviewed as part of the preparation of the Local Development Framework, and in the light of the next Regional Spatial Strategy. Meanwhile, it is intended that no development should be permitted on this land that would prejudice the possibility of longer-term development, and any proposals for such development will be treated as departures from the Plan.

**N34: WITHIN THOSE AREAS SHOWN ON THE PROPOSALS MAP UNDER THIS POLICY, DEVELOPMENT WILL BE RESTRICTED TO THAT WHICH IS NECESSARY FOR THE OPERATION OF EXISTING USES TOGETHER WITH SUCH TEMPORARY USES AS WOULD NOT PREJUDICE THE POSSIBILITY OF LONG TERM DEVELOPMENT.**

### 8.3 Supplementary Planning Guidance / Documents:

Neighbourhoods for Living – A Guide for Residential Design in Leeds  
Street Design Guide  
Greenspace and Residential Developments

## **Interim PAS Policy**

- 8.4 A report on Housing Delivery was presented to Executive Board on the 13<sup>th</sup> March 2013. The report outlines an interim policy which will bolster and diversify the supply of housing land pending the adoption of Leeds Site Allocations Development Plan Document which will identify a comprehensive range of new housing sites and establish the green belt boundary. The Interim Policy is as follows:-

In advance of the Site Allocations DPD , development for housing on Protected Area of Search (PAS) land will only be supported if the following criteria are met:-

- (i) Locations must be well related to the Main Urban Area or Major Settlements in the Settlement Hierarchy as defined in the Core Strategy Publication Draft;
- (ii) Sites must not exceed 10ha in size ("sites" in this context meaning the areas of land identified in the Unitary Development Plan ) and there should be no sub- division of larger sites to bring them below the 10ha threshold; and
- (iii) The land is not needed , or potentially needed for alternative uses

In cases that meet criteria (i) and (iii) above, development for housing on further PAS land may be supported if:

- (iv) It is an area where housing land development opportunity is Demonstrably lacking; and
- (v) The development proposed includes or facilitates significant planning benefits such as but not limited to:
  - a) A clear and binding linkage to the redevelopment of a significant brownfield site in a regeneration area;
  - b) Proposals to address a significant infrastructure deficit in the locality of the site.

In all cases development proposals should satisfactorily address all other planning policies, including those in the Core Strategy.

- 8.5 Leeds City Council Executive Board resolved (Paragraph 201 of the Minutes 13<sup>th</sup> March 2013 ) that the policy criteria for the potential release of PAS sites ,as detailed within paragraph 3.3 of the submitted report be approved subject to the inclusion of criteria which
- (i) Reduces from 5 years to 2 years the period by which any permission granted to develop PAS sites remains valid: and
  - (ii) Enables the Council to refuse permission to develop PAS sites for any other material planning reasons.
- 8.6 It has been confirmed following a High Court challenge from Miller Homes that the Council's interim PAS policy is legal. However, the case is due to be heard in the Court of Appeal in March 2015.
- 8.7 The policy has been used to support the release of land at four sites at Fleet Lane, Oulton, Royds Lane, Rothwell, Owlers Farm, Morley and Calverley Lane, Farsley. The policy has also been used to resist permission for PAS sites at Kirkless Knoll and Boston Spa which were subject of a public inquiry late last year and early this

year respectively with the Kirklees Knowl inquiry due to re-open in the Autumn. The decision on Boston Spa is expected in late October with the Kirklees Knowl decision not due until the end of the year. PAS sites at Bradford Road, East Ardsley and West of Scholes have also recently been refused.

- 8.8 The Council's interim PAS policy does not supersede the Development Plan but is a relevant material consideration that the Panel should have regard to. The starting point remains the Development plan and in particular policy N34.

### **Local Development Framework**

- 8.9 The Council submitted its Core Strategy to the Secretary of State in April 2013 and an examination in public was held in October 13 and May 14. The Council has consulted on a further set of Main Modifications to the Core Strategy. Following consultation and no arising outstanding matters, it is anticipated that the Core Strategy will be adopted in autumn 2014 following receipt of the Inspectors final report. The Core Strategy is considered by the Council to be sound and in line with the policies of the NPPF and the Planning and Compulsory Purchase Act 2004 as amended by the Localism Act 2011. The Core Strategy Inspector has proposed two sets of Main Modifications, which he considers are necessary to make the Plan sound, including in line with the NPPF. The Council is currently progressing a Site Allocations Plan. Following extensive consultation, including 8 weeks of formal public consultation from 3/6/13 to 29/7/13 the Council is currently preparing material for Publication of a draft plan
- 8.10 The supporting text to Policy N34 of the Unitary Development Plan expects the suitability of the protected sites for development to be comprehensively reviewed through the Local Development Framework (para 5.4.9). The Site Allocations Plan is the means by which the Council will review and propose for allocation sites which are consistent with the wider spatial approach of the Core Strategy and are supported by a comparative sustainability appraisal. It will also phase their release with a focus on: sites in regeneration areas, with best public transport accessibility, the best accessibility to local services and with least negative impact on green infrastructure. This application is contrary to this approach. The Site Allocations Plan process will determine the suitability of this site for housing development. This approach is in line with para 85 of the NPPF which states that "Planning permission for the permanent development of safeguarded land should only be granted following a Local Plan review which proposes the development." It is also in line with the NPPF core planning principle 1, which states that planning should "be genuinely plan-led, empowering local people to shape their surroundings, with succinct local and neighbourhood plans setting out a positive vision for the future of the area."
- 8.11 The NPPF states in paragraph 47 that local authorities should boost significantly the supply of housing. It sets out mechanisms for achieving this, including:
- use an evidence base to ensure that the Local Plan meets the full objectively assessed needs for market and affordable housing;
  - identify and update annually a supply of specific deliverable sites sufficient to provide for five years' worth of supply;
  - identify a supply of specific deliverable sites or broad locations for growth for years 6 to 10 and years 11 to 15,
- 8.12 The Core Strategy housing requirement has been devised on the basis of meeting its full objectively assessed housing needs. These are set out in the Strategic Housing Market Assessment (SHMA), which is an independent and up to date evidence base, as required by paragraph 159 of the NPPF and reflects the latest

household and population projections as well as levels of future and unmet need for affordable housing.

- 8.13 Relevant policies within the Core Strategy include:
- Spatial policy 1 – Location of development
  - Spatial policy 6 – Housing requirement and allocation of housing land
  - Spatial policy 7 – Distribution of housing land and allocations
  - Spatial policy 10 – Green Belt
  - Policy H1 – Managed release of sites
  - Policy H3 – Density of residential development
  - Policy H4 – Housing mix
  - Policy H5 – Affordable housing
  - Policy P9 – Community facilities and other services ( inc schools)
  - Policy P10 – Design
  - Policy P11 – Conservation
  - Policy P12 – Landscape
  - Policy T1 – Transport Management
  - Policy T2 – Accessibility requirements and new development
  - Policy G4 – New Greenspace provision
  - Policy EN2 – Sustainable design and construction
  - Policy ID2 – Planning obligations and developer contributions

The Examination into the Draft Core Strategy has now taken place and the Inspectors report is expected imminently. Of particular relevance is the issue of affordable housing. This was examined in May 14 and the Council is seeking to include the levels of affordable housing within the Core Strategy as required by the Inspector. The 35% outer north level is proposed to extend to Bramhope and this is a change from the current level of 15%.

### **Five Year Land Supply**

- 8.14 The NPPF provides that Local Planning Authorities should identify and update annually a supply of specific deliverable sites to provide five years' worth of housing supply against their housing requirements with an additional buffer of 5% to ensure choice and competition in the market for land. Deliverable sites should be available now, be in a suitable location and be achievable with a realistic prospect that housing will be delivered on the site within 5 years. Sites with planning permission should be considered deliverable until permission expires subject to confidence that it will be delivered. Housing applications should be considered in the context of the presumption in favour of sustainable development, articulated in the NPPF.
- 8.15 In the past, the Council has been unable to identify a 5 year supply of housing land when assessed against post-2008 top down targets in the Yorkshire and Humber Plan (RSS to 2026) which stepped up requirements significantly at a time of severe recession. During this time (2009-2012) the Council lost ten appeals on Greenfield allocated housing sites largely because of an inability to provide a sufficient 5 year supply and demonstrate a sufficiently broad portfolio of land. This was against the context of emerging new national planning policy which required a significant boosting of housing supply.
- 8.16 Nationally the 5 year supply remains a key element of housing appeals and where authorities are unable to demonstrate a 5 year supply of deliverable sites, policies in the NPPF are considered to be key material considerations and the weight to be given to Councils' development plan policies should be substantially reduced.

- 8.17 The context has now changed. The RSS was revoked on 22nd February 2013 and when assessed against the Council's Unitary Development Plan (2006) there has been no under delivery of housing up to 2012. Furthermore for the majority of the RSS period the Council met or exceeded its target until the onset of the recession. The Council has submitted its Core Strategy to the Secretary of State with a base date of 2012 and a housing requirement that is in line with the NPPF and meets the full needs for objectively assessed housing up to 2028.
- 8.18 In terms of identifying a five year supply of deliverable land the Council identified that as of 1<sup>st</sup> April 2014 to 31<sup>st</sup> March 2019 there is a current supply of land equivalent to 5.8 years' worth of housing requirements.
- 8.19 The current five year housing requirement is 24,151 homes between 2014 and 2019, which amounts to 21,875 (basic requirement) plus 1,094 (5% buffer) and 1,182 (under delivery).
- 8.20 In total the Council has land sufficient to deliver 28,131 within the next five years. The five year supply (as at April 2014) is made up of the following types of supply:
- allocated sites
  - sites with planning permission
  - SHLAA sites without planning permission
  - an estimate of anticipated windfall sites – including sites below the SHLAA threshold, long term empty homes being brought back into use, prior approvals of office to housing and unidentified sites anticipated to come through future SHLAAs
  - an element of Protected Area of Search sites which satisfy the interim PAS policy
- 8.21 The current 5 year supply contains approximately 24% Greenfield and 76% previously developed land. This is based on the sites that have been considered through the SHLAA process and accords with the Core Strategy approach to previously developed land as set out in Policy H1. This also fits with the Core Planning principles of the NPPF and the Secretary of State's recent speech to the Royal Town Planning Convention (11 July 2013) where he states that not only should green belts be protected but that "we are also sending out a clear signal of our determination to harness the developed land we've got. To make sure we are using every square inch of underused brownfield land, every vacant home and every disused building, every stalled site."
- 8.22 In addition to the land supply position, the Site Allocations Document is in the process of identifying specific deliverable sites for years 6 to 10 of the Core Strategy plan period and specific sites for years 11 to 15.

### **National Guidance - National Planning Policy Framework**

- 8.23 The National Planning Policy Framework (NPPF) came into force on 27th March 2012. The introduction of the NPPF has not changed the legal requirement that applications for planning permission must be determined in accordance with the development plan unless material considerations indicate otherwise.
- 8.24 Paragraph 47 of the NPPF requires that local planning authorities should identify a supply of specific, deliverable sites sufficient to provide five years' worth of housing against their housing requirements with an additional buffer of 5%. Where there has been a record of persistent under delivery of housing the buffer should be increased to 20%.

- 8.25 Paragraph 49 requires that housing applications be considered in the context of the presumption in favour of sustainable development. Whether the development is sustainable needs to be considered against the core principles of the NPPF. Relevant policies for the supply of housing should not be considered up to date if the local planning authority cannot demonstrate a five year supply of deliverable housing sites.
- 8.26 Paragraph 85 sets out those local authorities defining green belt boundaries should:
- ensure consistency with the Local Plan strategy for meeting identified requirements for sustainable development;
  - not include land which it is unnecessary to keep permanently open;
  - where necessary, identify in their plans areas of 'safeguarded land' between the urban area and the Green Belt, in order to meet longer-term development needs stretching well beyond the plan period;
  - make clear that the safeguarded land is not allocated for development at the present time. Planning permission for the permanent development of safeguarded land should only be granted following a Local Plan review which proposes the development;
  - satisfy themselves that Green Belt boundaries will not need to be altered at the end of the development plan period; and
  - define boundaries clearly, using physical features that are readily recognisable and likely to be permanent

## **9.0 MAIN ISSUES**

- Compliance with the Development Plan
- Development Timing in advance of the Site Allocations Plan
- 5 year land supply
- Highway safety and sustainability criteria
- Education
- Design public open space and landscaping
- Retail proposal
- Section 106 Matters
- Representations

## **10.0 APPRAISAL**

- 10.1 Section 38(6) of the Planning and Compulsory Purchase Act 2004 requires that proposals be determined in accordance with the Development Plan unless material considerations indicate otherwise. Other material considerations include the National Planning Policy Framework, the emerging Core Strategy, the requirement for a five year supply of housing and matters relating to sustainability, highways, layout/design/landscaping, residential amenity, retail, education and Section 106 matters

### **Compliance with the Development Plan**

- 10.2 The larger part of the application site is designated as a "Protected Area of Search (PAS) in the adopted UDP. Such sites are designated under Policy N34 which specifies that PAS sites are to be retained for possible long term development and any intermediate development should be resisted that would prejudice the potential for long development in the longer term should the need arise. The supporting text to Policy N34 states that, "The suitability of the protected sites for development will

be comprehensively reviewed as part of the preparation of the Local Development Framework...” By not waiting for the comprehensive review, a decision to approve this application now would be a departure from the Development Plan. The proposal to develop Breary Lane East would be premature in advance of the conclusions of the comprehensive assessment of all PAS sites and alternative land supply opportunities that is being undertaken now through the Site Allocations Plan. Policy N34 and its supporting text should be given considerable weight because it is part of the statutory development plan for Leeds and is consistent with bullet 4 of paragraph 85 of the NPPF which expects local authorities to make clear that “...planning permission for the permanent development of safeguarded land should only be granted following a Local Plan review...”

- 10.3 These should be clear factors in assessing the suitability of the site and this should take place through the Site Allocations process.
- 10.4 As set out above the Council has put in place an Interim Policy pending the further progress of the Site Allocations Plan. Breary Lane East needs to be assessed against the interim policy to see if it meets the criteria for possible early release.

### **Development Timing in advance of the Site Allocations Plan**

- 10.5 The criteria of the interim policy are intended to ensure that PAS sites are considered against the spatial development strategy of the Core Strategy. Within that context some sites have been released by virtue of their scale and relationship to the settlement hierarchy in advance of the Site Allocations Plan, to help bolster the delivery of housing in Leeds by diversifying the land supply. PAS sites in excess of 10ha, those with alternative potential uses or those not adjacent to the main urban area or major settlements have been considered more likely to give rise to harm to the spatial development strategy and raise more sustainability issues. These sites will only be identified as housing sites through the Site Allocations Plan, where a full and comparative sustainability appraisal can be undertaken, which includes exploring cumulative and synergistic effects and the implications of the release of sites on infrastructure provision. This process will also consider whether PAS sites are needed in the context of specific housing requirements for individual housing market areas. This leaves the smaller PAS sites that comply with the interim policy criteria as capable of being released for development in advance of the Sites DPD process. The Interim Policy is a relevant material planning consideration that should be afforded weight in the determination of this application. The performance of Breary Lane East against the interim policy criteria is considered below:
- 10.6 Criterion (i) *Locations must be well related to the Main Urban Area or Major Settlements in the Settlement Hierarchy as defined in the Core Strategy Publication Draft.* The site is not within the main urban area of Leeds or related to a major settlement. As such the development of the site would not form an extension to the main urban area or major settlement. It is considered that the site does not satisfy criteria (i). This is important because sites adjacent to the main urban area or major settlements have greater potential local impacts on accessibility, infrastructure and scale of development having regard to the settlements size, function and sustainability. They are therefore contrary to Policy SP1 and SP6 until such a time as they are assessed through the Development Plan process.
- 10.7 Criterion (ii) *Sites must not exceed 10ha in size and there should be no sub division of larger sites to bring them below the 10ha threshold.* The application site is above this threshold (the PAS land part of the application site is 15.44 HA) and fails the Interim Policy on this basis. This is important because the larger sites necessarily have a greater overall impact on the Council’s locational strategy for housing, other

choices within the local housing market area and give rise to more sustainability issues which need to be addressed through the site allocations process such as access, infrastructure and distribution across the Council's settlement hierarchy. They are therefore contrary to Policy SP1 and SP6 until such a time as they are assessed through the Development Plan process in the round.

- 10.8 Criterion (iii) *Land is not needed, or potentially needed for alternative uses.* This application raises issues around the provision of a new school which may be required in the area due to the growing school age population and the volume of housing in the area. Until the Site Allocations process is more advanced the need, size, type and potential deliverability of a school cannot be fully determined. The applicant's current offer of land for a new school is on greenbelt land adjacent to the PAS site, which has also been put forward for potential Greenspace. Clearly, there are strategic choices around housing, schools and Greenspace provision to be made between the PAS site, the adjacent green belt site and other sites in Bramhope. These decisions cannot be made through the planning application process and reinforce the need for consideration through the site allocations process.
- 10.9 The Interim policy provides that sites that meet criteria i) and iii) but exceed 10ha in size may also be accepted for early release if they meet further criteria iv) and v). Breary Lane East fails criterion i), ii) and iii), and therefore does not comply with the Interim Policy. Notwithstanding this, officers have considered the merits of the proposal at Breary Lane East against criteria iv) and v) too.
- 10.10 Criterion (iv) *It is an area where housing land development opportunity is demonstrably lacking.* There are a number of development sites in the locality and the Housing Market area. Some are currently under construction including a site within Adel for 40 dwellings. Others are being planned to commence soon including approximately 100 dwellings at the former government works and 130 at Boddington Hall site. These illustrate that housing land development opportunity is not demonstrably lacking in the area. In addition there is a Greenfield UDP allocation at East of Otley.
- 10.11 Criterion (v) *the development proposed includes or facilitates significant planning benefits such as but not limited to:*  
*a) A clear and binding linkage to the redevelopment of a significant brownfield site in a regeneration area;* the applicant has not linked this application to the redevelopment of a significant brownfield site in a regeneration area.  
*b) Proposals to address a significant infrastructure deficit in the locality of the site.* The applicant has stated that the bus services could be diverted into the site to overcome sustainability issues but the applicant is unwilling to fully fund the diversions and additional bus services required.
- 10.12 To summarise, the application does not meet the interim policy criteria to be released early. Part of the land is potentially needed for a school site. There are other housing development opportunities on-going and soon to start in the area. The allocation of this site should await comprehensive assessment through the Site Allocations Plan.
- 10.13 The application proposal does not satisfy the Interim Policy criteria for release at this time. As such the proposal is contrary to policy N34 of the adopted UDP.

## **Five Year Land Supply**

- 10.14 The Council has a supply of 28,131 net homes between 1st April 2014 and 31st March 2019, which when assessed against the requirement for 24,151 homes provides a 5.8 year housing land supply. This supply has been sourced from the Strategic Housing Land Availability Assessment Update 2014 and includes over 21,000 units, including sites for students and older persons housing. In addition identified supply consists of some safeguarded sites adjacent to the main urban area which meet the Council's interim policy on Protected Areas of Search (approved by Executive Board in March 2013). The supply also includes evidenced estimates of supply, based on past performance, from the following categories: windfall, long term empty homes returning into use and the conversion of offices to dwellings via prior approvals. The supply figure is net of demolitions.
- 10.15 The Core Strategy Inspector's latest set of Main Modifications (16th June 2014) which he considered were necessary to make the Core Strategy sound confirm that the Council should supply land at a rate of 4,375 homes per annum throughout the life of the plan. However given market conditions moving out of recession, the need to plan for infrastructure and demographic evidence his latest modifications have also included a lower target of at least 3,660 homes per annum between 2012 and 2016/17 against which delivery should be measured for performance purposes. This basic requirement is supplemented by a buffer of 5% in line with the NPPF. The requirement also seeks to make up for under-delivery against 3,660 homes per annum since 2012. It does this by spreading under-delivery, since the base date of the plan, over a period of 10 years to take account of the circumstances under which the under-delivery occurred i.e. the market signals and the need to provide infrastructure to support housing growth.

## **Highway Safety and Sustainability Criteria**

- 10.16 There are a number of issues in relation to the proposed development and its highway implications which can be split into impact on the highway network, access arrangements and sustainability.
- Impact on existing highway network*
- 10.17 The applicants have submitted a Transport Assessment to demonstrate the impact of the proposals on the existing highway network. The trip generation rates and trip distribution used within the TA have not been agreed by officers and officers consider that the information that has been submitted is not accurate and that the trip generation rates and trip distribution shown on the existing highway network should be revised.
- 10.18 In terms of the residential part of the scheme the applicants have used average trip rates to predict the traffic associated with the residential element of the proposals. However, due to poor accessibility credentials of the site it is considered that 85%ile trip rates are more appropriate and robust. The development access and the impact of the proposals on the highway network needs to be re-assessed based on the 85%ile trip rates.
- 10.19 In terms of the retail element the applicants have stated that they anticipate that 50% of all trips to the convenience store would be on foot. In reality it is expected that this figure would be much less and that the majority of trips would be by car, both from within the proposed development site from the surrounding area and by passing trade. Again it is considered that an 85%ile trip rates should be used and that a more realistic approach is taken. The A660 is a real barrier to those travelling

from the opposite side of the A660 even with the prospect of a controlled crossing it would still anticipate that the majority of residents would drive to the site.

- 10.20 The traffic impact assessment also does not cover other junctions further away from the site which will also be affected by the development. Plus the traffic generation to Otley also needs to be taken on board and not just Leeds as there will be shopping and employment trips to there.
- 10.21 The TA also needs to look at the impact of traffic further south along the A660 including the cumulative impact of this and other committed developments on Lawnswood Roundabout and the A660/Farrar Lane/Church Lane junctions. This needs to be done both with and without the NGT proposals.
- 10.22 As the TA underestimates the amount of traffic on the existing network it does not give a full picture of the impact of this level of development on the existing highway network. It is considered that it has not been satisfactorily demonstrated that the impact of the proposals can be safely accommodated on the highway network. This will have a detrimental impact on the safe and free flow of traffic within the area and cannot be supported.

#### *Proposed access*

- 10.23 The access to the site takes the form of a roundabout on the A660 with pedestrian and emergency access onto High Ridge Way and pedestrian/cycle access on to Breary Lane east. This first roundabout is linked to a second roundabout 130m into the site by a wider than normal road, and from the second roundabout the site would be served by a loop road. This is an attempt to overcome the fact that a development of this scale would normally require two points of access but at this juncture it is not considered established that this arrangement would provide a safe and suitable access. It is in addition a heavily-engineered design solution which is likely to have an unsatisfactory design and appearance in this context adjoining a rural area.
- 10.24 There are initial concerns about the design/location of the proposed roundabout. The deflection looks to be too severe and a better location would be at the point where The Poplars meets the A660. This would allow for a better approach and alignment. A plan is required to demonstrate that the roundabout meets all of the geometrical requirements of the Design Manual for Roads and Bridges and that it can safely accommodate the swept paths of HGV's and abnormal loads.
- 10.25 The submitted plan appears to show a connection to the existing cul-de-sac known as High Ridge Way – other than as an emergency access incorporating pedestrians and cycles, a vehicular link to the development site would not be acceptable at this location. A link is also shown to Breary Lane East. This would not be suitable for use by vehicles and would have to be for pedestrian and cycle use only.
- 10.26 Until the information above has been submitted it is difficult to establish if a safe access can be provided into the site. At the moment it is considered that a safe access cannot be achieved for this level of development without a detrimental impact on the safe and free flow of traffic along the A660.

#### *Sustainability*

- 10.27 The site is not located within the 400m walking distance to bus stops which is outside of the relevant guidance within the core strategy. To overcome this the applicants have suggested that the bus services can be diverted into the site with bus stops being provided within the site itself. At the moment this is only a suggestion and concerns have been raised from Metro that this proposal has not been discussed with them or any of the bus operators. Metro have also raised concerns regarding this proposal as it will increase the bus journey times for other

passengers and it will also increase the number of passengers to the detriment of other passengers further along the existing bus route. Metro have also stated that for this to work the number of buses services on this route would also need to increase to prevent detriment to the existing bus service. Any costs in terms of providing additional buses on this route and the diversion would have to be paid by the developer which could amount to £300,000 a year. The applicant is not prepared to fully fund these requirements and will only fund the contribution required by the Public Transport improvements and developer contributions which is a one of payment of £466,000. Without the additional funding the bus route will not get diverted or the frequency increased which leaves the site not complying with the sustainability walking distance of 400m to a bus stop. It could also be stated that if the bus stops were moved it will mean that existing residents will have to walk further to bus stops and they would be outside the 400m distance which they are not at the moment.

- 10.28 The distances to other services are also not in compliance with the core strategy sustainability criteria. The local services with Bramhope are not within the required 10 minute walk, the primary school is not within a 20 minute walk and the nearest secondary school is not either within a 30 minute walk or 5 minute walk to a bus stop offering a 15 minute service (check). For all these reasons the site is not considered sustainable.
- 10.29 To conclude on highway matters the development is not acceptable in terms of its impact on the existing highway network, an unsafe access and the site is not sustainable. The three reasons for refusal in relation to these matters are detailed at the start of this report.

### **Education**

- 10.30 The site will generate the requirement for school places that cannot be accommodated with the existing primary and secondary schools and education have requested a level of financial contributions to take this matter on board. However, Bramhope Primary School is located in an area surrounded by houses and there is no opportunity for this school to be expanded. There is therefore a requirement for a new school in the area caused by this level of development and the applicant has offered the piece of land that is shown be to 'Bramhope Park' on the submitted masterplan for a new primary school. If the land is not used for a school within five years the land can be used for 'Bramhope Park' as shown on the submitted plans.
- 10.31 The location of this school on this piece of land does create a number of issues which so far have not been addressed. These include the fact that this site is within green belt, the loss of the area for the park in terms of impact on the landscape, ecology and views of the development from the A660. The site is also amber in the site allocations document so should be provided for housing if approved, however, the land which currently houses the primary school could be redeveloped for housing if the new school was built on this site and the site was accepted through the site allocation process. At present to build a school on land in the green belt would be inappropriate development for which very special circumstances would need to be demonstrated. This has not been demonstrated in this case – if a school is required and in advance of the Site Allocations Plan then land would have to be reserved for this purpose on the PAS site.

## **Design, public open space and landscaping**

- 10.32 An indicative layout has been submitted and although all matters in the application other than means of access are 'Reserved Matters' the applicant has specifically applied for 'up to 380 dwellings'. The submitted drawing does not show public open space within the site sufficient to satisfy Council policy on such provision and does not demonstrate that a satisfactory design and layout could be achieved.

## **Retail Proposal**

- 10.33 The initial plans showed the proposed shop to be 418 square metres. This is an out of town location so a retail development off this size in this location would have been unacceptable without a sequential test to show that the development would not impact on the viability and vitality of other town centres close by.
- 10.34 The retail element has now been reduced to 372 square metres which now complies with UDP and core strategy policies as the shop is small scale and due to this would not have a detrimental impact on the viability and vitality of other town centres.

## **Section 106 Package**

- 10.35 The Community Infrastructure Levy Regulations 2010 set out legal tests for the imposition of planning obligations. These provide that a planning obligation may only constitute a reason for granting planning permission for the development if the obligation is -
- (a) Necessary to make the development acceptable in planning terms;
  - (b) Directly related to the development; and
  - (c) Fairly and reasonably related in scale and kind to the development. .
- 10.36 The proposed obligations referred to in this report have been considered against the legal tests and are considered necessary, directly related to the development and fairly and reasonably related in scale and kind to the development. Accordingly they can be taken into account in any decision to grant planning permission for the proposals. The applicants would be required to submit a Section 106 Agreement to address the policy requirements for this application. In the absence of such an agreement a reason specific to this matter is recommended but this matter would not be contested at any appeal if an agreement was completed beforehand. The position in relation to affordable housing is subject to likely change. At present 15% is required but this could increase substantially in the coming months to 35% dependent on the report of the Core Strategy Inspector expected shortly. Whilst the higher rate cannot be given substantial weight at present if this is supported by the Inspector and then adopted by the Council then the higher rate would need to be given substantial weight at that stage.

## **11.0 CONCLUSION**

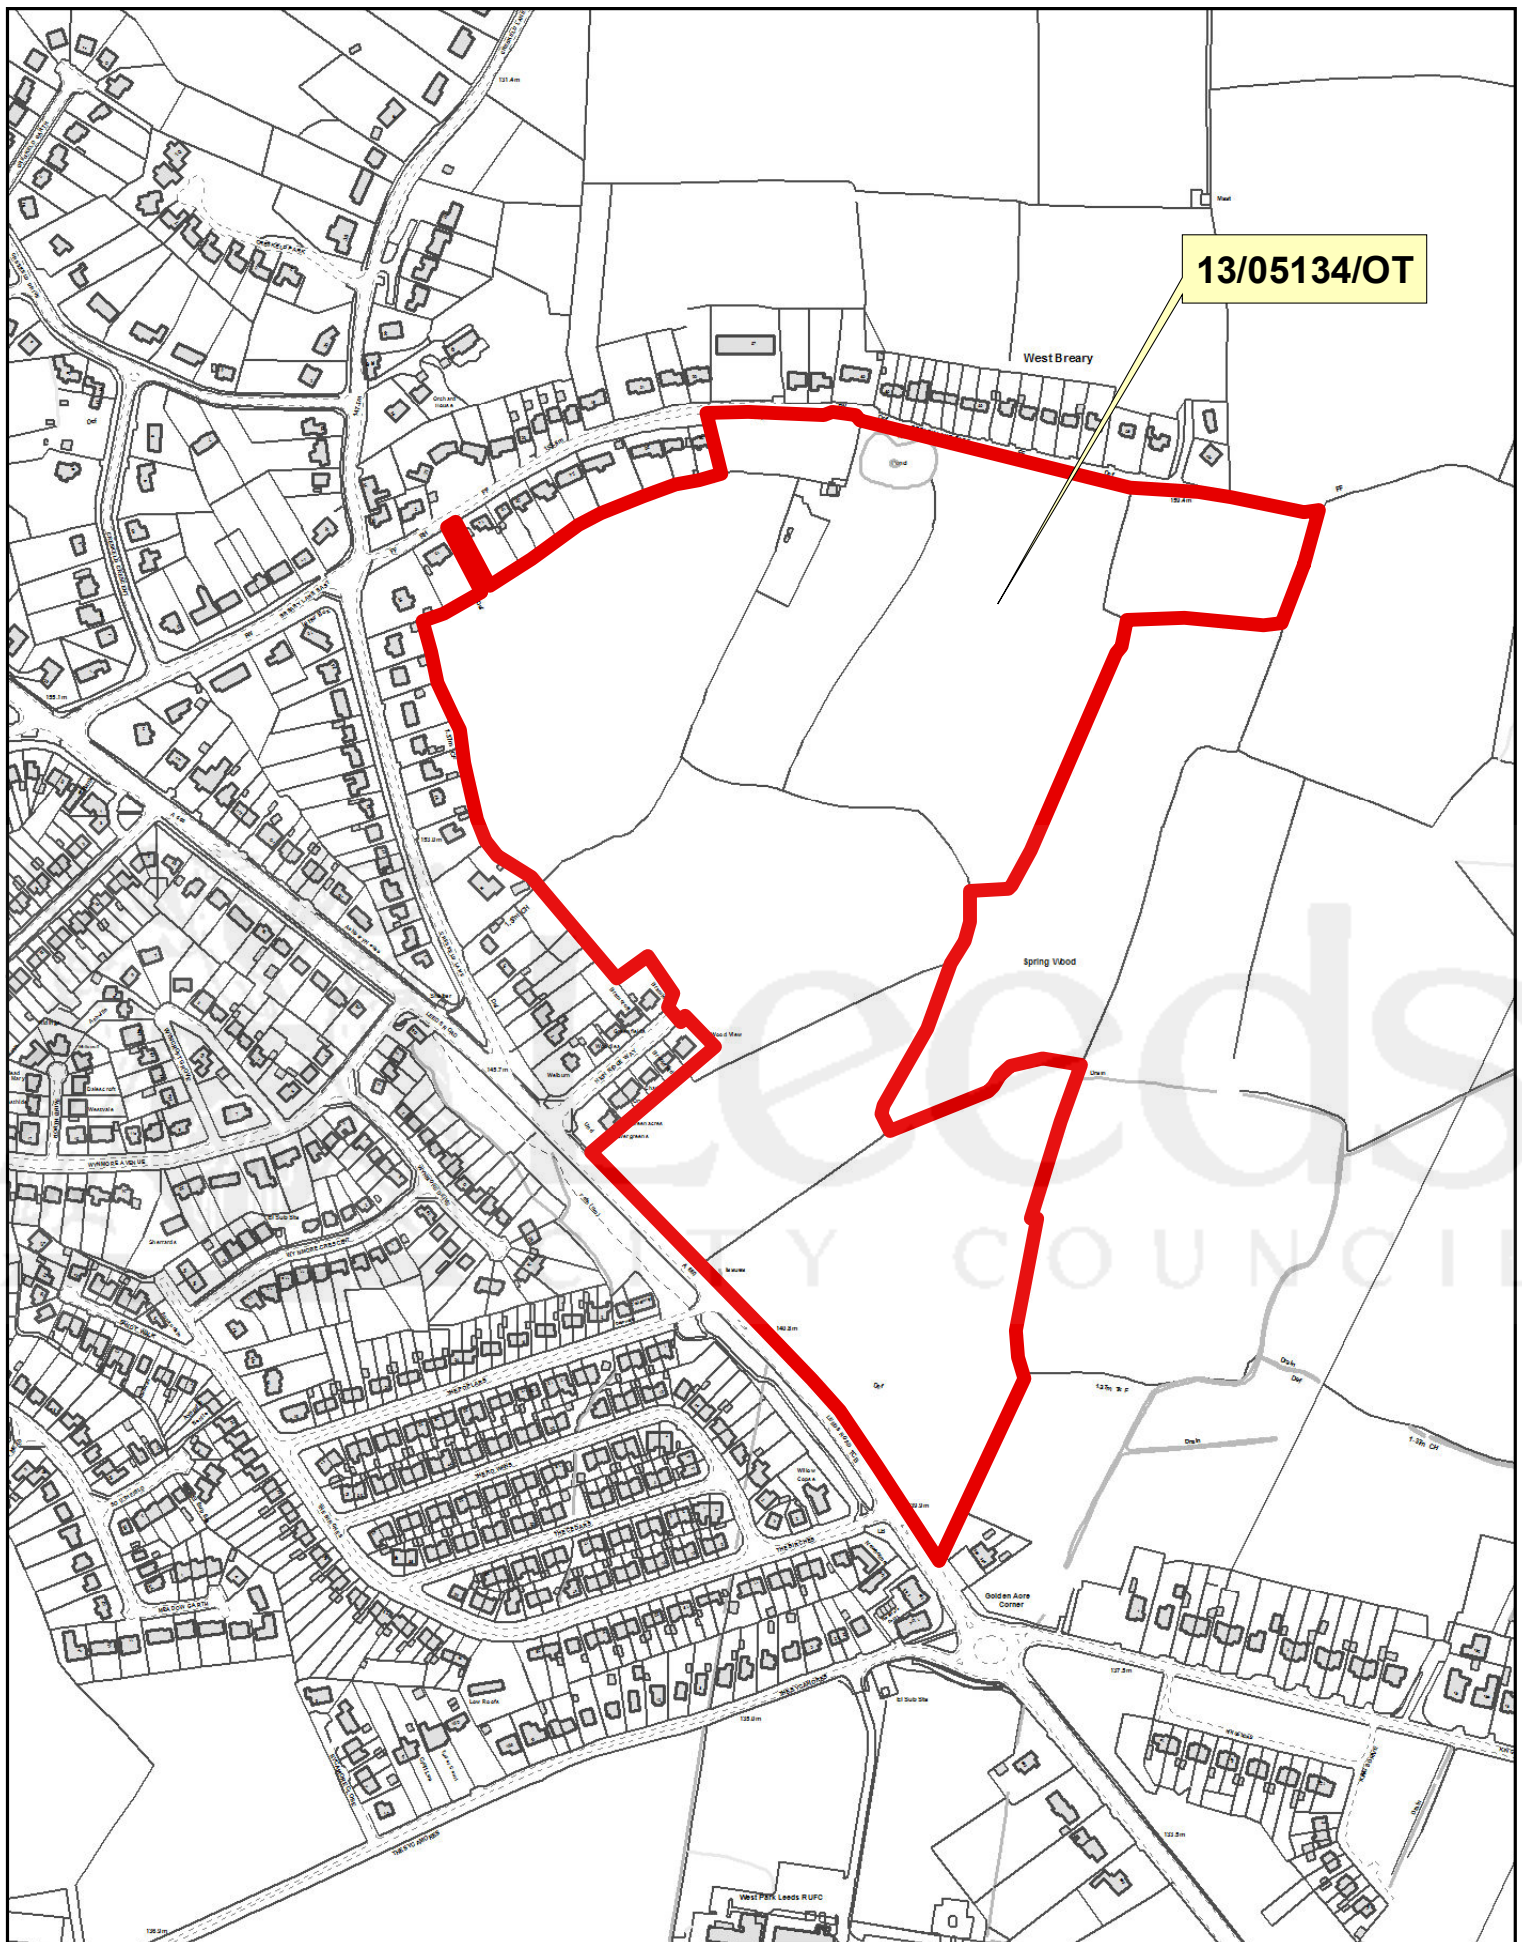

- 11.1 The key conclusion is that the proposal to develop Breary Lane East now runs contrary to UDP Policy N34 which expects the PAS sites only to be released following comprehensive assessment of development plan preparation. The interim policy is designed only to release those PAS sites early which are of a scale, location and nature that would not generate planning major planning implications that ought to be considered in a comprehensive plan making exercise. This site

does have an issue that it may be required for a school. It also is in a locality that contains other development opportunities both now and in the immediate future, that mean that release now for local housing availability purposes is not of such urgency that a decision cannot wait for the conclusions of the Site Allocations Plan.

- 11.2 A Five Year Supply can be demonstrated.
- 11.3 The proposal gives rise to local sustainability concerns including:
  - Consideration of the need and delivery of a school in the most appropriate location
  - A scale of growth which has not yet been determined through the Site Allocations Plan in the context of choices for meeting needs within the housing market area
- 11.4 At this stage it is considered that the applicants have proposed insufficient mitigation to accommodate the impact of the development on the highway network. . There are outstanding concerns that need to be resolved in relation to pedestrian/cycle access along the A660.
- 11.5 As discussed above the indicative masterplan raises concerns in relation to how the numbers of dwellings proposed could be satisfactorily accommodated on the site and the provision of Greenspace within the site does not meet with Council policy.
- 11.6 Refusal is recommended for the reasons set out at the beginning of this report.
