

Better Lives for People of Leeds

Day Centres for Older People

EQUALITY IMPACT ASSESSMENT

1.0 Introduction

- 1.1 Leeds City Council is reviewing the ways it provides day centres for older people – specifically day centres directly run by the Council.
- 1.2 Proposals are that in future the Council will no longer run some of its day centres. It will however continue to ensure that older people’s care needs are met with a wider range of more flexible day time activities.
- 1.3 This paper outlines the Equality Impact Assessments that have been carried out in the context of these proposals to ensure that they do not unfairly impact on people from the different equality groups. It has been completed as a parallel process to the consultation on the proposed changes.
- 1.4 The lead officer for this assessment is Dennis Holmes, Deputy Director - Strategic Commissioning. Members of the assessment team are:

- Anna Clifford - Programme Manager, Adult Social Care
- Richard Graham - Senior Quality Assurance Officer, Adult Social Care
- Pauline Hill - Senior Policy and Performance Officer, advisor to the assessment

2.0 Current Services

2.1 Background

- 2.1.1 In September 2011, following extensive and comprehensive consultation, the Council's Executive Board agreed to proceed with the first phase of the Better Lives Programme. This included the implementation of the following proposals for the eighteen Council owned and operated day centres for older people:
- Decommissioning of four centres
 - Recommissioning of four specialist dementia facilities
 - Recommissioning of two short-term rehabilitation centres
 - Recommissioning of two centres as specialist BME facilities
- 2.1.2 The criteria for determining the future options for these services were considered and agreed by the Executive Board on 15 December 2010 and proposals were assessed with due regard to equality through an Equality Impact Assessment. The impact of the proposals was considered and assessed both in terms of those individuals directly affected and future users of the services.
- 2.1.3 The following impacts for people living in the general population were identified:
- The review of day care service is in line with the personalisation of adult social care services. Future delivery of adult social care will see an increased use of personal budgets and a reduction on people using traditional day services. Further to the first phase of this programme, Leeds has made significant progress in extending the use of personal budgets. Currently around 61% of Leeds citizens receiving a community care service or carer-specific service receive their support in the form of personal budgets.
 - Currently a high level of resource is committed to a service which is underused. This locks up resources in the existing service which could be used to support older people's day activities in other more effective ways. The proposals aim to free up resources to be reinvested in services for future and current users who would prefer to receive an alternative to a centre based day service. This is evident in the additional recurrent funding of £300,000 to Neighbourhood Networks to support the development of new models of service provision in order to meet the changing needs of older people.
 - There would be additional economic benefits to bring investment into the area as well as improving the quality of public services.
 - Supporting older people with care needs should be seen in the context of other changes aimed at promoting the independence, well-being and choice of older people in Leeds. The proposals will allow resources to focus more on increased take-up of preventative services which will enable older people to remain living safely and independently in their own homes for longer.
- 2.1.4 The impact of the change to day centre provision has been lessened and potentially removed through putting in place a range of mitigating actions.

These actions include the following:

- An assessment team was established to undertake assessments of service users in accordance with the Council's Assessment and Transition Protocol.

- A Leeds-specific Care Guarantee was developed which outlined the principles that residents affected by the closures could expect from the Council to ensure their dignity, choice and rights were protected
- People who did not have the capacity to make an informed decision were given access to an independent advocate arranged by Adult Social Care.
- Risk assessments were carried out to ensure that clinical and therapeutic needs of those directly affected were responded to urgently and with sensitivity.

2.1.5 The Executive Board report describes in detail the outcomes for service users directly affected in the first phase of the programme.

2.1.6 The Executive Board also agreed at its meeting in September 2011 to bring forward further options in relation to the remaining six day centres.

3.0 **Proposals**

3.1 An options analysis has been completed and proposals developed for the six remaining day centres. Two of these centres have been retained as specialist day centres following the options analysis.

3.2 The proposed options for four of the centres were the basis for detailed consultation with those directly affected. Full details of the consultation and an analysis of responses are attached in the Consultation Report. These proposed options are the subject of individual EIAs, outlined in section 2 of this report.

3.3 It is intended that the review of these services will balance the need to achieve savings with opportunities to develop the service to ensure that it adds value and contributes to the health and well-being of older people.

3.4 Leeds City Council will wherever possible seek to avoid any unintended consequences of any proposals developed that have a negative impact. This could be disproportionate impacts on different geographic locations, communities and the voluntary and community sector

4.0 **Scope of the equality, diversity, cohesion and integration impact assessment**

4.1 This EIA will consider and assess the impact of the options for:

- Current users of the day centres and their carers affected by the proposed options, as future users were consulted in the equality impact process for the first phase of this programme.

4.2 This EIA is intended to support the decision making process by:

- Identifying the potential impact of any changes/ decisions on each protected characteristic
- Setting out actions to minimise/ mitigate any adverse impacts

4.3 Proposals have been subject to Equality Screening and this concluded that the proposed options will potentially give rise to equality impacts particularly to those older and disabled people, their families and carers, who attend day centres currently provided by the in-house service. Staff will also be affected and if the proposals are agreed, a full EIA on organisational change will consider impacts on staff and

therefore staff are not included in the scope of this EIA.

- 4.4 To mitigate against any adverse impacts and ensure that any such impacts are minimised, it was agreed that each option would be subjected to an equality impact assessment. The assessments will then be considered through the Council's decision making process. These are outlined in Section 2 of this report.
- 4.5 It is proposed that should agreement be given to progress with the proposals, an implementation plan is developed in line with the Assessment and Closure Protocol. This would show how any closures would be managed over the timescales and how service users and their carers are to be supported to safeguard human rights, minimise distress and maximise the benefits to individuals. This will relate particularly to the monitoring arrangements in relation to the proposed changes.

5.0 Context

5.1 Demographics

- 5.1.1 Leeds is the second largest Metropolitan District in England with an estimated population in excess of 750,000 people. The country is faced with an increase in the proportion of older people in its population. There are currently 10.3 million people aged 65 or over in the UK and this figure is expected to rise by 65% in the next 25 years to over 16.4 million in 2033 (ONS, 2009/11). This represents 21% of the total population.
- 5.1.2 The increase is reflected in Leeds, where there are currently 116,600 people over the age of 65, representing 14.6% of the overall population of the city. This figure will increase to 129,800 by 2020 (15.3% of population) and by 2030 the figure will reach 153,800 (16.9% of population) (ONS subnational population projections, March 2012).
- 5.1.3 Leeds is clearly becoming a more diverse place. Stonewall, the lesbian, gay and bisexual charity, estimates that large cities such as Leeds with an established gay scene, businesses and support network may be made up of at least 10 per cent lesbian, gay and bisexual people.
- 5.1.4 Leeds population broken down by religion or belief is 55.9% Christians, 5.4% Muslims, 1.2% Sikh, 0.9% Jewish, 0.9% Hindu, 0.4% Buddhist other religion 0.3% and 28.2% no religion or 6.7% not stated.
- 5.1.5 Leeds is now home to over 130 different nationalities. The 2011 Census estimated that 18.9 per cent of the total resident population comprised people from black and minority ethnic communities (including Irish and other white populations), a rise of 8 per cent from the 2001 Census.
- 5.1.6 Many citizens in the over 65 age group continue to contribute to the economic prosperity of Leeds and the social fabric of its diverse communities. This is reflected in the number of people who continue to work beyond 65 either in paid employment or as volunteers. The over 65 year-olds who act as informal or family carers also play an important part in our society. However it is estimated that almost all people currently aged 65 will need healthcare, and 66% of men and 84% of women will need some social care before they die (Personal Social Services Research Unit, 2011).
- 5.1.7 Dementia is one of the main causes of disability in later life, with over 820,000 people estimated to be suffering from late onset dementia in the UK in 2010. By 2025, the number is expected to rise to one million (ONS, background paper 7). In Leeds there

are an estimated 8,500 people with dementia and this figure is estimated to increase to 12,000 by 2028, a 35-40% increase in 15 years (Leeds Dementia Strategy 2013).

5.2 Trends

- 5.2.1 Although there are an increasing number of older people in Leeds, the demand for non-specialist day care has fallen as people have chosen to have their wellbeing and care needs met by alternative means available within their own communities.
- 5.2.2 Helping older people to remain independent and become involved in social activities in their own communities are key factors in improving a person's well-being and avoiding social isolation. In Leeds this has led to the development and continued investment in Neighbourhood Networks that now provide a comprehensive range of activities and services for older people across the City.
- 5.2.3 The policy to support people to live independently and have choice and control over their care and support services is evidenced in Leeds by the introduction of a range of community based services. In addition to personal budgets and the Neighbourhood Networks, Leeds has invested into a range of services provided to older people in their own homes. These include reablement, intermediate care, assistive technology, daily living equipment and home adaptations. The development of these services represents a change in emphasis away from building-based services, where the person is required to fit in with the service, towards a personalised service that responds to individual needs. In 2013/14 £9.6 million of revenue expenditure and £2.4 million of capital expenditure will be invested in these services.
- 5.2.4 It is recognised that people's health, wellbeing and care needs cannot be separated and that efficiencies can be achieved by jointly commissioning and providing services. This has led to a number of initiatives that have been developed by Leeds City Council and in partnership with other statutory and third sector organisations such as the NHS and Neighbourhood Networks and include Holt Park Active Wellbeing Centre and integrated health and social care assessment and care management teams.

5.3 In addition to the above, the EIA considers data from the following

- Key strategies and policies relating to the proposals
- Quantitative information relating to the profile of current service users and carers. This is included within each assessment in section 2
- Feedback from consultation with those directly affected
- Comments from submissions, complaints and suggestions received throughout the course of the consultation
- Feedback/comments from Area Committees, Cross Party Advisory Group, and individual Elected Members.

6.0 Addressing gaps in equality and diversity information

- 6.1 Adult Social Care, where possible, will obtain full equality information around the profile of service users and determine the likely impacts given that profile. Due regard will be taken of this information during the implementation phase, should these proposals be agreed. A review of the impact will also be undertaken post implementation, considering any impact on equality groups.

7.0 Consultation and involvement

7.1 Detailed consultation on the proposals took place between 11 March and 3 June 2013. The aim of the consultation was to consult with those directly affected and as a priority the existing users of day centres and their families and carers. Detailed consultation also took place with affected staff and Trade Unions, with related stakeholders within the locality, including elected members and partner organisations.

7.1.1 As part of the consultation with service users and their families and carers a questionnaire has been used in one to one interviews as a tool to capture responses to the proposed option for each individual day centre. The aim was to:

- Capture people's responses to the proposed changes
- Determine the impact on individuals and how this might be reduced as plans are developed.

7.1.2 The findings from the consultation are outlined in full in the Consultation Report appended. Key themes are outlined in the individual Equality Impacts Assessments options in section 2 of this report.

8.0 Equality impacts identified

8.1 The table below highlights the range of impacts on equality characteristics, stakeholders and other potential barriers.

8.1.2 Data on current users indicate that the proposed options potentially give rise to impacts mainly in respect of age; gender, race, disability, carers and socio-economic. Data relating to sexual orientation and gender reassignment is not available; however no disproportionate impacts have been identified for these equality characteristics through consultation with current users of day centres and carers.

Equality characteristics		
<input checked="" type="checkbox"/> Age	<input checked="" type="checkbox"/> Carers	<input checked="" type="checkbox"/> Disability
<input checked="" type="checkbox"/> Gender reassignment	<input checked="" type="checkbox"/> Race	<input checked="" type="checkbox"/> Religion or Belief
<input checked="" type="checkbox"/> Sex (male or female)	<input checked="" type="checkbox"/> Sexual orientation	
<input checked="" type="checkbox"/> Other low socio-economic groups		
Stakeholders		
<input checked="" type="checkbox"/> Services users	<input checked="" type="checkbox"/> Employees	<input checked="" type="checkbox"/> Trade unions
<input checked="" type="checkbox"/> Partners	<input checked="" type="checkbox"/> Members	<input checked="" type="checkbox"/> Suppliers

Potential barriers for current users

<input checked="" type="checkbox"/>	Built environment	<input checked="" type="checkbox"/>	Location of premises and services
<input checked="" type="checkbox"/>	Information and communication	<input checked="" type="checkbox"/>	Customer care
<input checked="" type="checkbox"/>	Timing	<input checked="" type="checkbox"/>	Stereotypes and assumptions
<input checked="" type="checkbox"/>	Cost	<input checked="" type="checkbox"/>	Consultation and involvement
<input checked="" type="checkbox"/>	Capacity of the voluntary and private sector		

8.1.3 The following provides an overview of the relevance of the proposals to the equality characteristics and where identified, action to mitigate any impact.

8.1.4 **Age:** The proposals for change are aimed at providing improved services to older people of the 65+ age group. The overall aim of this proposal is to reform and modernise services for older people. It is embedded in key modernisation strategies and strategies specific to older people which highlight the importance of enabling older people to remain in their own homes for as long as possible.

8.1.5 **Disability:** By the nature of the day centre service, all residents are older people and have disabilities associated with ageing. As part of the review, the Council will consider that its role in ensuring the need for specialist provision in key areas such as the increasing need for dementia services and intermediate care is met.

Action: In relation to day services, service user profiling will be undertaken to identify those people with personal care and high dependency needs to ensure that their needs are continued to be met.

8.1.6 **Gender:** Compared with the general population, statistical data of current service users suggest that the service reflects the gender profile across the city.

8.1.7 **Race:** Statistical data of current service users indicates lower take up of day services by people from BME groups. In the first phase of this programme, two day centres were recommissioned as specialist facilities to provide personalised services for older people from BME backgrounds and their carers. Work is on-going within Adult Social Care to understand the low take-up of services by, and representation of, ethnic groups. In relation to current BME service users this provides an opportunity to consult with them on relocation which could result in a positive impact.

8.1.8 **Religion or belief:** The services will be provided to people irrespective of, but with respect for religion and belief, as this will be taken into consideration in any needs assessment

- 8.1.9 **Carers/ families:** The review will seek to identify changes which promote independence and choice and facilitate support for carers.
- 8.1.10 **Cohesion:** Integrating people into communities wherever possible will enable them to access universal services and make links with their own communities
- 8.1.11 **Social Exclusion:** The service proposals will need to ensure that socially excluded people are not disproportionately disadvantaged as a result of these changes.
- 8.1.12 **Sexual orientation:** No specific issues have been identified in relation to sexual orientation. The service will be provided to people irrespective of, but with respect of their sexual orientation, as this will be taken into consideration in any needs assessment.
- 8.1.13 **Gender reassignment:** No specific issues have been identified in relation to gender reassignment. The service will be provided to people irrespective of, but with respect of their gender reassignment, as this will be taken into consideration in any needs assessment.

Section 2

Equality Impacts Assessments on proposed options

Proposal: To decommission the facility and transfer service users to other services of their choice already available in the ward / area.

Burley Willows, Doreen Hamilton, Naburn Court, Queenswood Drive: Provide generic day care and no specialist services.

A list of alternative provision in relation to these day centres is available in the background document 'Alternative Services Available'.

Consultation

Informal and formal consultation has been undertaken with all service users over a period of 12 weeks.

The Consultation Report attached provides a full analysis of responses.

Key themes from the consultation

- The majority of comments related to the detrimental impact and potential risk to the health and well-being of service users brought about by the closure of their day centre. Concerns were raised that this will have an unsettling effect and could lead to disorientation, particularly among the very old and most vulnerable.
- Concerns related to the need to ensure day care for people with dementia is retained to support older people to remain independently at home.
- Concerns were raised around the loss of friendships and fears around social isolation. Transport issues and travel arrangements to alternative day care were also raised.
- Ensure that the needs of carers are recognised.

The emerging key themes to alleviate the impact of the proposed closure are that the following are important:

- Alternative provision is local and of similar nature and quality
- Keep friends together
- Consider individual needs
- Make the transition as stress free as possible and provide ongoing support to older people to access alternative provision

Potential impact identified from decommissioning this service

The programme of change will result in improved personalised services for people with dementia and their carers with improved outcomes.

An important criteria of the proposal is that the change does not mean a reduction in service for service users, or that the Council's statutory duties are not being delivered, however it is recognised that there may be some barriers to this being the case. The following have been identified with actions to mitigate their impact: Key themes from the consultation

Built environment

Older people are likely to find changes more difficult to cope with both physically and mentally in terms of changes in routine and to their care needs. The built environment may dictate some of these changes. The emphasis of the proposals is to reduce barriers to day activities for older people so that older people with care needs can remain involved in their local communities and pursue activities like other people. The proposals also have the potential for improved access to other health and social care services - through community based activities.

Whereas day care centres inadvertently tend to foster the stereotype that older people with care needs move into segregated settings to receive care and support, the new service model will provide a more flexible approach. For example; a wider range of activities in more socially inclusive settings will make it possible to support older people in different situations. Accessing these services may not depend on travelling to a centre.

The service will support older people in working out personalised activities plans and will be proactive in ensuring that older people benefit from the opportunities available through Self Directed Support arrangements.

Action: An assessment of every service user will be undertaken in accordance with the Assessment and Closure Protocol

Action: Minimise changes to routine

Action: Provide visits to new provision to lessen confusion

Location of premises

Changes to transport arrangements may be required and a longer journey time and/or different route could have an adverse effect. Also potential difficulties for those with high dependency needs if they choose mainstream services with less support for their disability, or are dependent upon less reliable support services (e.g. accessible transport is not available or unreliable). In addition potential difficulties for carers dropping off service users. There may also be concerns about loss of contact with friends etc.

Action: Give consideration to methods of ensuring continued contact between people, in line with the Assessment and Closure Protocol. Focus on local alternative provision

Action: Transport needs to form part of each current service user's assessment. Make more effective use of community transport.

Communication and Information

Some service users may not be able to make their own decisions, or may need 1-1 help in understanding the proposed changes through the use of independent advocacy. Also older people affected by age-related conditions or limited mental capacity will have to take on more control of their care than they would choose. Traditionally day services for older people have provided an important respite function for carers, providing them with a significant, regular and reliable break from caring. Even if day activities are organised in a different way the respite needs of carers must be considered.

Action: Clear and timely communication to all service users and carers, particularly that which provides information about alternative provision

Action: The impact on carers respite should be minimal as all current service users would be offered alternative day services, however in managing the change it is important to consider and engage with carers throughout.

Action: An assessment of every service user will be undertaken in accordance with the Assessment and Closure Protocol by qualified social workers to ensure that current, individual needs are properly understood. If they wish, individuals and their relatives/carers will be supported by their managers or a dedicated resource to seek appropriate alternative services following a reassessment of their needs and will be given comprehensive information on cost, quality and all alternatives in order to make an informed decision.

Customer care and staff training

Staff will play a lead role in understanding the concerns of service users, helping them understand the proposed changes and helping them make the right decisions for themselves. Staff will need to address issues, particularly for older people about having to adapt to a new environment, different staff, concerns for friendship groups, concerns over changes in routine and that their care needs will not be met by new staff and concerns over disruption to relationships/friendships.

Action: Provide appropriate support to staff through awareness raising events

Timing

There are proposals to change other Adult Social Care Services that affect older and disabled people

Action: Adult Social Care to ensure a joined up approach and effective coordination and communication of the various change programmes

Action: Provide service users and their carers with opportunities to let us know what impact all changes may have on them.

Cost

The proposals could negatively impact on carers who are reliant on the centres for respite from their caring role, and so may need to make other arrangements.

There is a risk that the changes to care provision could decrease economic well-being among older people as some users may be financially worse off as a result of a change to day care.

Action: Review carers access to respite to ensure that they are not negatively impacted upon

Action: Ensure that a full benefit and financial review is undertaken as part of service user assessments to ensure no financial detriment for individuals.

Actions to ensure mitigation is in place are outlined in the Equality Diversity and Integration Action Plan below

Equality, diversity, cohesion and integration action plan

(insert all your actions from your assessment here, set timescales, measures and identify a lead person for each action)

Action	Timescale	Measure	Lead person
An assessment team will be established to undertake assessments of service users in accordance with the Council's Assessment and Transitions Protocol (A&TP). This work will be overseen by an Assurance Group who will monitor and advise during the process.	In line with programme plan	<ul style="list-style-type: none"> • A stress free, managed and coordinated transition of service users to alternative day time activities • Minimised /eradicated risk to health and well-being of day centre users and carers brought on by move • The number of service users accessing alternative day time activities of their choice • The number of people satisfied with their alternative day time activity 	Programme Team
Give consideration to methods of ensuring continued contact between people, in line with the Assessment and Closure Protocol. Focus on local alternative provision	In line with programme plan	<ul style="list-style-type: none"> • Friendship groups maintained • Risk of social isolation removed • The number of service users able to transfer and remain within their local area where they have long established links 	Programme Team
Commissioning to take full account of equality issues and to ensure that the quality of services is consistent and of good quality.	In line with programme plan	Services commissioned by the Council will focus on quality of service to all diverse users.	Programme Team
Understand and address the low take-up of services by, and representation of, ethnic groups	In line with programme plan	The take-up of services by older people is relative to the ethnic make-up of the population of Leeds	Programme Team

Action	Timescale	Measure	Lead person
<p>Ensure that existing service users are matched to day activities that support their well-being and independence in friendship groups or independently within the wider community. Organise a timetable of 'taster' sessions in alternative services throughout the community with health, leisure and VCFS partners.</p>	<p>In line with programme plan</p>	<ul style="list-style-type: none"> • The number of day centre users accessing a wider range of activities in more socially inclusive settings • The number of day centre users supported to have personalised packages of care through personal budgets • Friendship groups maintained • Risk of social isolation removed • Service user profiling of all day centre users • Minimised confusion for older people • Minimised changes to routine • Individual care needs met 	<p>Programme Team</p>
<p>Ensure alternative community services are aware of the needs of service users with high dependency needs and disabilities. Consider access to specialist services in the city where appropriate</p>	<p>In line with programme plan</p>	<ul style="list-style-type: none"> • Improved access and increase in numbers of service users accessing community based health and social care services and activities • On-going provision of day services at day centres retained following phase 2 • Services provided by Neighbourhood Networks and Holt Park Active to consider access for people with high dependency needs 	<p>Programme Team</p>
<p>Ensure robust procedures are in place to identify and manage safeguarding concerns as they arise. All staff and volunteers to be trained in recognising and responding to safeguarding concerns</p>	<p>In line with programme plan</p>	<p>The provision of:</p> <ul style="list-style-type: none"> • Services that prioritise both safeguarding and independence • A well trained workforce operating in a culture of zero tolerance of abuse • A sound framework for confidentiality and information sharing across agencies good universal services, such as community safety services 	<p>Programme Team</p>

Action	Timescale	Measure	Lead person
		<ul style="list-style-type: none"> • Needs and risk assessments to inform people's choices • A range of options for support to keep safe from abuse tailored to people's individual needs 	
Increase the take-up of preventative services such as reablement and assistive technology which will ensure that more older people can remain living independently and safely in their own home	In line with programme plan	<ul style="list-style-type: none"> • Number of service users provided with /supported by preventative services • Number of service users exercising choice and personalised packages of care through personal budgets 	Programme Team
Further work undertaken to ensure that the range of universal and preventative services are developed to meet the needs and outcomes of people across all cultures and communities. This to be developed in partnership with a range of stakeholders in the statutory, voluntary and private sectors	In line with programme plan	Increased personalised services provided across all communities (due to reinvestment of resources freed up from the closure of day centres)	Programme Team
Focus on local alternative provision give consideration to the distance to travel to alternative day time activities	In line with programme plan	<ul style="list-style-type: none"> • The number of service users accessing day time activities in more socially exclusive settings within their own community • Reduction in the number of service users dependent on transport • Reduction in transport costs 	Programme Team

Action	Timescale	Measure	Lead person
All equalities considerations will be considered in the planning and commissioning of services. All services will be monitored to identify where there is disproportionate impact and action taken to understand and where appropriate address	In line with programme plan	The number of assessments undertaken to ensure that the individual needs of service users and carers are properly understood	Programme Team
Ensure that the assessment team and day centre staff are aware of the full range of alternative services available and that information is available in a range of formats	In line with programme plan	<ul style="list-style-type: none"> • Service users and their carers able to exercise choice and make informed decisions on the range of services available • Improved personalised services for older people and their carers, with improved outcomes • The number of day centre users who understand the changes and are able to make informed decisions 	Programme Team
Involve service users and carers fully in the decision making process when considering alternative services. Ensure carers receive regular information on the change process. Sign post to carer support networks	In line with programme plan	<ul style="list-style-type: none"> • The number of service users accessing day time activities of their choice • The number of people satisfied with their alternative day time activities • The number of carers accessing support networks 	Programme Team
Provide service users with an opportunity to let the Council know what impact the changes may have on them	In line with programme plan	The number of day centre users and carers reporting the impacts of the changes	Programme Team

Action	Timescale	Measure	Lead person
<p>Ensure that the Leeds City Council website contains a range of information relevant to all communities. Information should be available in a range of accessible formats and main community languages. Work should be undertaken to ensure information is available in locations that are appropriate for target communities. Involve communities and their representatives in identifying gaps.</p>	<p>In line with programme plan</p>	<p>Increase in take up of personalised, community based day time activities</p>	<p>Programme Team</p>
<p>Establish communication and information strategy about the day time activities and explore and promote opportunities and activities in local communities in order to improve choice and facilitate access. This to be integrated as part of an overall approach to information so that the message about ASC day services fits with wider messages about personalisation and promoting independence</p>	<p>In line with programme plan</p>	<p>Increase in take up of personalised, community based day time activities</p>	<p>Programme Team</p>

Action	Timescale	Measure	Lead person
Continue dialogue and negotiations with stakeholders and interest groups with regard to future building use.	In line with programme plan	The number of decommissioned buildings retained for community use	Programme Team
Ensure that a full benefit and financial review is undertaken as part of service user assessment to ensure no financial detriment	In line with programme plan	<ul style="list-style-type: none"> • No service users financially disadvantaged as a result of changes • The number of service users supported to receive personal budgets 	Programme Team

Governance, ownership and approval
