2011 Census of Population

Outer East

The Big Picture

The Census is completed every ten years and is the largest piece of social research undertaken in the country. It has always been considered a rich and valuable source of information and represents a "gold standard" in terms of population statistics.

The Census tells us how many people live where and provides valuable information on the make-up of local communities, covering issues such as health, housing, employment, skills levels and transport.

It provides the basis for central and local government, health authorities and many other organisations to target their resources and to plan housing, education, employment, health, transport and other services for years to come.

The Census took place on 27 March 2011. It was conducted on a resident basis, and the statistics relate to where people usually live, rather than where they were on Census night. Students who were studying away from home during the term were enumerated at their term-time address.

ONS achieved its target response rate of 94% in England and Wales and at least 80% in every local authority area. The response rate for Leeds was 94% which is better than was achieved in 2001.

The information contained in this pack is based on the data which was published by the Office for National Statistics on 30 January 2013. It is arranged by the following themes and, where possible, includes comparisons to the 2001 Census:

- Demographic Profile
- Housing Profile
- Household Compositions
- Economy Profile
- Lifelong Learning Profile
- Health and Wellbeing Profile

The Outer East area is comprised of four electoral wards:

- Cross Gates & Whinmoor
- Garforth & Swillington
- Kippax & Methley
- Temple Newsam

Individual ward profiles have also been produced in the same format as this document and are available on the Leeds Observatory.

www.westyorkshireobservatory/leeds

*Source: All data has been supplied by the Office for National Statistics (ONS). While every care has been taken to ensure the accuracy of the data, it is provided only on condition that Leeds City Council **cannot** be held responsible for any error, omission or misrepresentation whether negligent or otherwise.*

2011 Census of Population

Demographic Profile

This section contains information on:

- Age and gender
- Population density
- Ethnicity and nationality (including passports held)
- Household language
- Religion

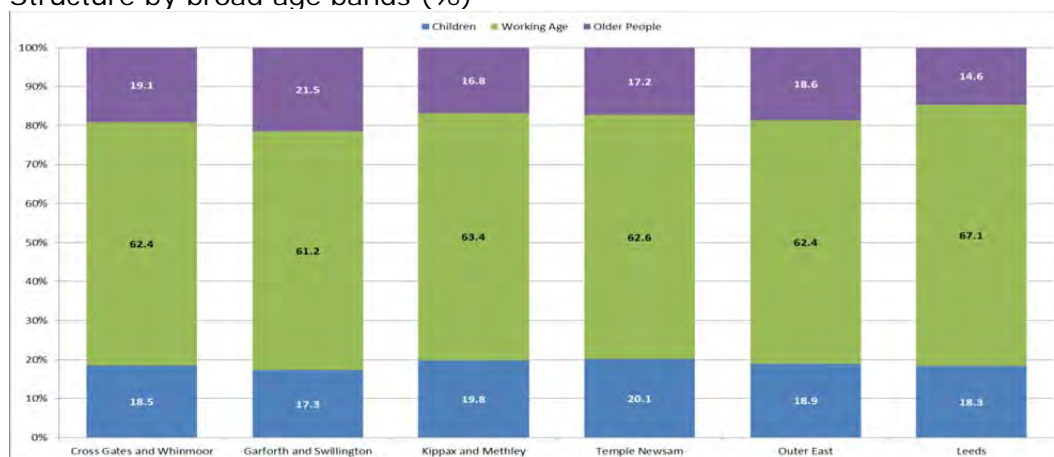

ONS has also published detailed tables on "Country of Birth", "Ethnic Group", "Language" and "Religion" and this information is produced in full in the appendices. A table showing the population by single year of age is also included in the appendices.

Some of the key things to note

Age and gender

- The Census shows that there are 84,569 people living in the area, of which 51.7% are female and 48.3% are male
- The age breakdown shows that the area has a lower proportion of people in the 20-29 age band than is average for the city (10.9% compared to 17.5%)
- The area has higher proportions of people in the 45-59 age band (20.1% compared to 17.7%) and in the age bands from 60 years upwards (25.3% compared to 19.9%)
- Children and young people (aged 0-15 years) account for 18.9% of the population, slightly higher than the city average of 18.3%

Structure by broad age bands (%)

Population density

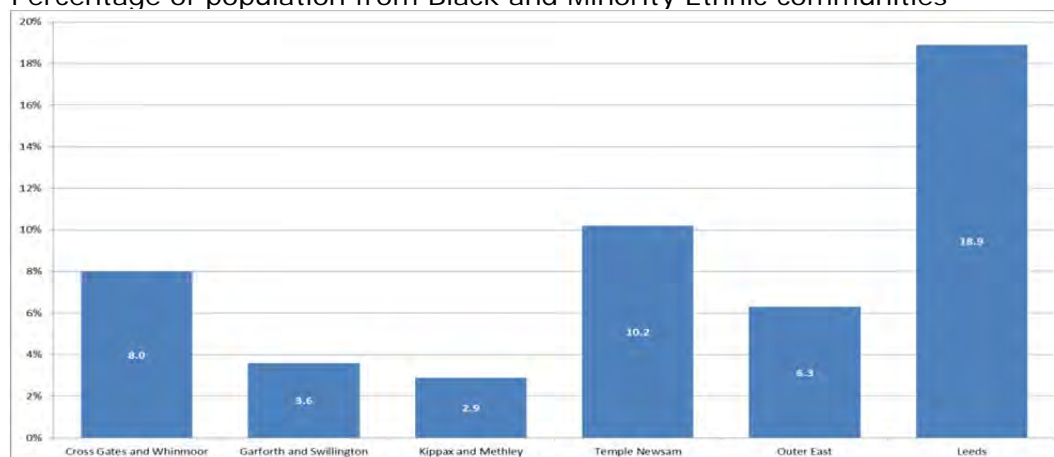

- There are 8.6 people per hectare (pph) in the area, compared to a city population density of 13.6 pph

Ethnicity and nationality

N.B. The 2011 Census question on ethnic group included two new tick boxes for "Gypsy or Irish Traveller" and "Arab". The "Chinese tick box was also repositioned from "any other ethnic group" to "Asian / Asian British". These changes affect the comparability of some data and care should be taken when interpreting these results.

- 95.7% of the population gave their ethnic origin as "White" (higher than the city average of 85.1%)
- 93.7% of the population in the area are "White British" and 6.3% are from Black and Ethnic Minority (BME) communities, much lower than the city BME rate of 18.9%
- Proportionately, the BME population in the area has increased from 3.4% in 2001 to 6.3% in 2011
- No "single" BME community in the area accounts for more than 0.9% of the resident population, but there are 974 people (1.2%) in the category of "Other White"
- 1,530 households in the area have members from different ethnic group

Percentage of population from Black and Minority Ethnic communities

- 95.8% of the population in the area were born in the UK (compared to a city average of 88.5%)
- The number of residents born outside of the UK has increased from 2,280 (2.7% of the population) in 2001 to 3,572 (4.2%) in 2011, with 1,499 people being born in the EU and 2,073 born elsewhere
- 45.3% of the 3,572 people born outside the UK arrived in the last 10 years (lower than the rate for Leeds as a whole which shows more than half arriving in the last 10 years)
- 58.3% of foreign born usual residents were between the ages of 16 and 44 when they arrived in the UK and 38.3% were aged 15 or younger

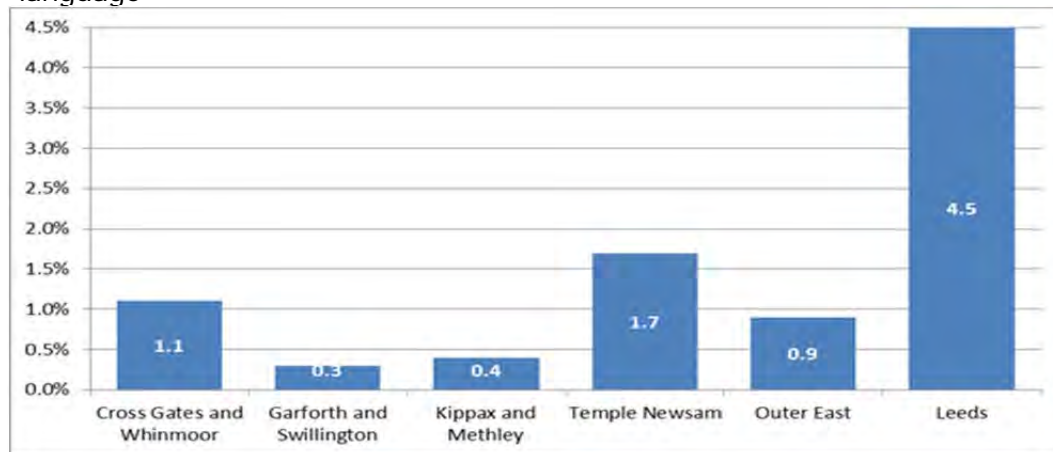

Percentage of resident population born outside the UK and arriving in this country between 2001 and 2011

Household language

- In 94 households no adults but at least one child spoke English as a main language, and in 326 households there were no residents who spoke English as a main language

Percentage of households where no-one in the household has English as a main language

Religion

- 67.6% of people in the area say they are Christian (higher than the city average of 55.9%), but the proportion of people who say they have no religion is lower (24.2% and 28.2% respectively)
- Across the city the number of people who stated that their religion was Christian has fallen, and this is reflected in the area where the rate has fallen from 79.7% in 2001 to 67.6% in 2011
- No other major faith group in the area accounts for more than 0.9% of the population

Notes:

1. Comparability issues exist between these categories for the 2001 and 2011 Census
2. No comparable data exists for these ethnic groups in 2001 Census

2011 Census of Population

Housing Profile

This section contains information on:

- The usually resident population living in households
- Accommodation type
- Tenure
- Number of rooms and bedrooms
- Central heating

Some of the key things to note

The usually resident population living in households

- There are 37,026 household spaces in the area of which 36,076 are occupied by at least one usual resident
- The number of households with at least one usual resident has increased from 35,060 in 2001 to 36,076 in 2011
- The average household size is 2.3 persons (mirroring the city average)

Accommodation type

- "Whole houses" or bungalows account for 90.6% of all households in the area, (city average is 78.1%), however there are significantly more detached and semi-detached properties (69.1% compared to 51.4%), and proportionately fewer terraced houses (21.6% compared to 26.7%)
- The area has a much lower proportion of households living in flats / maisonettes / apartments than is average for the city (9.4% compared to 21.9%)

Housing Stock (%)

Tenure

- 72.4% of occupied households in the area are "owner occupied", compared to 58.6% for the city, although the rate for owner occupation has fallen slightly from 73.5% in 2001 (overall the city has also seen a decrease in owner occupation)
- 26.3% of occupied households in the area are rented, much lower than the city average of 39.9%

- The proportion of households living in rented accommodation has stayed broadly the same over the last decade (across the city there has been a slight increase)
- The proportion of households that are renting from the local authority (through an ALMO) has fallen from 18.6% in 2001 to 14.2% in 2011
- The proportion renting from a housing association or other RSL has increased from 2.3% in 2001 to 3.5% in 2011, but the proportion renting from a private landlord or letting agency has more than doubled (from 3.1% to 7.8%)

Housing Tenure (%)

Rooms and bedrooms

This includes a measure of whether a household's accommodation is overcrowded or under occupied. There are two measures of occupancy rating, one based on the number of rooms in a household's accommodation, and one based on the number of bedrooms. The ages of the household members and their relationships to each other are used to derive the number of rooms/bedrooms they require. This is subtracted from the number of rooms/bedrooms in the household's accommodation to obtain the occupancy rating. An occupancy rating of -1 implies that a household has one fewer room/bedroom than required, whereas +1 implies that they have one more room/bedroom than the standard requirement.

- The average number of rooms per household in the area is 5.4, compared to a city average of 5.2
- The average number of bedrooms per household is 2.8, (city average 2.7)
- Based on rooms, 4.4% of households in the area (1,585) are deemed to be overcrowded, compared to 9.1% the city
- Based on bedrooms, 2.5% of households (918) are deemed to be overcrowded, compared to a city average of 3.8%
- The proportion of households deemed to be overcrowded has not changed since 2001 (across the city the rate has increased from 7.8% in 2001 to 9.1% in 2011)

Central heating

- 96.8% of households have central heating (compared to a city rate of 94.7%) with the majority (85.9%) having gas central heating
- The proportion of households without central heating has fallen dramatically from 12.4% in 2001 to 3.2% in 2011

2011 Census of Population

Household Composition

This section contains information on:

- Living arrangements
- Marital and civil partnership status
- Household composition
- Lone parent households

Some of the key things to note

N.B. The 2011 Census collected information on civil partnerships for the first time, reflecting the Civil Partnership Act 2004 which came into effect in the UK on 5 December 2005.

Living arrangements

- In the area 61.8% of all adults live in a couple and 38.2% do not, this compares to city rates of 54.2% and 45.8% respectively
- The proportion of people living in a couple has fallen from 65.3% in 2001 to 61.8% in 2011

Marital and civil partnership status

- Married people account for 50.7% of adults in the area, higher than the city rate of 41.5%
- 0.1% of adults are in a registered same-sex civil partnership (city average 0.2%)
- 29.9% of adults are single (never married or never registered in a same-sex civil partnership), lower than the city rate of 40.8%

Household composition

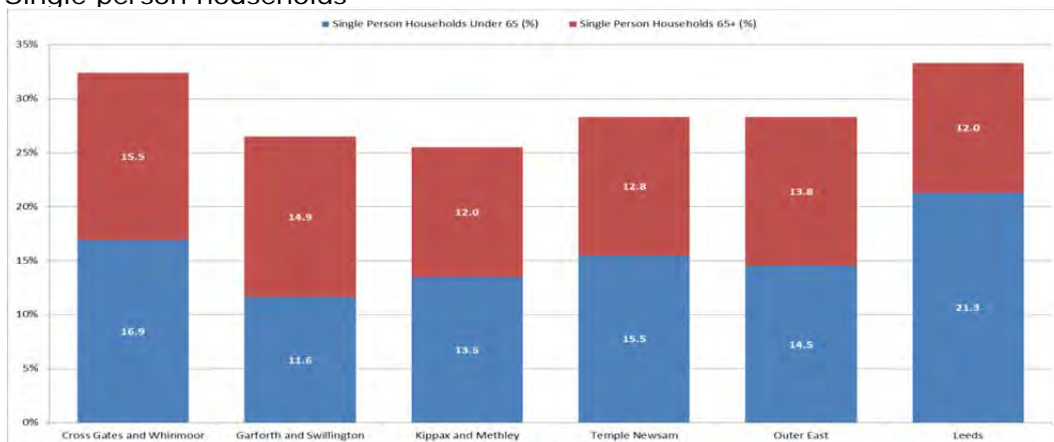

- 28.3% of all households in the area are occupied by people living on their own, (city average is 33.3%)
- The proportion of single person households has increased from 25.7% in 2001 to 28.3% in 2011
- 24.2% of households consist of pensioners only (compared to 19.1% for the city), and of the 8,718 pensioner only households in the area 4,988 are occupied by a lone person (13.8% of all households in the area)
- 29.4% of all households in the area contain dependent children, and 11.4% contain children under 5 years of age, compared to the city averages of 27.6% and 11.7% respectively

Lone parent households

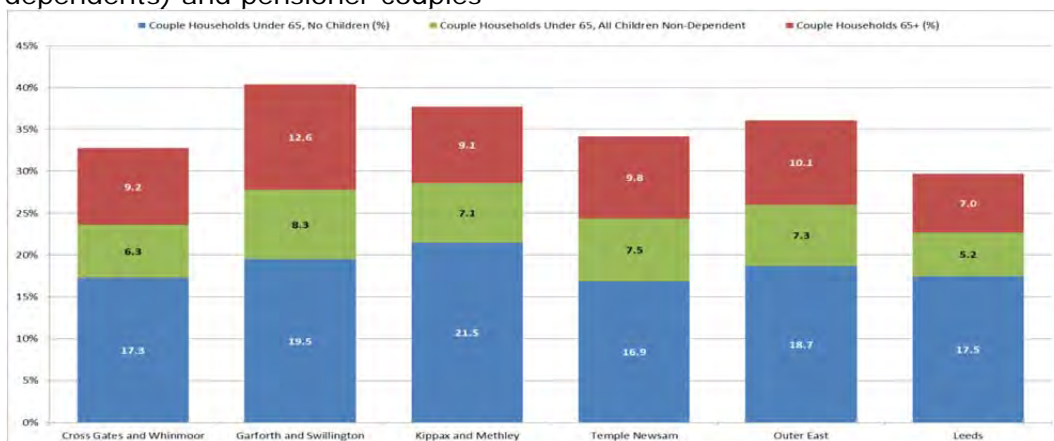

- 4,013 households in the area are headed by a lone parent (11.1%), broadly in line with the city average of 10.9%
- The proportion of lone parents has increased from 8.8% in 2001 to 11.1% in 2011
- 90.7% of lone parent families with dependent children are headed by a female

- In the area, 66.7% of lone parent households with dependent children are headed by a parent in full or part-time employment (compared to 55.9% in 2001)

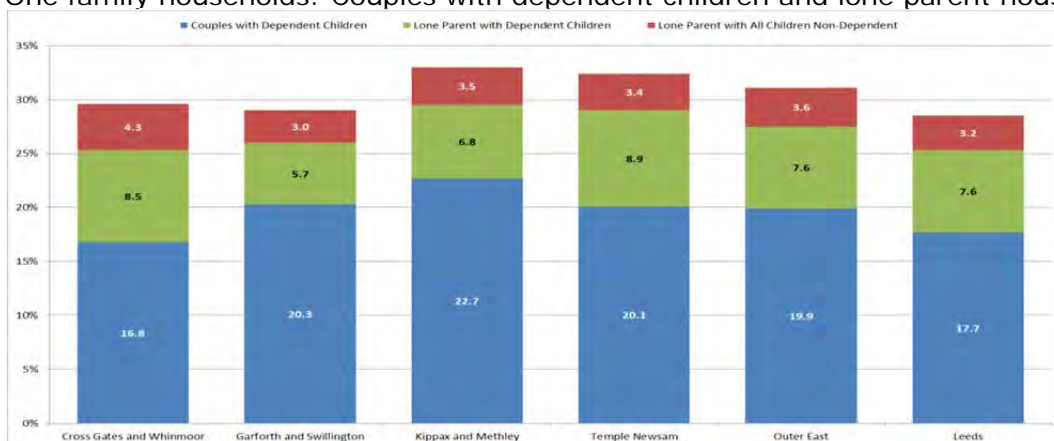

Single person households

One family households: Couples (with no children or where all children are non-dependents) and pensioner couples

One family households: Couples with dependent children and lone parent households

Notes:

1. The category "In a registered same-sex civil partnership" was not available in the 2001 Census
2. Re-married is not included in the 2011 Census release.
3. In the 2001 Census, a 'pensioner' was defined as a male aged 65 and over, or a female aged 60 and over.

2011 Census of Population

Economy Profile

This section contains information on:

- Economic activity
- Hours worked
- Occupation groups
- National Statistics socio-economic Classification (NS-SeC)
- Industry of employment
- Car or van availability

The data relating to economic activity and employment has also been published by gender and separate "economy profiles" for males and females have also been included in this section.

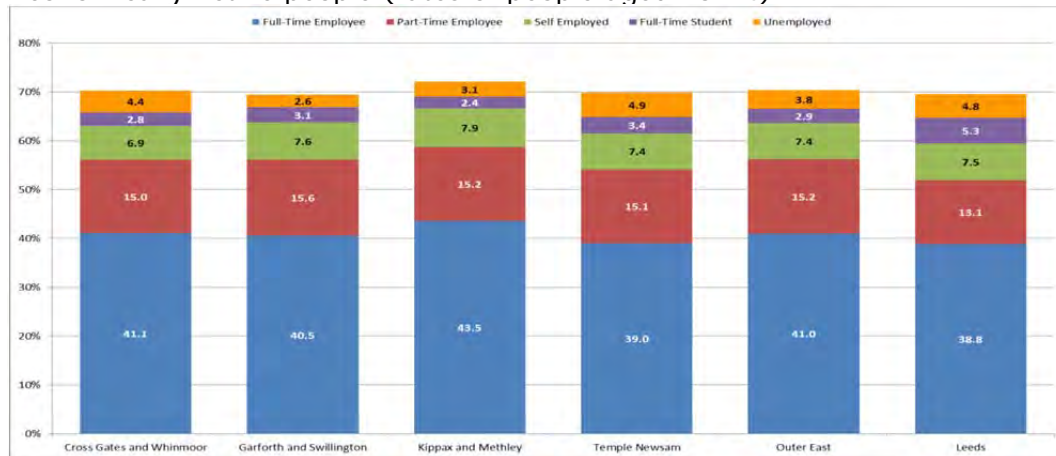

N.B. ONS advises that economic activity data as collected by the 2011 Census is not directly comparable with 2001 due to factors that include changes in the underlying classification and improvements in the questions on the census questionnaire. ONS will publish analysis in 2013 to explain how these estimates have changed in the ten year period.

Some of the key things to note

Economic Activity

- In the area, 70.4% of people aged 16-74 are economically active, slightly higher than the city rate of 69.5%, and the breakdown is slightly different with the area having a higher proportions of employees and lower proportions of both self-employed people and full-time students
- The economically active rate for males is 74.8%, while the rate for females is 66.2%
- 9,350 people aged 16-74 are in part-time employment, of which 7,819 are women and 1,531 are men
- At the time of the 2011 Census 3.8% (2,320 people) of the population aged between 16 and 74 was unemployed (compared to 4.8% for the city)
- Of the 2,320 people who were unemployed:
 - 1,469 are male and 851 are female
 - 896 are long term unemployed (533 men and 363 women)
 - 345 have never worked (681 men and 532 women)
 - 1,389 are aged 16-24 (228 men and 117 women)
 - 736 are aged 50 and over (487 men and 249 women)

Economically Active people (rates of people aged 16-74)

Year last worked

- Of the 20,915 people in the area aged 16-74 and not in employment, 3,463 have never worked, 5,956 last worked before 2001 and 3,838 last worked in 2001-2005

Hours worked

- In the area there were 40,510 people aged 16-74 in employment in the week before the census, of which
 - 3,312 (8.2%) worked 15 hours or less per week
 - 8,373 (20.7%) worked between 16-30 hours per week
 - 24,691 (61%) worked between 31-48 hours per week, and
 - 4,134 (10.2%) work 49 or more hours per week

Occupation Groups

- In the area 34.9% of the people aged 16-74 in employment work in managerial and professional / associate professional occupations, compared to a city rate of 41.1%
- The occupation with the highest number of respondents was the "administrative and secretarial" (5,673 people, 14%) while "process, plant and machine operatives" had the lowest number (3,037, 7.5%)

Industry of Employment

- In the area the "wholesale and retail trade; repair of motor vehicles" was the largest employer of the 16-74 age group, with 6,538 (16.1%) of employed usual residents working in this sector, this was followed by "human, health and other social work activities" (5,636, 13.9%) and "manufacturing" (3,980 people, 9.8%)

Car or van availability

- The number of cars or vans available to households in the area increased from 36,496 in 2001 to 40,440 in 2011
- 25.1% of households have no car or van, compared to 32.1% for the city, with the proportion of households without a car or van falling from 27.7% in 2001
- 45% of households have one car or van, a slight decrease from 2001 (45.8%), but higher than the city average of 41.6%

- The number of households with access to more than one car or van has increased from 26.5% in 2001 to 30% in 2011, higher than the city average of 26.4%

Households with no access to a car or van (%)

Method of travel to work

The following graph shows the method of travel used for the longest part, by distance, of the usual journey to work. This topic is only applicable to people who were in employment in the week before the census. For the purpose of this analysis the "travel to work" options have been grouped as follows:

Private Transport: driving a car or van; passenger in a car or van; motorcycle, scooter or moped

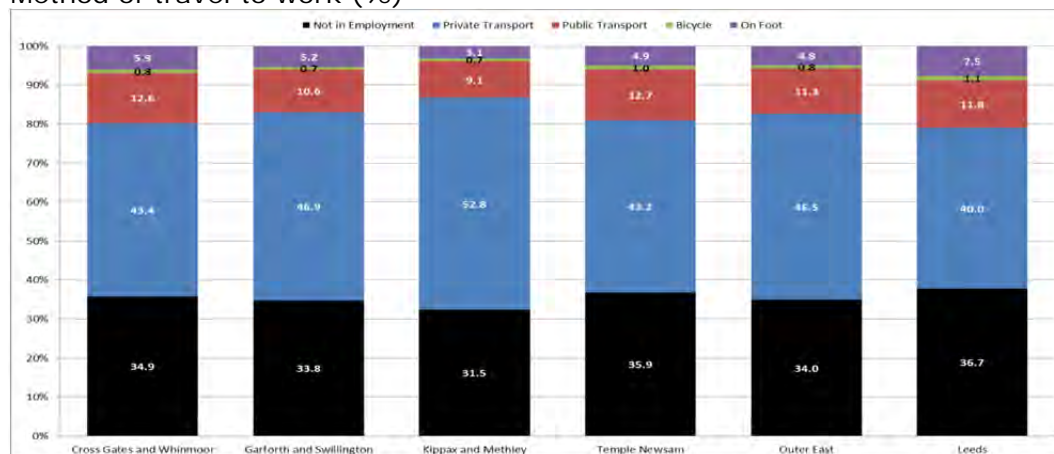

Public Transport: bus, minibus or coach; train; underground, metro, light rail, tram; taxi

Bicycle

On foot

- Driving a car or van is still the most popular method of travelling to work with 41.6% of people in the area (aged 16-74) choosing this method (compared to a city rate of 35.9%)

Method of travel to work (%)

2011 Census of Population

Lifelong Learning Profile

This section contains information on:

Highest level of qualification

Full-time students and school children (post 16)

ONS advises that some of the qualifications data are not directly comparable with 2001. This is due to a number of factors including changes in the level assigned to some qualifications, and the addition of a foreign qualification tick-box. A comparison table has been included with this section but care must be taken when interpreting this data.

Some of the key things to note

Highest level of qualification

- 27.3% of adults in the area have no qualifications, compared to 23.2% across the city
- 14.4% of adults have level 1 qualifications (1-4 GCSEs or equivalent), compared to a city rate of 12.6%
- 16.8% of adults have level 2 qualifications (5 GCSEs or equivalent), compared to a city rate of 14.1%
- 5.6% of adults have an apprenticeship compared to a city rate of 3.7%
- 12.1% of adults have level 3 qualifications (2 or more A-levels or equivalent), compared to a city rate of 14.7%
- 19.9% of adults have level 4 or above qualifications (Bachelor's degree or equivalent, and higher qualifications), compared to a city rate of 26.9%
- 4% of adults have other qualifications (including foreign qualifications), compared to a city rate of 4.7%

Qualification levels (%)

Full-time students and school children (post 16)

- In the area there are 1,896 young people aged 16-17 who are in full-time education
- There are 1,993 full time students aged 18 and over living in the area, 2.9% of the usual residents aged 16 or over (compared to a city rate of 9.7%)

Notes:

1. In the 2001 Census, "Aged 16 and over" was defined as "Aged 16-74"
2. The qualification category "Apprenticeship" was not included in the 2001 Census.
3. In the 2001 Census, "Aged 18 and over" was defined as "Aged 18-74"

2011 Census of Population

Health and Wellbeing Profile

This section contains information on:

- Limiting long-term illness
- General health
- Provision of unpaid care
- Communal establishments

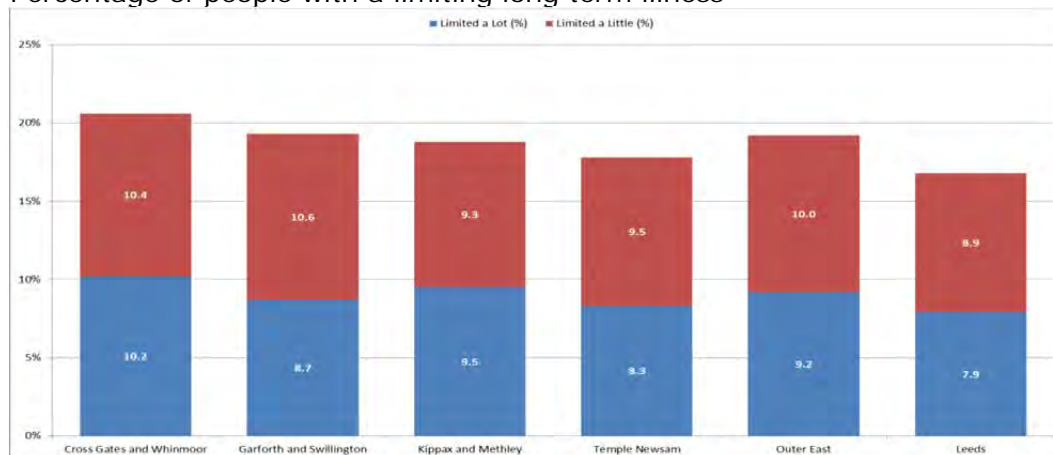

Some of the key things to note

Limiting long-term illness

N.B. In 2011, those reporting a long-term health problem or disability (including those related to age) that limited their day-to-day activities and that had lasted, or was expected to last, at least 12 months, were asked to assess whether their daily activities were limited a lot, a little or not at all by such a health problem. In 2001 the limiting-long term illness response categories were just "yes" or "no". To compare 2001 and 2011, the 2011 results for "yes, limited a lot" and "yes, limited a little" have been combined into a single "yes" response.

- 16,198 people in the area (19.2% of the total population) feel that they have a limiting long-term illness, higher than the city average of 16.8%
- Of these people, 7,771 (9.2% of the total population) feel that their day-to-day activities are limited a lot and 8,427 (10% of the total population) feel their day-to-day activities are limited a little
- 7,019 people of working age (16-64 years) have a limiting long-term illness
- 26.9% of all households contain one or more people with a limiting long-term illness
- The number of people reporting limiting long-term illness has fallen from 16,499 in 2001 to 16,198 in 2011

Percentage of people with a limiting long term illness

General Health

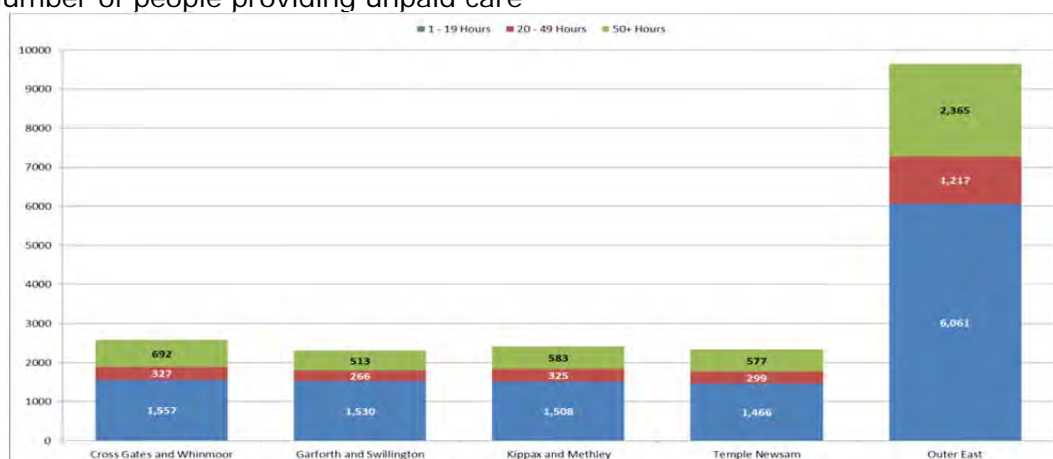

N.B. In 2011 residents were asked to assess their general state of health on a five point scale: very good, good, fair, bad or very bad. This was not a new question in 2011 but its structure has changed. In 2001 it was based on a three point scale: good, fairly good or not good. The findings are therefore not directly comparable. For example, some people recording their health as 'fair' in 2011 might have said 'fairly good' using a 2001 scale but some might have said 'not good'.

- 6% of all people in the area feel that their general health is "bad" or "very bad", compared to a city average of 5.4%
- 14.1% of people feel that their general health is "fair", compared to 12.7% for the city
- 79.9% of people feel that their general health is "good or very good", compared to 81.9% the city

Provision of unpaid care

- 9,643 people in the area (11.4% of the total population) are providers of unpaid care, with 2,365 people providing care for 50 or more hours per week
- The proportion of people in the area providing unpaid care is higher than the city rate of 9.5%
- The proportion of people who are providers of care has stayed broadly the same over the decade

Number of people providing unpaid care

Communal establishments

Communal establishments provide managed residential accommodation such as; sheltered accommodation units; student halls; large hotels; hospitals and prisons. A detailed breakdown of all communal establishments and the number of residents in each is included in the appendices.

- The Census identified 471 communal establishments in Leeds of which 35 are in this area
- 400 people in the area live in communal establishments, and the majority of these (375 people) live in care homes
- The number of people living in communal establishments has fallen from 556 in 2001 to 400 in 2011

2. The 2011 Census contains a more detailed breakdown of "Medical and care establishments : NHS"

2011 Census of Population

Households by Deprivation Dimension

The 2011 Census provides a table that classifies households by deprivation dimension. The dimensions of deprivation are indicators based on the four selected household characteristics:

- Employment (any member of a household not a full-time student is either unemployed or long-term sick)
- Education (no person in the household has at least level 2 education, and no person aged 16-18 is a full-time student)
- Health and disability (any person in the household has general health 'bad or very bad' or has a long term health problem), and
- Housing (Household's accommodation is ether overcrowded, with an occupancy rating -1 or less, or is in a shared dwelling, or has no central heating)

A household is classified as being deprived in none, or one to four of these dimensions in any combination.

The data shows that in this area:

- 41.8% of households are not deprived in any dimension (compared to 41.7% for the city as a whole)
- 32.7% are deprived in respect of one of the above dimensions (compared to 32.2% for the city as a whole)
- 20.4% are deprived in respect of two of the above dimensions (compared to 19.5% for the city as a whole)
- 4.7% are deprived in respect of three of the above dimensions (compared to 5.9% for the city as a whole), and
- 0.4% are deprived in respect of all four of the above dimensions (compared to 0.7% for the city as a whole)
