

**Leeds Strategic Housing Land Availability
Assessment Update 2014**

Main Report

1. Background

- 1.1. Preparation of a SHLAA and regular updates is a requirement of the National Planning Policy Framework (NPPF). The SHLAA provides essential evidence to inform the local plan making process. It should be noted that SHLAAs only identify potential land; it is the job of local plans to decide which land is actually made available for development.
- 1.2. The first non-draft version of the National Planning Policy Guidance (NPPG) was published during preparation of this SHLAA Update. As set out in the methodology section below, it is considered that this SHLAA Update accords with both the NPPF and the latest NPPG.
- 1.3. The previous SHLAA – the 2012 SHLAA Update – works to a base date of 1/4/2012. This Update was originally intended to work to a base date of 1/4/2013, but due to the time taken to prepare, it now works to a base date of 1/4/2014.

2. National Guidance

- 2.1. One of the changes to the national guidance introduced by the NPPG was the expectation for SHLAAs to include sites as small as 5 dwellings (Methodology Stage I). Leeds' previous SHLAA used the following size threshold: 0.4ha with the exception of sites with planning permission (down to 0.2ha) and sites in the city centre (any size). Even with this approach, Leeds' SHLAA had more than 1000 sites identified. It is considered that to lower the threshold down to 5 dwellings would make Leeds' SHLAA unmanageable. The sheer scale of Leeds and the number of sites involved provides good reason to depart from this aspect of national guidance. It should be noted that the NPPG also states:

“Plan makers should have regard to the guidance in preparing their assessments. Where they depart from the guidance, plan makers will have to set out reasons for doing so. The assessment should be thorough but proportionate, building where possible on existing information sources outlined within the guidance.”

- 2.2. In the section “Who should plan makers work with” the NPPG expects SHLAA to be prepared, from the outset, with involvement of a range of interest groups, housebuilders etc. As can be seen below, LCC has sought to involve a broad range of relevant stakeholders, including in the methodology, terms of reference and overall approach.

- 2.3. Leeds' SHLAA is broad enough to cover the full range of types of site listed in the NPPG. There are sites with planning permission, allocated sites, urban brownfield sites, surplus land, green field and Green Belt sites.
- 2.4. In accordance with the NPPG, Leeds' SHLAA seeks to understand the Suitability, Availability and Achievability of sites and to understand where constraints exist and need to be overcome to help boost housing supply. In particular, this Update focuses on the deliverability of urban brownfield sites that may have been in the SHLAA since 2009 without being re-assessed.

3. Preparation

SHLAA Partnership and Terms of Reference

- 3.1. In spring 2013 LCC set about re-assembling the SHLAA partnership. The three previous housebuilder representatives were unable to continue, so the HBF was invited to suggest new members. LCC specifically sought involvement of a developer with knowledge of urban brownfield development and involvement of Leeds Civic Trust. Organisations previously involved – Re'new, CPRE and the Leeds Property Forum – fielded new representatives. The Homes and Communities representative continued to be engaged. LCC also sought to improve the representation of communities by replacing the single Parish Councillor with three City Councillors representing each of the three main political parties in Leeds. The partnership continued to be chaired by a city councillor. Hence, the overall balance of the partnership was as follows:

Volume house builders	4
Urban developer	1
Re'new	1
Civic Trust	1
Homes and Communities Agency	1
City Councillors (including Chair)	4
CPRE	1
Leeds Property Forum	1
LCC supporting officers	7

- 3.2. The first meeting of the partnership agreed new Terms of Reference (appendix 1) setting out the roles, responsibilities and code of conduct for the partnership.

Project Methodology

- 3.3. LCC drew up a draft project methodology (Appendix 2) which was circulated in June 2013 and agreed at the first partnership meeting in December. Having regard to the new context of national policy/guidance, it was agreed that the SHLAA Update should be fairly comprehensive and seek to review deliverability of sites in the 2012 SHLAA as well as consider new sites. A thorough review was necessary to help inform Leeds' 5 Year Supply position, which was being tested in relation to Section 78 appeals. The methodology sought to "chunk up" to assessment into categories of sites which are summarised below.
- 3.4. It was agreed that LCC would supply lists of sites to the SHLAA partnership in advance of meetings seeking views. Before looking in detail at individual sites the partnership considered the context for reaching conclusions on deliverability. The conservatism of volume house builders in their build-out-rates was considered. With an exacting housing requirement of 74,000 dwellings up to 2028 LCC needs builders to be more confident about rates of building. The health of the housing market was also considered. The partnership as a whole agreed that the market is moving from recession to more buoyant conditions, aided by Government house buy incentives and an improving economy. House builder representatives talked of "cautious optimism". LCC felt there is cause to be more optimistic about the housing market delivering sooner on a broad range of sites.
- 3.5. LCC wanted evidence of achievability to be robust. In particular, LCC wanted partnership members to volunteer their evidence of deliverability up front; LCC sought clarity from house builder representatives on whether their comments on deliverability come direct from one of their members being involved with a site or whether they are providing a general housebuilder opinion.
- 3.6. A chronology of how the assessment of sites was progressed through the SHLAA Partnership is set out in Appendix 3.
- 3.7. As a parallel exercise to the SHLAA Update, LCC commissioned independent consultants to appraise the viability of a number of urban sites. The results of this will come too late to inform the initial results of the SHLAA Update, but may be incorporated at a later stage.

4. Categories of Sites for Assessment

Stage I

- 4.1. Stage I sites are those with planning permission and which had been subject to a change in commencement or completion status. An initial list of Stage I sites was generated in June 2013 with a base date of 1/4/2013. However, by the time this was circulated to the SHLAA partnership in December 2013 there was uncertainty over dwelling deliveries and site completions during the 2013/14 year. Hence, it was decided to re-issue the Stage I list refreshed to a 1/4/2014 base date. This also included LCC feedback from landowners/agents for the 22 sites yet to complete where the HBF SHLAA representatives had said they were not directly involved.
- 4.2. The housebuilder representatives were given the refreshed list shortly before the SHLAA partnership meeting of 7/5/14. Suitability and availability is generally not in doubt on these sites because they have extant planning permission. Achievability is not in doubt either, except for the build-out-rates of one or two very large schemes (in excess of 150 dwellings in the 5 Year period) and for some of the schemes which have yet to commence.

Stage II

- 4.3. Stage II sites are those which had dwelling delivery in the first 5 years of the 2012 SHLAA, but excluding those sites in Stage I and excluding greenfield allocations, PAS land, Green Belt and similar sites. A table of these sites was circulated to SHLAA partnership in January 2013 with blank fields for members to suggest dwelling delivery and reasons. Site-by-site consideration of dwelling deliveries proved to be too time consuming for Partnership meetings, so LCC officers were instructed to meet HBF representatives separately to reach as much agreement as possible. There is much divergence on these sites between LCC and HBF principally over the level of optimism of urban brownfield sites commencing sooner rather than later. Nevertheless evidence has been assembled to help inform judgements on "Suitability", "Availability" and "Achievability" including soft market tests: state of the site (cleared, vacant, occupied?), level of recent planning interest (pre-application enquiries, applications submitted etc?), strength of local market area and whether there are any regeneration initiatives. Ultimately, the results of the viability study may inform this further. Conclusions on expected site dwelling delivery are set out to show clearly where there is consensus and HBF delivery conclusions are set separately where they are different from those of LCC.

Nb Stage III of the methodology concerns the assessment process of sites in Stages I and II; it does not comprise a separate list of sites.

Stage IV

- 4.4. Stage IV concerns sites which had dwelling delivery in the medium and long term of the 2012 SHLAA, excluding greenfield allocations, PAS land, Green Belt and similar sites. These were circulated to the HBF members of the SHLAA partnership shortly before the partnership meeting of 7/5/14. There is divergence between LCC and HBF over the extent to which many of these sites warrant being brought forward into the first 5 years.

Stage VI (Aire Valley)

- 4.5. Stage VI concern sites within the jurisdiction of the Aire Valley Leeds Area Action Plan. This area includes part of Leeds city centre around the South Bank, East St, Hunslet Road and stretches out through Richmond Hill, Stourton to the Junction 45 of the M1 motorway. These were circulated to the HBF members of the SHLAA partnership shortly before the partnership meeting of 7/5/14. There is general consensus on delivery of these sites but some divergence.

Remaining sites

- 4.6. The remainder of sites including UDP Green Field Allocations, Protected Area of Search (PAS), Green Belt and similar sites have not needed to be as extensively investigated. The assumption that green field sites will be “available” now or very soon **if** released for development is the general starting point. Feedback from SHLAA partnership members on any sites that lack “availability” will help LCC determine appropriate phasing of release through the Site Allocations Plan.
- 4.7. PAS sites distinguish between those which comply with LCC’s interim PAS release policy which can be developed now and those that do not comply which are considered premature ahead of the Site Allocations Plan.
- 4.8. There are a large number of Green Belt sites in the SHLAA. In the earlier versions of the SHLAA, Green Belt sites were systematically given a long term delivery. However, many of these sites will not be supported for development by the Site Allocations Plan. The choice of which sites to take out of the Green Belt is a matter for the Site Allocations Plan. Hence, this SHLAA Update does not attempt to apportion Green Belt site dwelling delivery to any time period. Instead, their suitability is concluded “LDF to Determine” and dwellings attributed to a category of “Potential Capacity”

without any timing. “Availability” is assumed to be immediate unless specified.

Miscellaneous

- 4.9. A list of miscellaneous changes is provided which merely reflects corrections and changes of which LCC has been notified.

New Sites

- 4.10. Some 180 new sites have been added to the SHLAA Update. There was no formal “Call for Sites” specifically for this Update, but there have been two “Calls for Sites” in the past, and the LCC website has instructions and forms permanently available for anyone who wants to submit a site. Also, the Issues and Options consultation on the Site Allocations Plan (summer 2013) helped to identify a lot of new sites that now need to be included in the SHLAA.
- 4.11. LCC produced two tables of new sites. The first circulated in March 2013 with blank fields for partnership members to suggest dwelling delivery and reasons. With no responses received, LCC then circulated a second table with LCC’s conclusions on Suitability, Availability and Achievability and summaries of evidence gathered regarding planning interest. This was circulated shortly before the partnership meeting of 7/5/14. Of particular importance are the categories of Availability of the sites. Their level of Availability is discernible from the source of identification: those stemming from active planning interest, from owners submissions, from LCC asset management service and from LCC’s regeneration service can be assumed to be Available. The Availability of those from other sources is more questionable, including residents who made site suggestions through their comments on the Site Allocations Plan Issues and Options consultation.
- 4.12. A number of new Green Belt sites have been suggested. As the SHLAA Update does not attempt to apportion Green Belt site dwelling delivery to any time period, their suitability is concluded “LDF to Determine” and dwellings attributed to a category of “Potential Capacity” without any timing. “Availability” is assumed to be immediate unless specified.

5. Results

5.1. The headline results of the Update are set out here.

Leeds City Council Totals		
Period	Years	Dwellings
Short (5 Years)	2014/15 – 2018/19	22625
Medium	2019/20 – 2023/24	51547
Long	2024/25+	57610
Green Belt Potential	LDF to Determine	37250
Total		169032

House Builder Totals		
Period	Years	Dwellings
Short (5 Years)	2014/15 – 2018/19	5815
Medium	2019/20 – 2023/24	3139
Long	2024/25+	7154
Green Belt Potential	LDF to Determine	234
Total		16342

5.2. Lists of the sites making up the dwelling delivery are set out after Appendix 3.

Appendix 1

LEEDS STRATEGIC HOUSING LAND AVAILABILITY ASSESSMENT

TERMS OF REFERENCE FOR THE PARTNERSHIP GROUP

DECEMBER 2013

Role and Functions of the Partnership

- to agree and endorse the methodology for the work needed to undertake a SHLAA in Leeds
- to agree a work programme and timetable for production of the SHLAA
- to provide expertise and knowledge to come to a view on the deliverability and developability of sites, and how market viability may be affected by market conditions
- to agree an annual review process and be involved in the reviews

Governance Arrangements

- Membership –
 - o Membership to include those listed on membership of Partnership list (attached). Continuity is important; members should endeavour to attend all meetings and are discouraged from sending substitutes.
 - o Membership expects representation of sector rather than individual, personal or company interests
 - o Membership means the representative will be actively involved in the role and functions of the Partnership as listed below.
 - o Members can call on additional people to assist them in Partnership work outside of meetings, e.g. checking site information etc
 - o Observers at the meetings will not be allowed
- Results and conclusions
 - o The Partnership will endeavour to reach conclusions on site delivery and on the final results of the SHLAA by consensus of all members, but where this is not possible will clearly record alternative conclusions

- The Partnership should seek to rely upon evidence that is independent, impartial and objective
 - Members are expected to stand by the SHLAA results and conclusions
- Servicing the meetings –
- Minutes (including actions and responsibilities as appropriate) to be taken by Leeds City Council staff and agreed by the Partnership,
 - All papers to be sent to members in advance of meetings. Where views on sites are sought sufficient time has to be allowed for adequate consideration of information supplied
 - A forward plan of meeting dates to be agreed in advance

Membership of Leeds SHLAA Partnership group list.

- 3 City Councillors (Cllr Taggart, Cllr Procter, Cllr Campbell)
- City Council Executive Board Member (Cllr P Gruen)
- Planning Officers supporting the SHLAA process
- House builder representatives
- 1 Urban developer representative (Mark Finch, Rushbond)
- 1 Campaign for Protection of Rural England (David Cooke)
- 1 Renew (Alison Gillespie)
- 1 Leeds Property Forum (Prew Lumley)
- 1 Homes and Communities Agency (Dilys Jones)
- 1 Civic Trust ?
- 1 Elderly/Specialist housing provider ?

Appendix 2

Leeds SHLAA Annual Update Methodology – November 2013

1. Background

1.1. The SHLAA needs to be updated annually. National Guidance suggests a full re-assessment will only be necessary for preparation of LDF documents or where a 5 year supply cannot be demonstrated. As Leeds' SHLAA has in excess of 1000 sites, any amendments to it are resource intensive and complex. Therefore, the City Council needs to be clear on the methodology of annual updates so as to produce outputs that are fit for purpose.

1.2. Several factors weigh in favour of a full re-assessment:

- i. Changes in the national economic context need to be reflected in SHLAA conclusions
- ii. the SHLAA is being subject to intense scrutiny at housing appeals
- iii. the outputs of the Site Allocations DPD process – including the sustainability of sites – affect the potential suitability of SHLAA sites
- iv. a housebuilding consortium has prepared its own evidence on the deliverability of SHLAA sites, which needs to be addressed

2. Components

2.1. The SHLAA Update will comprise:

- i. A review of existing sites
- ii. An assessment of new sites

2.2. **Reviewing Existing Sites.** For the 2013 update, the initial focus is upon the delivery of sites in the first 5 years. A methodology was circulated to the Partnership in June (see Appendix A) which has been followed. Some additional update measures are considered necessary.

2.3. It is proposed that the 2013 Update of existing sites comprise the following elements:

i. **Market Testing**

- a. Stage I: sites with planning permission.
- b. Stage II: other sites with dwellings apportioned in the 2012 SHLAA to deliver during the first 5 years. Delivery to be assessed against a range of market delivery indicators
- c. Stage III: comparison of conclusions of Stages I and II with site delivery evidence advanced by house builders (at appeals etc).
- d. Stage IV: review of sites with dwellings apportioned in the 2012 SHLAA to deliver in the medium term (i.e. 2019/20 – 23/24) to see whether any warrant being brought forward into the first 5 years.

- ii. **Viability Testing.** This will apply to sites that are found in Market Testing Stage II to have insufficient indications of market interest for delivery in the first 5 years but are suitable and available for housing development. An external consultant with expertise in development finance in Leeds may need to be appointed to undertake this work.

- iii. **Reassessment of Greenfield supply.** This will need to be informed by progress on the Core Strategy (which recognises the contribution that greenfield land makes to the spatial strategy) and the Site Allocations plan preparation.

- 2.4. **New sites** will be identified through a variety of sources: submissions will be invited during the year, Neighbourhood planning may identify sites, the Site Allocations Plan preparation process will identify sites. The role of LCC will be to assemble information on suitability, availability and achievability and reach initial conclusions on dwelling delivery which will be assessed and ratified by the Partnership.

- 2.5. For the 2013 Update over 130 new sites have been processed with initial delivery conclusions reached ready for checking through the SHLAA Partnership.

- 3. Presentation to the SHLAA Partnership

It is proposed that different components of the update are presented to the SHLAA Partnership as they are completed over more than one meeting. Stages I and II can be discussed at the December meeting. Further meetings will need to be scheduled in January, February and March 2014.

Appendix 3

Chronology of SHLAA Partnership Activity

- 17-12-13** Initial SHLAA Partnership Meeting
- Agreed: Terms of Reference and Methodology
- That LCC will circulate lists of Stage I and Stage II sites in good time for the next meeting.
- Next meetings of 4th February and 25th February
- 10-01-14** LCC circulates Stage I and II lists for comment. Stage I sites have LCC's dwelling delivery expectations. Stage II sites have dwelling capacities and planning status for sites but blank annual deliveries for Partnership members to insert their own expectations.
- 30-01-14** Email and telephone call from HBF Representative explaining that they have not had enough time to assess the SHLAA sites. They expect to be able to comment on the Stage I sites at the 25th February meeting and comment on the Stage II sites shortly after that. LCC emails the SHLAA Partnership cancelling the meeting for 4th February and extending the length of the meeting for 25th February.
- 03-02-14** LCC receives confirmation letter from HBF Representatives requesting 4-6 weeks extra time to undertake review of Stage I and II sites.
- 07-02-14** LCC circulates revised Stage I and II lists to the Partnership incorporating planning application and permission details as requested by HBF Representatives
- 12-02-14** Exchange of emails between HBF Representative and LCC clarifying points i) the addition/removal of sites in the revised Stage II list and ii) the status of the "Pre-2014" column in the Stage I list of sites. It is considered that pre-2014 deliveries can be confirmed following receipt of the end of year (31/3/14) information. In the meantime, assumptions will be made about whether the pre-2014 dwellings can be incorporated in the first 5 years (2014/15 – 2018/19).
- 25-02-14** The second meeting of the SHLAA Partnership takes place. Discussion on build-out-rates and confidence in improvement of the housing market. Discussion on Stage I sites with tentative agreement on some deliveries. Agreement that the HBF representatives would circulate considered written comments on Stage I by the end of that week (by 28/2/14) and on Stage II within 2 weeks (11th March). Further SHLAA Partnership meetings are agreed for 28/3/14 and 15/4/14.
- 28-02-14** LCC receives HBF written comments on all Stage I sites. HBF assume all Pre 2014 dwellings will have been built, so should not feature in the first 5 year supply. Comments are supplied in red text. HBF raise further questions:
- Can LCC identify each of the individual stages of the SHLAA process providing their name and timescales for completion;

- Why is there no 5 year land supply assessment in the latest AMR;
- Can the Council refine the Stage 2 assessment and re-distribute so we know that this is fully up to date; and,
- Can all of the spreadsheets/details for the individual stages be in the same excel format as Stage 1 for ease.

- 07-03-14** LCC re-distributes the Stage II sites to the HBF Representatives, explaining the deletion of c. 30 sites because they are Green Belt, PAS and UDP H3:2 and H3:3 housing allocations which would be better considered in a later stage. It also includes planning histories for all sites.
- 19-03-14** LCC Email to HBF Representatives reminding them of their commitment to provide comments on Stage II sites by 11/03/14
- 24-03-14** LCC receive list of Stage II sites with comments and delivery suggestions from HBF Representatives. LCC circulate the Stage I and Stage II conclusions to SHLAA Partnership.
- 28-03-14** The third SHLAA Partnership meeting takes place. On Stage I sites, the meeting concludes that further LCC officer work is necessary to contact landowners of those sites that the HBF are not involved with and to review the 2013/14 delivery of dwellings to accurately re-assign the pre-2014 dwellings to the first 5 years.
- On Stage II sites the consideration of individual sites takes too much time. It is agreed for LCC officers to meet HBF Representatives separately on the 8th and 10th of April.
- On New Sites, LCC circulate a list and map of c. 180 new sites with basic details but no delivery suggestions. The sources of site suggestions are explained to understand why some “maverick” cases such as Leeds Bradford Airport are in the list.
- 02-04-14** LCC circulates to the Partnership i) a list of the new sites with columns for Partnership members to insert delivery suggestions and comments and ii) a map of the site locations/sizes
- 08-04-14** LCC officers and HBF Representatives meet to consider Stage II site deliverability.
- 10-04-14** LCC officers and HBF Representatives meet again. Only around 50 of the c.210 sites are concluded upon. Both sides agree the conclusions of a handful of sites; the remainder of the c. 50 are concluded as “agree to disagree”, with the level of optimism in the revival of the housing market being the main point of disagreement.
- 15-04-14** The fourth SHLAA Partnership meeting takes place. A review of progress concludes that LCC officers will need to meet HBF Representatives separately to try to

conclude: Stage I, Stage II, Stage IV (medium/long term 2012 SHLAA sites), Stage VI (Aire Valley) sites, Miscellaneous changes and New Sites.

- 01-05-14** LCC officers and HBF Representatives meet and agree on some site deliveries, but agree to disagree on most. LCC officers are keen for the SHLAA Update to be concluded in accordance with the methodology, acknowledging that there will be two lists of site deliveries; one advanced by LCC; the other advanced by HBF representatives.
- 07-05-14** The fifth SHLAA Partnership meeting takes place.
