

Site Allocations Plan and Aire Valley Leeds Area Action Plan

Leeds Local Development Framework

Development Plan Document

Green Space Background Paper

July 2015

GREEN SPACE BACKGROUND PAPER RELATING TO SITE ALLOCATIONS PLAN AND AIRE VALLEY LEEDS AREA ACTION PLAN

Green space sites

The Site Allocations Plan (SAP) protects over 1600 green spaces that are currently in an open space, recreational use. These are shown on the SAP proposals map and listed in Appendix 2. This represents approximately a 45% increase in the amount of green space compared to the UDP. However the majority of the additional open space is not new space, rather long established areas that were not identified and protected by the UDP.

Sources of Green Space Sites

The green space sites shown in the SAP are mainly those sites designated as green space under Policies N1, N1A and N6 in the Unitary Development Plan Review 2006 and those identified as in a green space use in the citywide Open Space, Sport and Recreation Assessment (July 2011)(OSSRA). Each site has been recorded, plotted, assessed (in terms of quality and facilities available) and classified according to typology using the categories:

- Parks & Gardens
- Amenity Space
- Children and Young People's Play Provision
- Outdoor Sport
- Allotments
- Natural Green Space
- City Centre Civic Space
- Cemeteries/Churchyards
- Green Corridors
- Private Gardens open to the public e.g. Harewood House

The OSSRA was undertaken to inform the Core Strategy and was submitted to Development Plan Panel on 12th July 2011.

Green Space Standards

Core Strategy Policy G3 sets quantity, quality and accessibility standards for some of the different types of open space identified in the OSSRA. The standards are set out below:

Type	Quantity per 1000 people	Quality (Sites were scored from 1 to 10, 10 being excellent quality, 1 very poor. A score of 7 is considered good)	Accessibility
Parks and gardens	1 hectare	Good (7)	720 metres
Outdoor sports provision	1.2 hectares (does not include education provision)	Good (7)	Tennis court 720 metres, bowling greens and grass playing pitches 3.2km, athletics tracks, synthetic pitches 6.4km
Amenity greenspace	0.45 hectares	Good (7)	480 metres
Children and young people's equipped play facilities	2 facilities (per 1000 children/young people, 0 -16 year olds)(excluding education provision)	Good (7)	720 metres
Allotments	0.24 hectares	Good (7)	960 metres
Natural greenspace	0.7 hectares main urban area and major settlements, 2 hectares other areas	Good (7)	720 metres and 2km from site of 20 hectares
City Centre open space (all types including civic space)	0.41 hectares	Good (7)	720 metres

These set out the standards that should be achieved and provide a structure and basis for future provision. There are no standards for the quantity of cemeteries/churchyards, green corridors or private gardens open to the public. Golf courses were assessed as "outdoor sport" but these have not been included.

The standards contained in G3 set out a clear strategy for future provision of green space in terms of quantity, quality and accessibility. New green space required through Core Strategy Policies G4 and G5 should be considered carefully in an attempt to improve the provision of typologies in deficit and every opportunity should be made to provide new areas where accessibility is poor, however it is recognised that green space must be appropriate to the circumstances of individual sites. There is scope to change typologies where there are excessive amounts of land in one typology to address deficiencies in other typologies however its suitability as a revised typology would need to be carefully assessed.

Process chronologically

The continuing aim throughout the preparation of the Site Allocation Plan is to designate and protect all sites in an open space, recreational use across the city. The stock of sites is forever changing over time as new sites are created, current spaces are increased and all or part of existing sites are developed or cease to function as green space. Much time has been spent updating and refining the data held by the City Council in an attempt to have as accurate a picture of green space across the city as possible and therefore identify the correct sites in the Site Allocations Plan. This is rightly an ongoing process as more information becomes available and appropriate amendments can be made. Information presented to Development Plan Panel and Executive Board at various times was inevitably a snapshot in time and the most up to date situation at that time.

Issues and Options Stage

The sites proposed for designation were shown on the plans attached to the Issues and Options HMCA Area documents. These were mainly those areas identified through the OSSRA as this was more up to date and accurate than the UDP green space sites. Those UDP green space sites not identified in the OSSRA were proposed for deletion as they were no longer in a green space use e.g. built on, and listed in the documentation.

Quantity/Quality/Accessibility

An assessment of the quantity of green space against the standards set out in Policy G3 was undertaken for each Ward to establish which typologies had a surplus of provision and which were in deficit. These were set out and conclusions were drawn. All Wards were in deficiency in at least one typology so no Ward met the full standards. These calculations were done by Ward rather than by HMCA (as done in the housing and employment topics) as accurate population data was readily available by Ward but not for HMCA's.

The green space sites proposed for protection at the Issues and Option stage of the Site Allocations Plan were assessed against these standards and details were published in the documentation. A number of amendments have been made to the

proposed green space sites since that time to ensure, as far as possible, that sites are identified accurately and reflect the existing land in green space uses across the City. This revised provision has been assessed against the standards to identify which wards and which typologies are in surplus and deficiency.

Questions

The Issues and Options documentation asked a number of general questions about the approach to green space provision, protection, quality and accessibility as well as site specific questions relating to the future of some UDP green space sites.

Public Consultation exercise on Issues and Options

The City Council consulted on the Issues and Options documents between 2nd June – 29th July 2013 and a number of comments were received on green space provision generally and specifically relating to individual sites.

Post Public Consultation

Green space sites were reviewed in light of formal representations and other technical information received since the Issues and Options document preparation. Some sites were deleted, added and boundaries amended to reflect the current situation more accurately and update the OSSRA survey work which was undertaken in 2008/9. There was also a review of some typologies especially in relation to “green corridor” sites. It was considered that most sites more accurately functioned as “amenity” or “natural” which allowed them to be reclassified to a typology that had a standard in Policy G3 and provided for future delivery of additional spaces. Some were also historically N1 green space and their continued protection ensured continuity. These were reported to Development Plans Panel on 6th January 2015 and Executive Board on 11th February 2015.

Since Executive Board in February 2015

Further changes were made to green space sites including those made in relation to potential conflicts with other allocations proposed in the draft SAP and were reported to Development Plan Panel on 16th June 2015. Sites cannot be allocated for two different land uses therefore some green space is no longer proposed for protection as it falls within a proposed housing/employment/PAS allocation. In recognition that some such green space does, and will continue to, function as green space until development takes place, some “deleted” green space sites (especially allotments and outdoor sport) have been included in the calculations of surpluses and deficiencies.

Whilst this has resulted in a loss of proposed green space, Core Strategy Policies G4 and G5 will be applied to housing proposals and new green space will be required on site. These new areas of green space will not be specifically identified and designated as green space through the SAP but will be protected as part of the

development. Furthermore, a number of housing sites will have specific green space requirements which will be set out clearly in site specific policies e.g. Silverdale Allotments, Red Hall.

Changes since Development Plan Panel (16/6/2015)

A small number of boundary changes have been made since Development Plan Panel which are as follows:

Site Address	Area	Ward	HMCA	Action	Reason
Mount Preston Street	0.536	Hyde Park & Woodhouse	City Centre	Delete	Developed
Woodsley Road	1.208	Hyde Park & Woodhouse	Inner	Delete	Partially developed.
Ash Tree Approach	0.275	Crossgates & Whinmoor	East	Delete	Wider regeneration objectives
Boddington Hall	20.502	Weetwood	North	Partially delete	To exclude Park and Ride allocation

Revised Surpluses and Deficiencies

In light of the many changes made to green space since the Issues and Options stage, new calculations have been undertaken to determine whether the standards set out in Policy G3 are met and by how much the quantity is in deficit or surplus. The results are set out in Appendix 1. There is one standard of 0.41ha/1000 population for the City Centre. Using the total of 11.23ha of green space and a population estimate of 18,909 (based on council tax banned residences and average household sizes at 2011 census) the quantity is 0.594ha/1000 population which exceeds the standard (by 0.184ha). There is also 18.686ha of civic space within the City Centre which represents a provision of 0.988/1000 population which again exceeds the standard (by 0.578ha). Overall there is a great variety of provision across the typologies and Wards with no Ward meeting the standards of provision for all typologies. Provision of allotments is particularly poor and outdoor sports provision in deficit in many Wards whilst the provision of natural green space is in surplus across many Wards. These results will enable the Council to know what specific types of open space are in shortfall in an area so resources can be channelled to meeting any deficiencies. If any surpluses exist, alternative uses may be an option. There are no standards for cemeteries, green corridors and private golf courses therefore no surpluses and deficiencies calculations.

Quality scores and accessibility standards

It is anticipated that further analysis will be undertaken in relation to quality and accessibility assessments in the context of the standards set out in Policy G3. This will be available at a later date.

Approach taken on specific issues

Future sites

UDP Policy N5 established the principle of identifying potential future green space sites however only a very limited number of such sites have been delivered over the last 14 years and there is no similar policy in the Core Strategy. It is acknowledged that future provision will primarily be through new housing development and the application of Policies G4 and G5 and site specific requirements linked to certain sites.

In principle only sites that are currently in a green space use are identified on the SAP plan and proposed for protection however there are a small number of exceptions to this – the new pocket park at Sovereign Street which is currently being laid out, the Country Park proposed as part of the East Leeds Extension and the new park (Green Park) at Thorpe Park. This has not yet commenced however the park has planning permission and its delivery is embedded in a S106 agreement to 12/03386/OT. Work will commence when the trigger point is reached. These two sites are not included in the calculations of surpluses and deficiencies.

Cemeteries

76 cemeteries, burial grounds and churchyards were identified in the OSSRA. They are identified in the SAP and therefore given protection as open space with amenity value even though there is no standard for provision in Policy G3. This is a considerable increase compared to the UDP however these are not newly created sites rather long established sites that have now been identified and given formal green space protection in recognition of their amenity value.

Private Green space

Whilst most green space proposed for protection is publically accessible, some privately owned green spaces are identified in the SAP in recognition of their contribution to open space provision across the city. These areas include private sports clubs, those facilities that are part of a wider 'members only' facility and privately owned open space. Private golf courses have consistently not been identified on plans or included in assessments as their inclusion would severely skew outdoor sport provision in certain areas and give misleading quantities of public open space in comparison with Policy G3. Furthermore, most private golf courses are located in the green belt and are already afforded a high level of protection.

Municipal Golf Courses

Up until recently there were 4 municipal golf courses in Leeds- Roundhay, Temple Newsam, Middleton and Gotts Park. Middleton has now closed and the area has been reclassified as “Park and Garden.” To reflect the historic protection of these golf courses in the UDP under Policy N1, their amenity function and the more accessible nature of public as opposed to private golf courses, municipal golf courses are identified in the SAP and proposed for protection.

New greenspace on identified housing sites

New green space created as part of recent residential development has been specifically identified where possible however these areas will be afforded protection through their delivery as part of their associated planning consent.

Facilities within other typologies

There are cases where certain facilities especially outdoor sport and children’s play facilities are located within larger green space sites of a different typology e.g. park and garden or amenity. Care has been taken to ensure any dual functioning of spaces is taken into account but that double counting is avoided. For example the playing pitches located in Roundhay Park are counted within the wider park and classified as “park and garden” but are also included in the area of “outdoor sport” within the Roundhay Ward. This accurately acknowledges that the pitches are used for team sports at certain times of the week but are open for general access and informal recreation at other times. The area of outdoor sport has been calculated using the actual number of pitches, greens, courts etc and standard areas for each type of facility. This means only the actually useable area for sport has been taken into account and not additional peripheral areas that do not strictly function as outdoor sport.

Green Space and other proposed allocations

Sites cannot be allocated for more than one purpose therefore where sites were identified as in a green space use and proposed for allocation for another use e.g, housing, employment, the proposed allocation was shown on the plans and the existing or proposed green space designation was effectively deleted. These areas of green space will not be given any formal protection but green space provision will be addressed through the application of Policies G4 and G5 to any development proposals and any specific green space site requirements set out in the SAP. Green space located within PAS sites has been removed from the SAP map for the same reason however where the green space is actively used especially with specific facilities such as allotments or playing fields, the areas have still been included within the surpluses and deficiencies calculations in recognition of their current use and the opportunities for recreation they present. Depending on the timescale for the release

of PAS sites, these areas of green space could continue to function as such for some time.

Aire Valley Area Action Plan

The Aire Valley Area Action Plan 1300 ha of land extending from the City Centre south eastwards through Cross Green to Junction 45 of the A1/M1 link and beyond to Skelton Gate. There are 130 hectares of green space on 21 sites, plus an additional 3.2 hectares of civic space across 7 sites in Leeds City Centre. Sites have been assessed using the standard criteria and provision has been assessed against the standards set out in Policy G3 using an estimation of the population of the Aire Valley area. This is a similar exercise to what has been done for each Ward across the city. There is a surplus of amenity, children's play and natural green space. Further details of green space within the Aire Valley Leeds Area Action Plan, is contained within the 'Aire Valley Leeds Area Action Plan – Greenspace Background Paper'.
