

Site Allocations Plan and Aire Valley Leeds Area Action Plan

Leeds Local Development Framework

Development Plan Document

**Housing (including Gypsies, Travellers and Travelling
Showpeople) Background Paper**

July 2015

HOUSING (INCLUDING GYPSIES, TRAVELLERS AND TRAVELLING SHOWPEOPLE) BACKGROUND PAPER RELATING TO SITE ALLOCATIONS PLAN AND AIRE VALLEY LEEDS AREA ACTION PLAN

1 THE NATIONAL PLANNING POLICY FRAMEWORK (NPPF) 2012

- 1.1 Paragraph 14 of the NPPF emphasises that a presumption in favour of sustainable development is at the heart of government policy and for plan making local authorities to positively seek opportunities to meet the development needs of their area. Plans should set out a clear strategy for allocating sufficient land which is suitable for development in their area (paragraph 17).

2 THE CORE STRATEGY

- 2.1 The Site Allocations Plan and Aire Valley Leeds Area Action Plan (AVLAAP) have to be in general conformity with the Core Strategy, which was adopted in November 2014 and sets targets for housing and employment growth in Leeds. The Core Strategy policies which affect housing directly are: Spatial Policy 1, 6, 7, 10 and policies H1, H2, H3, H4, H7 and H8. In terms of the overall housing target and spatial approach, Core Strategy Spatial Policies 1, 6, 7 and 10 apply.

- 2.2 Core Strategy Spatial Policy 1 (SP1) establishes some guiding principles. It indicates that development will be based on the settlement hierarchy, with the majority of new development to be concentrated in or adjoining urban areas, also reflecting regeneration priorities and a need for an appropriate balance of brownfield and greenfield sites. It goes on to advise that:

- (i) The largest amount of development will be located in the Main Urban Area and Major Settlements. Smaller Settlements will contribute to development needs, with the scale of growth having regard to the settlement's size, function and sustainability,
- (ii) In applying (i) above, the priority for identifying land for development will be as follows:
 - a. Previously developed land and buildings within the Main Urban Area/relevant settlement
 - b. Other suitable infill sites within the Main Urban Area/relevant settlement
 - c. Key locations identified as suitable extensions to the Main Urban Area/relevant settlement,
- (iii) For development to respect and enhance the local character and identity of places and neighbourhoods,
- (vi) To recognise the key role of new and existing infrastructure (including green, social and physical) in delivering future developments to support communities and economic activity,
- (vii) In meeting the needs of housing and economic development (and in reflecting the conclusions of the Appropriate Assessment Screening), to seek

- to meet development requirements, without adverse nature conservation impacts upon Special Protection Areas and Special Areas of Conservation, in particular the South Pennine Moors (including Hawksworth Moor),
- (viii) To undertake a review of the Green Belt (as set out in Spatial Policy 10) to direct development consistent with the overall strategy.

2.3 Spatial Policy 6 sets the overall target of 66,000 dwellings to be allocated over the plan period (2012 to 2028) with broad criterion for allocations outlined. The total amount of housing to be accommodated is 70,000 (net) of which 8,000 is anticipated to come from small and unidentified sites. Allowing for assumed demolitions over the plan period the policy indicates that this will leave a need to allocate land for 66,000 dwellings. Building on the general approach set out in SP1 the policy advises that in allocating land the following considerations should apply:

- (i) Sustainable locations (which meet standards of public transport accessibility – see the Well Connected City chapter), supported by existing or access to new local facilities and services, (including Educational and Health Infrastructure),
- (ii) Preference for brownfield and regeneration sites,
- (iii) The least impact on Green Belt purposes,
- (iv) Opportunities to reinforce or enhance the distinctiveness of existing neighbourhoods and quality of life of local communities through the design and standard of new homes,
- (v) The need for realistic lead-in-times and build-out-rates for housing construction,
- (vi) The least negative and most positive impacts on green infrastructure, green corridors, green space and nature conservation,
- (vii) Generally avoiding or mitigating areas of flood risk.

2.4 Spatial Policy 7 sets the distribution by settlement hierarchy and targets for each of eleven Housing Market Characteristic Areas (HMCAs) across Leeds. The Core Strategy emphasises that the overall approach is to achieve opportunities for housing growth in sustainable locations, linked to the settlement hierarchy, whilst respecting local character and distinctiveness. Reflecting this and the policy considerations set out above Spatial Policy 7 (SP7) sets out the proposed distribution of housing land to deliver the 66,000 dwellings. The Core Strategy advises that the distribution is indicative and provides a framework for housing distribution for future LDF land allocation documents, such as the Site Allocations Plan. The policy is set out in full below.

SPATIAL POLICY 7: DISTRIBUTION OF HOUSING LAND AND ALLOCATIONS

The distribution of housing land (excluding windfall) will be planned based on Tables 2 and 3:

Table 2 [in Core Strategy]: Housing Distribution by Settlement Hierarchy

Settlement level	Number		Percentage	
	Infill	Extension	Infill	Extension
City Centre	10,200		15%	
Main Urban Area*	30,000	3,300	45%	5%
Major Settlements	4,000	10,300	6%	16%
Smaller Settlements	2,300	5,200	3%	8%
Other rural	100	600	1%	1%
Total	46,600	19,400	70%	30%

* excluding City Centre

Table 3 [in Core Strategy]: Housing Distribution by Housing Market Characteristic Area

Housing Market Characteristic Area	Number	Percentage
Aireborough	2,300	3%
City Centre	10,200	15.5%
East Leeds	11,400	17%
Inner Area	10,000	15%
North Leeds	6,000	9%
Outer North East	5,000	8%
Outer North West	2,000	3%
Outer South	2,600	4%
Outer South East	4,600	7%
Outer South West	7,200	11%
Outer West	4,700	7%
Total	66,000	100%

- 2.5 Spatial Policy 10 concerns the Green Belt review (see Green Belt Review background paper), which is necessary to accommodate the scale of growth set out in the Core Strategy. The Core Strategy recognises the importance of the Green Belt to the character of the District and in maintaining the separate identity of many

of its settlements. However, it also recognises that the use of Green Belt land will be necessary if the housing target is to be met. Spatial Policy 10 (SP10) advises that sites to be allocated through Green Belt review should relate to the settlement hierarchy and should have regard to the impact on Green Belt purposes set out in National Guidance. The policy does however allow for opportunities to be considered unrelated to the settlement hierarchy where they provide the most sustainable option to meet needs within a particular HMCA. Any such opportunities identified represent a departure from a strict adherence to the distribution in SP7.

- 2.6 The Core Strategy is consistent with national guidance in recognising that Green Belt boundaries should be permanent and should only be changed in exceptional circumstances. The appropriate approach is therefore that the SAP should only remove as much land from the Green Belt as is essential to meet targets for allocation (or safeguarding) and no more, otherwise exceptional circumstances will not be demonstrated.
- 2.7 Policy H1 sets out the parameters for phasing of sites for development (see Phasing section below); Policy H2 covers housing development on sites not specifically allocated for housing, H3 sets densities for residential development, H4 concerns housing mix, H7 concerns Gypsies, Travellers and Travelling Show People and H8 housing for independent living (see sections below).

3 THE SITE ALLOCATIONS PLAN - COMPARISON AGAINST CORE STRATEGY POLICY

- 3.1 Table 1 in the Publication Draft Plan, para 2.27 sets out the Core Strategy targets (Spatial Policy SP7 Table 3) for each HMCA along with the total capacity of sites that are existing supply/identified sites plus the capacity from new housing allocations, to show the total housing supply and whether this is over or under the Core Strategy target:

Table 1: Housing Distribution by Housing Market Characteristic Area (HMCA)¹

HMCA	Core Strategy Housing target	%	Existing supply ('Identified sites')	Proposed allocations	Total housing supply	+/- Target
Aireborough	2,300	3%	967	1,277	2,244	-56
City Centre	10,200	15.5%	5,710	5,596	11,306	+1106
East Leeds	11,400	17%	6,133	4,218	10,351	-1049
Inner Area	10,000	15%	7,317	4,483	11,800	+1800
North Leeds	6,000	9%	4,033	1,855	5,888	-112
Outer North East	5,000	8%	1,540	3,437	4,977	-23
Outer North West	2,000	3%	1,145	634	1,779	-221
Outer South	2,600	4%	617	1,780	2,397	-203
Outer South East	4,600	7%	1,302	2,778	4,080	-520
Outer South West	7,200	11%	2,265	4,536	6,801	-399
Outer West	4,700	7%	2,607	2,100	4,707	+7
Total	66,000	100%	33,636	32,694	66,330	330

Identified housing sites

3.2 As paragraph 2.29 of the Publication Draft Plan explains, new allocations are not needed to accommodate the entire 66,000 target. The Council already has an existing supply of 33,636 dwellings (previous UDP housing allocations not developed, planning permissions with units still remaining to be built (from end March 2012 updated to 5.4.15) and sites with a recently expired permission (this includes sites covered by the Aire Valley Area Action Plan) which can be deleted from the total, as shown in column 4, Existing Supply, in Table 1 above). This is not of course spread evenly across the housing market characteristic areas. These sites are listed in Section 3, Policy HG1 for each area. Depending on the progress of the plan, prior to submission, further updates will be completed, as appropriate, to ensure that the Publication Draft Plan presents the most up to date data possible, so the totals categorised as 'identified housing sites, and sites allocated for housing', may still be subject to change. Column 4 on Table 1 gives the total capacity from identified sites for each HMCA.

¹ Figures for identified sites and allocations also include contributions from sites included within the Aire Valley Leeds AAP in the relevant HMCAs (see para 3.11)

Residual target

- 3.3 The total capacity from identified sites is deducted from the Core Strategy target for each HMCA to leave a residual target for each area. The overall residual target is 32,364 (the overall target minus existing supply).

New housing allocations and meeting Core Strategy targets

- 3.4 As paragraph 2.29 of the draft plan details, new housing allocations are proposed to meet the residual target. The distribution by HMCA and the other characteristics set out in Core Strategy Policy SP7 provide the starting point for the provision of allocations. In identifying suitable sites other aspects of the Core Strategy must also be taken into account, such as: the concentration in the main urban areas and major settlements; regeneration priorities; the impact on the Green Belt; accessibility and greenfield/brownfield split. In some instances these considerations have made it difficult to translate strategic policy into specific sites, whilst in the City Centre and Inner area it has been possible to identify more land than originally envisaged that is entirely consistent with the Core Strategy approach. In this situation it is felt that overprovision in one area can help to make up the shortfall in an adjacent area. The distribution set out in Table 1 is considered to properly reflect the guidance set out in Policy SP7 and the wider ambitions of the Core Strategy. Column 5 on Table 1, gives the total capacity from allocated housing sites for each HMCA.
- 3.5 As anticipated, smaller settlements take only a modest amount of new housing. Infill in smaller settlements matches the contribution anticipated in SP7 whilst the figure for extensions is below. This can be seen as a positive outcome given their place in the settlement hierarchy, the objective of protecting character and identity and a preference for development on brownfield land. The outer areas are often below the SP7 figures but this generally reflects local circumstances relating to the settlement hierarchy and green belt considerations. For instance the only major settlement in Outer North West is Otley and opportunities for expansion are severely constrained by proximity to Bradford and North Yorkshire as well as the physical constraints of the Wharfe Valley. The position is similar in Outer North East in relation to Wetherby. In Outer South East, Garforth is the only major settlement and is taking a very substantial urban extension. Elsewhere opportunities are more limited. East Leeds has little opportunity for further expansion but whilst the proposals are below the SP7 figure the area is nevertheless taking the highest number of dwellings of any of the HMCAs. Overall it can be concluded that the proposed package of allocations broadly reflects both the strategic direction set by Core Strategy policies and the indicative distribution of SP7.
- 3.6 Core Strategy Spatial Policy 7 also sets out in Table 2 the planned distribution of housing land by settlement hierarchy. Table 2 below compares the Publication Draft Plan distribution of housing sites to the suggested Core Strategy approach.

Table 2: Comparison against Core Strategy Table 22

Level	Type	Capacity	SP7 Target	Capacity Diff	% difference	No. sites
City Centre	Infill	11608	10200	1408	14	106
Main Urban Area	Infill	30401	30000	401	1	361
Main Urban Area	Extension	4536	3300	1236	37	34
Major Settlement	Infill	3652	4000	-348	-9	88
Major Settlement	Extension	6393	10300	-3907	-38	22
Smaller Settlement	Infill	2493	2300	193	8	73
Smaller Settlement	Extension	3367	5200	-1833	-35	31
Other Rural	Infill	275	100	175	175	15
Other Rural	Extension	234	600	-366	-61	5
Other	Other	3371	0	3371		5

- 3.7 The proposed allocation in the Outer North East HMCA, the site at Headley Hall, Bramham, site MX2-33 (3391) affects the breakdown against the Core Strategy policy, as outline in Table 2 above. This site sits outside the settlement hierarchy. Whilst the overall approach of the Core Strategy is to promote growth in relation to the Settlement Hierarchy (Spatial Policy 1), SP10 exceptionally allows for sites in sustainable locations where they can be supported with the necessary infrastructure. In this case, the inclusion of a new settlement at Headley Hall/Spenn Common Lane east of Bramham, is considered to be the most sustainable option, within the Outer NE HMCA. The NPPF advises (para 52) that new housing can sometimes be best delivered by large scale development such as new settlements. In Core Strategy terms this proposal also has the benefit of protecting the character and identity of the many relatively small communities that are a distinctive feature of this part of the District.
- 3.8 There are other policy considerations that will affect the allocation of land for housing. Policy H1 identifies a target that 65% of housing in the first five years of the plan should be on brownfield land and 55% thereafter (see paragraph 5.0 below). Paragraph 4.6.16 of the Core Strategy advises that where the regeneration of previously developed land is in locations that are or can be made sustainable then opportunities outside the settlement hierarchy can be considered, which would inevitably affect the distribution in SP7.

² Figures for identified sites and allocations also include contributions from sites included within the Aire Valley Leeds AAP in the Main Urban Area. The City Centre settlement hierarchy boundary and HMCA boundary differ slightly, hence the total capacity in Table 2 differs from the HMCA total.

3.9 SP7 is therefore a guide to site allocations, it does not anticipate that the final distribution will precisely match that given in Table 1 of Core Strategy Spatial Policy 7 (SP7). Given that the allocations will need to reflect and balance the wide range of considerations set out in the policies, including the matters highlighted above, there will inevitably be compromise based on sometimes conflicting priorities and the available opportunities. It is also important to consider the distribution in the round as a substantial proposal in one HMCA may well have wider implications. Nevertheless it is considered that the proposed distribution is in general conformity with that set out in SP7.

AIRE VALLEY LEEDS AREA ACTION PLAN – COMPARISON AGAINST CORE STRATEGY POLICY

3.10 Whilst the above analysis includes Aire Valley Leeds sites, the AVL also has a separate housing target, set out in Core Strategy Spatial Policy 5 (SP5), to deliver a minimum of 6,500 new homes with the AAP boundary over the plan period. Table 3 below shows the total number of new dwellings identified and allocated in the publication draft AAP against this requirement.

Table 3: Housing sites and proposed allocations in Aire Valley Leeds in comparison to the Core Strategy requirement

Area	Core Strategy Housing target	Existing supply ('Identified sites')	Proposed allocations	Total housing supply	+/- Target
Aire Valley Leeds AAP	6,500 (minimum)	1,840	5,990	7,830	+1,330

3.11 The number of dwellings identified and allocation in the publication draft AAP exceeds the minimum target by 1,330. Dwellings delivered in AVL also help contribute to the relevant HMCA (City Centre, Inner Area and East areas), Main Urban Area and district wide targets and are therefore also included in the calculations set out in Tables 1 and 2 above.

4 THE PROCESS OF SITE ASSESSMENT AND SELECTION OF SITES FOR ALLOCATION FOR HOUSING IN THE SITE ALLOCATIONS PLAN

4.1 As para 3.2 above explains, the capacity from identified sites in each HMCA has been deducted from the specific HMCA target to leave a residual target, to be made up by allocating new sites for housing.

Issues and Options stage

4.2 The Issues and Options plan explains the process of site identification and

assessment to identify sites to meet the Core Strategy target for each of the 11 Housing Market Characteristic Areas (HMCAs). The source of sites for consideration has been the Strategic Housing Land Availability Assessment (SHLAA) together with any new sites put forward for consideration through consultation on Issues and Options.

The Strategic Housing Land Availability Assessment (SHLAA)

- 4.3 The SHLAA is an ongoing process and updated each year. Anyone can submit a site for inclusion in the SHLAA. It is a technical database of sites submitted for consideration for housing. Having a site in the SHLAA does not mean that it is automatically allocated for a housing use. Sites in SHLAA create a pool from which to select suitable sites. Sites can only be allocated through the Site Allocations Plan process. The SHLAA is an important part of the evidence base supporting the Site Allocations Plan as it sets out the deliverability of sites and assesses their capacity and potential completion rates during the Plan period.

Sieved out sites

- 4.4 As a first stage in the process, sites were 'sieved out' of the assessment process where they fell wholly within an area of high flood risk (zone 3b functional floodplain), or a Site of Special Scientific Interest or national nature conservation designation, were within minerals safeguarded sites, the airport safety zone, or fell outside the settlement hierarchy of the Core Strategy. (These sites were shown in purple on the Issues and Options Plan).

Remaining sites

- 4.5 Remaining sites have been subject to an individual site assessment which includes consideration of Green Belt issues (the Green Belt review), where relevant. The site assessment form is at Appendix 1. At Issues and Options stage sites were categorised using a green, amber and red traffic light system as a basis for inviting public comment. The initial colour coding and reasons for it were an indicator as to which sites were most favoured for allocation. The colours were as follows:

- Green – sites which have the greatest potential to be allocated for housing
- Amber – sites which have potential but there may be issues which need to be resolved, or the site may not be in such a favoured location as those highlighted in green
- Red – sites which are not considered suitable for allocation for housing

As Volume 1 of the Issues and Options Plan explained, 'The site assessment process is an iterative one, in that parts of the assessment will be completed later on in the site selection process.' Hence the initial colour coding of sites reflected work done at that point in time and provided a level of information sufficient to assist public consultation. Whilst this initial assessment does give an indication of sites considered most appropriate for development, it was never intended to provide a

definitive or final answer; that had to come from consideration of the consultation responses and further technical work. It is therefore unsurprising and entirely appropriate that the final selection of sites show some changes from the position at Issues and Options.

Public consultation on Issues and Options

- 4.6 There was an 8 week public consultation on the Issues and Options plan from 3rd June to 29th July 2013. There is a separate Report of Consultation which details the number and content of representations received. The representations were considered in making the overall decisions as to which sites were most appropriate for allocation (see para 4.2 below). All sites at Issues and Options stage, plus any new site suggestions made in the public consultation period and late site submissions prior to Executive Board in February 2015 (as Executive Board approved the sites in principle for allocation, to enable the detailed Publication Draft Plan to subsequently be written) have been assessed and are detailed at Appendix 2.

Moving from Issues and Options stage to Publication Draft Plan

- 4.7 A number of factors have fed into the overall assessment and process of site allocation selection. These include:
- 4.7.1 **The initial colour coding at Issues and Options stage:** The majority of the proposed housing allocations were shown as 'green' sites at Issues and Options stage. These were defined as sites with the greatest potential to be allocated for housing. The majority of the sites not proposed for allocation for housing were shown as 'red' at Issues and Options stage. These were defined as sites which are not considered suitable for allocation for housing. Unless new evidence has come to light to alter the initial assessment on these sites, (including from infrastructure providers, the public consultation process etc) they have been either allocated for housing, or not, respectively. In all cases, in Outer HMCAs, the total from green sites alone would not meet the targets, so it has been necessary to give further consideration to other opportunities, particularly the amber sites. The process has sifted out those sites considered to represent the best and most sustainable choice for development in each area to make up the required target. Appendix 2 gives details of all sites considered in each HMCA, their colour coding at Issues and Options stage, (unless the site was submitted post Issues and options – see para 4.6 above), and the position on the Publication Draft Plan (whether identified, allocated or not allocated).
- 4.7.2 **Site attributes:** the site assessments have considered whether a site can be developed physically, including consideration of comments from infrastructure providers, (see separate Background Paper – Infrastructure) as well as the relationship of the site to the settlement hierarchy, whether brownfield or greenfield and the more preferable sites to release in Green Belt review terms – (those having

least effect on the five Green Belt purposes).

- 4.7.3 **Local preference:** Consideration of the representations received at the Issues and Options public consultation and ward members' views. See the separate Report of Consultation. It should be noted that most sites attracted objection in the Issues and Options consultation. It is not necessarily the scale of objection which would overturn the proposed allocation of a site. The extent of local opposition has to be balanced against the wider housing requirements for the Leeds district, which were established by the adopted Leeds Core Strategy, following independent examination, and the planning merits of one site compared to others.
- 4.7.4 **The Sustainability Assessment (SA) of sites:** a sustainability assessment has been undertaken alongside the production of the plan and is subject to the public consultation process. Furthermore, the Site Allocations Plan and Aire Valley Leeds Area Action Plan aim to deliver the requirements of the Core Strategy, which itself was subject to a sustainability assessment. Sustainability assessments take into account economic, environmental and social considerations. The SA has considered the overall effects of proposed allocations coming forward as a whole, ie the cumulative effects and the identification of mitigation measures where negative effects are identified for individual sites or sites as a whole. See the separate Sustainability Assessment Report. It should be noted that SA cannot ensure that development will be absolutely sustainable in all respects. It can only show how sustainable the effects of a policy or site are likely to be and where there are harmful impacts how far they can be mitigated. A policy or site may also have negative environmental impacts but they can be outweighed by positive social and economic aspects of the policy or site, which in balance allow it to be regarded as sustainable.
- 4.7.5 The SA provides a useful guide to comparative performance against a range of environmental, social and economic considerations allowing all reasonable alternatives to be assessed on the same basis. It does not itself provide a definitive answer on which sites to allocate, but is an important part of the supporting evidence. There may be specific local circumstances that justify choosing a particular option that does not perform as well as others when appraised against the SA framework. This could arise, for instance, because the plan has targets for individual HMCAs rather than a district wide target. If such instances arise, particular attention should be given to implementing recommended mitigation measures.
- 4.7.6 **Flood Risk Sequential Test and Exception Test:** See separate Background Paper. The Council has to consider which sites are susceptible to flooding. All sites in flood zone 3b were 'sieved out' at the initial stages of site assessment. (See para 4.4 above). Remaining sites have been subject to a sequential, and where necessary exception test to make sure that flooding issues are taken into account, and in instances where sites are in or partly in higher category flood zones,

mitigation measures can be applied if a site is proposed for allocation.

- 4.7.7 **Other considerations:** In addition, certain sites may be affected by other considerations including the Habitats Regulations Assessment, or comments made by neighbouring authorities or other statutory consultees in the Duty to Cooperate process – see separate reports on these.
- 4.7.8 It is a combination of all these factors that have led to the final suite of new housing allocations.

AIRE VALLEY LEEDS AREA ACTION PLAN - THE PROCESS OF SITE ASSESSMENT AND SELECTION OF SITES FOR ALLOCATION FOR HOUSING

- 4.8 The process of site assessment and selection of sites in the Aire Valley followed a similar process to the Site Allocations Plan, using the same site assessment proforma. However, earlier consultations on the AVLAAP were undertaken to different timescales including a preferred options consultation in 2007, with a separate Report of Consultation which details the number and content of representations received and a further informal consultation on potential site allocation taking place in 2011. These consultations did not adopt the same colour coding approach but alternative housing sites submitted to the Council have been fully assessed as part of the Sustainability Appraisal process.

Further site submissions – late representations to the Site Allocations Plan and SHLAA submissions post February 2015.

- 4.9 A small number of new site submissions have been received for the Site Allocations Plan since Executive Board in February 2015 and this is likely to continue up to Submission. The Site Allocations Plan and Aire Valley Area Action Plan must inevitably take decisions on sites at a single point in time, otherwise it will never be possible to reconcile all the different elements. Therefore, rather than consider further sites on an ad hoc basis it is considered that such sites should be considered as part of the SHLAA 2015 conclusions and alongside representations made for other sites following the Publication Draft Plan public consultation stage, for both site allocations and Aire Valley. This means that all new suggestions will be considered in a consistent and fair manner at the same time. If subsequent changes were to be agreed by members through this process, there would need to be a further period of public consultation on proposed changes to the plans, prior to submission. This would have implications for the overall timetable for, submission, examination and adoption.

Safeguarded Land

- 4.10 In addition to land for housing the Site Allocations Plan needs to identify sites as safeguarded land to provide a reserve for possible long term use (for housing and/or employment) beyond the plan period (2028). See Background Paper –

Green Belt Review which explains this process and the distribution of sites across the HMCAs. (There are no such designations within the area of the Aire Valley Area Action Plan).

- 4.11 It is also the case, that in some HMCAs, there remain existing UDP Protected Area of Search (PAS) sites which are retained as safeguarded land where they are not proposed for allocation. This is partly on the basis that a previous inspector has determined that these sites are capable of development and are in broadly sustainable locations. In addition if these sites do not continue to be safeguarded then the only option would be to remove yet more land from the Green Belt. This would run counter to the view that the Green Belt should be impacted as little as possible and not meet the exceptional circumstances test for Green Belt change. Otherwise the choice of sites generally reflects the same considerations as for housing sites, attempting to balance a range of policy considerations, and has undergone the same assessment process described above.

5 BROWNFIELD/GREENFIELD MIX

- 5.1 Paragraph 2.32 of the Site Allocations Publication Draft Plan details the brownfield/greenfield mix achieved. Table 3 from the plan is reproduced below.

Table 3 (Core Strategy) Greenfield/brownfield split across HMCAs

HMCA	Greenfield capacity	Brownfield capacity	% greenfield	% brownfield
Aireborough	1381	863	62	38
City Centre	195	11111	2	98
East Leeds	8808	1543	85	15
Inner Area	1436	10364	12	88
North Leeds	1921	3967	33	67
Outer North East	4468	509	90	10
Outer North West	1237	542	70	30
Outer South	1953	444	81	19
Outer South East	3462	618	85	15
Outer South West	5177	1624	76	24
Outer West	2051	2656	44	56
Total	32,089	34,241	48	52

*The table includes AVLAAP figures

- 5.2 The draft plan explains that Government policy does not insist that previously developed land, known as brownfield land, has to be developed and exhausted before any development on greenfield land can take place. The amount of

allocated sites on brownfield land totals 34241 (see Table 3 above), which is under the 66,000 we need to allocate, so we need to allocate greenfield sites for housing as well. Core Strategy policy H1 sets a target of 65% of development on previously developed land for the first 5 years of the plan (2012 – 2017) and 55% thereafter. The National Planning Policy Framework (NPPF) sets out 12 core planning principles of which one is to encourage the effective use of land by reusing land that has been previously developed (brownfield land), provided that it is not of high environmental value, and Core Strategy Policy H1 includes previously developed land and buildings within the main urban area or settlement as a priority for identifying land for development. The Core Strategy also includes a windfall allowance of 8,000 dwellings over the plan period. It is anticipated that the great majority, if not all windfall will be on brownfield land. When this is taken into account the overall balance is 57% brownfield and 43% greenfield, which is within the range established in the Core Strategy. Sites on brownfield land are within Phase 1 – see para 2.36 – 2.39 on phasing. We have tried to identify all reasonable opportunities on brownfield land consistent with the Core Strategy approach and national policy. The delivery above the indicative targets in the City Centre and Inner HMCAs reflects this approach.

6 PHASING

- 6.1 Paragraphs 2.36 to 2.39 of the Site Allocations Publication Draft Plan explain the methodology for phasing development of housing sites. The approach is to release sites which are more sequentially preferable i.e. support the delivery of the Core Strategy spatial priorities as set out in policies SP1 to SP10. The phasing approach addresses the need to strike a balance between ensuring an enduring 5 year supply of land, with sufficient choice and competition in the market for land with recognition that some sites are less sequentially preferable by virtue of their greenfield status, local highways impacts or local infrastructure requirements. Phase 1 is large because there are a significant number of brownfield sites in the main urban area which could come forward at any time, and sites which have the benefit of planning permission already; supplemented by strategic Green Belt and greenfield release which among other things supports wider regeneration ambitions. Also, large sites over 750 dwellings will start in phase 1 so as to ensure that they make an appropriate contribution to housing requirements throughout the plan period.
- 6.2 Table 4 in the Site Allocations Publication Draft Plan outlines the Phasing Approach and is reproduced below.

Table 4 (in Site Allocations Plan) Phasing Approach

Phase	Type	No. of sites	Capacity
1	Identified sites with extant permission	310	20037
1	Identified sites - UDP	62	10130
1	Brownfield allocations in Main urban area	94	6735
1	Brownfield allocations in Major settlements	20	529
1	Brownfield allocations in Regen areas	2	71
1	Greenfield allocations in Regen areas	35	5687
1	City Centre Infill	57	6367
1	All sites over 750 units	3	6091
1	Greenfield allocations in Main Urban Area	17	836
1	Greenfield allocations in Major settlements	6	352
1	Brownfield allocations in smaller settlements	8	260
1	Phase 1 other	3	198
	Phase 1 total	617	57,293
2	Greenfield allocations MUA extension	12	1295
2	Greenfield allocations Maj Set extension	14	2528
2	Phase 2 other	4	1125
	Phase 2 total	30	4,948
3	Greenfield allocations in smaller settlement	6	107
3	Smaller settlement extensions	24	2904
3	Rural allocations	1	40
	Phase 3 total	31	3,051

*The table includes AVLAAP figures

- 6.3 The phasing of individual sites (i.e. whether in Phase 1, 2 or 3) is identified in the Draft Plan under Policies HG1 and HG2 and listed under the site specific requirements for each site in section 3 for each HMCA. Phases are not time limited but movement between phases will happen when the Council is no longer able to maintain a 5 year land supply and needs to supplement its deliverable pool of sites from the next phase in the Plan period. In certain circumstances it has been necessary to alter the phase of a site given factors such as highway infrastructure, the spread of an individual settlement's sites across the phases and the ability of some sites, in policy terms, to be developed at any time in spite of being theoretically phased later. These sites are:

Table 5: Phase Changes

HG2-150 (1220A)	Churwell (land to the east of) LS27	Moved from Phase 1 to Phase 2 due to highways concerns
HG2-149 (1282)	Lane Side Farm, PAS Morley	Moved from Phase 1 to Phase 2 due to highways concerns
HG2-182 (129A)	Main Street and Pitfield Road, Carlton,	Highways requirement to merge site HG2-182 with site HG1-410 (507) (which is a current UDP Phase 1 housing allocation)
HG2-26 (15)	Wetherby Road - Scarcroft Lodge, Scarcroft	Changed to Phase 1 - a major developed site in the Green Belt could come forward at any time.
HG2-168 (3373A)	Haigh Wood, Ardsley	Moved from Phase 3 to Phase 2 to achieve a better phasing balance in the local settlement
HG2-169 (3373C)	Haigh Wood, Ardsley	Moved from Phase 3 to Phase 2 to achieve a better phasing balance in the local settlement
HG2-53 (4097)	Calverley Cutting / Leeds Liverpool Canal, Apperly Bridge	Moved from Phase 2 to Phase 1 - Changed due to relationship with adjoining site (1337)

6.4 All sites within the Aire Valley Leeds Area Action Plan area are within Phase 1 for development.

7 SITES FOR OLDER PERSONS HOUSING/INDEPENDENT LIVING

7.1 The National Planning Policy Framework (NPPF) and National Planning Policy Guidance (NPPG) requires Local Planning Authorities to plan for a mix of housing (including older people), based on current and future demographic trends. The NPPG states that the need to provide housing for older people is critical given the projected increase in the number of households aged 65 and over accounts for over half of the new households (Department for Communities and Local Government Household Projections 2013). Leeds has an ageing population and the need to plan for this is identified in the Strategic Housing Market Assessment (SHMA). The findings of the SHMA are embedded in the Core Strategy housing growth principles. These ensure housing growth targets reflect local housing needs by providing a range of housing options in terms of tenure, type and size, ensures quality of life through the design and standard of new homes, delivers affordable homes, and works with partners to meet housing requirements. The majority of housing sites in the SAP and AVLAAP will be able to contribute towards the provision of housing for older people through Core Strategy H4: Housing Mix, and Core Strategy H8: Housing for Independent Living.

7.2 The SAP and the AVLAAP help address areas of deficiency by identifying suitable sites close to Town and Local Centres in conformity with the Core Strategy. Core Strategy Policy H8 states that sites should be within easy walking distance of Town and Local Centres. A 5 minute walk (400m) is deemed an acceptable walking

distance in the Core Strategy accessibility standards and this is used as a general indicator to identify sites for people aged 65 years and over close to Town and Local Centres (and for these sites to be identified on the SAP and AVLAAP Policies Maps) but with the understanding that older people (e.g. over 75 years) are likely to be less mobile, are more likely to have impairments or restricted mobility. Consequently, other factors must be taken into account when assessing sites that are suitable for older people including, but not restricted to, proximity of the site to a frequent bus service, topography, and the location of G.Ps and neighbourhood shopping parades. Where appropriate the sites identified are expected to contribute towards delivering older persons housing, unless the applicant can demonstrate the need is met in this area, or there are other exceptional reasons. This does not preclude other sites from delivering housing for older people as the spatial requirements for the different types of housing for older people vary and they will still be required to satisfy the criteria in Core Strategy Policies H4 and H8.

- 7.3 Arising from this approach, Policy HG4 applies to the sites shown as being suitable for this use. All sites falling within Policy HG4 are listed under that Policy in section 3 for each HMCA concerned and identified on the Plan, as well as listed in the site specific requirements for new allocations.
- 7.4 Details of the projected demand across Leeds can be found in the Adult Social Care report on developing the range of choices in the older peoples housing market that was agreed at [Executive Board](#) on the 18th March 2015.

For the purposes of the Site Allocations Plan the projections were extended to cover the life time of the plan to 2028 and are set out below. It should be noted however, that whilst Table 6 is indicative of some of the need required across the city, it does not reflect the full need from 65+.

Table 6: Over 75's housing market

Ward	Projected over 75s	2028 % over/under supply – Care Beds without Nursing	2028 % over/under supply for Extra Care Housing (ECH) *	% Over /Under Supply For Care Beds With Nursing

*Extra Care housing promotes independent living whilst providing 24 hour access to care.

8 SITES FOR GYPSIES, TRAVELLERS AND TRAVELLING SHOWPEOPLE

Background

8.1 There is a considerable body of legislative and national planning guidance to assist local authorities in meeting the housing needs of Gypsies and Travellers (G&T):

- Section 225 of the **Housing Act (2004)** places an obligation on local housing authorities to assess the accommodation needs of G&T in their area and to develop a strategy to address these needs. If a G&T is statutorily homeless the Council is obliged to secure them suitable temporary accommodation and to maintain this duty until suitable long-term accommodation can be secured. However, it is not defined in law that suitable accommodation must be pitch based.
- G&T have been recognised by the courts as being distinct ethnic groups and are protected from discrimination by the **Equality Act 2010**. The courts have made clear that travelling is not a defining characteristic of these groups, but only one among others. It is important to ensure that the cultural needs of G&T are met and recognise that for most, there will be an aversion to bricks and mortar housing. The Council also has a statutory duty to have due regard to the need to eliminate discrimination, advance equality of opportunity and foster good relations in the course of developing its policies and delivering its services.
- The **Equality Act** defines English, Welsh and Scottish Gypsies, Romany Gypsies, Irish Travellers, New Age Travellers, and Travelling Showmen as distinct ethnic minorities because of their long shared history, with family and cultural traditions that distinguish them from other groups.
- Government planning guidance “**Planning Policy for Traveller Sites**” (PPTS) was published in 2012. PPTS advises that local authorities should set pitch targets for G&T and plot targets for Travelling Showpeople. It also advises that in producing their Local Plan, authorities should identify and update annually a supply of specific deliverable sites sufficient to provide five years’ worth of sites against their locally set targets. It states that the Government’s overall aim is to ensure fair and equal treatment for Travellers, while respecting the interests of the settled community.

8.2 For the purposes of the Site Allocations Plan, and to ensure the accommodation needs of all G&T are considered (including those who do not have a nomadic habit of life but may still have a strong cultural aversion to bricks and mortar accommodation and be in need of a pitch), the definition of G&T as used in the

2004 Housing Act is used³. This defines G&T as:

“Persons with a cultural tradition of nomadism or of living in a caravan; and all other persons of a nomadic habit of life, whatever their race or origin, including: (i) such persons who, on grounds only of their own or their family’s or dependant’s educational or health needs or old age, have ceased to travel temporarily or permanently; and (ii) members of an organised group of travelling showpeople or circus people (whether or not travelling together as such).”

The needs of Gypsies, Travellers and Travelling Showpeople are distinctive.

The accommodation needs of Gypsies and Travellers in Leeds

- 8.3 Gypsies and Travellers require sites which are accessible to local services and pitches which are large enough to accommodate up to two caravans. There is a requirement for separate amenity blocks. In Leeds G&T are represented by a member’s organisation called Leeds Gypsy and Traveller Exchange (Leeds GATE). This charity is based in Leeds and a number of their staff have been key partners in the progression of the Core Strategy and Site Allocations Plan.

The accommodation needs of Travelling Showpeople in Leeds

- 8.4 Travelling Showpeople are a different ethnic group and do not always live in caravans. Their needs are more directly linked to their main employment (servicing fairs and fairgrounds) therefore sites tend to be larger, due to the practicalities of securely storing equipment and HGVs and akin to an employment use i.e. storage and distribution. Accessible road travel is also a priority and constraints relating to the use of HGVs are a key factor in assessing the local impacts of sites. When developing a site, Showpeople require little input from the local authority as they are prepared to purchase land, develop the site and put in water, electricity and roads themselves.
- 8.5 Most Travelling Showpeople belong to the Showmen’s Guild, a regulatory body for its members, who have specific responsibilities, rights, and privileges as well as specific design guidance for the design of their sites. The Showmen’s Guild is represented at a Yorkshire level. The Chair of the Showmen’s Guild for Yorkshire has been involved in the progression of both the Core Strategy and Site Allocations Plan.

The Core Strategy

- 8.6 The Adopted Core Strategy Policy H7 sets out a need for 62 pitches between 2012

³ It should be noted that DCLG released a consultation in September 2014 seeking to amend the Housing Act definition to remove the words “and permanently”. This would have the effect of meaning that only those G&T who have ceased travelling permanently for reasons of health, education or old age (be it their needs or their family’s or dependents’) would for the purposes of planning be treated in the same way as those who continue to travel. A Government response to this consultation has not been released.

and 2028 for Gypsies and Travellers. The justification to this policy notes that the local Gypsy and Traveller Accommodation Assessment (GTAA) splits this need down into three separate components between 2012 and 2028:

- public provision for 25 pitches (a preference for a publically managed pitch was expressed during the GTAA survey)
- private provision for 28 pitches (a preference for a private pitch was expressed during the GTAA survey)
- negotiated stopping for 9 pitches (a need for temporary pitches for Gypsies and Travellers with a connection to Leeds was established)

8.7 The Core Strategy Inspector noted in his report at ¶43:

“Planning Policy for Traveller Sites (PPTS) requires local planning authorities to set pitch targets for gypsies and travellers and plot targets for travelling showpeople based on a robust assessment of need. Following concerns I expressed with regard to Policy H7, the Council worked with Leeds Gypsy and Traveller Exchange (GATE) and carried out site surveys to assess the needs of the travelling community in Leeds. Policy H7 and its reasoned justification were subsequently revised setting targets for gypsies and travellers and travelling showpeople. GATE was critical of Policy H7 as submitted but, at the hearing in May 2014, praised the Council’s officers and the collaborative approach taken in compiling the survey. This is to be commended and I have no reason to consider that the new evidence which supports the modified targets is not robust”.

Adopted Core Strategy Criteria

8.8 The identification of allocated sites has had regard to the criteria of Policy H7 as follows:

1. *pitches and plots should have reasonable access to public transport, health care, schools, shops and local services*

the assessment of sites for Gypsies and Travellers has taken into account the accessibility standards of the Core Strategy contained in Policy T2 and the accompanying accessibility standards. For access to schools there is a need to take account of local arrangements on Council-run sites where Gypsy and Traveller children often access schools which have a history of teaching Gypsy and Traveller children.

2. *pitches and plots should not be located on land that is deemed unsuitable for general housing, such as land that is contaminated, adjacent to refuse sites, landfill sites, heavy industry or electricity pylons*

sites which give rise to these constraints have been fully assessed to take them into account, including the presence of past remediation measures and distance between the constraint and the proposed site.

3. *itches and plots should avoid zones of high flood risk (zone 3 flood risk areas)*

a Strategic Flood Risk Assessment has been carried out as part of the assessment of suitable potential sites.

4. *the following order of preference for categories of land should be followed: brownfield, greenfield and Green Belt. Alterations to the Green Belt boundary to accommodate pitches and plots will only be considered in exceptional circumstances, to meet a specific identified need. In such circumstances and as part of the Site Allocations Plan, sites will be specifically allocated as a Gypsy, Traveller and Travelling Showpeople's site only*

the site search of Council owned land has examined the Council's land holdings, and considered those which are part of its brownfield land programme. However, there are a number of local factors which have affected the manner in which this criteria has been implemented and these are explored in the conclusion section below.

5. *the availability of alternative deliverable sites for Gypsies and Travellers and Travelling Showpeople*

Leeds is preparing a Gypsy and Traveller allocations plan at the same time as its allocation plan for settled housing, employment, retail or greenspace. Many of the most available and suitable sites are identified as preferred allocations or already have planning permission for another use. They are therefore not always available for Gypsy and Traveller use.

8.9 Two other criteria are important in guiding the allocation of sites.

8.9.1 First, the Core Strategy Policy H7 notes in its justification that whilst the national guidance is for no more than 15 pitches per site (as reflected in the policy wording) the justification reflects that there is a preference from local Gypsies and Travellers themselves and local Members for a larger number of small sites rather than a smaller number of large sites.

8.9.2 Second, the Core Strategy Inspector notes in ¶44:

"Sites identified through the Site Allocations Plan process will be subject to consultation. PPTS requires local planning authorities to ensure that their policies promote peaceful and integrated co-existence. This will doubtless be a factor in choosing sites through the site allocations process and I see no need to repeat that requirement in the Core Strategy."

8.10 In Leeds several factors are pertinent in implementing this criteria.

8.10.1 The first is around the preferences of Gypsy and Traveller families themselves to feel that they are not threatened by proximity to the existing settled community. On larger sites it is possible for a Gypsy and Traveller population to establish itself locally and gain a feeling of security by the fact that they are a large group. Given

the desire to provide smaller sites locally there is a need to consider the implications for Gypsies and Travellers of a new small site within an area of established housing. Leeds GATE have confirmed their reluctance to see such small sites delivered within existing settled housing estates. It is important to note that the Council is not seeking to isolate Gypsies and Travellers in this way but seeking to pragmatically identify sites which are near to local services and amenities and can also provide the opportunity for peaceful integration without any potential negative impacts which might be caused by the introduction of Gypsy and Traveller families immediately adjacent to settled housing.

- 8.10.2 The second factor, relates to the settled population who by and large have expressed through the issues and options consultation an unwillingness to accommodate Gypsies and Travellers locally. Whilst noting these concerns in the context of seeking to promote a peaceful and integrated co-existence, the Council has not sought to locate Gypsies and Travellers away from the urban area or existing communities where access to services is poor, but rather has sought a balance whereby it can ensure that new sites are not immediately adjacent to areas of settled housing. Whilst not a critical criteria the Council has also sought to identify sites which by their nature offer an element of established self-containment and privacy for new residents. These ambitions have been discussed with and supported by Leeds GATE.
- 8.10.3 Both of these factors are addressed somewhat by the intent to deliver smaller sites. Learning from the Inspector's decision at the Cottingley Springs call-in inquiry the Council is aware that larger sites where a number of families live are more likely to lead to local issues around co-existence. In Leeds, the fact that so many of the private sites that the Council is seeking to safeguard exist peacefully is also evidence that smaller sites tend to co-exist better with the settled population. In addition, these sites being slightly removed from areas of settled housing but nevertheless accessible to services, supports peaceful co-existence.
- 8.10.4 Third, the implementation of sites via planning approval and site design offers the potential to ensure that new Gypsy and Traveller sites are integrated into the surrounding local community and not excluded from it. This can be achieved by ensuring that sites are not overly enclosed and secluded i.e. creating strong and well-designed frontages. It also offers the chance to ensure that those families living on new sites can access services i.e. through improvements to local footpaths and routes to shops and other facilities.

Identification of public pitch allocations

- 8.11 With regard to the allocation of Council run / public sites the Core Strategy justification sets out that:

"The Site Allocations Plan will engage positively with the Gypsy and Traveller community and Leeds GATE to ensure that suitable Council run sites

(including where appropriate an element of transit provision) are identified and allocated to meet the full needs for the plan period". (¶5.2.36)

- 8.12 The approach to identifying Council run sites (i.e. the 25 public pitches identified in the policy alongside approaches to the 9 negotiated stopping (i.e. transit pitches) is set out below.

Identification of private pitch allocations

- 8.13 With regard to the allocation of private sites the Core Strategy justification sets out that:

"For private pitch provision, including for Travelling Showpeople, the Council will work proactively with the Gypsy and Traveller communities, Leeds GATE and the Showmen's Guild to help identify and allocate such sites through the Site Allocations Plan in line with the criteria in Policy H7." (¶5.2.37)

- 8.14 The Adopted Core Strategy policy also recognises that not all of the identified need for Gypsies, Travellers and Travelling Showpeople may be addressed via the allocation of land in the Site Allocations Plan document. To this end it sets out in the Policy a set of criteria to be used "in identifying land or determining planning applications". The justification to Policy H7 notes:

"Planning Policy for Traveller Sites (2012) confirms that a criteria based policy can provide a basis for decision taking as well as allocating sites, therefore the policy contains criteria to guide land supply allocations and provide a basis for decisions, should applications nevertheless come forward". (¶5.2.37)

- 8.15 This is a locally important issue because not all of the requirement may arise during the plan period. The GTAA survey revealed that some Gypsies and Travellers were living in their own house or a rented house and whilst their first preference would be for their own land there wasn't a cultural aversion to living in bricks and mortar accommodation. Their personal circumstances will determine when and if their expressed aspiration for a pitch may materialise during the plan period. This can be fulfilled by either submitting a planning application or by proactively making a housing application to the Council for a public-run pitch.

Current approaches to the provision of accommodation

- 8.16 It is widely accepted that there is a national shortage of authorised sites for Gypsies and Travellers and Travelling Showpeople. In Leeds this has led to increasing incidence of unauthorised encampments, which create tensions between G&T and the settled community. At the same time it is recognised that G&T are amongst the most socially excluded groups and independent national research confirms the link between the lack of good quality sites and poor health and education outcomes. G&T are being held back by some of the worst outcomes of any group across a range of social indicators on housing, health, education, incidence of hate crime and

access to employment⁴. Both the Government and the Council recognise that unmet need for housing must be addressed. The provision of authorised sites is therefore an important step in managing a host of issues.

8.17 Leeds, like most other parts of the country, has a shortage of authorised G&T sites. Historically this has created unauthorised developments and encampments. However, in recent years, and following a Council Scrutiny Inquiry in 2010, emphasis has been placed upon addressing immediate needs and priorities (for families living on the roadside), as well as developing a longer term approach through the Core Strategy and Site Allocations Plans to meet arising needs and where families are “doubling up” on existing provision. To that end, the Council has pursued two options to address immediate needs:

- a planning application for an additional 12 pitch extension to Cottingley Springs (the Council’s only managed site for permanent pitches). This was refused by the Secretary of State following a “call-in” hearing in public. The main reasons for refusal were: harm to Green Belt outside of a plan-making process and impact on the neighbouring settled community.
- a 3 year temporary permission for 8 pitches has been granted at Kidacre Street (City & Hunslet), which is fully subscribed and has helped to reduce the incidence of unauthorised encampments and to relieve pressure for pitches at Cottingley Springs.

8.18 The Council recognises that the ability to enforce against unauthorised development in Leeds is related to its proactivity in meeting the need for new provision. If the Council supports the provision of sites largely for Leeds based G&T it will be in a much stronger position to resist inappropriate encampments where they arise.

Gypsies and Travellers – Existing Supply

8.19 In Leeds there is a current residential supply (assuming one household per pitch) of 41 public sector pitches at Cottingley Springs, Farnley & Wortley and 7 further private pitches. Authorised pitches include sites with planning permission (in the form of permanent, personal or temporary permissions) and sites with established use rights or other planning status which means that planning enforcement action cannot be taken. It should be noted that the site at Kidacre Street does not form a part of the existing supply, as this was granted permission after the Core Strategy assessment was completed. The 7 private pitches provide for families on sites at:

- Nepshaw Lane, Morley South (1 pitch counted as part of existing supply but following further assessment it should be noted that the site accommodates 2 pitches)
- Rose Neath Place, Farnley & Wortley (1 pitch)

⁴ (2012) Department of Communities and Local Government, [Progress report by the ministerial working group on tackling inequalities experienced by Gypsies and Travellers](#)

- Ninevah Lane, Kippax & Methley (2 pitches counted as existing supply but following further assessment it should be noted that the site accommodates 1 pitch)
- Knotford Nook, Otley & Yeadon (1 pitch)
- Springfield Villas, Morley North (2 pitches)

8.20 There are also a number of G&T sites which are unauthorised but categorised as “tolerated sites”. These did not form part of the identified existing supply of land at the time of the Leeds Needs Assessment. These sites are as follows:

- Dunningley Lane, Middleton (2 pitches)
- White Rose Farm, Gildersome (2 pitches)
- Scarecrow Farm, Gildersome (1 pitch)
- Thorp Lane, Tingley (3 pitches)
- Urn Farm, Middleton (2 pitches)

8.21 Many of these sites are long established and they are all currently not subject of enforcement action by the Council. The Council’s preferred approach is to therefore safeguard these sites for the permanent use by Gypsies and Travellers. These sites have been subject to Sustainability Appraisal in Appendix 1.

8.22 In addition the Council asked Leeds GATE to visit these sites and establish the intentions of the current occupiers. In all cases there was a desire to remain. Occupiers will be encouraged to apply for permanent planning permission or Lawful Development Certificate for pitches. It is important to note that these 5 sites were not counted as part of the existing supply in the GTAA **and** expressed a need in the GTAA survey. By safeguarding these 5 sites the Site Allocations Plan therefore addresses 10 out of the 28 private pitch needs. The Council can also count an additional pitch by safeguarding land at Nepshaw Lane, Morley, bringing the total to 11 out of 28.

Travelling Showpeople – Existing Supply

8.23 The recent local Leeds GTAA carried out with the Showmen’s Guild assessed a need for 15 plots in Leeds up to 2028 and that these could be accommodated on one or two sites. There is an unauthorised “tolerated” site at Whitehall Road, Drighlinton where 8 families are reported by the Showmen’s Guild to currently reside. There is also a longstanding small site at Town Street, Yeadon. These sites are counted against the need figure of 15 which leaves a remaining need for 6 plots. These are to meet the current needs of two family groups currently residing on land in Leeds for which there is no permission and where the landowner, whilst tolerant for a short period, does not wish them to remain permanently.

Issues and Options Consultation

8.24 At the time of the Site Allocations Issues and Options consultation (Summer 2013) a

specific level of need for G&T was not established and agreed upon. Therefore no sites were proposed for G&T use at the time. However, at Issues and Options stage the Council sought the views of people as to whether any particular sites which were also being assessed for housing would be suitable for G&T or whether there were any other sites which were suitable which were not being assessed for housing i.e. “a call for sites”.

8.25 The Council received 172 comments to these questions. 55 comments stated that sites for G&T should be found within the main urban area. 46 individual site suggestions were made throughout the District and these have been considered as part of an assessment. However, there were a number of issues with the “call for sites” submissions:

- no sites were submitted by landowners at Issues and Options consultation stage
- a number of comments were offensive and racist – these have been removed from the Council’s database and no further consideration has been given to them
- a number of suggestions were for sites which could not be taken seriously as they were not available e.g. the airport and Millennium Square in the City Centre
- a number of suggestions were on large housing submissions owned by private house builders and landowners where the land is not available for G&T use

8.26 In parallel to the Issues and Options work for the SAP the Core Strategy was being finalised. As part of this the Council liaised closely with the Leeds Gypsy and Traveller Exchange (Leeds GATE) and representatives of the Showmen’s Guild. Through this consultation a range of sites were proposed to the Council which have been assessed as part of the SAP. In addition, as part of the Leeds local GTAA a survey of G&T was held. In total 115 surveys were completed by local G&T families. A specific question on the survey was around whether there were any sites which would be suitable for G&T accommodation or whether G&T owned any land that they wished to submit to the SAP “call for sites”. This question did not elicit any responses from the 115 households who were surveyed.

8.27 Following the Issues and Options call for sites the Council received one submission of a site by a landowner for privately managed provision. This was submitted via a planning consultant specialising in G&T accommodation provision throughout the country and is assessed alongside the other sites.

Consultation with Leeds GATE

8.28 Consultation with Leeds GATE has continued throughout the process and following

Adoption of the Core Strategy further meetings were held to encourage Leeds GATE to explore with their local members whether there were additional sites. They reported that Gypsies and Travellers remain sceptical about the process and the potential for sites to be found and agreed. Leeds GATE anticipate that further consultation at Publication stage may elicit positive responses from landowning Gypsies and Travellers in Leeds to submit their sites into this process. Leeds GATE have been instrumental in assisting the Council assess the safeguarded sites in terms of current numbers of pitches and desires of existing residents. Leeds GATE are supportive of the preferred sites proposed for allocation.

Consultation with the Showmen's Guild

- 8.29 Consultation has continued with the Showmen's Guild throughout the site allocations process. Officers visited a Showmen's site in Doncaster to understand their specific needs and gain an understanding of the manner in which sites can be laid out. The Chair of the Guild has supported the preferred allocation at land off Phoenix Avenue, New Micklefield.

The approach to assessing sites

- 8.30 G&T sites vary in terms of size and there is no one size fits all measurement for a pitch or plot. Good practice guidance suggests that G&T sites should provide enough land per household for a mobile home, touring caravan and a utility building, together with space for the parking of two vehicles. In accordance with the views of consultees, local members and Leeds GATE the Council has looked for a greater spread of smaller sites where around 5 families could be accommodated. The minimum site area required is estimated at 0.3 hectares but some sites could be smaller or larger depending on specific circumstances.
- 8.31 Sites for Showpeople are usually larger as there is not only the need to store equipment, there is also a desire for more Showpeople to live together so as to ensure greater natural security for their equipment and HGVs.
- 8.32 When identifying suitable sites a range of factors need to be taken into consideration. PPTS states that sites for the short term (first five years of a plan period 2012 - 2017) should be deliverable and that sites, or broad locations, for the medium and longer term (years six to ten (2018 – 2022) and years eleven to fifteen (2023 – 2027/8) should be developable.
- 8.33 For a site to be considered deliverable, it should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that development will be delivered on the site within five years and in particular that development of the site is viable. For a site to be considered developable, it should be in a suitable location for development and there should be a reasonable prospect that that the site is available and could be viably developed at the point envisaged.

Assessment Phase 1

8.34 In accordance with the Core Strategy, the potential of each submitted and existing site was assessed against the site selection criteria in Policy H7. At the same time, each site was assessed for its deliverability which included an assessment of:

- *Suitability* – does the site meet wider Core Strategy or National Planning policies e.g. on environmental and conservation issues
- *Availability* – is the site available for G&T use? has it been submitted by a willing landowner? does the site have permission/allocation for another use or has the landowner submitted it for another use as part of the SAP process?
- *Achievability* – is the site below 2ha or where smaller parcels of larger sites could easily be achieved without prejudicing the remaining site for other uses?

The “long list” assessment included 64 individual sites comprising:

- 15 Sites submitted in consultation with Leeds GATE (appendix 3)
- 1 Site submitted in consultation with the Showmen’s Guild (appendix 4)
- 2 Sites submitted by private G&T landowners (appendix 5)
- 1 Site being considered through the Decision Taking process (appendix 5)
- 34 Sites (from over 80 individual site suggestions – with some duplicates) which were submitted to the Council through the Issues and Options consultation but not by those who owned the land (appendix 6)
- Broad areas of search submitted through the Issues and Options consultation (appendix 6)
- 11 existing sites in the District without the benefit of full planning permission

8.35 Many of the phase one sites were simply not available as they had not been submitted by willing landowners. The results of stage one was a potential pool of 13 sites, which were mainly existing tolerated sites but also included a private submitted site. The potential capacity of these sites would not meet the identified need in Policy H7.

Assessment Phase 2

8.36 One of the main means of ensuring that sites are deliverable/developable, is to assess land in the Council’s ownership over which it has control, which is surplus to requirements and is suitable for G&T accommodation. Such sites were considered as part of a stage two assessment examining land in Council ownership. The results of stage two was the identification of a further 27 sites. These sites were selected on the basis of the tests of suitability, availability and achievability above and detailed as Appendix 8 and with the preferred sites in Appendix 9 and 10.

8.37 One of the key messages from the assessment and consultation with stakeholders has been the desire to have smaller sites for a smaller number of families per site. This approach also helps to address some of the concerns raised by the Inspector

who assessed the Cottingley Springs application and considered that there is an issue with a local resident population feeling overwhelmed by larger sites. It is difficult to set a limit and national guidance advises that sites should be no larger than 15 families. However, the site assessment has been carried out on the basis that small sites for around 5 families would be preferable. The approach to site selection is a balance between suitable sites, locational preferences of the G&T population and impacts on existing areas. An approach to smaller sites means that a greater range of sites are available, there is more prospect of peaceful integration as smaller sites may be easier to assimilate with existing communities and inevitably that there is a greater spread of sites throughout the District.

8.38 Consultation with landowners, ward members, Leeds GATE and the Showmen's Guild was undertaken prior to the publication of these sites for consideration by Development Plans Panel. The preferred list of sites was tabled at the meeting on 24th June 2015. No comments were received following this panel meeting.

8.39 In general the site search has been a difficult exercise for the following reasons:

- there has only been one submission of a site by its landowner⁵
- the use of Council land is supported however the Council as landowner has an obligation to seek best value on its assets, especially in difficult public funding climates.

8.40 The Core Strategy recognises the desirability of re-using brownfield land, however it is considered that this must also be balanced against other objectives. The NPPG⁶ recognises that brownfield land is often more expensive to develop and where the cost of land is a major barrier, landowners should be engaged in considering options to secure the successful development of sites. In many parts of the Leeds District comprehensive regeneration strategies are being progressed which incentivise the bringing back of brownfield sites into use for a range of uses including settled housing. The Council consider that some of these areas where brownfield land is expensive to develop, where areas are classed as gateway regeneration sites e.g. the Enterprise Zone which is dependent on attracting significant levels of private inward investment or where regeneration frameworks are well advanced, would not provide competitive returns to landowners, including the Council if they to be identified for Gypsy and Traveller uses. This has a bearing on the availability of some sites within Leeds. The results of a sustainability appraisal are included at Appendix 11 and 12.

Flood Risk Assessment

8.41 Four of the proposed sites have some form of Flood Risk. The sites are assessed

⁵ However a further site has been submitted, but not yet assessed at Pollard Lane, Bramley.

⁶ NPPG: 10-025-20140306

in Appendix 14. This concludes that Tulip Street has minimal flood risk to a small corner of the site which causes no constraint to the site's overall delivery.

- 8.42 Knotford Nook and Land at West Wood have potential to be affected by flooding in Flood Zone 3. The former lies within Flood Zone 3 and the access road for the latter is within Flood Zone 3. The conclusion for Knotford Nook is that given its longstanding nature and presence of on-site flood mitigation it is appropriate to safeguard. Access arrangements will need to be addressed as part of any planning application for land at West Wood.
- 8.43 Tong Road, Wortley is in Flood Zone 2 but not at risk from the main river because the site is elevated above it. The main risk to be addressed and mitigated via a planning application is from the reservoir, which in the past has discharged water across the site.
- 8.44 There are no sequentially preferable sites from the Phase 2 site assessment which are available or achievable.

Green Belt Implications

- 8.45 Although Policy H7 of the Core Strategy states that sites in the Green Belt will not be permitted unless other locations have been considered and only then in exceptional circumstances, because Leeds has an identified unmet need for Council-run sites and no alternative deliverable sites elsewhere, this is considered to constitute exceptional circumstances. It should also be noted that Adopted Core Strategy Policy SP10 sets the strategic policy framework for such releases. It notes that a review of the Green Belt boundary will need to be carried out to accommodate housing growth and also that sites unrelated to the main urban area, major settlements and smaller settlements could be considered where they will be in sustainable locations and are able to provide a full range of local facilities and services. A number of Green Belt sites made the final shortlist for public provision. In Leeds a number of settled housing sites have been located in the Green Belt and in line with Core Strategy SP10 there is no reason why the principle of Gypsy and Traveller sites should be any different. However, for such sites to be appropriate for allocation there must be an assessment of their Green Belt functions and mitigation in site requirements where necessary. This is included as Appendix 6.
- 8.46 The Solihull Plan Inspector considered similar circumstances when finding their plan sound. Some key points arising from the Solihull Inspector's Report are:
- The Inspector highlighted that the Borough is significantly constrained given that all the non-urban area is Green Belt. This is largely the case in Leeds.
 - All the existing authorised G+T sites are also within the Green Belt. This is largely the case in Leeds.

- The Inspector noted that land values in the urban area tend to prohibit G+T sites being viable and deliverable options. This is the case in Leeds.
- The sites put forward are considered to be available and deliverable options, and as such the identification of sites in the Green Belt is therefore the most appropriate strategy, in principle, when considered against the lack of reasonable alternatives.

8.47 Green Belt assessments (Appendix 12) have been carried out for otherwise available sites on three sites: West Wood, Morley; Bullerthorpe Lane, Temple Newsam and Land off Pawson Street, Robin Hood. The conclusions of the assessment (Appendix 6) are that:

- the sites at West Wood and Bullerthorpe Lane lie within areas of Green Belt where designation of these small scale sites would lead to minor impacts on the Green Belt with little potential to create precedents of sprawl or encroachment. Whilst the sites do not round off settlement boundaries they are small in scale and their impact is minimal. They are proposed as deletions of Green Belt.
- the site at Land off Pawson Street lies within a strategically important Green Belt buffer which defines the western edge of the smaller settlement of Robin Hood. Release of this site from the Green Belt, which is currently actively used for agricultural purposes, would lead to sprawl, encroachment and create a potential precedent for further release of sites to the north and south. This tract of Green Belt forms a strategic role in Leeds and proposals for settled housing to the north of the site have also been discounted because of the importance of this Green Belt buffer. The site is also rejected on this basis.

8.48 The Council intend to wash over safeguarded allocations in the Green Belt because these are existing sites that are generally longstanding and are very small in scale. To inset them would create very small holes in the Green Belt which given their lawful use rights in any event would be unnecessary to their continued function as G&T sites.

8.49 The Council propose to inset the two new allocations within the Green Belt on the basis that these are new sites and are being proposed at a time when the Green Belt boundary is being established. Whilst this is not a precedent for creating holes in the Green Belt for other uses it aligns with the approach set out in the Solihull Inspectors Report and a need to create defensible boundaries to ensure that the sites can be implemented for their intended allocated use.

Duty to Cooperate

8.50 The approach to assessing a need for Gypsies and Travellers and the various

stages of Local Authority plan's preparation on the issue has been a standing update item on the Strategic Planning (Duty to Cooperate) Group which meets every two months and comprises the Heads of Planning for each of the Leeds City Region authorities. Throughout the preparation of the Core Strategy policy the Council has focused on meeting its own needs and is not relying on neighbouring authorities to assist. It has also not been asked to assist in meeting the Gypsy and Traveller accommodation needs of any neighbouring authorities.

Conclusions

Council-run permanent sites

- 8.51 The Adopted Core Strategy sets out a requirement for 25 Council-run pitches between 2012 and 2028. There is already an existing supply of 41 pitches set out in the Leeds GTAA at Cottingley Springs, Gildersome. This site will continue to meet needs throughout the plan period as Gypsies and Travellers move out and new families move in. The site is overcrowded at the current time and solutions, including new sites are required to address immediate needs.
- 8.52 The Council has granted temporary planning permission for a site at Kidacre Street at the edge of the City Centre. This addresses much of the immediate need for accommodation and is in a sustainable location. The safeguarding of the Kidacre Street site throughout the plan period or until the new High Speed Rail development impacts it is set out as a means of meeting up to 12 pitches. It is considered that the remaining need for new sites will be addressed via the allocation of three further sites.
- 8.53 These sites have been identified following two phases of assessment. The first assessed sites which were submitted to the Council as part of the issues and options consultation. This elicited few deliverable sites mainly because many had alternative uses proposed or were not in the Council's ownership. The second carried out an assessment of additional Council owned land which had not been considered through the wider Site Allocations Plan process. Whilst some of these sites became un-available with the passage of time it produced a small pool of available, suitable and achievable sites. Land at West Wood, Tingley and land off Bullerthorpe Lane are in the Green Belt and assessments have revealed that their impacts are very minor. Land at West Wood, Tingley and Tong Road, Wortley are in areas of flood risk and assessments have revealed that risks can be managed and/or mitigated. Together with Kidacre Street these new sites represent a good distribution of sites to meet the needs of Gypsies and Travellers wishing to live on a Council-run site.
- 8.54 The accommodation from these four sites totals 24 out of the 25 requirement for pitches and the Council will continue to explore options for addressing this outstanding supply prior to submission of the SAP, potentially via new sites

proposed through the consultation process.

Council-run negotiated stopping sites

- 8.55 The Adopted Core Strategy sets out a requirement for 9 Council-run negotiated stopping pitches between 2012 and 2028. The Council's intention is that these sites meet the housing need of 'Leeds connected' G&T who do not want permanent pitch provision, intend to stay in the city for a short period of time and want a short term site option in the city as part of their nomadic lifestyle. The proposal is to deliberately not identify specific sites as they will become, by default, permanent sites and are less likely to lead to peaceful and settled co-existence because of the transitional nature of the occupants.
- 8.56 Rather than identify sites in the SAP, as part of ongoing operational management, the Environment and Neighbourhoods service will work alongside other Council services to identify and appropriate short term sites where Gypsy and Traveller visitors to Leeds can be directed. This approach has the support of Leeds GATE.

Privately managed sites

- 8.57 The Adopted Core Strategy sets out a requirement for 28 privately managed pitches between 2012 and 2028. There is already an existing supply of 7 pitches on 5 sites identified in the Leeds GTAA. As part of the Site Allocations Plan preparation and, particularly as a result of work by Leeds GATE eleven additional households have been identified, who expressed a preference for private pitches in the Core Strategy and, for whom their need could be met by permitting them to stay on the long term land that they are occupying. This approach therefore safeguards 5 sites in addition to the 5 sites which were accounted in the Leeds GTAA. This meets 11 out of the 28 pitch requirement in the Core Strategy policy.
- 8.58 Only two private submissions were made to the Site Allocations Plan process for the allocation of privately owned land. These were by the same consultant. First, for land off Pawson Street, Robin Hood which has been discounted on Green Belt terms. Second, for land off Pollard Lane, Bramley which has yet to be assessed because it was submitted late in the process. In addition, a site at land off Sandon Mount, Hunslet has been assessed as it was subject of a S78 appeal against refusal of planning permission. The site has been discounted on the basis that it is on greenspace in an area of deficit.
- 8.59 The Publication consultation may elicit further submissions which will be assessed in the same manner.

Sites for Travelling Showpeople

- 8.60 The Adopted Core Strategy sets out a requirement for 15 private plots between 2012 and 2028. During the site assessment for Gypsies and Travellers land was

also assessed for potential for Travelling Showpeople. This involved looking at large parcels of land. The Council's asset management service suggested a site at land off Pheonix Avenue, New Micklefield. This site was considered to be sustainable and deliverable. It is part of a wider employment land allocation. Given the nature of the proposed use for Travelling Showpeople it is not considered that its former designation is inconsistent with the proposed use for Travelling Showpeople as they will require the land to store large equipment and machinery alongside their caravans.

Approach to site selection

- 8.61 Site selection has resulted in some brownfield sites and land within the main urban area of Leeds, but it has not been possible to identify Gypsy and Traveller allocations wholly on brownfield land. Where greenfield and green belt sites have been chosen these are small in scale and considered to form self-contained and well-defined boundaries with minimal impact to the Green Belt.

Green Belt Review Methodology - complete this section only where a site lies within the existing Green Belt.

Once the general extent of a Green Belt has been approved, boundaries should only be altered in exceptional circumstances. It is therefore necessary to assess which land within the Green Belt can make a significant contribution to meeting long term development land supply needs which would be least damaging to the purposes and integrity of the overall Green Belt in the Leeds district.

When assessing a site that is only partially in the Green Belt, only assess the part that is Green Belt.

GB purposes, criteria for assessing sites:

National Planning Policy Framework (NPPF) para 79 states that the fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belt are their openness and permanence. Para 80, sets out the 5 purposes of Green Belt:

Purpose	Criteria and definitions	Assessment
1. Check the unrestricted sprawl of large built up areas	<p>This is not the same as urban development per se. It is a judgement as to whether a development would result in inefficient use of land considering the following criteria:</p> <p>i. Would development of the site lead to/constitute ribbon development YES/NO</p> <p>ii. Would development result in an isolated development site not connected to existing boundaries YES/NO</p> <p>iii. Is the site well connected to the built up area? – Does it have 2 or more boundaries with the existing built up area? YES/NO</p> <p>iv. Would development of the site effectively 'round off' the settlement pattern YES/NO/PARTIAL</p> <p>v. Do natural and physical features (major road, river etc) provide a good existing barrier between the existing urban area and undeveloped land, which if breached may set a precedent for unrestricted sprawl? YES/NO</p>	<p>i. If response yes, high potential for unrestricted sprawl</p> <p>ii. If response yes, result would be isolated development, high potential for urban sprawl</p> <p>iii. If a site is well connected ie has several boundaries with the adjacent urban area, lower potential for urban sprawl. If only one boundary with existing urban area, development would 'jut out' or not be as well related and has more potential to result in urban sprawl.</p> <p>iv. If response yes, development would 'round off', low potential for unrestricted sprawl</p> <p>v. if yes, higher potential for urban sprawl.</p> <p>Overall conclusion: Development of the site would result in:</p> <p>High potential to lead to unrestricted sprawl OR</p> <p>Low potential to lead to unrestricted sprawl (Delete response which does not apply)</p>

<p>2. Prevent neighbouring towns from merging</p>	<p>It is impossible to define a minimum distance that there should be between settlements.* (see bottom of 3rd column). The important consideration is whether development would appear to result in the merger of built up areas. Topography and features such as rivers and major roads can act as barriers preventing merging. The assessment therefore looks at:</p> <ul style="list-style-type: none"> i. Do natural features and infrastructure provide a good physical barrier or boundary to the site that would ensure that development was contained? YES/NO ii. Would development of the site lead to physical connection of 2 or more settlements? YES/NO 	<ul style="list-style-type: none"> i. If yes, a good physical boundary is more likely to perform a role in preventing neighbouring towns from merging. ii. If development would lead to the merging/physical connection of settlements the site would not prevent towns from merging. <p>Overall conclusion: Development of the site would lead to coalescence/merging of settlements OR</p> <p>Development of the site would not result in the merging of Settlements OR</p> <p>Development of the site would not result in actual merging of settlements but does not:</p> <ul style="list-style-type: none"> i) make good use of any physical barriers/there is no defensible boundary and/or ii) development of the site would significantly reduce the Green Belt gap between settlements. (see * 2nd column, explanation) <p>(Delete response which does not apply)</p>
<p>3. Assist in safeguarding the countryside from encroachment</p>	<p>This is an assessment as to the extent to which the Green Belt constitutes 'open countryside' from assessing countryside characteristics. If the site has any such characteristics it can be said to assist in safeguarding the countryside from encroachment. The characteristics are:</p> <ul style="list-style-type: none"> i. Is there a strong, defensible boundary between the existing urban area and the site – wall, river, main road etc (as opposed to garden boundaries) YES/NO ii. Does the site provide access to the countryside – footpaths, bridleways across the land, or is it a designated park/greenspace? YES/NO iii. Does the site include national or local nature conservation designated areas (SSSIs etc) YES/NO iv. Does the site include areas of woodland, trees or hedgerows that are protected (protected ancient woodland) or significant unprotected tree/hedge cover. YES/NO v. Does the site include any best and most versatile; grade 1, 2 or 3a (where known) agricultural land? YES/NO 	<ul style="list-style-type: none"> i. If response yes, there is an existing defensible boundary between the existing settlement/urban area and the site, the site will perform a role in safeguarding the countryside from encroachment ii. If yes, the site performs a role in providing access to the countryside for the urban population, the site will perform a role in safeguarding the countryside from encroachment. iii. If yes, the site performs a role in safeguarding the countryside from encroachment. iv. If yes, the site performs a role in safeguarding the countryside from encroachment. v. If yes, the site performs a role in safeguarding the countryside from encroachment. vi. If the site contains buildings that are not in agricultural use, development (on that part of the site) would be classed as brownfield rather than Greenfield development, so the site would not perform a role in safeguarding the countryside from encroachment.

	<p>vi. Does the site contain buildings? YES/NO</p> <p>If yes, are these in agricultural use? YES/NO</p>	<p>Overall conclusion: The site performs an important role in safeguarding the countryside from encroachment OR</p> <p>The site does not perform an important role in safeguarding the countryside from encroachment</p> <p>(Delete response which does not apply)</p>
<p>4. Preserve the setting and special character of historic towns</p>	<p>Most towns have a historic core, so this assessment focuses on whether a site is adjacent to a conservation area, listed building, historic park or garden or other features of historic significance.</p> <p>Where a site is adjacent* to such a feature, development may still be able to preserve the setting and special character if done sensitively through appropriate design. This is a matter of judgement at initial site selection stage.</p> <p>* adjacent is either abutting the current boundary or only separated by a road that isn't included in the boundary.</p> <p>For the assessment:</p> <p>i. Is the site adjacent a conservation area, listed building or other historical features? YES/NO</p> <p>ii. If 'yes' could development preserve this character? YES/NO/PERHAPS</p>	<p>Overall conclusion:</p> <p>Development of the site would have no effect on the setting and special character of historic features OR</p> <p>Development of the site would have an effect on the setting and special character of historic features, which could be mitigated against through appropriate detailed design OR</p> <p>Development of the site would have a significant effect on the setting and special character of historic features</p> <p>(Delete response which does not apply)</p>
<p>5. Assist in urban regeneration, by encouraging the recycling of derelict and other urban land</p>	<p>Not to be included within GB assessment because the Core Strategy policies encourage regeneration within the urban area</p>	<p>N/A</p>
		<p>NB. The conclusion under each purpose is an overall assessment from the conclusions from all the criteria in that category/Green Belt purpose.</p>
<p>OVERALL CONCLUSION FROM ASSESSMENT AGAINST ALL 4 PURPOSES OF GREEN BELT AND ESSENTIAL CHARACTERISTICS OF OPENNESS AND PERMANENCE:</p>		

We have not applied a scoring or weighting system as a site may have only one applicable criteria as opposed to many, but this one factor may be so significant as to mean that overall, the effect on Green Belt purposes is still very significant – for example the site may be isolated and so not satisfy the purpose of preventing urban sprawl, but satisfy all other Green Belt purposes, but this alone may be considered to have a more significant effect on the purposes of Green Belt than for example a site which it is considered would round off a settlement but has various 'countryside characteristics' which means that the site performs a role in safeguarding the countryside from encroachment. The end comments box is for the overall conclusion from looking at all the purposes to be outlined. We may have to assess this further once site visits have taken place to establish sites which have a significant effect on the purposes of Green Belt and those that do not, but this is an iterative process and will be determined once more site visits have been undertaken.

Conformity with Core Strategy Spatial Development Strategy (Section 4 of the Core Strategy publication draft):	
<ul style="list-style-type: none"> - main urban area - major settlement - smaller settlement - villages and outer rural - urban extension to main urban area - urban extension to major settlement - urban extension to smaller settlement - extension to village/rural settlement - development unrelated to existing settlement 	
Is site: <ul style="list-style-type: none"> - Brownfield - Greenfield - Mixed – part brownfield, part greenfield 	
Regeneration Priority Area: * <ul style="list-style-type: none"> - East Leeds - Aire Valley Leeds - Leeds Bradford Corridor - West Leeds Gateway - South Leeds - Inner South Leeds - none 	
If assessing site for residential use, Gypsy and Traveller site assessment to be done by Environment & Neighbourhoods):	
Could site be effectively managed	YES/NO/MAYBE
Would gypsies and travellers live on the site?	YES/NO/MAYBE
Proximity to housed gypsies and travellers	YES/NO
Experience of previous encampments	YES/NO/UNKNOWN
Conclusions as to whether the site could also be considered as a site for travellers:	
Proposed Use: Duplicate proposed use, SA and Summary of Infrastructure & other planning requirements for all different alternative proposed uses considered	
<ul style="list-style-type: none"> - residential - employment (B2 & B8) - retail (all A use classes) - office (B1) - mixed use (state combination of uses & primary use) - other (state)

Utilities (Drainage/Water/Electricity etc)	
Built heritage	
Other	
Site suitability, availability and achievability (Where a site has been through the SHLAA partnership, this will be automatically completed)	
Suitability. Is the site suitable in terms of planning policy and physical construction? Yes Yes, Physical No LDF to Determine	

Availability. How ready for development is the land? Indicators of availability include expressions of interest by the landowner, whether buildings are occupied or have been cleared, whether/when tenants will move, or whether there

are competing uses for the land. Short medium long term uncertain.	
Achievability. How strong is the market for dwellings at the site location? Indicators include the physical and socio-economic attractiveness of the setting, potential supply from other sites in the area and local house prices. Short medium long term uncertain	
Site boundary:	
Does the boundary of the site need to be redrawn?	Yes/No
Would the redrawing of the site change conclusions/assumptions that would change final assessments/conclusions?	Yes/No/Partial *If Yes/Partial, undertake a second assessment based on the new boundary/new proforma details
New site reference number (enable link between two sites)	
Surrounding sites impact	
Is the development of this site contingent on the development of surrounding land/sites?	Yes/No/Partial If yes, list sites, or add/create new site
In what way is it contingent? a) Road access b) Enables joining up of site to settlement (via linking development of sites) c) Enables shared delivery of services/ infrastructure d) Other	Click all that apply

Appendix 3 – Phase 1 Assessment – Sites suggested by Leeds GATE

	Address	Size	Ownership	Comments	Conclusion
1	Copperfields College, Burmantofts and Richmond Hill	11.5ha	LCC	This site has been camped on in the past, but with local issues arising. The site is identified as a preferred housing allocation is prominently located and forms a key gateway regeneration site within the Aire Valley Leeds Area Action Plan. It will require a comprehensive, mixed use approach to development in sympathy with this and its adjoining inner-city housing.	Not available
2	Mistress Lane, Armley	1.2ha	LCC	Identified housing site with permission for housing where a scheme for Council housing is being progressed.	Not available
3	Land around the Royal Armouries, City and Hunslet	Unspecified sites	Unspecified sites	This part of Leeds is identified as part of the Aire Valley Leeds Area Action Plan and with the Royal Armouries and associated improvement to office and retail space at New Dock is identified as a gateway regeneration area. The land around the Armouries is also identified as a tram stop for the New generation Transport scheme.	Not available
4	Land off Telford Terrace, City and Hunslet		LCC	Moved to Phase 2 for further analysis particularly on loss of greenspace. Site submission was stated as “land off Balm Road” but clarified as land off Telford Terrace through further consultation with Leeds GATE.	Phase 2 assessment
5	Brown Lane West, North Site, Beeston and Holbeck	1.5ha	Private	Employment site which has been recently sold to a private developer.	Not available
6	Cross Green Car Boot site, Pontefract Lane, Burmantofts & Richmond Hill	7.6ha	Private	Site of the under construction Veolia Incinerator	Not available
7	Fox Way and surrounding, City and Hunslet	1.1ha	Private	Proposed allocation for mixed use development as part of the Aire Valley Leeds Area Action Plan.	Not available
8	Haigh Park Road, City and Hunslet	1.4ha	LCC	Isolated parcel of land accessed only through a large industrial area. Contrary to locational criteria of Policy H7	Not suitable
9	Leeds International Pool site, City and Hunslet	1.3ha	LCC	High value Council owned City Centre site with marketing proposals for high density mixed use schemes being prepared e.g. office block, retail and residential	Not available
10	Matthew Murray School site, Beeston and Holbeck	8ha	LCC	Lots of previous encampments without complaint or disruption locally, however site is a preferred housing allocation	Not available
11	Old Run Road, Hunslet	4.7ha	LCC	Identified as a preferred greenspace allocation.	Not available
12	Land off Pontefract Lane, Cross Green	1.2ha	LCC	Identified as a preferred greenspace allocation.	Not available

13	South Leeds Sports Stadium, Middleton Park	Unspecified site	LCC	Large well used area of greenspace retained as such through Site Allocations Plan	Not available
14	Thornes Farm (Plot 5)		LCC	Preferred employment allocation within the designated Enterprise Zone boundary	Not available
15	Tingley Station	43ha	Private	Preferred safeguarded land allocation where SAP has determined that housing is not appropriate within the plan period. Land is in private ownership.	Not available Not suitable
16	Land to the south of Whitehall Road, Gildersome	40ha	Private	Large green belt site which is not proposed for housing. Land is in private ownership.	Not available Not suitable

Appendix 4 – Phase 1 Assessment – site suggested by the Showmen’s Guild

Address	Size	Ownership	Comments	Conclusion
Land bounded by Harwill Approach Coteroyd Avenue and Elland Road, Churwell, Morley	10.67ha	Private	Preferred housing site with school provision.	Not available.

Appendix 5 – Phase 1 Assessment – sites submitted/at planning application stage by Gypsy and Traveller landowners

Address	Size	Ownership	Comments	Conclusion
Land off Pawson Street, Robin Hood		Private	This is a green belt site and an assessment of Green Belt has been carried out.	Not suitable
Land off Pollard Lane, Beeston		Private	This site was formally submitted late in the process and after material for Development Plan Panel was assembled. It has not been subject of a Phase 1 assessment and will be assessed as part of any new sites that emerge as part of the Publication consultation process.	To be assessed
Land off Sandon Mount, Hunslet		Private (adverse possession from LCC)	The site is subject of an appeal against refusal of planning permission. The site is a designated allotment site.	Not suitable

Appendix 6: Phase 1 Assessment – sites submitted as part of the Issues and Options consultation

No	Address	Size	Ownership	Comments	Conclusion
1	1336 Land bounded by Baghill Beck Upper Green Way and Upper Green Drive, Tingley	4.78	Private	Proposed housing allocation	Allocated housing site

34	Whiteways Thorp lane Middleton	6.79ha	Private	Active scrap metal yard	Not proposed as a housing allocation

Appendix 7: Phase 1 Assessment – general areas submitted as part of the Issues and Options consultation

- Land off Gelderd Road – not possible to identify a site from this description
- Fields in Killingbeck – not possible to identify a site from this description
- Bramhope – this is a smaller settlement in the North of the District surrounded by Green Belt
- Brownfield sites in the City Centre – these have been considered in the Stage 2 assessment
- Elland Road – land around Elland Road football stadium is not available
- Beeston – sites in Beeston have been considered as part of the Stage 2 assessment

Appendix 8: Phase 2 sites – LCC owned or advanced from Phase 1

	Address	Ownership	Comments	Conclusion
1	Ilkley Road, Otley	Private	<ul style="list-style-type: none"> • Access road to river with experience of past encampment – currently vacant • Area of high flood risk 	Not suitable
2	Land to the South of Leeds Road, Rothwell	LCC	<ul style="list-style-type: none"> • Very difficult to access 	Not achievable
3	Parkside Lane, Beeston	LCC	<ul style="list-style-type: none"> • Offers for employment use • Industrial area – noisy neighbours • Impacts on adjacent greenspace 	Not available
4	Wyther Community Centre, Bramley	LCC	<ul style="list-style-type: none"> • Option for Registered Housing provider • Impact on adjacent housing allocation • Surrounded by existing housing 	Not available

25	Land off Elemete Lane, Roundhay	LCC	<ul style="list-style-type: none"> Site needed for cemetery use 	Not available

Appendix 9 – Assessment of Preferred Safeguarded and Site Allocations for Gypsies and Travellers

Site Ref	Address	No of Plots	Ownership	Comments	Conclusion
HG6-1	Cottingley Springs, Gelderd Road, NR Gildersome	41	LCC	Existing well established authorised G+T site which is publically managed. The site is currently full occupied with a waiting list for future occupants. The site forms part of the existing G+T supply. It is appropriate to safeguard the existing G+T provision on the site for the plan period.	Safeguard existing site under policy HG6
HG6-2	Kidacre Street, City Centre	8	LCC	Existing G+T site which currently benefits from temporary 3 year permission. The site is a well enclosed former brownfield site which lies adjacent Crown Point Retail Park and other small commercial premises. The site is situated within the Leeds City Centre boundary with excellent access to local services and community facilities. There has been little evidence of any negative local impacts from the existing G+T use. The proposed HS2 route runs directly through the site. The site is suitable for allocation until the progression of the proposed HS2 line when an alternative site will be required.	Safeguard existing site under policy HG6
HG6-3	Former Moorend Training Centre, Tulip Street, Hunslet	8	LCC	Flat derelict brownfield site which lies adjacent to Tulip Retail Park within a mixed commercial/residential area of Hunslet. The site is situated within the main urban area and a wide range of local services and community facilities are available within walking distance. The sites location also benefits from good links to the main highway network with frequent public transport links into the City Centre. The size of the site is in scale with the surrounding settlement and the site is well enclosed by existing trees. The site is also separated from the adjacent residential area by a disused railway line. A very small section of the site is at high risk from flooding. This section of the site is minimal and will be excluded from forming a functional area of the site in order to mitigate any potential impact. The site is considered to be a long term suitable alternative site the Kidacre Street site which is within the same locality (Ward).	Safeguard the site as a suitable alternative to Kidacre Street, under policy HG6
HG6-4	Nepshaw Lane South, Morley	2	Private	Existing authorised small family G+T site which is in private ownership and is well established. The site forms part of the existing G+T supply. It is considered appropriate to safeguard the existing G+T provision on the site for the plan period.	Safeguard site under policy HG6
HG6-5	Roseneath Place, Wortley	1	Private	Existing well established small family G+T site which is in private ownership. The site is a longstanding encampment and is likely to be time immune from enforcement action. There is little evidence of any negative local impacts	Safeguard site under policy HG6

				from the existing G+T use on the site and the site forms part of the existing G+T supply. It is appropriate to safeguard the existing G+T provision on the site for the plan period.	
HG6-6	Ninevah Lane, Allerton Bywater	1	Private	Existing small site which benefits from temporary 3 year permission for G+T use. The site lies adjacent to the settlement of Allerton Bywater and is accessible to range of local services and community facilities on foot. The sites location also benefits from good links to the main highway network with frequent public transport links into the City Centre. The site is situated within land defined as Green Belt. However, development of the site is considered to have a limited impact on the Green Belt. The site lies adjacent to a proposed settled housing allocation. Given the small scale of the site it is considered that peaceful integration can be achieved through careful consideration at the design stage of the adjacent housing proposal. There is little evidence of any negative local impacts from the existing G+T use on the site and the site forms part of the existing G+T supply. It considered appropriate for small scale G+T use to remain on the site for the plan period.	Safeguard site under policy HG6
HG6-7	Knotford Nook, Old Pool Road, Otley	1	LCC	Existing well established small family G+T site. It is noted that the site is situated within an area of high flood risk, however the site is a longstanding encampment and is likely to be time immune from enforcement action. There is little evidence of any negative local impacts from the existing G+T use on the site and the site forms part of the existing G+T supply. It is appropriate to safeguard the existing G+T provision on the site for the plan period.	Safeguard site under policy HG6
HG6-8	Springfield Villas, Gildersome	2	Private	Existing small site which benefits from temporary 3 year permission for G+T use. The site lies close to urban edge of Gildersome and consequently has reasonable access to range of local services and community facilities. The site is situated within land defined as Green Belt. However, development of the site is considered to have a limited impact on the Green Belt. The size of the site is in scale with the surrounding settlement and appears to be well integrated. There is little evidence of any negative local impacts from the existing G+T use on the site and the site forms part of the existing G+T supply. It considered appropriate for small scale G+T use to remain on the site for the plan period.	Safeguard site under policy HG6
HG6-9	Dunningley Lane, Middleton	2	Private	Existing well established small G+T site which is in private ownership. It is noted that the site lies within land defined as Green Belt. However, the site is a longstanding encampment and is likely to be time immune from enforcement action. There is little evidence of any negative local impacts from the existing G+T use on the site. It is appropriate to safeguard the	Safeguard site under policy HG6

				existing G+T provision on the site for the plan period.	
HG6-10	Thorpe Lane, Tingley	3	Private	Existing well established small G+T site which is in private ownership. It is noted that the site lies within land defined as Green Belt. However, the site is a longstanding encampment and is likely to be time immune from enforcement action. There is little evidence of any negative local impacts from the existing G+T use on the site. It is appropriate to safeguard the existing G+T provision on the site for the plan period.	Safeguard site under policy HG6
HG6-11	White Rose Farm, Whitehall Road, Gildersome	2	Private	Existing well established small G+T site which is in private ownership. It is noted that the site lies within land defined as Green Belt. However, the site is a longstanding encampment and is likely to be time immune from enforcement action. There is little evidence of any negative local impacts from the existing G+T use on the site. It is appropriate to safeguard the existing G+T provision on the site for the plan period.	Safeguard site under policy HG6
HG6-12	Scarecrow Farm, Whitehall Road, Gildersome	1	Private	Existing well established small G+T site which is in private ownership. The site is a longstanding encampment and may be time immune to enforcement action. The site is situated within land defined as Green Belt, however development of the site is considered to have a limited impact. There is also little evidence of any negative local impacts from the existing G+T use on the site. It is appropriate to safeguard the existing G+T provision on the site for the plan period.	Safeguard site under policy HG6
HG6-13	Urn Farm, Middleton Road, Middleton	2	Private	Existing small former farm site which benefits from temporary 10 year permission for G+T use. The site forms part of an existing undeveloped UDP allocation for settled housing. The site lies within the main urban area consequently has good access to range of local services and community facilities within Middleton. The size of the site is in scale with the surrounding settlement and it appears to be well integrated. There is also little evidence of any negative local impacts from the existing G+T use on the site. It considered appropriate for small scale G+T use to remain on the site for the plan period.	Safeguard site under policy HG6
HG7-1	West Wood, Dewsbury Road, Tingley	4	LCC	Small greenfield site within a rural location, which is not directly adjacent to any built development. The site lies within a short walk to the eastern edge of the large settlement of Morley which has a wide range of local services and community facilities. The site is also situated close to the main highway network on Dewsbury Road which offers frequent bus services to the City Centre and the nearby town centres. The site is within land defined as Green Belt, however development of the site is considered to have a limited impact.	Allocate site under policy HG7

				It is noted that part of the site lies with an area which is at high risk from flooding. The feasibility of altering the site boundary as well as onsite mitigation will be used to limit the potential flood risk impact. The potential ecological impact from developing the small site could be reduced through on site measures. The site is considered to be suitable for allocation for small scale G+T use to help meet the identified public provision needs over the plan period.	
HG7-2	Land to the South of Tong Road, Wortley	4	LCC	Small well enclosed greenfield site within the main urban area. The site has good access to the adjacent neighbouring built up areas of Farnley, Wortley and Bramley which offer a range of services and community facilities. The site is also situated close to Ring Road which offers frequent bus services to the City Centre. The location of the site is close but not directly adjacent to a large residential area. Given the small scale of the site it is considered that a G+T use can be successfully integrated into the existing community. The majority of the site is within an area of medium flood risk. On site mitigation measures will be required to reduce the potential flooding risk. The site is also within the setting of a Listed Building (Stone Bridge Mills), however it is considered that the site is unlikely to have a negative impact on its setting or special interest. The potential ecological impact from developing the small site could be reduced through on site measures. The site is considered to be suitable for allocation for small scale G+T use to help meet the identified public provision needs over the plan period.	Allocate site under policy HG7
HG7-3	Bullerthorpe Lane, Temple Newsam	4	LCC	Small, well enclosed, former car parking site which lies beyond the south eastern edge of the main urban area. The site is situated within a rural setting. However, the urban area of Colton is located close by which offers a range of services and community facilities. The site is not situated directly adjacent to any isolated residential dwellings. As such the size of the site is not considered to be out of scale with the nearby residential areas. The site is situated within land defined as Green Belt, however development of the site is considered to have a limited impact. The site lies adjacent to a Scheduled Monument (Grim's Ditch), however it is considered that development of the site for a G+T uses could preserve the significance of the Monument and its setting through on site mitigation measures. On site mitigation measures will also be required to limit the potential ecological impact of the small site. The site is considered to be suitable for allocation for small scale G+T use to help meet the identified public provision needs over the plan period.	Allocate site under policy HG7

Appendix 10 - Assessment of Preferred Safeguarded and Site Allocations for Travelling Showpeople

Site Ref	Address	No of Plots	Ownership	Comments	Conclusion
HG8-1	Whitehall Road, Gildersome	8	Private	Existing well established TSP site which is in private ownership. It is noted that the site lies within land defined as Green Belt. However, the site is a longstanding encampment and is likely to be time immune from enforcement action. There is little evidence of any negative local impacts from the existing G+T use on the site and the development appears to be well integrated into the local community. It is considered appropriate to allocate the existing TSP provision on the site for the plan period.	Allocate site under policy HG8
HG8-2	Town Street, Yeadon	1	Private	Existing, small, well established TSP site which is in private ownership. The site is a longstanding encampment and is likely to be time immune from enforcement action. There is little evidence of any negative local impacts from the existing G+T use on the site and the development appears to be well integrated into the local community. It is considered appropriate to allocate the existing TSP provision on the site for the plan period.	Allocate site under policy HG8
HG8-3	Land off Phoenix Avenue, Micklefield	6	LCC	The site forms part of a longstanding undeveloped employment allocation within the Micklefield Regeneration Area. The site is situated within the urban area of Micklefield and has reasonable walking accessibility to a range of services and community services within the village. The site is also situated close to the main highway network and Micklefield train station which benefits from frequent services to Leeds, York and Selby. The site is small in scale and relates well the size of the existing settlement. The sites location adjacent to a proposed employment allocation (light industry) and not directly adjacent to any sensitive uses means it to be well suited to accommodating mixed-use yards - allowing residential accommodation and space for storage of equipment. The commercial nature of the access road (Phoenix Avenue) is also appropriate for the HGV's which will be stored on the site and will ensure that they do not have to filter through the village. It is noted that the site lies near to a landfill. However, the impact of the landfill of the site is considered to be minimal and the landfill is due to be capped in forthcoming years. It is considered appropriate to allocate the existing TSP provision on the site for the plan period.	Allocate site under policy HG8

Appendix 13 – Green Belt Assessment of shortlisted public sites

West Wood, Dewsbury Road, Tingley

Purpose 1: Check the unrestricted sprawl of large built up areas

- Would development of the site lead to/ constitute ribbon development **NO**
- Would development result in an isolated development site not connected to existing boundaries **YES**
- Is the site well connected to the built up area? – Does it have 2 or more boundaries with the existing built up area? **NO**
- Would development of the site effectively ‘round off’ the settlement pattern **NO**
- Do natural and physical features (major road, river etc) provide a good existing barrier between the existing urban area and undeveloped land, which if breached may set a precedent for unrestricted sprawl? **YES**

Conclusion: The site is a small scale site located in a valley and not visible from the road. It is well contained by existing trees and vegetation and is the only developable piece of land in a long strip of green belt extending between Dewsbury Road and the East Coast Mainline, because the remainder is either steeply sloping or has significant archaeological remains on it. It is therefore a relatively minor Green Belt incursion with little harm and little prospect of setting precedent for sprawl. Any planning application would have to demonstrate that its existing natural boundaries are maintained.

Purpose 2: Prevent neighbouring towns from merging

- Do natural features and infrastructure provide a good physical barrier or boundary to the site that would ensure that development was contained? **YES**
- Would development of the site lead to physical connection of 2 or more settlements? **NO**

Conclusion: Development of the site would not result in the merging of settlements. The site is small in scale and given the distance of the site from the main urban area and the presence of existing physical boundaries between the urban areas it is not considered to lead to sprawl.

Purpose 3: Assist in safeguarding the countryside from encroachment

- Is there a strong, defensible boundary between the existing urban area and the site – wall, river, main road etc (as opposed to garden boundaries) **YES**
- Does the site provide access to the countryside – footpaths, bridleways across the land, or is it a designated park/greenspace? **NO**
- Does the site include national or local nature conservation designated areas (SSSIs etc) **YES**
- Does the site include areas of woodland, trees or hedgerows that are protected (protected ancient woodland) or significant unprotected tree/hedge cover. **NO**

- Does the site include any best and most versatile; grade 1, 2 or 3a (where known) agricultural land? **YES**
- Does the site contain buildings? **NO**

Conclusion: The site is natural greenspace but is not accessible as functional greenspace. The site lies within the Leeds Habitat Network and is on best and most versatile agricultural but not used for this purpose now and given its site characteristics has little potential other than for grazing in the future.

Purpose 4: Preserve the setting and special character of historic towns

- is the site adjacent a conservation area, listed building or other historical features? **NO**

Conclusion: No effect on the setting and special character of historic features.

Purpose 5: Assist in urban regeneration, by encouraging the recycling of derelict and other urban land.

Conclusion: Addressed due to the fact that there are no other sustainable sites which are sequentially preferable to the site under consideration in the Green Belt.

Bullerthorpe Lane, Temple Newsam

Purpose 1: Check the unrestricted sprawl of large built up areas

- Would development of the site lead to/constitute ribbon development **NO**
- Would development result in an isolated development site not connected to existing boundaries **YES**
- Is the site well connected to the built up area? – Does it have 2 or more boundaries with the existing built up area? **NO**
- Would development of the site effectively ‘round off’ the settlement pattern **NO**
- Do natural and physical features (major road, river etc) provide a good existing barrier between the existing urban area and undeveloped land, which if breached may set a precedent for unrestricted sprawl? **NO**

Conclusion: The site is very small and well contained by existing trees and cannot be seen from Bullerthorpe Lane. It is therefore a relatively minor Green Belt incursion with little harm and little prospect of setting precedent for sprawl as its boundaries are defensible. Any planning application would have to demonstrate that its existing natural boundaries are maintained. The site is small in scale and given its unique characteristics in the local area would not set a precedent for encroachment.

Purpose 2: Prevent neighbouring towns from merging

- Do natural features and infrastructure provide a good physical barrier or boundary to the site that would ensure that development was contained? **YES**
- Would development of the site lead to physical connection of 2 or more settlements? **NO**

Conclusion: Development of the site would not result in the merging of settlements.

Purpose 3: Assist in safeguarding the countryside from encroachment

- Is there a strong, defensible boundary between the existing urban area and the site – wall, river, main road etc (as opposed to garden boundaries) **YES**
- Does the site provide access to the countryside – footpaths, bridleways across the land, or is it a designated park/greenspace? **NO**
- Does the site include national or local nature conservation designated areas (SSSIs etc) **NO**
- Does the site include areas of woodland, trees or hedgerows that are protected (protected ancient woodland) or significant unprotected tree/hedge cover. **NO**
- Does the site include any best and most versatile; grade 1, 2 or 3a (where known) agricultural land? **YES**
- Does the site contain buildings? **NO**

Conclusion: The site lies adjacent to a public right of way with access to the countryside but development of the site would not affect this. The site is not in agricultural use and is not useable for agriculture given its size and presence of trees.

Purpose 4: Preserve the setting and special character of historic towns

- is the site adjacent a conservation area, listed building or other historical features? **YES**

Conclusion: No effect on the setting and special character of historic features. A Roman ditch runs alongside the site, but the Council's Conservation Team consider that development of the site can be carried out with no impact on the Scheduled Ancient Monument. This is reflected in the site requirements.

Purpose 5: Assist in urban regeneration, by encouraging the recycling of derelict and other urban land

Conclusion: Addressed due to the fact that there are no other sustainable sites which are sequentially preferable to the site under consideration in the Green Belt.

Land off Pawson Street, Robin Hood

Purpose 1: Check the unrestricted sprawl of large built up areas

- Would development of the site lead to/constitute ribbon development **NO**
- Would development result in an isolated development site not connected to existing boundaries **NO**
- Is the site well connected to the built up area? – Does it have 2 or more boundaries with the existing built up area? **NO**
- Would development of the site effectively ‘round off’ the settlement pattern **NO**
- Do natural and physical features (major road, river etc) provide a good existing barrier between the existing urban area and undeveloped land, which if breached may set a precedent for unrestricted sprawl? **NO**

Conclusion: This site would create sprawl into a strategically important area of Green Belt which would amend the previously well-defined western edge of the smaller settlement of Robin Hood. There would be potential for a precedent to be set for further sprawl to the north and south of the site.

Purpose 2: Prevent neighbouring towns from merging

- Do natural features and infrastructure provide a good physical barrier or boundary to the site that would ensure that development was contained? **NO**
- Would development of the site lead to physical connection of 2 or more settlements? **NO**

Conclusion: Development of the site would not on its own result in the merging of settlements however, there is no defensible boundary of the proposal which could lead to a precedent for further encroachment to the north and south of the site along a strategically important track of Green Belt buffer which defines the western edge of Robin Hood. Further encroachment would bring the settlement closer to the main urban area of Leeds.

Purpose 3: Assist in safeguarding the countryside from encroachment

- Is there a strong, defensible boundary between the existing urban area and the site – wall, river, main road etc (as opposed to garden boundaries) **NO**
- Does the site provide access to the countryside – footpaths, bridleways across the land, or is it a designated park/greenspace? **NO**
- Does the site include national or local nature conservation designated areas (SSSIs etc) **NO**
- Does the site include areas of woodland, trees or hedgerows that are protected (protected ancient woodland) or significant unprotected tree/hedge cover. **NO**
- Does the site include any best and most versatile; grade 1, 2 or 3a (where known) agricultural land? **YES**
- Does the site contain buildings? **NO**

Conclusion: The site performs a countryside role as it is currently used for agricultural purposes and is on the Best and Most Versatile agricultural land.

Purpose 4: Preserve the setting and special character of historic towns

- is the site adjacent a conservation area, listed building or other historical features?

NO

Conclusion: No effect on the setting and special character of historic features.

Purpose 5: Assist in urban regeneration, by encouraging the recycling of derelict and other urban land

Conclusion: The release of the site does not assist in urban regeneration although no other submissions of available sites have been received and assessed in preparation for the Publication of the Plan in the main urban area. A late submission at Pollard Lane, Bramley adjacent to the railway line which could be considered as urban land has been received but not yet assessed.

Appendix 14 – Flood Risk Assessment

The National Planning Policy Framework (NPPF) states that inappropriate development in areas of flooding should be avoided by directing development away from areas at highest risk, but where development is necessary, making it safe without increasing flood risk elsewhere. PPTS states that local authorities must not locate sites in areas at high risk of flooding, including functional floodplains, given the particular vulnerability of caravans.

Core Strategy Policy H7 notes that 'pitches and plots should avoid zones of high flood risk (zone 3 flood risk areas)'.

Where development is proposed in areas at risk of flooding, plans should be informed by a sequential test. The purpose of the sequential test is to ensure sites are not reasonably available for the proposed development in areas with a lower probability of flooding. The purpose of the exception test is to demonstrate that the proposed development provides wider sustainability benefits which outweigh flood risk and that the development will be safe.

Sites which lie within areas at risk of flooding are as follows:

Proposed Safeguarded sites:

Knotford Nook, Otley

This site lies wholly within Flood Zone 3 and is an area of historic flooding. The resident of the site has been in this location for many years and has lawful rights to live on the site. He has put in place personal flood management measures to protect his caravans. Given that the site is long established it is proposed that it is safeguarded despite being in Flood Zone 3. Any permission sought or application for Certificate of Lawful Rights Use should be accompanied by a Flood Risk Assessment and assessment of the existing defences.

Proposed New Allocations:

West Wood, Morley

The site boundary has been drawn so as not to include an area of adjacent land that lies within Flood Zone 3 categorised as high risk of flooding and therefore contrary to PPTS. The source of flooding is Millshaw Beck which is classified as an ordinary watercourse by the EA. The very southern edge of the site lies within Flood Zone 2 at risk from the same beck. The vast majority of the site is Zone 1.

The main risk from flooding is the access road. Access arrangements at times of flooding will need to be assessed as part of any planning application.

Tong Road, Wortley

The site is located in flood zone 2 with the main theoretical source of flooding being Wortley Beck, which is a main river along western boundary. However, the site lies above the beck and the main historic source of flooding was uncontrolled discharge from the reservoir across Tong Road.

Former Moorend Training Centre, Tulip Street

1% of the southern corner of the site lies within Flood Zone 2/3. Any planning application should avoid placing vulnerable development on this part of the site. It is considered that the site is of a sufficient size and offers flexibility in terms of layout for flood risk to be discounted as a determinative constraint.
