

## **Anonymised responses received during Statutory Notice Period 1 July 2015-29 July 2015 regarding the expansion of Roundhay School**

The Governing Body of Roundhay All Through School agrees in principle to support the proposal to increase our pupil admission number from 250 to 300 pupils, commencing no earlier than September 2017.

Our agreement in principle is subject to the issues and concerns requiring resolution that we raised at our meeting with Leeds City Council and Children's Services on Tuesday 14th July, being fully addressed by the time we next meet on Thursday, 20 August 2015.

These are summarised as

- That an improved 'Pavilion' design is proposed by 20 August, that meets the teaching and learning requirements of an outstanding school in the 21st-century.
- That there is no imposed decrease in the size of the proposed pavilion building, which at our meeting was planned to be 3500 m<sup>2</sup> as per the GIFA
- That additional outdoor social space is created, including an all-weather pitch.
- That there are improvements to the dining arrangements, including an increase in size of the dining centre through an extension, improved design and additional furniture etc., is provided as part of a holistic whole school improved service for current and future pupils under the PFI contract.
- That's there is adequate revenue funding provided by the local authority to make up for the shortfall in funding whilst the school reaches its new proposed capacity over a period of five years to ensure the pupil number expansion of staffing/accommodation/services/Facility management is cost neutral to the existing school budget.
- That's there is provision for increased car parking, that addresses increased staffing for the proposed growth in pupil numbers whilst improving the current situation including secondary campus pedestrian safety management
- That's there is an increase in the existing provision of changing rooms.
- That sufficient capital funding to meet the one off set up costs including Furniture and Fittings and integrated telephony, Access control, CCTV, security, ICT linkage etc., is provided.
