I should like to object because the extension of the sales area to include the public highway/pedestrianised area would cause issues for the following reasons

The occupation of the pavement area would cause pedestrians (including wheel chair users) to be forced into the highway. This would cause conflict between them and patrons and could lead to public disorder.

Parts of the area are occupied by Market stalls during the week and again there are possible public order issues with conflict between stall holders, customers and patrons.

The area is also used on a number of days in the year for family and child friendly events and an outside drinking area in this location could present issues of child safety.
