

Performance Indicator Type	Reference	Title	Service	Frequency & Measure	Rise or Fall	Baseline	Last Year Result	Target	Qtr1	Qtr2	Predicted Full Year Result	Data Quality	
1	National Indicator	NI 125	Achieving independence for older people through rehabilitation/intermediate care	PCT	Quarterly %	Rise	New Indicator	N.A.	To be provided February 2009	See Comments		Under-development: checklist received but systems/processes still being developed	
<p>This indicator measures the benefit to individuals from intermediate care and rehabilitation following a stay in hospital. It captures the joint work of social services and health staff and services commissioned by joint teams. The measure is designed to follow the individual and not differentiate between social care and NHS funding boundaries. The measure covers older people aged 65 and over on discharge from hospital who:</p> <ul style="list-style-type: none"> <li>• Would otherwise face an unnecessarily prolonged stay in acute in-patient care, or be permanently admitted to long term residential or nursing home care, or potentially use continuing NHS in-patient care;</li> <li>• Have a planned outcome of maximising independence and enabling them to resume living at home;</li> <li>• Are provided with care services on the basis of a multi-disciplinary assessment resulting in an individual support plan that involves active therapy, treatment or opportunity for recovery (with contributions from both health and social care);</li> <li>• Are to receive short-term interventions, typically lasting no longer than 6 weeks, and frequently as little as 1-2 weeks or less.</li> </ul> <p>This new indicator relies on new data for which results will be available for reporting from February 2009 onwards.</p>													
2	National Indicator	NI 135	Carers receiving needs assessment or review and a specific carers service	Access & Inclusion	Quarterly %	Rise	16.2%	16.2%	19.3%	15.7%	16.1%	21.6%	No concerns with data
<p>Predicted performance includes anticipated respite care figures. This prediction shows that we appear well on track to meet/surpass our target. NB - due to time constraints the quarter 2 figure has been calculated as at the end of August 08.</p>													
3	National Indicator	NI 131	Delayed transfers of care	Access and Inclusion	Quarterly Number	Fall	5.24 per 100,000 population	N.A.	3.68 per 100,000 population	5.3 per 100,000 population	5.04 per 100,000 population	4.7 per 100,000 population	Not completed
<p>Following an initial slight decline in performance from the end of 2007/08 during quarter one this indicator has gradually improved throughout quarter two. The initial deterioration was due to multiple factors, such as increased volume in hospital admissions, delay in completion of Continue Care Assessments and patients/family exercising choice. However, current performance is now better than the national average for 2007/08 (based on the 111 authorities where data was available).</p>													
4	National Indicator	NI 142	Percentage of vulnerable people who are supported to maintain independent living	Strategic Housing and Commissioning	Quarterly %	Rise	99%	N.A.	99%	99%	98%	99%	No concerns with data
<p>No comments</p>													
5	Local Indicator	BV-56	Percentage of items of equipment delivered within 7 working days	Access & Inclusion	Quarterly %	Rise	90.0%	90.0%	92.0%	90.3%	92.0%	94.0%	No concerns with data
<p>Current performance is rated in the highest band (very good) by CSCI. Target for 08/09 has been surpassed. NB - data is not made available for reporting until 6-8 weeks after the end of the period it deals with, therefore quarter 2 results are actually as at August 2008.</p>													

	Performance Indicator Type	Reference	Title	Service	Frequency & Measure	Rise or Fall	Baseline	Last Year Result	Target	Qtr1	Qtr2	Predicted Full Year Result	Data Quality
6	Local Indicator	LKI-SS23	Percentage of people receiving a statement of their needs and how they will be met	Access & Inclusion	Quarterly %	Rise	99.0%	99.0%	99.0%	98.9%	99.0%	99.0%	No concerns with data
Current performance is rated by CSCI as being in the 4th band (good). Overall the activity has remained fairly constant during the year, with a slight upward trend from an already high baseline position. NB - Quarter 2 performance is calculated as at the end of August 2008.													
7	Local Indicator	LKI-SS35	Adult and older clients receiving a review as a percentage of those receiving a service	Access & Inclusion	Quarterly %	Rise	62.5%	62.8%	76.0%	79.8%	72.6%	76.0%	No concerns with data
Performance has fallen somewhat from an excellent start in the first quarter of the reporting year. However, the overall performance is still some way above 2007/08 and at present it is anticipated that once all records are collated the year end target will be met. NB - Quarter 2 is calculated as at the end of August 08.													

Column Title	Description
No.	Each indicator is numbered to allow for easier navigation through the report.
Performance Indicator Type	<p>This column gives a little more information on the type of indicator and gives some indication of its relative importance and what the implications might be of poor performance. Some of the indicators fall into more than one type, for example, all LSP government agreed indicators are also national indicators. The types of indicator are:</p> <p><b>Leeds Strategic Plan Government Agreed</b> - these indicators form part of the Leeds Strategic Plan 2008 to 2011 and have been negotiated and agreed, by the council and its partners, with government. They form part of our current Local Area Agreement and additional reward grant is paid if we meet these targets. The Audit Commission will also give these indicators additional attention under the Comprehensive Area Assessment as these are our local priorities.</p> <p><b>Leeds Strategic Plan Partnership Agreed</b> - these indicators form part of the Leeds Strategic Plan 2008 to 2011 and have been agreed with our partners as priorities for the city. The Audit Commission will give these indicators additional attention under the Comprehensive Area Assessment as these are our local priorities.</p> <p><b>Council Business Plan</b> - these indicators form part of the Council Business Plan 2008 to 2011 and we have set these targets to drive change and progress across the organisation. The Audit Commission will give these indicators additional attention under the Comprehensive Area Assessment as these are our internal organisational priorities.</p> <p><b>National Indicator</b> - this is a set of 198 indicators used by Government nationally to monitor the performance of public services in local areas. Our performance against this set of indicators will contribute to the Comprehensive Area Assessment. This has replaced several sets of other indicators including the old best value indicators.</p> <p><b>Local Indicators</b> - these indicators have been nominated by service areas to provide a more complete picture of performance. In many cases these indicators will also directly contribute to the delivery of our priorities</p> <p>Each indicator is given a unique reference code and these codes tell us which basket each indicator belongs to. A basket is a set of indicators which are used to report on progress relating to different plans or frameworks. Below we have listed the main groups of indicator you will see in these reports.</p> <p><b>LSP</b> - Leeds Strategic Plan indicator</p> <p><b>NI</b> - National Indicator</p> <p><b>BP</b> - Business Plan indicator</p> <p><b>LAA</b> - Local Area Agreement indicator - for this year only we are continuing to measure a small number of indicators from our previous LAA which are subject to reward monies based on the year end position in April 2009.</p> <p><b>LKI</b> - Local key indicator</p>
Title	<p>The title column gives a description of the indicator.</p> <p><b>NB</b> The Government have provided the descriptions for all national indicators.</p>
Service	<p>The service column identifies which team within the Council is responsible for service delivery, monitoring the performance and data quality of each indicator.</p>
Frequency & Measure	<p>The top line in this column identifies how often we collect this information. This may be every month, every three months (quarterly) or once a year (annually). We only report annual indicators at the end of quarter 4 (after the end of March). With the exception of education attainment figures which are reported in quarter 3.</p>
Rise or Fall	<p>The second line in this column identifies what measure we use to check on progress. For example, we might measure this result in the number of days or weeks we should take to finish something, such as a planning application. In another case, we might measure the percentage, such as the percentage of enquiries we respond to within five minutes.</p>
Baseline	<p>The rise or fall column identifies if the results should go up or down to show whether we are doing well. For example, if this is set to rise, you would expect the figures to increase.</p>
Last Year Result	<p>This column gives the baseline performance figures upon which we have set our targets and/or will be comparing our performance over the coming years</p>
Target	<p>This column displays the result from the end of the previous financial year (31 March 2008)</p>
Qtr1	<p>This column shows the target we have agreed for this financial year.</p>
Qtr2	<p>The shows the current position at the end of this quarter. This result might be given a traffic light (red, amber or green) if the service is unable to accurately predict the full year performance based on the interim results (see below). If they can forecast their year end position then the traffic light will appear in the next column.</p>
Predicted Full Year Result	<p>Directores use this column to show how well they expect to do at the end of the year. They forecast this position depending on the current performance of each indicator. This figure may change each quarter depending on the performance of the indicator. Where possible we use this figure to inform whether an indicator is traffic lighted red, amber or green.</p> <p>The green light shows that the Directorate predicts this indicator <b>WILL</b> meet its target. The Directorate uses current performance information to make this forecast.</p>
Data Quality	<p>An amber traffic light shows that the Directorate predicts this indicator will not meet its target. However, the performance for this indicator is still acceptable and will not result in significant problems. The Directorate uses current performance information to make this forecast.</p> <p>The red lights shows that the Directorate predicts this indicator <b>WILL NOT</b> meet its target at the end of the year. The Directorate uses current performance information to make this forecast.</p> <p>We are using this information to make strategic decisions therefore it is important that it is both accurate and reliable. This column provides an overall assessment of the data quality for each indicator.</p> <p>No Concerns indicates that the data as accurate and there are good processes in place to check and validate this information.</p> <p>Some Concerns indicates that more work needs to be done to ensure the data is accurate and reliable. Services may be in the middle of implementing improvements to their systems and processes but these are not fully in place yet.</p> <p>Concerns indicates that there are concerns that the quality of the data may not be good or that maybe they have not got the correct data. Again services are working toward improving this position. Many of the national indicator set are new and we are having to set up new systems to collect data - until these are fully embedded and proven there are likely to be outstanding concerns.</p>
Comments	<p>The comments for each indicator should explain why performance varies. They should also highlight if there are any problems with the quality of the data and what steps the Directorate is taking to improve it. This section will also focus on what will be done to improve the actions and state what outcomes they have achieved.</p>
