

## What are trolleybuses?

Trolleybuses run on rubber tyres like a regular bus but they are powered by electricity from overhead wires.

### Environment

They have fast, smooth acceleration and are clean, quiet and don't pollute the local environment.

### Quicker, more reliable journeys

The NGT trolleybuses would use dedicated lanes wherever possible to help avoid congestion, making journeys quicker and more reliable.

### Accessible

The vehicles would be modern, easily accessible for wheelchairs and buggies and will be fully compliant with the Disability Discrimination Act (DDA).
