# Alley-gate Analysis Oakham Way

**Safer Leeds**  
*tackling drugs and crime*

NOT PROTECTIVELY MARKED

### **Important Information**

This report has been produced by Emma Jennings, a West Yorkshire Police Intelligence Analyst working for the Safer Leeds Partnership.

Whilst every care has been taken to ensure the accuracy of any data, it is supplied by a number of sources, and the author of this report cannot be held responsible for any error, omission or misrepresentation whether negligent or otherwise.

The report is classified as 'Not Protectively Marked' and any copies should not be retained beyond 3 years from the production date. Information is provided to inform decision making within relevant groups and is not intended to be used or directly quoted in dealing with the public or other groups outside of the intended audience.

No part of this report should be copied or further disseminated without the approval and permission of the authors or direct line management.

### **Methodology**

This profile is an evaluation of crime and incidents in order to assess the effectiveness of alley-gates in a specific area.

Crime and Incident data for this profile includes the dates 01/11/07 – 30/10/09, taken from CORVUS.

There are some data issues with ASB incident data. A change of recording systems may have affected the figures and therefore any ASB incident data totals recorded before April 2008 may be incorrect.

The data totals were collated for Leeds, the ward the alley-gate has been installed in, and the street the alley-gate has been installed in. Any changes in trend have then been advised.

### **Context**

This report looks at a current alley-gating scheme for the following streets:

Oakham Way

The scheme was introduced during November 2008 and the data looks at the years before and after installation.

<b>Total</b>	<b>17</b>	<b>12</b>	<b>5</b>	<b>-29</b>

Total crime data for Leeds shows that there has been an overall reduction in offences when comparing 12 months before and 12 months after the alley-gate was installed. This reduction has been continuous since June 2009. Ward 7 reflects the decrease seen in total Leeds data. Total crime data suggests that when comparing the 12 month periods before and after the alley-gate installation, there has been a reduction in offences on the street. This reflects the trend for the City and ward areas.

Crime type data shows reductions across the comparative years. The main offence seen on the street is burglary.

**Crime data**

Offence Recorded	Oakham Way		Total	%
	07to08	08to09	change	change
Burglary Dwelling	8	7	-1	-13
Burglary Other	3	2	-1	-33
