

## City Development Performance Indicators Annual Results

| 2009/10 Year End   |                 |              |  |                  |                     |              |            |                  |         |                  |                     |                         |
|--|-----------------|--------------|--|------------------|---------------------|--------------|------------|------------------|---------|------------------|---------------------|-------------------------|
|  | PI Type         | Ref          | Title  | Service          | Frequency & Measure | Rise or Fall | Baseline   | Last Year Result | Target  | Full Year Result | Direction of Travel | Data Quality            |
| 2  | Local Indicator | LSP-TR1b(ii) | Local bus passenger journeys originating in the authority area | Transport Policy | Annually Number     | Rise         | 80,424,891 | N/A              | Not Set | 80,424,891       |                     | Some concerns with data |
| <p>The 2009/10 result is the first data provided by Metro for this indicator. Therefore it has been difficult to draw any conclusions from a single figure without any historical data to provide context. The service will use the 2009/10 result as the baseline figure for Leeds, and will monitor bus patronage against this baseline in future years.</p> |                 |              |  |                  |                     |              |            |                  |         |                  |                     |                         |
