Protocolto SupportLocalW orking Between Leeds City Council Environm ental Services and Police Community SupportOfficers (PCSOs)

1. BACKGROUND

Leeds currently has over 320 PCSOs working across the city and Leeds City Council provides a 30% contribution towards 170 of these posts. Despite huge budget pressures for the Council, thas maintained significant investment in the PCSO service. In April 2011, the Council agreed to extend the existing arrangement with West Yorkshine Police Authority to retain the level of PCSOs in Leeds. The investment by the Council was awarded on the basis of strengthening arrangements between PCSOs, NPTs and Leeds City Council Services. One particular aim is to support the improved delivery of boally identified environmental priorities and this was supported at the Council Sexecutive Board in September 2011.

2.0 PURPOSE OF THIS PROTOCOL

This protocol provides guidance for NPTs, PCSOs and CouncilO fficers to jointly deliver better outcomes in respect of environmental issues and enforcement in boalities across the city.

An essential element of integrated boality working is the ability to involve the community and partners in finding solutions to the problems they have identified. By doing this it is more likely that the identified and in plemented solutions will be sustainable

PCSO's contribute to the policing of neighbourhoods, prinarily through highly visible patrols with the purpose of reassuring the public, and being accessible to both communities and partner agencies working at boal level.

There are strong links between crime and disorder and environmental issues and this protocol is aimed at ensuring the quality of the boalenvironment is incorporated into the work of crime reduction partnerships. It is in portant that the fear of crime, heightened by issues such as graffit, literand abandoned vehicles, is addressed.

This protocol provides a coordination and tasking mechanism for NPTs, PCSOs and CouncilO firers to jointly deliver better outcomes in respect of environmental issues and enforcement in boalties across the city.

3.0 W HAT ENVIRONMENTAL SUPPORT ISSUES WILL PCSOs BE INVOLVED IN?

PCSO swillplay a pro-active and re-active role in addressing environmental concerns that have been raised. These will be agreed jointly at a boal level between Leeds City Council and West Yorkshire Police (NPT) officers.

Appendix 1 details the initial priority actions for each of the 3 areas of the city, which will be subject to change as outlined at paragraph 4.

4.0 PROCESS FOR AGREEING ENVIRONMENTAL PRIDRITIES

Priorities will be communicated at boaltasking meetings. These are chaired or co-chaired by a senior officer from the Police, Councilor ALMO. Meetings are held on a six weekly cycle which is programmed into core business throughout the year.

A regulatory team officer/supervisor from Environmental Services will attend these meetings and will provide information from the analysis of boal data which will highlight areas of poor environmental conditions. This will enable the prioritisation of specific issues where environmental crimes require a focused partnership approach.

It is proposed that priorities should be reviewed at each cycle, be amended as appropriate on the tasking matrix, updated with progress and monitored through the existing performance framework.

5.0 CONTACTS

Contact details are included for Police, Environmental Services and Area Community Safety Coordinators to support the implementation and monitoring of these arrangements and can be found in Appendix 1 by area.

6.0 GOVERNANCE

The protocol will be agreed and periodically updated by the Safer Leeds Executive.

Taibred reports will be presented to Area Comm ittees with inputs from each tasking meeting to briefthem about initial arrangements and provide periodic updates. Periodic reports will also be provided for Divisional Community Safety Partnerships/Locality Partnership meetings which will also be able to consider PCSO support for other boal priorities, such as tackling burglary and anti-social behaviour, along side contributions from other partners.

Divisional Community Safety Partnerships / Locality Partnerships will monitor the implementation of the protocol.

Key issues of significance and occasional updates will be provided to the Safer Leeds Executive.
