Map of Meanwood Priority Neighbourhood

Introduction – Meanwood Priority Neighbourhood

The Meanwood Priority Neighbourhood is made up of the Meanwood 6 estates MSOA area although has been increased to include the nearby Stonegate estate which falls into an adjacent ward and MSOA area. It is bounded to the east by Scott Hall Road, to the North Stainbeck Lane and Road (excepting the Stonegate area) before cutting along Woodhouse Cliffe and down through Buslingthorpe. The major estates within this neighbourhood are the Miles Hills, Beckhills, Potternewtons, Farm Hills, Sugarwells, Boothroyds and Stonegates.

Demographically, the area is becoming more diverse ethnically with 77.86% of the population being White British 5.14% Black Caribbean and 2.44% of Pakistani origin. Faith wise 60.74% of the population Christian and 3.68% Muslim. The population of this neighbourhood is also considerably younger than would be expected with 20.50% children and 50.84% under the age of 30.

33.5% of households within this area are in owner occupation and 50% rent from the local authority. Terraced housing accounts for 30% of the total housing stock and semi detached for a further 36% and 20% of stock is flat accommodation. 74% of the properties are classified as council tax band A.

Team Meanwood Delivery Groups

Community Leadership Team – This will be made up of representatives of the local community and should include Parent Governors from local schools, Representatives from local recognised TRA's, and the local business community and potentially elected community champions. This meeting would be chaired by a local elected member and the group would meet 4 times per year. The general purpose of this meeting would be to oversee the development of the Neighbourhood Improvement Plan in particular around identifying local priorities that require action, helping to measure the success of interventions and crucially to take a lead in communicating to the wider community what activities are taking place and what improvement are being made in the local area. This should improve public awareness in the partnership and ensure that it becomes responsive to public needs.

Local Management Team – This will be made up of local service providers and chaired by the Neighbourhood Manager. This group will work with the Neighbourhood Improvement Plan and drive forward operational improvements in the priority neighbourhood. Members of this group will be selected from local service providers and it is recommended that members of this group cannot also be members of the Community Leadership Team as this could create a conflict of interests.

Inner NE Area Committee – This will provide a strategic reporting mechanism for the Neighbourhood Management project and will assist in ensuring the buy in of partner agencies and signing off the project and NIP for a twelve month period. The Area Committee will receive 6 monthly progress reports on the status of the project and an annual assessment and comparison of statistics alongside each years NIP.

Breakdown and Assessment of Neighbourhood Index Comparison

Economic Activity

This has increased in city wide ranking by 3 places (rising from 12th to 15th overall) and increases of varying significance can be seen in all aspects here with a static (non significant) improvement in Job Seekers Allowance (JSA) sub domain scoring and significant improvements in both the Incapacity Benefit and Lone Parent Income Support sub domains (2.46 and 4.25 increase in scores respectively)

Low Income

This has seen an overall increase in the last twelve months from 17th to 19th citywide however given that there have been no statistically significant improvements in any of the sub domains it would appear that this relates to other areas deteriorating than improvement in this neighbourhood. Both Children in Workless Households and Court Payment Orders have remained static with a slight deterioration in 60+ Households in receipt of benefits (0.92) and a significant deterioration in Households receiving in work benefits (7.01)

Health

This has seen the single largest domain decrease in this neighbourhood with a drop from 17th in 2009 to 7th in 2010 although the inclusion of an additional variable within this does question whether an accurate direct comparison is achievable here. The sub domains showing the greatest deterioration is that of circulatory disease mortality (a increase in score from 49.85 to 34.74) with both Cancer Mortality and Low Birth weights remaining static and some increase in the levels of Adult social care clients in this neighbourhood (a score reduction of 4.47).

Environment

Overall environment has decreased in score with a fall from 17th to 14th citywide however this is not considered to be statistically significant and is classified as remaining static. Within this there has been a significant improvement within scoring around fly tipping (increase in score of 18.09) although both graffiti and waste issues have seen slight deterioration (decreases in scores of 5.33. and 8.97 respectively).

Education

This domain has also seen a significant decrease from 28th in 2009 to 17th in 2010 although within this there are positives as well as negatives. The largest sub domain deterioration is with NEET with a decrease of 39.49% between the two years (79.31 in 2009 to 38.82 in 2010) and the next is in Kesy Stage (KS) 2 attainment with a decrease of 24.01 in score (49.76 to 25.75). There has also been a decrease in scoring around Persistent Absenteeism (43.18 to 37.63). Foundation stage attainment has remained static and there have been small improvements in KS4 attainment levels (4.84 in 2009 to 13.01 in 2010).

Community Safety

This has seen a significant improvement within this locality rising by three places to 28th in Leeds (previously 25th). Within this the sub domain with the greatest improvement is Environmental Crimes with a score increase of 15.75 (48.5 in 2009 and 64.25 in 2010) and improvements are

also seen in crimes against individuals with an increase score of 9.49 (56.99 in 2009 and 66.48 in 2010). Acquisitive crimes remained static and there was a slight deterioration in community disorders (69.91 in 2009 and 65.61 in 2010).

Housing

This domain has seen the greatest single increase in this neighbourhood with the score improving from 35th in 2009 to 44th in 2010. The two sub domains with the highest increase are average purchase price (rising £18,904 and score wise increasing from 12.81 in 2009 to 18.14 in 2010) and in price / income ratio which has increased in score by 12.24 (34.33 in 2009 and 46.57 in 2010). Empty properties have remained static and there has been a deterioration in Housing turnover with a score decrease of 9.6 (81.35 in 2009 and 71.75 in 2010).

Neighbourhood Index 2010 Assessment

Economic Activity

This domain remains a primary concern within Meanwood despite recent improvements and all the sub domains are well above the Leeds average, indeed almost double in most instances. Particular sub domains requiring attention are levels of incapacity benefit (11.07% compared to 1.8%) and Lone parent income support (4.64% compared to 1.8%) with JSA also high at 8.74% (compared to 4.9%).

Low Income

As with the previous domain, this remains a significant issue within Meanwood with all aspects significantly higher than the Leeds average. In particular Children in workless households (36.62% compared to 19.15%) and households receiving in work benefits (7.48% compared to 3.81%).

Health

This is the lowest indicator within the neighbourhood showing 7th in the city. The major sub domain impacting here remains Cancer mortality (165.25 per thousand compared to 118.33) and 2010 has seen an increase in circulatory disease mortality (150.26 per thousand compared to 85.36). Low birth weights are also higher here than the Leeds average but not with the same statistical significance.

Environment

The major issue within this neighbourhood environmentally remains fly tipping with 161 reports in 2010. The next sub domain being waste issues with 56.

Education

This domain is significantly worse across all sub domains with the exception of Foundation Stage attainment (which is just above the Leeds average. The greatest difference within this domain is with KS 2 attainment (52.31% compared to 71.02%) and KS 4 attainment (23.81% compared to 45.11%) although both NEET and Persistent Absenteeism remain a concern, both being higher than the Leeds average (10.15% compared to 6.79% and 12.81% compared to 8.00% respectively).

Community Safety

This domain has seen an improvement over the last twelve months however work needs to continue, notably in the sub domains of community disorders and acquisitive crimes although there is no data to compare against the Leeds average.

Housing

This domain cannot be treated as a priority within the Meanwood area, average house prices rose in the last 12 months by nearly £18,904 and both Housing turnover and Empty Properties are above the Leeds average (14.36% compared to 14.81% and 6.86% compared to 7.18% respectively).

Breakdown and assessment of Community Perception Survey

The major community issues within the Meanwood neighbourhood relate to Noisy neighbours (34%) and rubbish and litter (30%) closely followed by Vandalism or graffiti (27%) and disruptive young people (24%) with drug dealing or use (21%). This clearly identifies that the major concerns in this locality continue to be based around the Crime and Environmental agendas.

In examining the illustrations detailing all responses however there is significant differences appearing within this. Litter and rubbish is clearly an issue however to approx three quarters of the respondents it is not so it could be considered that there are lines of demarcation within Meanwood where issues are more severe than others and that there has been a recent improvement. This is mirrored in the feedback relating to Disruptive Young people (not an issue for over 75% of the respondents) and drug use / dealing which again would both indicate a spatial variation and improvements that have taken place. Noisy neighbours however appears to be more of an all round issue from this regard with a more balanced graph indicating this.

Crime statistics Breakdown and Assessment

From overall offences committed this table indicates that it is the Beckhill area that has the highest cause for concern with 453 offences taking place last year. This is followed by the Miles Hill / Potternewton areas with 379.

This table indicates that the majority of offences relate to community disorders (likely to relate to anti social behaviour) with both the Beckhill and Miles Hill areas showing significant issues. In addition Acquisitive Property crime continues to be an issue on the Beckhill estate in particular and this estate is also highlighted as a worst performer for Crimes against individual.

This would support the priorities outlined above that Acquisitive Crime and Anti Social Behaviour activities continue to be a priority for the 2011-12 financial year.

Indicies of multiple deprivation information

Overall this indicates a significant improvement since 2007 with significant improvements in the two most deprived neighbourhoods (Miles Hill / Potternewtons and Beckhill estates). This is tempered however with a fall in the Stonegate estate. Significant improvements should be noted within all LSOA's around Living environment and Crime and disorder domains and in almost all within the Employment deprivation domains (the exception being the Stonegate estate with a significant decrease in this area). The major issue highlighted within these statistics is in the Education, Skills and training domains which have seen a reduction in all areas with the exception of the Miles Hills / Potternewtons (which has increased) although the fall of 1 in the Beckhill estate has little statistical significance and could be seen as remaining static.

Identified Priorities

- 1. Continue to improve the environment, in particular fly tipping, noise nuisance and waste issues.**
- 2. Continue to improve the Community safety aspects, in particular relating to acquisitive crimes and community disorders**
- 3. Reduce the NEET and Persistent Absenteeism rates**
- 4. Continue to work around the cancer mortality rate**
- 5. Reduce the Incapacity and JSA claimaints in this area**
