- NB. It should be noted that although the fees set out above are those confirmed as the relevant Local Authority contribution, many Authorities encourage the widespread use of third party 'top ups'. These are financial contributions (the scale of which varies widely) which are paid by relatives and/or friends of residents to a care home to make up the difference between the LA contribution and the cost of care charged by the provider.
- It should also be noted that some of the Authorities listed in the chart above are currently the subject of legal proceedings as a consequence of their approach to fee setting, in other Authorities who have been successfully challenged, fee rates have been subject to significant uplifts.
