Area Committee: Inner South

Autumn 2012 Children's Performance Update

Measure	Leeds	Inner South	Data period	Highest	Average	Lowest
1. Number of children and young people 0-19	171,127	18,099	Jan-12	23,910	17,113	11,581
2. Percentage of children and young people	N/A	11%	Jan-12	14%	10%	7%
3. Number of primary schools	218	22	Current	28	22	15
4. Number of secondary schools	38	2	Current	6	4	2
5. Number of children's centres	58	7	Current	11	6	3
<p>Commentary. The Inner South has 11% of the Leeds 0-19 population which represents just over 18,000 children and young people. They are served by 22 primary schools, 2 secondary and 7 children's centres.</p>						
Keeping children safe from harm						
6. Numbers of looked after children	1432	299	As at 30/06/12	385	137	18
7. Numbers of children entering care	75	12	Apr-Jun 2012	21	7	1
8. Numbers of children subject to a child protection plan	894	179	As at 30/06/12	165	87	12
9. Numbers of CAF initiated	243	35	Apr-Jun 2012	47	24	12
10. Number of requests for service	9026	1417	Apr-Jun 2012	1872	842	259
11. Number of requests for service leading to a referral	3053	590	Apr-Jun 2012	721	290	62
<p>Commentary. At the end of June there were 299 Looked After Children from the Inner South area representing 22% of the Leeds total for Looked after Children. This compares to 18,099 children and young people in the Inner South. The numbers of Looked After Children have decreased from 321 the end of December 2011 to 299 at the end of June 2012. 35 common assessments were made in the first quarter (April to June) with 1417 requests made to the social care duty and advice team of which 590 met the thresholds for being treated as a referral to social cares services. This represents almost 16% of the Leeds totals for requests and almost 20% of the total requests meeting thresholds.</p>						
Do well in learning and have the skills for life						
12. Primary school attendance levels	95.9%	95.0%	Autumn 2011	97.2%	95.9%	94.5%
13. Secondary school attendance levels	94.1%	93.6%	Autumn 2011	95.0%	94.1%	91.3%

14. Number of pupils persistently absent at primary	1941	326	Autumn 2011	408	194	71
15. Numbers of pupils persistently absent at secondary	2996	146	Autumn 2011	497	300	146
16. Numbers of NEET	1603	214	As at 30/06/12	310	130	32
17. Percentage of NEET	7.0%	7.5%	As at 30/06/12	9.7%	7.0%	2.0%
<p>Commentary. Since the end of December 2011 the number of NEET young people has increased from 277 to 214 in June 2012. The Inner South rate at 7.5% is above the Leeds average of 7%. Primary attendance for Inner South was 92.9% in autumn term 2010/11 and rose to 95.00% for the academic year just finished; this is similar to the Leeds average. Secondary attendance for Inner South improved from 89.1% in the autumn term 2010/11 to 93.6% in 2011/12 compared to the Leeds average of 94.1%. Expectations are that attendance improvements have been maintained over the academic year but may not be quite at the levels of the autumn term. In the Inner South 326 primary pupils missed at least 15% of school in the autumn term; almost 17% of the city cohort. At secondary 238 pupils missed at least 15%, almost 5% of the city total. Figures based on school attended not home address.</p>						
Choose healthy lifestyles						
18. Teenage pregnancy	1145	184	June 09-June 10	233	115	43
19. Free school meal uptake primary	76.9%	81.0%	2011/12 FY	84.2%	76.9%	71.3%
20. Free school meal uptake secondary	68.9%	89.8%	2011/12 FY	89.8%	68.9%	52.8%
<p>Commentary. Teenage conception levels are above the Leeds average level with 184 conceptions between June 2009 and June 2010 compared to the average of 115. Free school meal take up in primary schools at 81% is well above the Leeds average of 76.9%. Secondary school free school meal take up at 89.8% is well above the Leeds average of 68.9%. 157 10-17 years olds committed an offence in the Inner South between April 2011 and March 2012 this was 17% of the Leeds total.</p>						
Voice and influence						
21. 10 - 17 year olds committing an offence	958	157	2011/12 FY	238	96	49
Ofsted inspections (as at 30 July 2012)						
22. Percentage of primary schools good or better	69%	55%	As at 30/07/12	87%	69%	47%
23. Percentage of secondary schools good or better	58%	50%	As at 30/07/12	100%	58%	25%
24. Percentage of children's centres good or better	81%	80%	As at 30/07/12	100%	81%	60%
25. Percentage of children's homes good or better	36%	0%	As at 30/07/12	100%	36%	0%
Ofsted judgement - Inner South	Outstanding	Good	Satisfactory	Inadequate		

26. Primary schools	3	9	9	1	
27. Secondary schools		1		1	
28. SILCs (citywide)	1	4		1	
29. Pupil referral units (citywide)		2	1		
30. Children's centres		4	1		
31. Children's homes			1		
<p>Commentary. Of the 22 primary schools in the Inner South 12 are rated as good or better and one is inadequate. This gives a rate of 54% good or better, well below the city average of 69%. 1 of the secondary schools in the area is rated as good, the other as inadequate. Four of the 5 children's centres in the area committee inspected to date are rated good and 1 as satisfactory; the 1 children's home inspected is rated as adequate.</p>					
Secondary schools	Ofsted	Attendance			
Cockburn High School	2	94.6%			
South Leeds Academy	4	92.6%

Data definitions

Indicator	Allocation of data item to area committee	Data source	Notes
1 Number of children and young people 0-19	By home postcode of child or young person	NHS: GP registrations, Jan 2012	The count is the number of young people aged 0-19 (not including 19). This source data is compiled at lower super output area (LSOA). LSOAs cannot be exactly matched to area committees as the boundaries do not match, so this is the closest approximation.
2 Percentage of children and young people	By home postcode of child or young person	NHS: GP registrations, Jan 2012	
3 Number of primary schools	By location of school		
4 Number of secondary schools	By location of school		
5 Number of children's centres	By location of children's centre		
6 Numbers of looked after children	By home postcode of child or young person at the point when they came into care, not the placement address	ESCR	<p>The result is not a cumulative count of the number of children that have been in care during the reporting period, but rather a snapshot of the numbers recorded in ESCR as being in care on that particular date. The number does not include children who receive respite with foster carers through the Family Support Service (under S17 of the Children Act) or children who are solely looked after under respite S20 Short Term Breaks and Shared Care. There can be delays in inputting a record of a child who has just gone into care, or similarly for a child who has just left care, so reported numbers for the same snapshot day but run at a later date could differ.</p> <p>Some records cannot be allocated to area committee because the record may show no postcode; a postcode for an address outside Leeds; an unrecognised or incorrectly input postcode that cannot be matched; or a confidential postcode.</p>
7 Numbers of children entering care	By home postcode of child or young person at the point when they came into care, not the placement address	ESCR	<p>The result includes unaccompanied asylum seekers.</p> <p>This is a cumulative count of the number of children entering care in the reporting period. Otherwise, all notes for indicator 6 apply.</p>
8 Numbers of children subject to a child protection plan	By home postcode of child or young person	ESCR	Notes as per the relevant sections in indicator 6
9 Numbers of CAF initiated	By home postcode of child or young person, not the location of the agency undertaking the common assessment	CAF database	The number of CAFs is the cumulative total number of CAFs initiated, not concluded, during the reporting period. The result is from the CAF database. Agencies who initiate CAFs need to report this to the integrated processes team in order to have this recorded on the database, so there may be a delay in the recording of a CAF initiated, depending on when the agency passes on this information.

Data definitions

10 Number of requests for service	By home postcode of child or young person, not the location of the agency/worker making the request for service	ESCR	Some records cannot be allocated to area committee because the record may show a postcode for an address outside Leeds; or an unrecognised or incorrectly input postcode that cannot be matched. The result is the cumulative total number of requests for service during the reporting period. Requests for service are handled by a Duty and Advice team working at the corporate contact centre, who consider the details of all contacts that are received about a concern for a child's welfare. Social workers in this team decide whether or not each case needs social work input. If a case does need social work input, this is termed a referral. Cases where children can best be supported by other children's services agencies or services, i.e., no social work input is required, are termed a request for service.
11 Number of requests for service leading to a referral	By home postcode of child or young person, not the location of the agency/worker making the request for service	ESCR	As above
12 Primary school attendance levels	By school attended, regardless of where the child or young person lives	School census returns for the autumn term 2011	Schools provide, via the termly school census, individual level attendance data for the autumn term 2011 for pupils in years 1 to 11. The school census collects the number of possible half-day sessions of attendance and the number of half-day sessions missed. Information on pupil absence counts the number of pupil enrolments, not the number of pupils. Pupil absence is recorded for the period when a pupil is enrolled at a school. If a pupil moves school, then they will be counted more than once as they have recorded attendance at more than one school.
13 Secondary school attendance levels	By school attended, regardless of where the child or young person lives	School census returns for the autumn term 2011	As above
14 Number of pupils persistently absent at primary	By school attended, regardless of where the child or young person lives	School census returns for the autumn term 2011	A persistent absentee is defined as having 46 or more half day sessions of absence during the school year, around 15% of possible half-day session. Pupils missing 22 or more half-day sessions in the autumn term are potentially on track to become persistent absentees. This indicator is the count of children and young people enrolled at schools in the area committee boundary whose absence levels in the autumn term hit this threshold.
15 Numbers of pupils persistently absent at secondary	By school attended, regardless of where the child or young person lives	School census returns for the autumn term 2011	As above

Data definitions

16 Numbers of NEET	By home address of young person	Insight database	The result is the adjusted number of young people who are NEET on the last day of each month, not the total number of young people who may have been NEET during the month. The "adjusted NEET" figure (which is for city-wide data, not area committee data) takes account of the number of young people whose status is not known. A formula is applied so that some young people whose status is not known are assumed to be NEET. This is added to the NEET figure to give the adjusted NEET figure. Because this adjustment is not made at area committee level, area committee results will not add up to the city-wide total.
17 Percentage of NEET	By home address of young person	Insight database	As above
18 Teenage pregnancy	By home postcode of the young woman. The postcode of the woman's address at time of birth or abortion is used to determine residence at time of conception.	NHS	The city-wide result is the latest rolling quarterly average. There is a 14 month time lag in obtaining this data at city-wide level. There is a an even greater time lag in receiving data that includes postcodes and can therefore be broken down by area committee, Conception statistics include pregnancies that result in one or more live births, or a legal abortion under the Abortion Act 1967. Miscarriages and illegal abortions are not included. The indicator is a count of conceptions, so instances of multiple births only count once.
19 Free school meal uptake primary	By location of school	Data returns by schools	This indicator is based on average take-up over a school financial year, not academic year. Pupils are counted as being free school meal (FSM) eligible, and therefore included in the denominator, if they are recorded as having FSM entitlement in the January school census that occurs during that financial year.
20 Free school meal uptake secondary	By location of school	Data returns by schools	As above
21 10 - 17 year olds committing an offence	By home postcode of the young person		The date from which the offender is included in the count is the date when the offence is proven, not the date of the offence.
22 Ofsted inspections - 31	By location of the school, children's centre, or children's home	Ofsted website	Inspection results are only included once they are published on the Ofsted website and therefore treated as confirmed. Unconfirmed and embargoed results given by an inspection team to a school immediately following an inspection are not counted. The children's centre inspection framework began in September 2010, so not all centres have yet had an inspection. Children's home inspection grades are the result for full, not interim, inspections.
