APPENDIX 5 - School Post-16 Funding Allocations

The table below shows the actual 2006-7 funding allocation by school and the funding they would have received based on the existing formula that takes into account retention from September to January and assumes an 87% achievement rate. It can be seen that a number of schools currently receive more than the formula allocation due to funding protection. From 2008 this protection all schools will start to move towards funding levels based on a new formula that utilises retention throughout the year and actual achievement rates. Poorly performing schools will end up receiving an allocation under the new funding mechanism that is significantly less than the formula allocation indicated below. Work is currently on-going to obtain accurate forecasts of funding using the new funding mechanism.
