

**LEEDS STRATEGIC HOUSING LAND
AVAILABILITY ASSESSMENT**

2012 UPDATE

Publication Note

At the time of Core Strategy submission, this report had not been authorised for publication by Leeds City Council. The Development Plan Panel of Leeds City Council is set to consider the SHLAA 2012 Update on 30th April 2013. Any changes to the SHLAA 2012 Update suggested by the Development Plan Panel will be made available for the Core Strategy Examination.

1. Introduction

- 1.1. Leeds' original Strategic Housing Land Availability Assessment worked to a base date of 31/3/09 and was published in February 2010. The SHLAA 2011 Update worked to a base date of 31/3/11 and was published in December 2011. This update works to a base date of 31/3/12 and includes a number of new sites and updated delivery information for existing sites.

2. Methodology

- 2.1. The methodology for the 2012 Update essentially followed the same approach used for the 2011 SHLAA Update. The main aspects of the approach taken to the update are set out below.

A Partnership Approach

- 2.2. The Leeds SHLAA Partnership continued from the 2011 SHLAA update. In terms of representation the essential balance between different interests remained broadly the same although individuals changed. The overall balance was as follows:

<u>Interest</u>	<u>Representatives</u>
City Council	3 officers, 1 Member
Community Representative	1
Countryside protection	1
Housebuilder	3
Leeds Property Forum	1
Homes & Communities Agency	1
Renew (Registered Providers)	1
Leeds City Region	1

New Sites

- 2.3. A "call-for-sites" was undertaken in March 2012 aimed at eliciting interest in advancing sites suited for industrial and retail use, but attracted over 100 new submissions for housing sites.

Update of existing sites

- 2.4. The main source of new information was progress made with planning applications and with construction on site. Where full planning permission had previously been granted, checks were made through Building Control records to ascertain the number of dwellings commenced construction and the number of dwellings completed. Where outline permissions had previously been granted, checks were made to see whether reserved matters applications had been received and whether they had been granted.
- 2.5. Sites were also reviewed which had dwellings expected to complete during 2011/12. Where construction had not commenced, the reasons were explored and delivery of dwellings reapportioned accordingly. Particular assessment was made

of large schemes on brownfield sites with dwelling delivery expected to commence in 2016/17. This was to re-verify the achievability of schemes that would otherwise slip, with the passage of time, from the medium to the short term, becoming part of Leeds' 5 Year Supply.

- 2.6. Site update information was provided to Partnership members in the form of spreadsheets that illustrated the changes in annual dwelling apportionment and a brief explanation of the reason for the change.

3. Results

- 3.1. The 2012 SHLAA comprises of 1013 active sites with potential to deliver over 170,000 dwellings up to 2035/36.

- 3.2. From the SHLAA base date of 1st April 2012 dwelling apportionment over the short, medium, long and very long time periods is as follows:

Period	Years	Dwellings
Short	2012/13 to 2016/17	20,106
Medium	2017/18 to 2021/22	44,643
Long	2022/23 to 2027/28	79,244
Very Long	2028/29 to 2035/36	30,123
Total	2012/13 to 2035/36	174,116

- 3.3. For the period starting from 1st April 2013 (which will be used to generate Leeds' 5 Year Supply requirement), the dwelling apportionment is as follows:

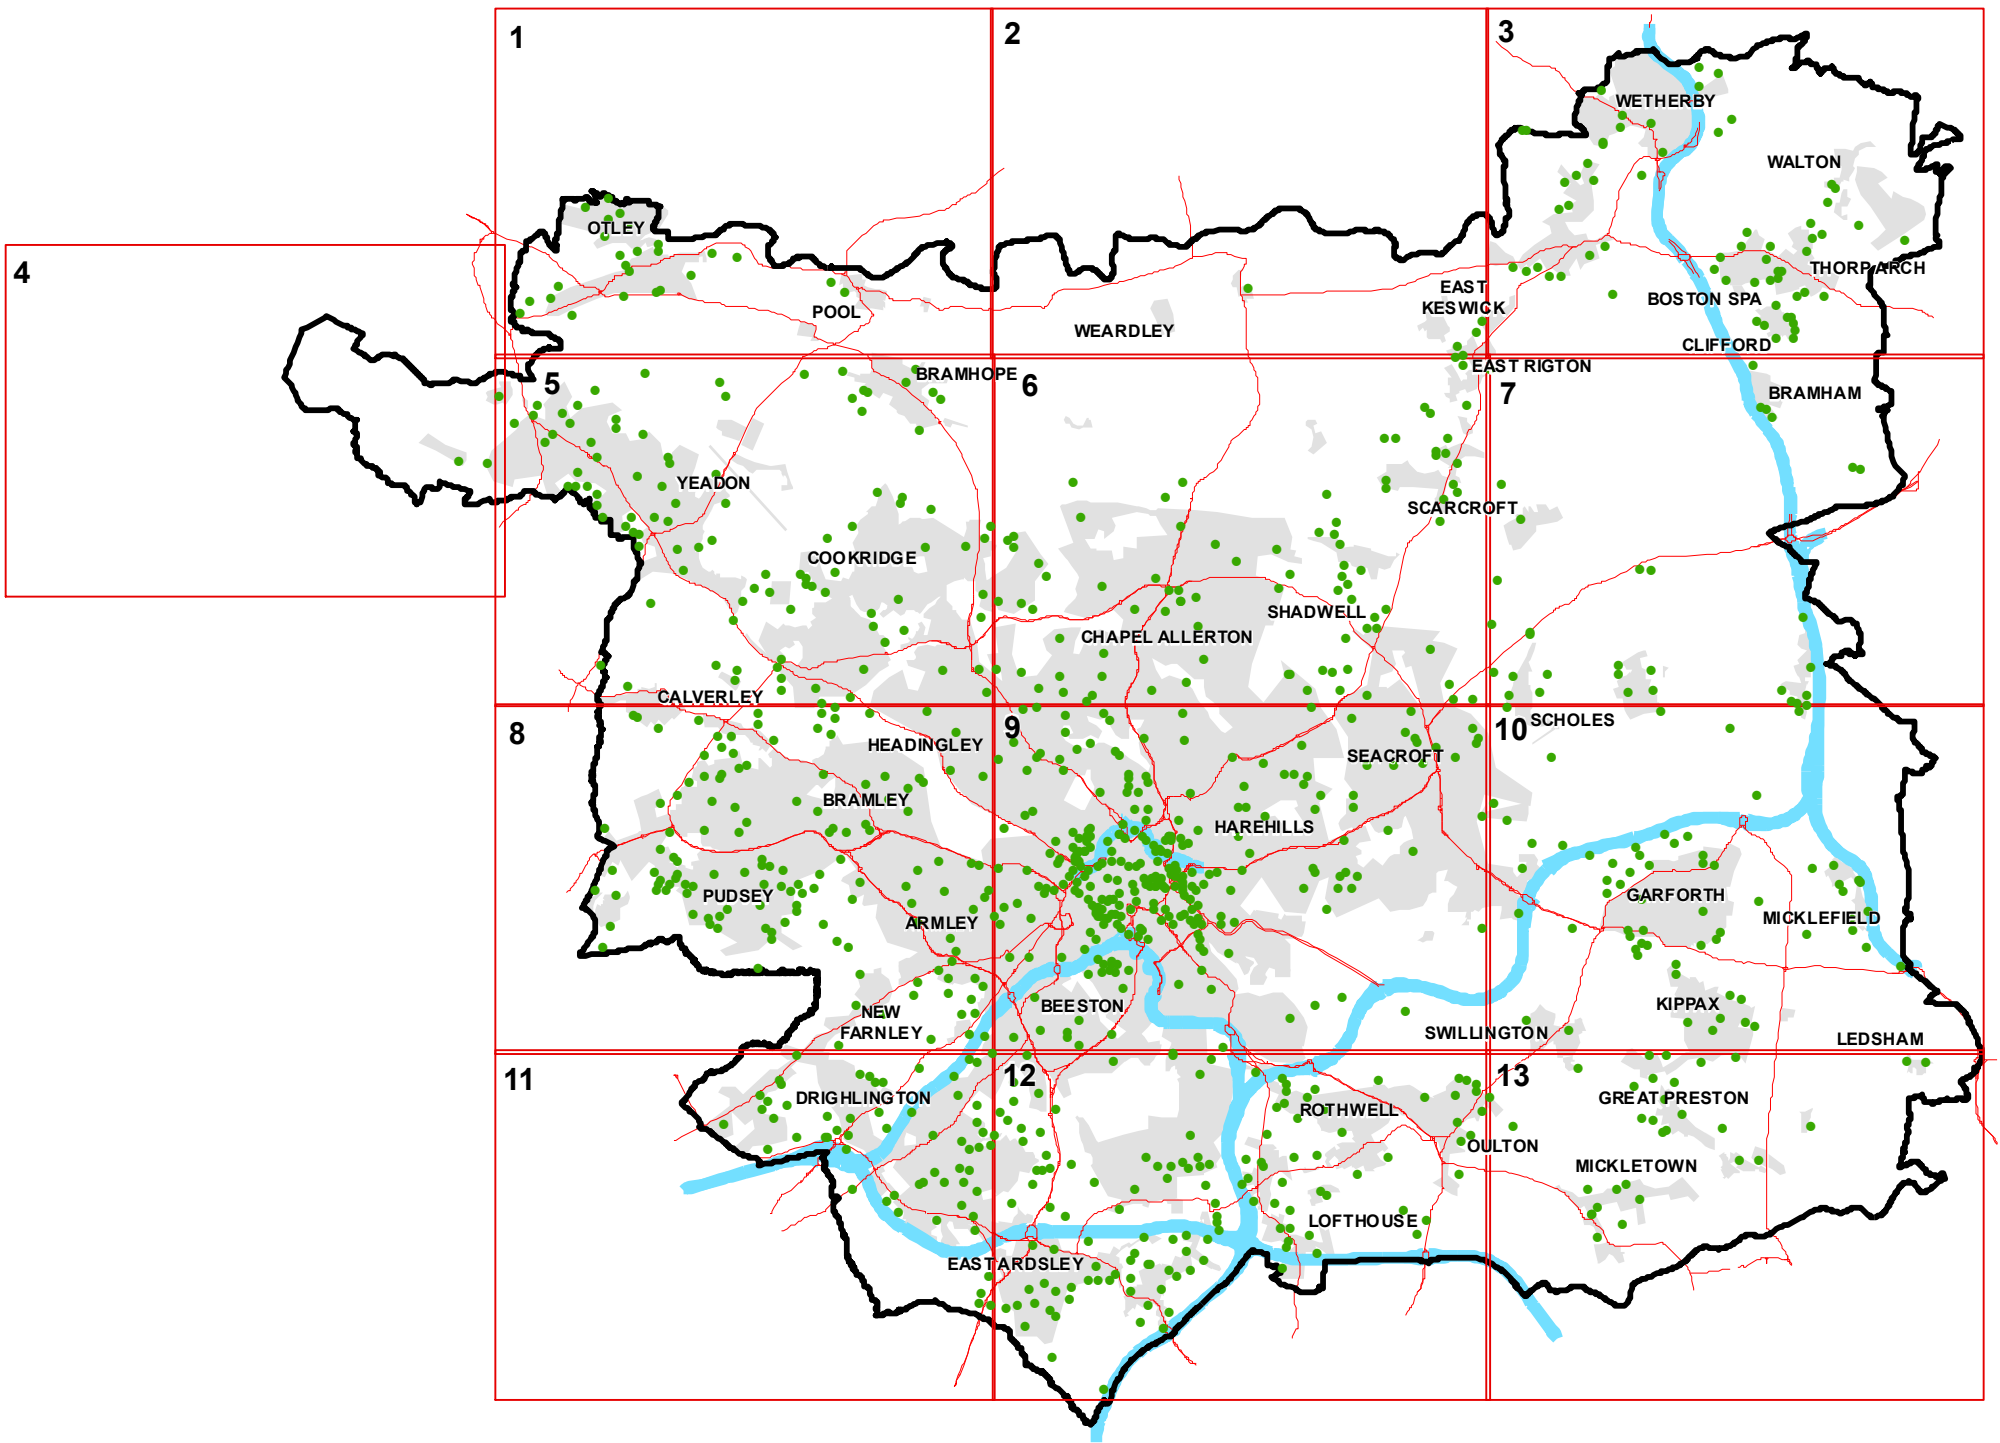

Period	Years	Dwellings
Short	2013/14 to 2017/18	23,668
Medium	2018/19 to 2022/23	57,548
Long	2023/24 to 2027/28	59,972
Very Long	2028/29 to 2035/36	30,123
Total	2013/14 to 2035/36	171,311

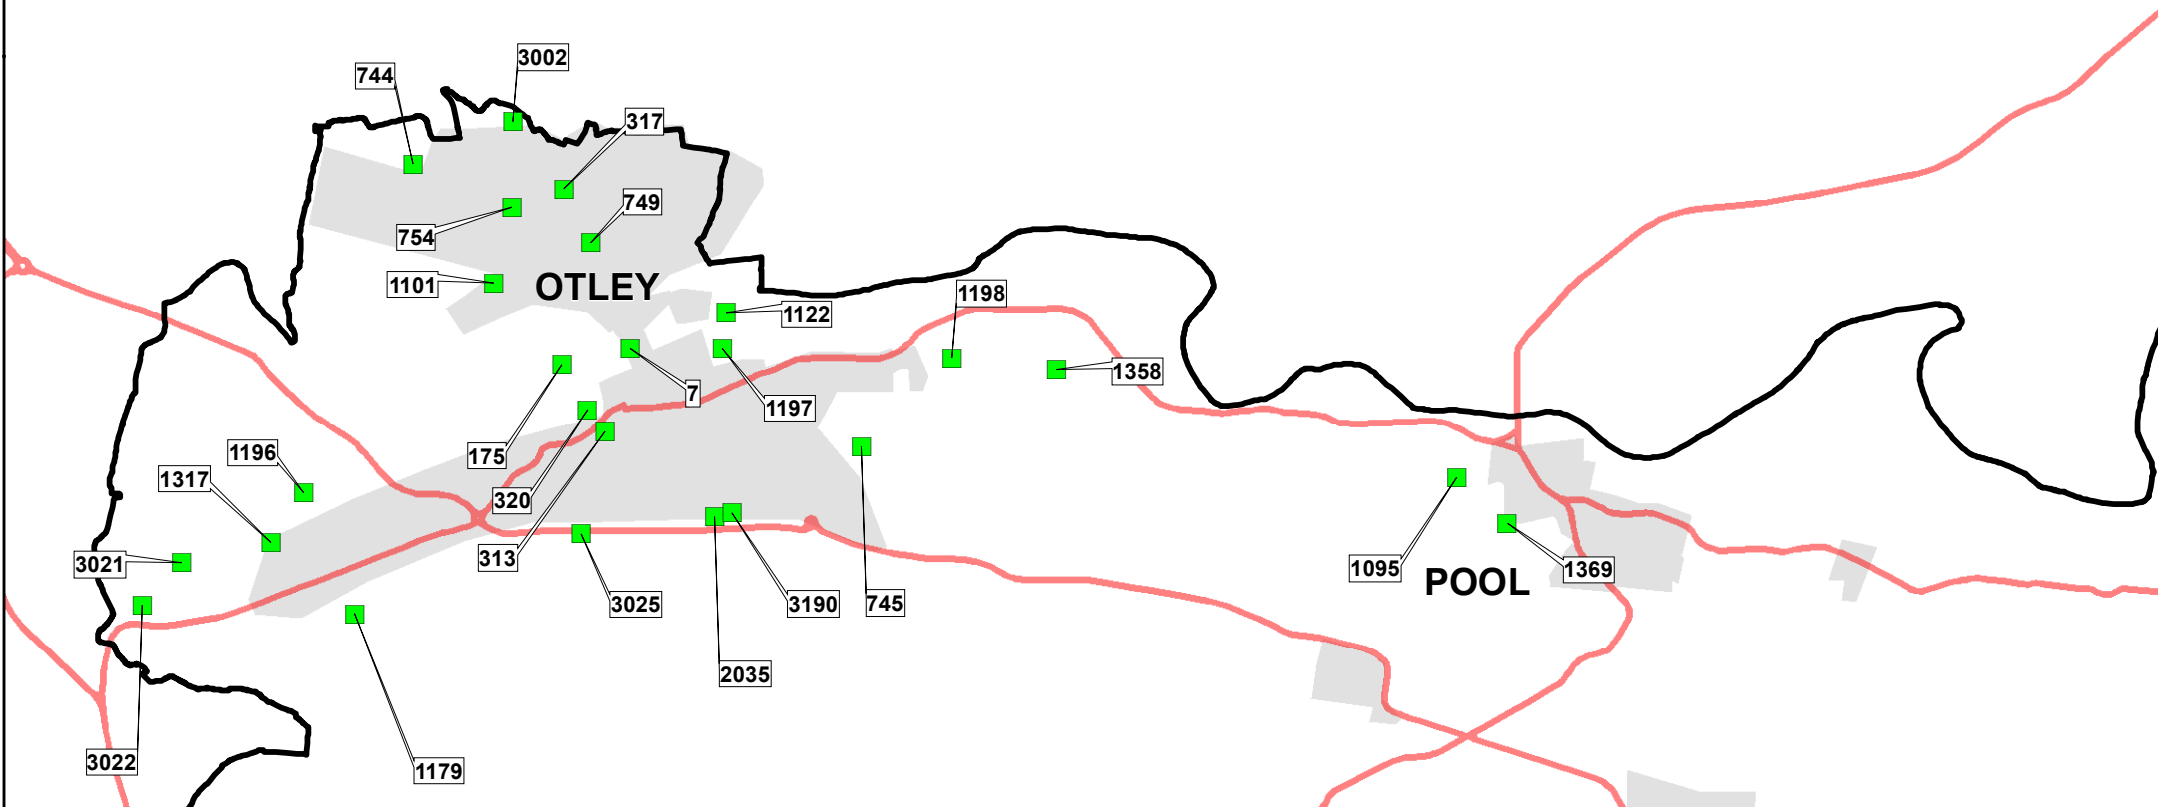

4. Location of Sites

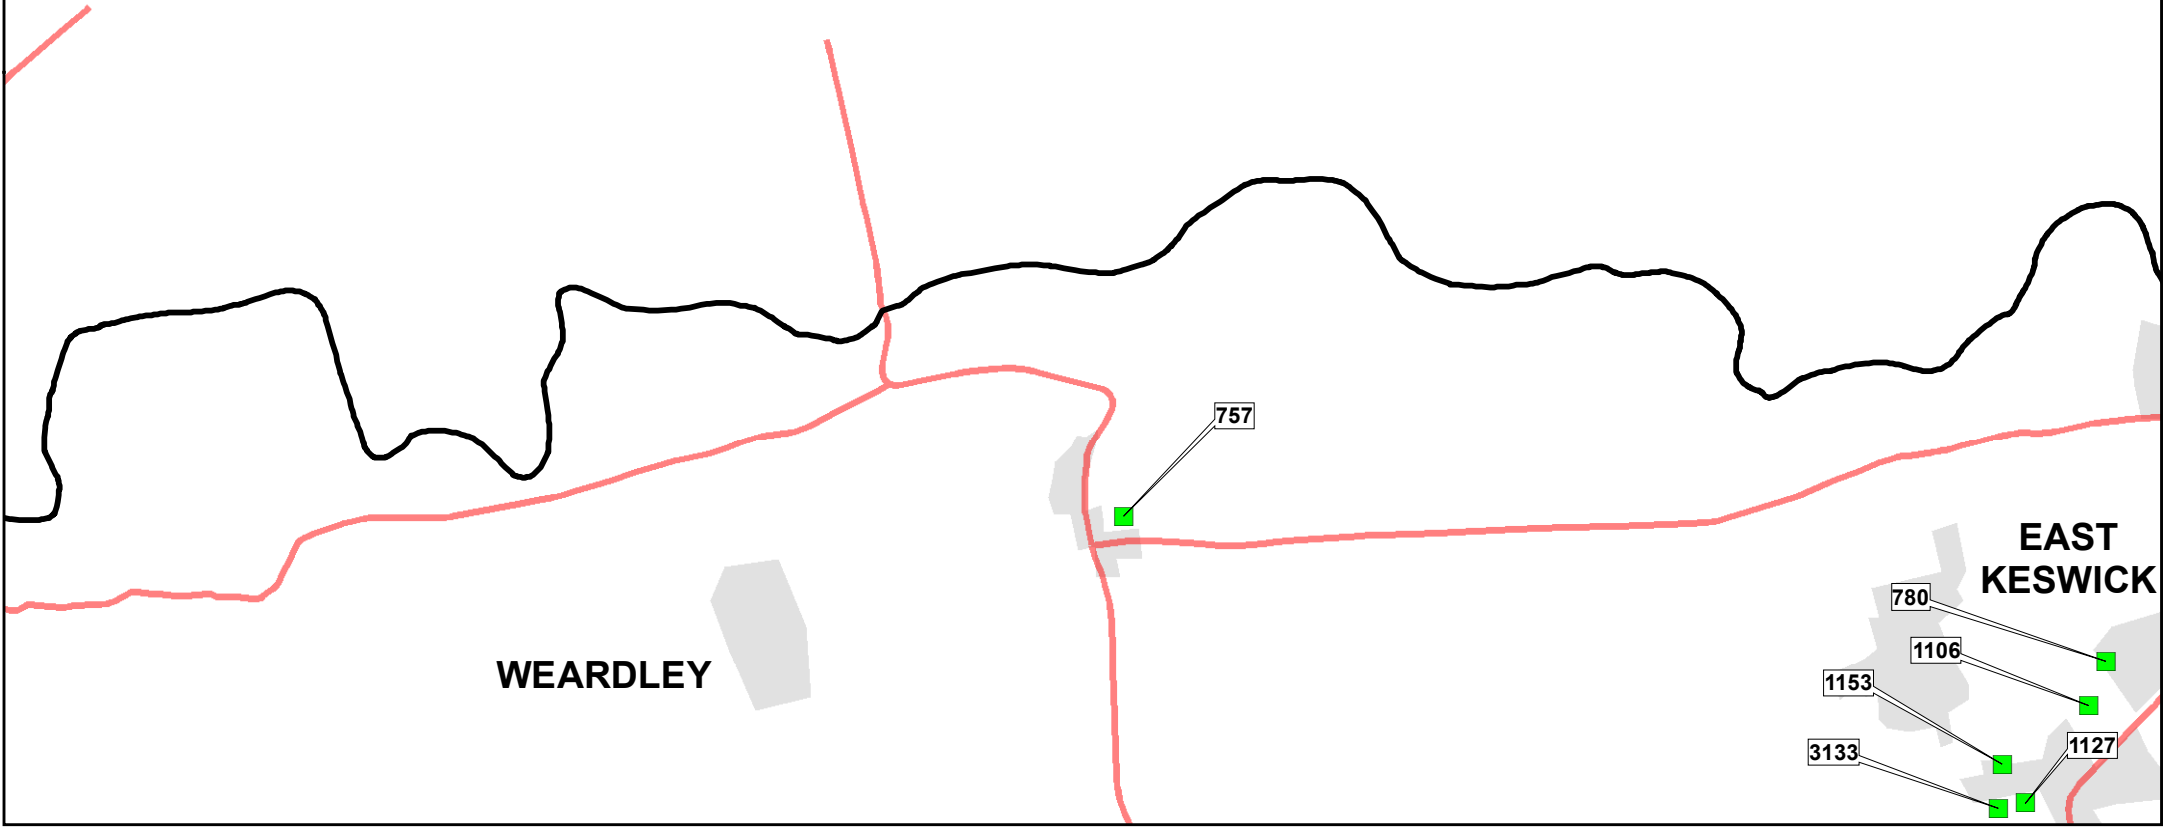

- 4.1. The following maps provide a geographical reference of what sites have been considered. The reference numbers allow readers to look up the conclusions reached in the log of site conclusions.¹

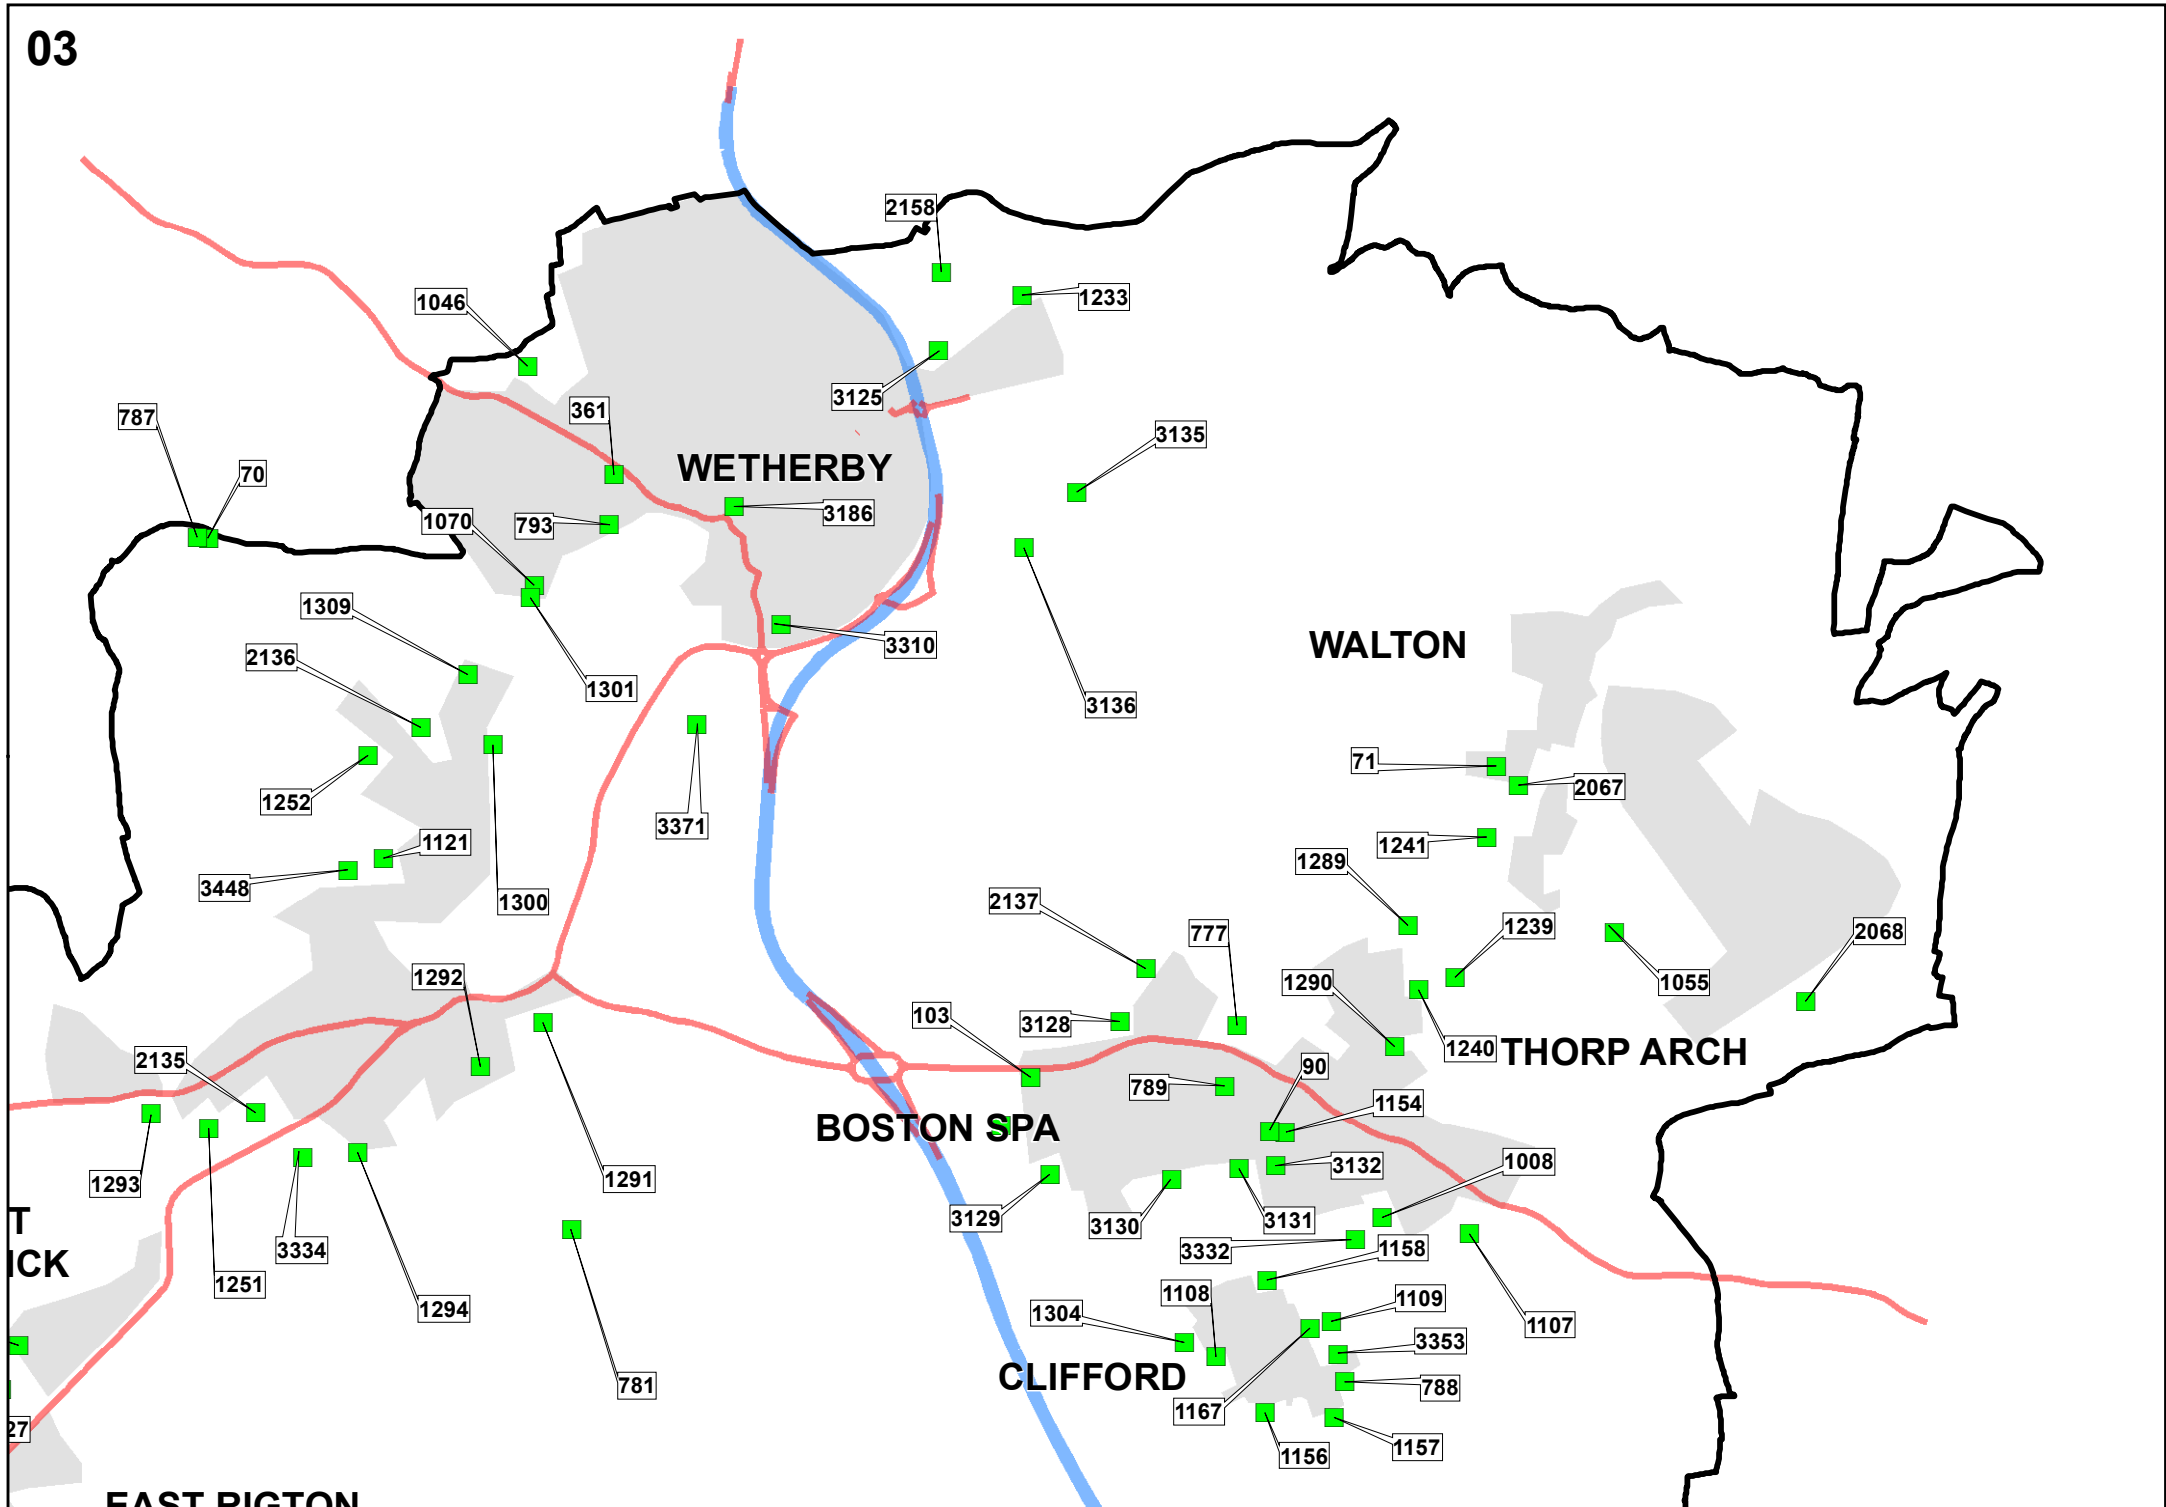

- 4.2. Due to the sheer scale of sites assessed it is not possible to provide more than an overall geographical picture of potential land & dwelling delivery in the form of A4 sized maps in this report. The map "Dwelling Distribution" gives a general overview of location, scale and nature of sites in Leeds. An inset map provides a better scale for the city centre.

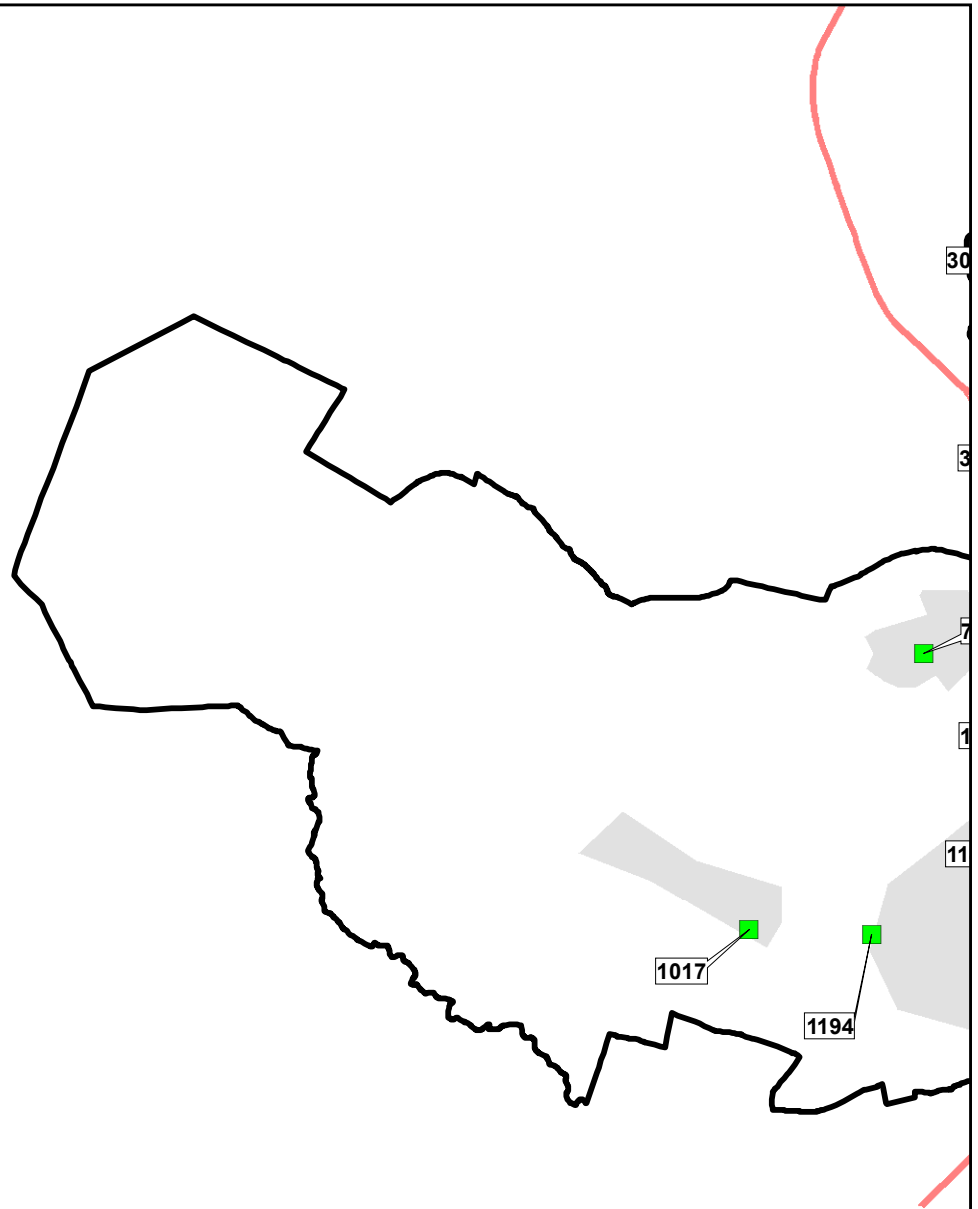

¹ The original 2009 SHLAA used the categories "active" and "dormant" to distinguish between more than one site submission on the same land. Active sites presented full information including numbers of dwellings. Dormant sites were kept blank to avoid double counting. The 2012 update only incorporates "active" sites.
