Motion will read:

This Council acknowledges the need to deliver more social and affordable housing and calls on the Chancellor of the Exchequer to consider, in his forthcoming budget, removing the Housing Revenue Account Borrowing Cap that prevents the council building more homes to address the shortage of social housing in the city.

Council notes the recent research carried out by Shelter that suggests that housing developers are not fulfilling their obligations on affordable housing as a result of viability assessments and welcomes the review of guidance on viability assessments contained within the Government consultation ‘Planning for the right homes in the right places’.

Council further notes the efforts of the current Government to deliver an increase in the supply of affordable housing, as highlighted by the additional £2bn announced in October 2017 that will see a £9bn fund for affordable homes, delivering an additional 25,000 homes at rents affordable to local people.

This council believes that the administration could also do more to increase the supply of affordable housing in Leeds and calls on the Executive Member for Communities and the Executive member for Regeneration, Transport and Planning to consider options such as a joint venture or arms-length trading building company and bring proposals to the Executive Board at the earliest opportunity.
