The contents of this report relate only to the matters which have come to our attention, which we believe need to be reported to you as part of our audit planning process. It is not a comprehensive record of all the relevant matters, which may be subject to change, and in particular we cannot be held responsible to you for reporting all of the risks which may affect the Authority or all weaknesses in your internal controls. This report has been prepared solely for your benefit and should not be quoted in whole or in part without our prior written consent. We do not accept any responsibility for any loss occasioned to any third party acting, or refraining from acting on the basis of the content of this report, as this report was not prepared for, nor intended for, any other purpose.

Grant Thornton UK LLP is a limited liability partnership registered in England and Wales: No.OC307742. Registered office: 30 Finsbury Square, London, EC2A 1AG. A list of members is available from our registered office. Grant Thornton UK LLP is authorised and regulated by the Financial Conduct Authority. Grant Thornton UK LLP is a member firm of Grant Thornton International Ltd (GTIL). GTIL and the member firms are not a worldwide partnership. Services are delivered by the member firms. GTIL and its member firms are not agents of, and do not obligate, one another and are not liable for one another's acts or omissions.

Introduction

Your key Grant Thornton team members are:

Gareth Mills

Key Audit Partner & Engagement Lead

T 07825 115921

Perminder Sethi

Engagement Senior Manager

T 07768 935273

E perminder.sethi@uk.gt.com

This paper provides the Corporate Governance and Audit Committee with a report on progress in delivering our responsibilities as your external auditors.

The paper also includes:

- a summary of emerging national issues and developments that may be relevant to you as a local authority; and
- includes a number of challenge questions in respect of these emerging issues which the Committee may wish to consider (these are a tool to use, if helpful, rather than formal questions requiring responses for audit purposes)

Members of the Corporate Governance and Audit Committee can find further useful material on our website, where we have a section dedicated to our work in the public sector. Here you can download copies of our publications www.grantthornton.co.uk.

If you would like further information on any items in this briefing, or would like to register with Grant Thornton to receive regular email updates on issues that are of interest to you, please contact either Gareth or Perminder.

Progress as at 7 June 2021

Financial Statements Audit

We have commenced our planning work for the 2020-21 audit during March 2021, and expect to complete our planning and interim audit work in July. We expect to begin our work on your draft financial statements during late July / early August.

Our interim fieldwork includes:

- Updated review of the Authority's control environment
- Updated understanding of financial systems
- Review of Internal Audit reports on core financial systems
- Understanding how the Authority makes material estimates for the financial statements
- Early work on emerging accounting issues

Once we have completed our planning work, we will issue a detailed Audit Plan, setting out our proposed approach to the audit of the Authority's 2020-21 financial statements. We expect to present our Audit Plan to the Committee on 30 July.

We will report our work in the Audit Findings (ISA260) Report and aim to give our opinion on the Statement of Accounts by 30 November 2021. The context to this timing is set out in more detail on page 6.

Value for Money

The new Code of Audit Practice (the "Code") came into force on 1 April 2020 for audit years 2020-21 and onwards. The most significant change under the new Code is the introduction of an Auditor's Annual Report, containing a commentary on arrangements to secure value for money and any associated recommendations, if required.

The new approach is more complex, more involved and will make more impact. Before beginning our work, we will discuss with you the timing and resourcing.

As a result of the ongoing pandemic, and the impact it has had on both preparers and auditors of accounts to complete their work as quickly as would normally be expected, the National Audit Office has updated its guidance to auditors to allow us to postpone completion of our work on arrangements to secure value for money and focus our resources firstly on the delivery of our opinions on the financial statements.

The NAO has 'decoupled' the VFM arrangements review from the audit opinion on the financial statements. With the deadline for the VFM work now given as three months after the date of the auditor's opinion on the financial statements.

Please see page 8 for further details.

Audit Fees: proposed audit fee for 2020-21

Other areas

Meetings

We continue to meet on a regular basis with the Section 151 Officer and her senior finance team. Our liaison meetings and discussions with finance staff help to ensure a regular dialogue regarding emerging developments and to ensure the audit process is smooth and effective.

Events

We provide a range of workshops, along with network events and publications to support the Authority. Your officers attended our Financial Reporting Workshop in February, which helped to ensure that members of your Finance Team were up to date with the latest financial reporting requirements for local authority accounts.

Further details of the publications that may be of interest to the Authority are set out in our Sector Update section of this report.

During 2017, PSAA awarded contracts for audit for a five year period beginning on 1 April 2018. 2020-21 is the third year of that contract. Since that time, there have been a number of developments within the accounting and audit profession. Across all sectors and firms, the Financial Reporting Council (FRC) has set out its expectation of improved financial reporting from organisations and the need for auditors to demonstrate increased scepticism and challenge and to undertake additional and more robust testing.

Our work in the Local Government sector in both 2018-19 and 2019-20 included additional audit work, particularly in respect of property, plant and equipment valuations and pensions liability. There is also an increase in the complexity of local government financial transactions and financial reporting. This combined with the FRC requirement that all Local Government audits are graded at or above the “few improvements needed” (2A) rating means that additional audit work is required.

As referred to on page 8, the 2020-21 Code introduces a revised approach to our VFM work. This requires auditors to produce a commentary on arrangements across all of the key criteria, rather than the previous ‘reporting by exception’ approach. Auditors now have to make far more sophisticated judgements on performance, as well as issue key recommendations if any significant weaknesses in arrangements are identified during the audit. We will be working with the NAO and other audit firms to discuss and share learning in respect of common issues arising across the sector.

The new approach will be more challenging for audited bodies, involving discussions at a wider and more strategic level. Both the reporting, and the planning and risk assessment which underpins it, will require more audit time, delivered through a richer skill mix than in previous years. Our estimate is that for your audit, this will result in an increased fee. This is in line with increases we are proposing at all our metropolitan council audits.

Additionally, across all sectors and firms, the FRC has set out its expectation of improved financial reporting from organisations and the need for auditors to demonstrate increased scepticism and challenge and to undertake additional and more robust testing, as noted in the number of revised ISA’s.

The ongoing impact of the additional work required on significant risk areas of the audit (eg PPE and Pensions), together with the new VFM Code and the requirements of the revised ISAs, result in a proposed audit fee for 2020-21 of £275,604 (2019-20 £238,35). Whilst we appreciate this is a significant increase on the PSAA scale fee of £178,604, it reflects the very different environment auditors are now working in compared to when the audit tender was bid for back in 2017. We understand from discussions with the finance team that the Council may be required to produce group accounts for the first time in 2020-21. If this does transpire then there will be an additional audit fee required in order to complete the group accounts audit work.

It should be noted that both the Redmond Review and MHCLG also recognised the need to increase audit fees and, in this context, MHCLG made £15m available to local authorities to support the expected uplift in fees in 2020-21. As a firm we have 40% of the local authority market and our proposed increases across the sector equate to 40% of the funding made available to local authorities to cover the uplift in fees.

We have discussed this with the Section 151 Officer. Further details on our 2020-21 audit fee will be included in the Audit Plan in July.

As a firm, we are absolutely committed to meeting the expectations of the FRC with regard to audit quality and local government financial reporting.

Audit Deliverables (indicative)

2020-21 Deliverables	Planned Date	Status
Audit Plan We are required to issue a detailed Audit Plan to the Corporate Governance and Audit Committee setting out our proposed approach in order to give an opinion on the Authority's 2020-21 financial statements and the Auditor's Annual Report on the Authority's Value for Money arrangements.	July 2021	Not yet due
Interim Audit Findings We will report to you the findings from our interim audit and our initial value for money risk assessment within our Progress Report.	September 2021	Not yet due
Audit Findings (ISA260) Report (the key findings from our accounts audit) The Audit Findings Report is targeted to be reported to the November Corporate Governance and Audit Committee.	November 2021*	Not yet due
Auditors Report – issuing our opinion to sign off your 2020-21 accounts This is the projected date for our opinion on your financial statements.	November 2021*	Not yet due
Auditor's Annual Report (the findings from our VFM arrangements review) This is a new report for 2020-21 in which we will communicate the key issues arising from our Value for Money work. Under the NAO guidance this needs to be issued within 3 months of the accounts opinion date.	January 2022*	Not yet due

* Members of the Corporate Governance and Audit Committee will be familiar from previous discussions regarding the challenging nature of the availability of specialist public sector external audit staff, and the volume of local authority audits which continued after last year's target date of completion of 30 November 2020. This background coupled with the impact of Covid remote working and the need to prioritise our Housing Benefit delivery in the early part of 2021 and then NHS clients given their earlier audit deadline of June 2021, means that we are behind in our local authority planning and interim work compared to our normal timings and profile of delivery.

We have noted that MHCLG has set an indicative date of 30 September 2021 for audited local authority accounts (two months earlier than last year). Given the context set out above, we believe this is highly unrealistic for 2020-21 audits (but as a firm we are fully supportive of this in a 'normal' year). We would also note that the Council's finance team are also under considerable pressure at this time to deal with the production of the annual accounts alongside other commitments (the draft accounts deadline for this year is 31 July – one month earlier than last year).

Therefore, we are proposing to target completing our audit fieldwork on your accounts in October before dealing with completion tasks and targeting signing off your accounts in November. This may need to be revised should group accounts be required in 2020-21. We will be happy to discuss this issue in more detail at the June Corporate Governance and Audit Committee.

I know the prospect of potentially 'missing' the deadline is not ideal and I am happy to make clear to Members at the Corporate Governance and Audit Committee that this is absolutely my call and not a reflection in any way of the Council's finance team or of the Council as a whole. Delivering a robust, high quality audit is my priority and I do not believe pushing to hit an unrealistic deadline of 30 September would support this. The indicative timetable set out above is consistent with the messages I am giving my other local authority clients and indeed my colleagues are doing so across the wider GT audit client base.

Where audits remain ongoing after the statutory date, all that is required to adhere to the Accounts and Audit Regs is a short statement on your website informing people that the audit remains ongoing and that the Council is continuing to engage with the external auditors to complete their audit. There is no naming of authorities that miss the deadline or any financial penalties arising. We can agree a form of wording in due course. As a Firm we have pushed back to MHCLG on the 30 September date for this year as not realistic, however, in a 'normal' year we are absolutely supportive of a 30 September sign off date.

Sector Update

Authorities continue to try to achieve greater efficiency in the delivery of public services, whilst facing the challenges to address rising demand, ongoing budget pressures and social inequality.

Our sector update provides you with an up to date summary of emerging national issues and developments to support you. We cover areas which may have an impact on your organisation, the wider local government sector and the public sector as a whole. Links are provided to the detailed report/briefing to allow you to delve further and find out more.

Our public sector team at Grant Thornton also undertake research on service and technical issues. We will bring you the latest research publications in this update. We also include areas of potential interest to start conversations within the organisation and with corporate governance and audit committee members, as well as any accounting and regulatory updates.

The new approach to Value for Money

The nature of value for money work

Section 20 and 21 of the Local Audit and Accountability Act 2014 (the Act), require auditors to be satisfied that the body “has made proper arrangements for securing economy, efficiency and effectiveness in its use of resources”. The auditor’s work on VFM arrangements is undertaken in accordance with the Code and its supporting statutory guidance. The Comptroller and Auditor General has determined through the 2020 Code and guidance that the key output from local audit work in respect of VFM arrangements is the commentary as reported in the Auditor’s Annual Report. It is therefore not a VFM arrangements ‘conclusion’ or an ‘opinion’ in the same sense as the opinion on the financial statements themselves. The Act and the Code require auditors to consider whether the body has put in place ‘proper arrangements’ for securing VFM. The arrangements that fall within the scope of ‘proper arrangements’ are set out in ‘AGN 03 Auditors’ work on VFM arrangements’, which is issued by the NAO. When reporting on these arrangements, the Code requires auditors to structure their commentary on arrangements under three specified reporting criteria:

Financial sustainability

How the body plans and manages its resources to ensure it can continue to deliver its services, including how the body:

- ensures that it identifies all the significant financial pressures that are relevant to its short and medium-term plans and builds these into them;
- plans to bridge its funding gaps and identifies achievable savings;
- plans finances to support the sustainable delivery of services in accordance with strategic and statutory priorities;

- ensures that its financial plan is consistent with other plans such as workforce, capital, investment, and other operational planning which may include working with other local public bodies as part of a wider system; and
- identifies and manages risks to financial resilience, e.g. unplanned changes in demand, including challenge of the assumptions underlying its plans.

Governance

How the body ensures that it makes informed decisions and properly manages its risks, including how the body:

- monitors and assesses risk and how the body gains assurance over the effective operation of internal controls, including arrangements to prevent and detect fraud;
- approaches and carries out its annual budget setting process;
- ensures effective processes and systems are in place to ensure budgetary control; to communicate relevant, accurate and timely management information (including non-financial information where appropriate); supports its statutory financial reporting requirements; and ensures corrective action is taken where needed;
- ensures it makes properly informed decisions, supported by appropriate evidence and allowing for challenge and transparency. This includes arrangements for effective challenge from those charged with governance/audit committee; and
- monitors and ensures appropriate standards, such as meeting legislative/regulatory requirements and standards in terms of officer or member behaviour (such as gifts and hospitality or declarations/conflicts of interests).

The new approach to Value for Money

Improving economy, efficiency and effectiveness

How the body uses information about its costs and performance to improve the way it manages and delivers its services, including:

- how financial and performance information has been used to assess performance to identify areas for improvement;
- how the body evaluates the services it provides to assess performance and identify areas for improvement;
- how the body ensures it delivers its role within significant partnerships, engages with stakeholders it has identified, monitors performance against expectations, and ensures action is taken where necessary to improve; and
- where the body commissions or procures services, how the body ensures that this is done in accordance with relevant legislation, professional standards and internal policies, and how the body assesses whether it is realising the expected benefits.

VFM arrangements commentary and recommendations

The new approach to Value for Money

The table below details what will be reported in the Auditor's Annual Report:

Section of report	Content
Commentary on arrangements	An explanation of the VFM work that has been undertaken during the year, including the risk assessment and any further risk-based work. It will also highlight any significant weaknesses that have been identified and brought to the body's attention. The commentary will allow auditors to better reflect local context and draw attention to emerging or developing issues which may not represent significant weaknesses, but which may nevertheless require attention from the body itself.
Recommendations	Where an auditor concludes that there is a significant weakness in a body's arrangements, they report this to the body and support it with a recommendation for improvement.
Progress in implementing recommendations	Where an auditor has reported significant weaknesses in arrangements in the previous year, the auditor should follow up recommendations issued previously and include their view as to whether the recommendations have been implemented satisfactorily.
Use of additional powers	Where an auditor uses additional powers, such as making statutory recommendations or issuing a public interest report, this should be reported in the auditor's annual report.
Opinion on the financial statements	The auditor's annual report also needs to summarise the results of the auditor's work on the financial statements.

The table below details the three types of recommendations that auditors can make. Auditors may make recommendations at any time during the year.

Type of recommendation	Definition
Statutory recommendation	Where auditors make written recommendations to the body under Section 24 and Schedule 7 of the Local Audit and Accountability Act 2014. A recommendation of this type requires the body to discuss and respond publicly to the report.
Key recommendation	Where auditors identify significant weaknesses in a body's arrangements for securing value for money, they have to make recommendations setting out the actions that the body should take to address them
Improvement recommendation	Where auditors do not identify a significant weakness in the body's arrangements, but still wish to make recommendations about how the body's arrangements can be improved

Revised auditing standard: Auditing Accounting Estimates and Related Disclosures

In the period December 2018 to January 2020 the Financial Reporting Council issued a number of updated International Auditing Standards (ISAs (UK)) which are effective for audits of financial statements for periods beginning on or after 15 December 2019. ISA (UK) 540 (revised): *Auditing Accounting Estimates and Related Disclosures* includes significant enhancements in respect of the audit risk assessment process for accounting estimates.

Introduction

Under ISA (UK) 540 (Revised December 2018) auditors are required to understand and assess an entity's internal controls over accounting estimates, including:

- The nature and extent of oversight and governance over management's financial reporting process relevant to accounting estimates;
- How management identifies the need for and applies specialised skills or knowledge related to accounting estimates;
- How the entity's risk management process identifies and addresses risks relating to accounting estimates;
- The entity's information system as it relates to accounting estimates;
- The entity's control activities in relation to accounting estimates; and
- How management reviews the outcomes of previous accounting estimates.

As part of this process auditors also need to obtain an understanding of the role of those charged with governance, which is particularly important where the estimates have high estimation uncertainty, or require significant judgement.

Specifically do Audit Committee members:

- Understand the characteristics of the methods and models used to make the accounting estimates and the risks related to them;
- Oversee management's process for making accounting estimates, including the use of models, and the monitoring activities undertaken by management; and
- Evaluate how management made the accounting estimates?

Additional information that will be required for our March 2021 audits

To ensure our compliance with this revised auditing standard, we will be requesting further information from management and those charged with governance during our audit for the year ended 31 March 2021 in all areas summarised above for all material accounting estimates that are included in the financial statements.

Based on our knowledge of the Authority we have identified the following material accounting estimates for which this is likely to apply:

- Valuations of land and buildings, council dwellings and investment properties
- Depreciation
- Year end provisions and accruals
- Credit loss and impairment allowances
- Valuation of defined benefit net pension fund liabilities
- Fair value estimates
- Valuation of level 2 and level 3 financial instruments

The Authority's Information systems

In respect of the Authority's information systems we are required to consider how management identifies the methods, assumptions and source data used for each material accounting estimate and the need for any changes to these. This includes how management selects, or designs, the methods, assumptions and data to be used and applies the methods used in the valuations.

When the models used include increased complexity or subjectivity, as is the case for many valuation models, auditors need to understand and assess the controls in place over the models and the data included therein. Where adequate controls are not in place we may need to report this as a significant control deficiency and this could affect the amount of detailed substantive testing required during the audit.

If management has changed the method for making an accounting estimate we will need to fully understand management's rationale for this change. Any unexpected changes are likely to raise the audit risk profile of this accounting estimate and may result in the need for additional audit procedures.

We are aware that the Authority uses management experts in deriving some of its more complex estimates, e.g. asset valuations and pensions liabilities. However, it is important to note that the use of management experts does not diminish the responsibilities of management and those charged with governance to ensure that:

- All accounting estimates and related disclosures included in the financial statements have been prepared in accordance with the requirements of the financial reporting framework, and are materially accurate;
- There are adequate controls in place at the Authority (and where applicable its service provider or management expert) over the models, assumptions and source data used in the preparation of accounting estimates.

Estimation uncertainty

Under ISA (UK) 540 (Revised December 2018) we are required to consider the following:

- How management understands the degree of estimation uncertainty related to each accounting estimate; and
- How management addresses this estimation uncertainty when selecting their point estimate.

For example, how management identified and considered alternative methods, assumptions or source data that would be equally valid under the financial reporting framework, and why these alternatives were rejected in favour of the point estimate used.

The revised standard includes increased emphasis on the importance of the financial statement disclosures. Under ISA (UK) 540 (Revised December 2018), auditors are required to assess whether both the accounting estimates themselves and the related disclosures are reasonable.

Where there is a material uncertainty, that is where there is a significant risk of a material change to the estimated carrying value of an asset or liability within the next year, there needs to be additional disclosures. Note that not all material estimates will have a material uncertainty and it is also possible that an estimate that is not material could have a risk of material uncertainty.

Where there is material estimation uncertainty, we would expect the financial statement disclosures to include:

- What the assumptions and uncertainties are;
- How sensitive the assets and liabilities are to those assumptions, and why;
- The expected resolution of the uncertainty and the range of reasonably possible outcomes for the next financial year; and
- An explanation of any changes made to past assumptions if the uncertainty is unresolved.

How can you help?

As part of our planning risk assessment procedures we routinely make a number of enquiries of management and those charged with governance, which include general enquiries, fraud risk assessment questions, going concern considerations etc. Responses to these enquires are completed by management and confirmed by those charged with governance at an Audit Committee meeting. For our 2020-21 audit we will be making additional enquires on your accounting estimates in a similar way (which will cover the areas highlighted above). We would appreciate a prompt response to these enquires in due course.

Further information

Further details on the requirements of ISA (UK) 540 (Revised December 2018) can be found in the auditing standard on the Financial Reporting Council's website:

[https://www.frc.org.uk/getattachment/0fa69c03-49ec-49ae-a8c9-cc7a2b65382a/ISA-\(UK\)-540_Revised-December-2018_final.pdf](https://www.frc.org.uk/getattachment/0fa69c03-49ec-49ae-a8c9-cc7a2b65382a/ISA-(UK)-540_Revised-December-2018_final.pdf)

Insight into accounting for grants in local government financial statements – Grant Thornton

The government has provided a range of financial support packages throughout the COVID-19 pandemic.

We have issued a brief bulletin aimed at helping local government bodies identify the key things they should consider when determining the accounting treatment for these grants in their financial statements for 2020/21.

There are no changes to the accounting treatment for grants as required by the CIPFA Code of Practice on Local Authority Accounting. What has changed, is the extent of additional funding to support the cost of services, to offset other income losses along with grant packages to be paid out to support local business. Local authorities need to consider the nature and terms of the various COVID-19 measures in order to determine whether there is income and expenditure to be recognised in the Comprehensive Income and Expenditure Statement in 2020/21.

The report highlights the factors to consider, including:

- Where the funding is to be transferred to other parties, is the authority acting as principal or as agent?
- Are there grant conditions outstanding?
- Is the grant a specific or non-specific grant?

Our bulletin provides you with links to further information on the various support packages and summarises features that may be relevant to your judgements as you determine the appropriate accounting treatment.

Local authorities need to demonstrate their judgements on the accounting treatment to be reasonable and soundly based and, where these have a significant effect on the accounts, to ensure they include sufficient disclosures to meet the requirements of IAS 1:122.

Please ask your audit manager for the full report:

Local government finance in the pandemic – National Audit Office

The National Audit Office (NAO) report, published in March, notes “The COVID-19 pandemic has been an unprecedented public health and economic emergency. Local authorities in England have made a major contribution to the national response to the pandemic, working to protect local communities and businesses, while continuing to deliver existing services. The pandemic has in turn placed significant pressure on local authorities’ finances, which in many cases were already under strain going into the pandemic.”

The NAO report examines if the Department’s approach to local government finance in the COVID-19 pandemic enabled it to assess and fund the costs of new services which local authorities have been asked to deliver. It also examines whether the Department fulfilled its responsibilities in securing financial sustainability across the sector.

The NAO report concludes “Steps taken by the government, led by the Department, have supported local authorities in the COVID-19 pandemic response. The Department’s successful monthly collection of data and continued intensive engagement with the sector provided a good evidence base to underpin the financial and other support provided by government. Action by the Department and wider government to support the sector has averted system-wide financial failure at a very challenging time and means that the Department has managed the most severe risks to value for money in the short term.

However, the financial position of local government remains a cause for concern. Many authorities will be relying on reserves to balance their 2020-21 year-end budgets. Despite continuing support into 2021-22 the outlook for next year is uncertain. Many authorities are setting budgets for 2021-22 in which they have limited confidence, and which are balanced through cuts to service budgets and the use of reserves.”

The NAO report found that “the combined impact on spending and non-tax income in 2020-21 is £9.7bn – equivalent to 17.6% of revenue expenditure. So far the government has announced £9.1bn of financial support, leaving a deficit of £605m.”

The full report can be obtained from the NAO website:

[Local government finance in the pandemic - National Audit Office \(NAO\) Report](#)

Good practice in annual reporting – National Audit Office

The National Audit Office (NAO) state that the guide, launched in February, “Sets out our good practice principles for good annual reporting and provides illustrative examples taken from public sector organisations who are leading the way in this area.

The guide draws on examples of good practice from within each of the six sections of an Annual Report:

- Strategy
- Risk
- Operations
- Governance
- Measures of success
- Financial performance

The NAO also state that the guide “provides further examples where bodies have made their context more understandable to the reader through use of graphics and clear language and signposting.”

However, The NAO observe “Done well, reporting in the public sector enables the public and Parliament to understand – with ease and confidence – an organisation’s strategy and the risks it faces, how much taxpayers’ money has been spent and on what, and what has been achieved as a result.”

Further, the NAO note “The significant impacts of the pandemic emerged in the UK in mid-March 2020. This means that, for many organisations, the reporting impact will be greater in 2020-21 than in the prior year. Transparent annual reporting will help stakeholders understand the impact of COVID-19 on an organisation’s strategy, plans and operational and financial performance.”

The full report can be obtained from the NAO website:

<https://www.nao.org.uk/report/good-practice-in-annual-reports-february-2021/>

2019-20 audited accounts – Public Sector Audit Appointments

In December 2020 Public Sector Audit Appointments (PSAA) published figures relating to the audit of 2019/20 local authority financial statements.

PSAA report “Audit arrangements in local councils, police, fire and other local government bodies are continuing to exhibit signs of stress and difficulty. In the latest audit round, focusing on 2019/20 financial statements and value for money arrangements, fewer than 50% of bodies’ audits were completed by the revised target of 30 November.

Figures compiled by PSAA, the organisation responsible for appointing auditors to 478 local bodies, reveal that 55% (265) of audit opinions were not issued by 30 November. This is a further deterioration on 2018/19 audits when 43% of opinions (210 out of 486) were delayed beyond the then target timetable of 31 July.

This year’s timetable has been deliberately eased by Ministers in recognition of the underlying pressures on the audit process and the significant added complications arising from the Covid-19 pandemic. The pandemic has posed practical challenges for bodies in producing accounts and working papers, and for auditors to carry out their testing. Both sets of staff have had to work remotely throughout the period, and the second national lockdown came at a critical point in the cycle.

Questions and concerns about the potential implications of the pandemic for some bodies have meant that both finance staff and auditors have needed to pay particular attention to the financial position of each entity. Additionally, following a series of increasingly challenging regulatory reviews, auditors have arguably been more focused than ever on their professional duty to give their opinion only when they are satisfied that they have sufficient assurance.”

The news article can be found here:

[News release: 2019/20 audited accounts – PSAA](#)

CIPFA Financial Resilience Index

The Chartered Institute of Public Finance & Accountancy's (CIPFA) Financial Resilience Index is a comparative tool designed to provide analysis on resilience and risk and support good financial management.

CIPFA note "CIPFA's Financial Resilience Index is a comparative analytical tool that may be used by Chief Financial Officers to support good financial management, providing a common understanding within a council of their financial position.

The Index shows a council's position on a range of measures associated with financial risk. The selection of indicators has been informed by extensive financial resilience work undertaken by CIPFA over the past five seven years, public consultation and technical stakeholder engagement.

Section 151 officers may also use the index in their annual report to the council setting out the proposed budget for the year and medium-term financial strategy.

While the impact of COVID-19 resulted in a delay to the publication of the index, it is still able to provide a comprehensive pre-COVID baseline, illustrating the financial resilience of authorities as they entered the pandemic."

CIPFA found that "there was a real-terms reduction of £800m in the level of reserves in 2020 compared with the previous year. At the end of March 2020 council reserves levels stood at £24.6bn, around 3% lower than £25.4bn recorded at the same period in 2019."

CIPFA note "The index is made up of a set of indicators. These indicators take publicly available data and compare similar authorities across a range of factors. There is no single overall indicator of financial risk, so the index instead highlights areas where additional scrutiny should take place in order to provide additional assurance. This additional scrutiny should be accompanied by a narrative to place the indicator into context."

The Financial Resilience tool is available on the CIPFA website below:

<https://www.cipfa.org/services/financial-resilience-index-2021?crdm=0>

© 2021 Grant Thornton UK LLP.

'Grant Thornton' refers to the brand under which the Grant Thornton member firms provide assurance, tax and advisory services to their clients and/or refers to one or more member firms, as the context requires. Grant Thornton UK LLP is a member firm of Grant Thornton International Ltd (GTIL). GTIL and the member firms are not a worldwide partnership. GTIL and each member firm is a separate legal entity. Services are delivered by the member firms. GTIL does not provide services to clients. GTIL and its member firms are not agents of, and do not obligate, one another and are not liable for one another's acts or omissions.
