### 1. Guidance

### Overview

This template is for Health and Wellbeing Boards (HWBs) to provide end of year reporting on their Better Care Fund (BCF) plans. The template should be submitted to the BCF team by 24 May 2021. Since BCF plans were not collected in 2020-21, the end of year reporting will collect information and data on scheme level expenditure that would normally be collected during planning. This is to provide effective accountability for the funding, information and input for national partners and into national datasets.

Throughout the template, cells which are open for input have a yellow background and those that are pre-populated have a grey background, as below:

### Data needs inputting in the cell

### Pre-populated cells

### Note on viewing the sheets optimally

For an optimal view each of the sheets and in particular the drop down lists clearly on screen, please change the zoom level to between 90% - 100%. Most drop downs are also available to view as lists within the relevant sheet or in the guidance sheet for readability if required.

The details of each sheet within the template are outlined below.

#### Checklist (all sheets)

- 1. On each sheet, there is a section that helps identify the data fields that have not been completed. All fields that appear as incomplete should be complete before sending to the BCF team.
- 2. The checker column will appear 'Red' and contain the word 'No' if the information has not been completed. Once completed the checker column will change to 'Green' and contain the word 'Yes'.
- 3. The 'sheet completed' cell will update when all 'checker' values for the sheet are 'Green' containing the word 'Yes'.
- 4. Once the checker column contains all cells marked 'Yes' the 'Incomplete Template' cell (below the title) will change to 'Complete'.
- 5. Please ensure that all boxes on the checklist tab are green before submission.

#### Cover

- 1. The cover sheet provides essential information on: the area for which the template is being completed; contacts; and sign off.
- 2. 'Question completion' tracks the number of questions that have been completed. When all the questions in each section of the template have been completed the cell will turn green. Only when all cells are green should the template be sent to **england.bettercarefundteam@nhs.net**
- 3. Please note that in line with fair processing of personal data we request email addresses for individuals completing the reporting template in order to communicate with and resolve any issues arising during the reporting cycle. We remove these addresses from the supplied templates when they are collated and delete them when they are no longer needed.

## **National Conditions**

This section requires the Health & Wellbeing Board to confirm whether the four national conditions detailed in the Better Care Fund planning requirements for 2020-21 (link below) continue to be met through the year, at the time of the template's sign off.

 $\underline{https://www.gov.uk/government/publications/better-care-fund-policy-statement-2020-to-2021/better-care-fund-policy-s$ 

This sheet sets out the four conditions and requires the HWB to confirm 'Yes' or 'No' that these continue to be met. Should 'No' be selected, please provide an explanation as to why the condition was not met during the year and how this is being addressed. Please note that where a national condition is not being met, the HWB is expected to contact their Better Care Manager in the first instance.

The four national conditions are as below:

- <u>National condition 1:</u> Plans covering all mandatory funding contributions have been agreed by HWB areas and minimum contributions are pooled in a section 75 agreement (an agreement made under section 75 of the NHS Act 2006).
- National condition 2: The contribution to social care from the CCG via the BCF is agreed and meets or exceeds the minimum expectation.
- National condition 3: Spend on CCG commissioned out of hospital services meets or exceeds the minimum ringfence.
- $\underline{\text{National condition 4:}} \text{ The CCG and LA have confirmed compliance with these conditions to the HWB.}$

## Income and Expenditure Actuals

The Better Care Fund 2020-21 pool constitutes mandatory funding sources and any voluntary additional pooling from LAs (Local Authorities) and CCGs. The mandatory funding sources are the Disabled Facilities Grant (DFG), the improved Better Care Fund (iBCF) grant, and the minimum CCG contribution.

## Income section:

- Please confirm the total HWB level actual BCF pooled income for 2020-21. Please include income from additional CCG and LA contributions in 2020-21 in the yellow boxes provided.
- Please provide any comments that may be useful for local context for the reported actual income in 2020-21.

## Expenditure section:

- Please enter the total HWB level actual BCF expenditure for 2020-21 in the yellow box provided.
- Please share any comments that may provide a useful local context to the reported actual expenditure in 2020-21.

## **Year End Feedback**

This section provide an opportunity to feedback on delivering the BCF in 2020-21 through a set of survey questions which are, overall, consistent with those from previous years.

The purpose of this survey is to provide an opportunity for local areas to consider and give feedback on the impact of the BCF. Covid-19 had a significant impact on services and schemes delivered on the ground which may have changed the context. However, national BCF partners would value and appreciate local area feedback to understand views and reflections of the progress and challenges faced during 2020-21.

There is a total of 5 questions. These are set out below.

## **Delivery of the Better Care Fund**

There are a total of 3 questions in this section. Each is set out as a statement, for which you are asked to select one of the following responses:

- Strongly Agree
- Agree
- Neither Agree Nor Disagree
- Disagree

- Strongly Disagree

The questions are:

- 1. The overall delivery of the BCF has improved joint working between health and social care in our locality
- 2. Our BCF schemes were implemented as planned in 2020-21
- 3. The delivery of our BCF plan in 2020-21 had a positive impact on the integration of health and social care in our locality

### Part - Successes and Challenges

This part of the survey utilises the SCIE (Social Care Institute for Excellence) Integration Logic Model published on this link below to capture two key challenges and successes against the 'Enablers for integration' expressed in the Logic Model.

- 4. Outline two key successes observed toward driving the enablers for integration (expressed in SCIE's logic model) in 2020-21.
- 5. Outline two key challenges observed toward driving the enablers for integration (expressed in SCIE's logic model) in 2020-21?

As noted above, these are free text responses to be assigned to one of the following categories from the SCIE Integration Logic Model - Enablers summarised below. Please see link below for fuller details:

SCIE - Integrated care Logic Model

- 1. Local contextual factors (e.g. financial health, funding arrangements, demographics, urban vs rural factors)
- 2. Strong, system-wide governance and systems leadership
- 3. Integrated electronic records and sharing across the system with service users
- 4. Empowering users to have choice and control through an asset based approach, shared decision making and co-production
- 5. Integrated workforce: joint approach to training and upskilling of workforce
- 6. Good quality and sustainable provider market that can meet demand
- 7. Joined-up regulatory approach
- 8. Pooled or aligned resources
- 9. Joint commissioning of health and social care

#### Social care fees

This section collects data on average fees paid by the local authority for social care. This is similar to data collected in Q2 reporting in previous years.

The questions have been updated for 2020-21 to distinguish long term fee rates from temporary uplifts related to the additional costs and pressures on care providers resulting from the COVID-19 pandemic

Specific guidance on individual questions can be found on the relevant tab.

#### CCG-HWB Mapping

The final sheet provides details of the CCG - HWB mapping used to calculate contributions to Health and Wellbeing Board level.

## Please Note:

- The BCF end of year reports are categorised as 'Management Information' and data from them will published in an aggregated form on the NHSE website. Narrative sections of the reports will not be published. However as with all information collected and stored by public bodies, all BCF information including any narrative is subject to Freedom of Information requests.
- At a local level it is for the HWB to decide what information it needs to publish as part of wider local government reporting and transparency requirements. Until BCF information is published, recipients of BCF reporting information (including recipients who access any information placed on the BCE) are prohibited from making this information available on any public domain or providing this information for the purposes of journalism or research without prior consent from the HWB (where it concerns a single HWB) or the BCF national partners for the aggregated information.
- All information, including that provided on local authority fee rates, will be supplied to BCF partners to inform policy development.
- This template is password protected to ensure data integrity and accurate aggregation of collected information. A resubmission may be required if this is breached.

|--|---|--|
| Scheme Type                            | Description   |  |
| Assistive Technologies and Equipment   | Using technology in care processes to supportive self-<br>management, maintenance of independence and more  |  |
|  | efficient and effective delivery of care. (eg. Telecare, Wellness services, Digital participation services).  |  |
| Care Act Implementation Related Duties | Funding planned towards the implementation of Care Act related duties.  |  |
| Carers Services                        | Supporting people to sustain their role as carers and reduce the likelihood of crisis. Advice, advocacy, information, assessment, emotional and physical support, training, access to services to support wellbeing and improve independence. This also includes the implementation of the Care Act as a sub-type.  |  |
| Community Based Schemes                | Schemes that are based in the community and constitute a range of cross sector practitioners delivering collaborative services in the community typically at a neighbourhood level (eg: Integrated Neighbourhood Teams)   |  |
| DFG Related Schemes                    | The DFG is a means-tested capital grant to help meet the costs of adapting a property; supporting people to stay independent in their own homes.  |  |
| Enablers for Integration               | Schemes that build and develop the enabling foundations of health and social care integration encompassing a wide range of potential areas including technology, workforce, market development (Voluntary Sector Business Development: Funding the business development and preparedness of local voluntary sector into provider Alliances/ Collaboratives) and programme management related schemes. Joint commissioning infrastructure includes any personnel or teams that enable joint commissioning. Schemes could be focused on Data Integration, System IT Interoperability, Programme management, Research and evaluation, Supporting the Care Market, Workforce development, Community asset mapping, New governance arrangements, Voluntary Sector Development, Employment services, Joint commissioning infrastructure amongst others. |  |

| High Impact Change Model for Managing Transfer of Care | The eight changes or approaches identified as having a high impact on supporting timely and effective discharge through joint working across the social and health system. The Hospital to Home Transfer Protocol or the 'Red Bag' scheme, while not in the HICM as such, is included in this section.  A range of services that aim to help people live in their  |  |
|--|--|--|
| Home Care or Domiciliary Care                          | own homes through the provision of domiciliary care including personal care, domestic tasks, shopping, home maintenance and social activities. Home care can link with other services in the community, such as supported housing, community health services and voluntary sector services.  |  |
| Housing Related Schemes                                | This covers expenditure on housing and housing-related services other than adaptations; eg: supported housing units.   |  |
| Integrated Care Planning and Navigation                | Care navigation services help people find their way to appropriate services and support and consequently support self-management. Also, the assistance offered to people in navigating through the complex health and social care systems (across primary care, community and voluntary services and social care) to overcome barriers in accessing the most appropriate care and support. Multi-agency teams typically provide these services which can be online or face to face care navigators for frail elderly, or dementia navigators etc. This includes approaches like Single Point of Access (SPoA) and linking people to community assets.  Integrated care planning constitutes a co-ordinated, person centred and proactive case management approach to conduct joint assessments of care needs and develop integrated care plans typically carried out by professionals as part of a multi-disciplinary, multi-agency teams.  Note: For Multi-Disciplinary Discharge Teams and the HICM for managing discharges, please select HICM as scheme type and the relevant sub-type. Where the planned unit of care delivery and funding is in the form of Integrated care packages and needs to be expressed in such a manner, please select the appropriate sub-type alongside. |  |

| Intermediate Care Services | Short-term intervention to preserve the independence of people who might otherwise face unnecessarily prolonged hospital stays or avoidable admission to hospital or residential care. The care is person-centred and often delivered by a combination of professional groups. Four service models of intermediate care are: bed-based intermediate care, crisis or rapid response (including falls), home-based intermediate care, and reablement or rehabilitation. Home-based intermediate care is covered in Scheme-A and the other three models are available on the sub-types.            |  |
|----------------------------|---|--|
| Personalised Budgeting and | Various person centred approaches to commissioning  |  |
| Commissioning              | and budgeting.  |  |
| Personalised Care at Home  | Schemes specifically designed to ensure that a person can continue to live at home, through the provision of health related support at home often complemented with support for home care needs or mental health needs. This could include promoting self-management/expert patient, establishment of 'home ward' for intensive period or to deliver support over the longer term to maintain independence or offer end of life care for people. Intermediate care services provide shorter term support and care interventions as opposed to the ongoing support provided in this scheme type. |  |
| Prevention / Early         |   |  |
| Intervention               | Services or schemes where the population or identified high-risk groups are empowered and activated to live well in the holistic sense thereby helping prevent people from entering the care system in the first place. These are essentially upstream prevention initiatives to promote independence and well being.   |  |
| Residential Placements     | Residential placements provide accommodation for people with learning or physical disabilities, mental health difficulties or with sight or hearing loss, who need more intensive or specialised support than can be provided at home.  |  |
| Other                      | Where the scheme is not adequately represented by the above scheme types, please outline the objectives and services planned for the scheme in a short description in the comments column.  |  |

The purpose of this survey is to provide an opportunity for local areas to consider and give feedback on the impact of the BCF. Covid-19 had a significant impact on services and schemes delivered on the ground which may have changed the context. However, national BCF partners would value and appreciate local area feedback to understand views and reflections of the progress and challenges faced during 2020-21
There is a total of 5 questions. These are set out below.

Leeds Selected Health and Wellbeing Board:

| Statement:  | Response: | Comments: Please detail any further supporting information for each response  |
|---|-----------|---|
| The overall delivery of the BCF has improved joint working between health and social care in our locality                     | Agree     | The main factor that has improved joint working between health and social care this year<br>has been our response to the Covid pandemic. This was made easier because there was<br>already a strong, well established relationship between health and care partners in Leeds<br>due in part to existing joint working to deliver services funded through the BCF. |
| Our BCF schemes were implemented as planned in 2020-21  | Agree     | BCF schemes were implemented as planned in 2020-21.   |
| 3. The delivery of our BCF plan in 2020-21 had a positive impact on the integration of health and social care in our locality |           | This year Covid-19 has had more of a positive impact on the integration of health and social care than the BCF however, Leeds' response to the pandemic was more effective because established health and care relationships were already in place.   |

| challenge in progressing.<br>Please provide a brief description alongside.   |   |   |
|--|---|---|
| Outline two key successes observed toward driving the<br>enablers for integration (expressed in SCIE's logical model) in<br>2020-21  | SCIE Logic Model Enablers, Response category:                                   | Response - Please detail your greatest successes  |
| Success 1  | 5. Integrated workforce: joint approach to training and upskilling of workforce | One of our successes has been a Therapy Supported Discharge (TSD) pilot which was funded through the iBCF grant. This is an integrated discharge pathway that promotes fluid working across acute and community settings, improving patient flow and outcomes for patients. Integrated working and improved communication have led to a greater understanding of both settings and has enabled patients to be discharged to Neighbourhood Teams earlier saving an average of 3 bed days per patient seen. Due to the success of the pilot (evidenced by data captured) funding has been secured for TSD to be scaled up and integrated into Leeds Teaching Hospitals Trust (LTHT) and all Leeds Community Healthcare Trust (LCH) Neighbourhood Teams. All partners believe progress on this scheme is being evidenced and that the scheme has met the exit strategy outlined in the business plan.  TSD also provided appropriate development opportunities to enable the 3 Band 6 Therapists to secure Band 7 positions. At this time the delivery model of the pilot was reviewed in partnership with LTHT and it was agreed that the number of Band 6 Therapists could be reduced to 2 whilst extending the remaining time of the pilot from 3 months to 4.5 months. LTHT also offered to provide 2 Band 6 Therapists and the TSD Therapists. This meant that the LTHT Therapists and the TSD Therapists managed the inpatients and the TSD Therapists. This managed the community patients. By merging these roles, a more fluid model was achieved. Joint assessments also took place which increased the knowledge and skills of LTHT staff to work within the community. With all 4 Therapists also took place which increased the knowledge and skills of LTHT staff to work within the community. With all 4 Therapists now performing the same role, a buddy system has been used to aid joint working, supporting each other in their respective working environments. |
| Success 2  | Strong, system-wide governance<br>and systems leadership                        | In preparation for refreshing the 2020/21 plan to meet requirements a review of the BCF Partnership Agreement (575) was conducted. Whilst this review was underway, the development of the Mental Health Strategy brought some of the schemes and services in the BCF together and it was agreed that the alignment of the services to the BCF principles should also be reviewed so we could ensure they still aligned to the strategic priorities of the city i.e. integrated commissioning, home first and mental health. Partners have worked together to refresh the BCF and ensure the services within it not only align to current governance structures but that where possible the total amount of spend is now included in the BCF. The BCF is now a better strategic fit linked to Leeds' Integrated Commissioning Framework with clear integrated and functional governance across services.  |
| Outline two key challenges observed toward driving the<br>enablers for integration (expressed in SCIE's logical model) in<br>2020-21 | SCIE Logic Model Enablers, Response category:                                   | Response - Please detail your greatest challenges   |
| Challenge 1  | Strong, system-wide governance and systems leadership                           | The NHS England changes that see the abolition of CCGs in April 2022 with an increased responsibility held by ICS leaves<br>the clarity of the future of the BCF a risk. We will need to ensure that the legal requirement to have a BCF is held and<br>managed locally at place as services are relevant to our place population. To date there has been no clarity on how this will<br>be achieved in governance terms and how this will fit into our Health and Wellbeing Board arrangements at place.   |

# Footnotes:

- Footnotes:
  Question 4 and 5 are should be assigned to one of the following categories:
  1. Local contextual factors (e.g. financial health, funding arrangements, demographics, urban vs rural factors)
  2. Strong, system-wide governance and systems leadership
  3. Integrated electronic records and sharing across the system with service users
  4. Empowering users to have choice and control through an asset based approach, shared decision making and co-production
  5. Integrated workforce: joint approach to training and upskilling of workforce
  6. Good quality and sustainable provider market that can meet demand
  7. Joined-up regulatory approach
  8. Pooled or aligned resources
  9. Joint commissioning of health and social care
  Other

provider market that can meet

demand

Checklist Complete: Leeds relies on the Third Sector as a partner to help improve/deliver a lot of Mental Health and discharge services that sit within our BCF but there are a number of challenges facing the Third Sector at a time when demand for services is at an all time high particularly from populations who experience the greatest levels of health inequalities. Challenges include financial sustainability, workforce capacity, increase in demand for services and digital capability.

# Better Care Fund 2020-21 Year-end Template 8. improved Better Care Fund

| ted Health and Wellbeing Board: | Leeds |
|---------------------------------|-------|
|                                 |       |

These questions cover average fees paid by your local authority (including client contributions/user charges) to external care providers for your local authority's eligible clients.

The averages will likely need to be calculated from records of payments paid to social care providers and the number of client weeks they relate to, unless you already have suitable management information.

We are interested ONLY in the average fees actually received by external care providers for your local authority's eligible supported clients (including client contributions/user charges). Specifically the averages SHOULD EXCLUDE:

- Any amounts that you usually include in reported fee rates but are not paid to care providers e.g. your local authority's own staff costs in managing the commissioning of places.

- Any amounts that are paid from sources other than eligible local authority funding and client contributions/user charges, i.e. you should EXCLUDE third party top-ups, NHS Funded Nursing Care and full cost paying clients.

Respecting these exclusions, the average fees SHOULD INCLUDE:
- Client contributions, Juser charges.
- Fees paid under so and block controllations, controllations of the state of the stat

If you only have average fees at a more detailed breakdown level than the three service types of home care, 65+ residential and 65+ nursing requested below (e.g., you have the more detailed categories of 65+ residential without dementia, 65+ residential with dementia) please calculate for each of the three service types an average weighted by the proportion of clients that receive ach detailed category:

1.78 the humber of clients receiving the service for each detailed category.

2. Divide the number of clients receiving the service for each detailed category (e.g., age 65+ residential without dementia, age 65+ residential with dementia) by the total number of clients receiving the relevant service (e.g., age 65+ residential).

3. Multiply the resultant proportions from \$150 2 by the corresponding (e.g. paid for each detailed category.

4. For each service type, sun the resultant detailed category figures from \$150 2.0.

3. The control of the control of the corresponding (e.g. paid for each detailed category.

4. For each service type, sun the resultant detailed category figures from \$150 2.0.

3. The control of the control of the corresponding (e.g. paid for each service type).
