

**Inner North West Community Committee Meeting 25th September  
2024**

**Late Paper Addition to Finance Report – for Decision**

**Contents:**

**1 Capital Application**

**Lovell Park Fencing Project £9,564.00**

Residents have limited access to enjoy a safe and well-kept outdoor space. There are many families living in the area which includes 3 high rise blocks. The installation of knee-high post and rail fencing will keep families and residents safe from vehicles from getting onto the grass verges, the fence will prevent cars/off road bikes from causing damage to the environment and prevent any accidents. There are currently no barriers in place, and this causes a serious threat to local children/ residents if they use the green area, which results in residents not making use of their limited outdoor space. Reviving the green spaces would make a big difference to all residents as they will have a better-looking environment overall as the 3 blocks have just undergone major improvements.
