

Equality, Diversity, Cohesion and Integration Screening

As a public authority we need to ensure that all our strategies, policies, service and functions, both current and proposed have given proper consideration to equality, diversity, cohesion and integration.

A **screening** process can help judge relevance and provides a record of both the **process** and **decision**. Screening should be a short, sharp exercise that determines relevance for all new and revised strategies, policies, services and functions.

Completed at the earliest opportunity it will help to determine:

- the relevance of proposals and decisions to equality, diversity, cohesion and integration.
- whether or not equality, diversity, cohesion and integration is being/has already been considered, and
- whether or not it is necessary to carry out an impact assessment.

Directorate: City Development	Service area: Transport policy
Lead person: Paul Foster	Contact number: 52586

1. Title: West Yorkshire Plus Transport Fund

Is this a:

Strategy / Policy

Service / Function

Other

If other, please specify

2. Please provide a brief description of what you are screening

Earlier this year, Government announced its decision not to grant powers for the construction and operation of NGT but announced the decision to set aside the £173.5m for public transport investment in Leeds.

This report also sets out the results so far from the Transport Conversation.

3. Relevance to equality, diversity, cohesion and integration

All the council's strategies/policies, services/functions affect service users, employees or the wider community – city wide or more local. These will also have a greater/lesser relevance to equality, diversity, cohesion and integration.

The following questions will help you to identify how relevant your proposals are.

When considering these questions think about age, carers, disability, gender reassignment, race, religion or belief, sex, sexual orientation. Also those areas that impact on or relate to equality: tackling poverty and improving health and well-being.

Questions	Yes	No
Is there an existing or likely differential impact for the different equality characteristics?	x	
Have there been or likely to be any public concerns about the policy or proposal?	x	
Could the proposal affect how our services, commissioning or procurement activities are organised, provided, located and by whom?		x
Could the proposal affect our workforce or employment practices?		x
Does the proposal involve or will it have an impact on <ul style="list-style-type: none"> • Eliminating unlawful discrimination, victimisation and harassment • Advancing equality of opportunity • Fostering good relations 		x

If you have answered **no** to the questions above please complete **sections 6 and 7**

If you have answered **yes** to any of the above and;

- Believe you have already considered the impact on equality, diversity, cohesion and integration within your proposal please go to **section 4**.
- Are not already considering the impact on equality, diversity, cohesion and integration within your proposal please go to **section 5**.

4. Considering the impact on equality, diversity, cohesion and integration

If you can demonstrate you have considered how your proposals impact on equality, diversity, cohesion and integration you have carried out an impact assessment.

Please provide specific details for all three areas below (use the prompts for guidance).

- **How have you considered equality, diversity, cohesion and integration?** (**think about** the scope of the proposal, who is likely to be affected, equality related information, gaps in information and plans to address, consultation and engagement activities (taken place or planned) with those likely to be affected).

Ensuring that we have a conversation, where everyone across Leeds is able to give their views on the future of transport in Leeds is a key objective for the Council. The main method of engagement is through the on-line questionnaire and with the involvement of social media, but paper questionnaires have been made available to those with no access to the on-line version. We have promoted the questionnaire through equality hubs and disabled and older people's organisations and women's groups to maximise circulation to those groups. To capture the views of children and young people, a child friendly questionnaire has been developed jointly with WYCA to cover transport consultations and is available on line. The promotion of the consultations through social media is also a means of engaging in particular with the younger section of the population.

To ensure we have fully considered the impacts of both public transport investment programme and future Leeds Transport Strategy on equality, diversity, cohesion and integration, we have organised a number of meetings, workshops and attended events and will continue this dialogue as we prepare the Leeds Transport Strategy into spring summer 2017 with the following groups: Child Friendly Leeds, Older People's Forum, Access Groups, BME Hub, Disability Hub, LGBT* Hub, Hub Reps Network, Womens' Lives Leeds, Access and Use-Ability Group, Physical and Sensory Impairment (PSI) Network, Leeds Involving People, Equalities Assembly Conference.

In particular, we have attended a workshop session organised by the PSI network with the focus on disabled people and carers, and have supported the equality hubs and disabled people's organisation members in attending and contributing to two of the stakeholders workshops.

This conversation along with the DfT guidance will inform the development of the Leeds public transport investment programme, prior to the longer term delivery of the emerging Leeds Transport Strategy.

- **Key findings**

(**think about** any potential positive and negative impact on different equality characteristics, potential to promote strong and positive relationships between groups, potential to bring groups/communities into increased contact with each other, perception that the proposal could benefit one group at the expense of another)

From both Transport Conversation engagement and previous policy documents including

the Local Transport Plan 3 and Leeds Core Strategy, transport has the potential to have a differential impact on all equality groups, with particular regard to the following;

- Gender; Research shows that women and men have persistent different transportation needs, travel behaviours and levels of access to services and infrastructure. Women tend to travel shorter distances, closer to the home, and make more trips; they travel for a wider variety of purposes; they walk more; they have less access to a car and are the main users of public transport, they make more chained trips; their travel patterns tend to be shaped as polygons as compared to the more frequent commuting trips made by men. Women are more sensitive to safety concerns and tend to self-limit their movements and activities because of perceptions of risk, in the UK, they are less likely to cycle. Women are also overrepresented in social groups with specific transport needs and greater transport disadvantage: older people, people with special needs, single parents, and working parents who take responsibility for most caretaking tasks. Women's overall comparative disadvantage in terms of access to transportation negatively affects their professional development, economic status, leisure time, and personal wellbeing. [Source: genderSTE]

- Disability; Differential access to the transport system and the effect of transport policies, particularly (but not restricted to) for those with physical and sensory impairments, mental health issues or learning disabilities. Disabled people travel more frequently by bus than others, so public transport plays a vital role in ensuring that they can participate in community life and avoid social exclusion. They also may be affected to a greater extent by issues of reliability of public transport, modal integration (or lack thereof) and interchange and by issues such as overcrowding/ space availability. The availability of accessible infrastructure and walkable, level routes and access to information, including on board and at stops, will also have a differential impact on this equality group.

Disability can lead to a greater reliance on private transport (own car or taxi, or lifts from friends/ relatives etc). Journey times, distance and destinations as well as modal choice may be affected by disability.

- Race; Differential access to the transport system and the effect of transport policies, particularly for Black, Asian and Minority Ethnic people are around impacts on access to employment, education and training, which are vitally important issues for BAME communities as a means of overcoming disadvantages in the job market. Studies have also shown a differential impact in terms of the impact of traffic and road safety. They are also underrepresented among cyclists. It is thought that enabling travel by active modes may particularly benefit some members of the BAME communities in addressing health inequalities, including Type II diabetes and cardio-vascular health.
- Age; Both younger and older people are more at risk of being involved on a road traffic collision and suffer greater consequential effects – initiatives that contribute to road safety, especially of active modes, will have a beneficial impact on these sections of the population.

Young people rely very much on public transport, although many have personal

security concerns when using public transport and this is coupled with the fact that in terms of actual risk they are the age group which are most likely to be the victims of violence and/or assault. Children exposed to traffic related air pollution are more at risk of asthma and child inactivity is a cause for future health concerns, which can be addressed through enabling the use of active travel modes.

Many older people are not able to drive because health conditions related to their age or find the cost of running a car prohibitive. Like with disabled people, there will be a differential impact in terms of distance travelled (including to access public transport in the first place), reliability, overcrowding and the need to interchange or change modes. The presence and availability of evening and weekend services and infrastructure at stops/ stations will also have a differential impact in terms of the ability to access activities and leisure opportunities. The inter-district connectivity enabling access to local services has also been found to be particularly important to older people and people with disabilities.

• **Actions**
(think about how you will promote positive impact and remove/ reduce negative impact)

The outcomes from the Transport Conversation, which include the inclusive engagement with equality stakeholders in particular, will feed into the public transport investment package of £173 million, to be submitted to the DfT. The Transport Conversation and our dialogue with equality groups will continue as we develop our longer term Leeds Transport Strategy. The interim results indicate that almost all respondents felt it was important for future transport strategy that everyone had access to the transport system (98%) – accessibility and inclusion are therefore likely to be key components of a future package of measures.

5. If you are **not already considering the impact on equality, diversity, cohesion and integration you **will need to carry out an impact assessment.****

Date to scope and plan your impact assessment:	N/A
Date to complete your impact assessment	N/A
Lead person for your impact assessment (Include name and job title)	N/A

6. Governance, ownership and approval

Please state here who has approved the actions and outcomes of the screening

Name	Job title	Date
Andrew Hall	Head of Transport	

	Planning	
Date screening completed		

7. Publishing

Though **all** key decisions are required to give due regard to equality the council **only** publishes those related to **Executive Board, Full Council, Key Delegated Decisions** or a **Significant Operational Decision**.

A copy of this equality screening should be attached as an appendix to the decision making report:

- Governance Services will publish those relating to Executive Board and Full Council.
- The appropriate directorate will publish those relating to Delegated Decisions and Significant Operational Decisions.
- A copy of all other equality screenings that are not to be published should be sent to equalityteam@leeds.gov.uk for record.

Complete the appropriate section below with the date the report and attached screening was sent:

For Executive Board or Full Council – sent to Governance Services	Date sent:
For Delegated Decisions or Significant Operational Decisions – sent to appropriate Directorate	Date sent:
All other decisions – sent to equalityteam@leeds.gov.uk	Date sent:
