

Context	Data period	Leeds	Outer West	Of all community committees	
				Highest figure	Lowest figure
Number of children and young people 0-19 (not including 19 year-olds)	July 2015	172,344	16,322	24,968	10,140
Percentage of children and young people	July 2015	n/a	9.5%	14.5%	5.9%

The Outer West contains 9.5 per cent of the Leeds under 19 population, an estimated 16,322 children and young people.

A rise of two in the number of children from the Outer West who are in the looked after cohort took the number in June 2016 to 76, 6.1 per cent of the total looked after cohort. Despite this slight rise, fewer children from the area were taken into care between April and June 2016 (fewer than five) compared to the same period last year (eight). Small fluctuations such as this are not uncommon, and do not indicate a rise in the underlying level of need within an area. The number of children from the area subject to a child protection plan remained level, at 27 (five per cent of the total cohort).

Total contacts, as well as contacts that become referrals, are slightly lower in the most recent reporting period; 373 contacts (24 fewer) and 177 referrals (eight fewer). As the reporting period only covers three months, it is too early to draw any conclusions about a reduction in the underlying level of need in either the Outer West or the city.

The attendance levels for pupils living in the Outer West are higher than the city averages at both primary phase (96.5 per cent, compared to 96.2 per cent) and secondary phase (95.3 per cent, compared to 94.7 per cent). Secondary attendance is 0.7 percentage points higher in the most recent reporting period, with primary attendance rising by 0.3 points. Nearly 800 Outer West children and young people were recorded as persistently absent - 391 (7.3 per cent) at primary phase, and 402 (11.4 per cent) at secondary phase. Persistent absence in the Outer West is lower than the city averages (of 8.7 per cent at primary, and 13.6 per cent at secondary).

109 young people (five per cent) in the Outer West are categorised as NEET, a reduction of 20 since December 2015. Even more notable is the reduction to 16 (from 64, a drop of 48) in the number of young people whose status is unknown. Often a reduction in not known statuses can lead to a rise in NEET numbers, but this is not the case here. Only 0.7 per cent of young people in the area have a not known status, compared to almost two per cent across the city, meaning that targeted advice, guidance, and pathways to EET activities are supporting many young people in the area to secure education, employment or training opportunities.

Free school meal eligibility is slightly below the city average, at just under 15 per cent in primary schools, and almost 14.5 per cent in secondary schools. Eligibility levels have reduced at both phases between 2015 and 2016; this reduction reflects the trend at a city level.
