- Other

Types of Council Properties

Housing Leeds manages a range of property types in this area, the largest proportion of which are houses.

Average House price by type

Detached	£146,929
Semi-Detached	£106,868
Terraced	£74,497
Flat	£103,867

Average House Price

Leeds

£178,045

Ward

£94,974

Unemployment

The number of claimants of various income support related benefits provides a proxy measure of unemployment in the City. In March 2016 Universal Credit (UC) began to be rolled out in Leeds. This is set to replace six means-tested benefits and tax credits (Income-based Jobseeker's Allowance, Housing Benefit, Working Tax Credit, Child Tax Credit, Income based Employment & Support Allowance and Income Support.)

Working Age Client Group Claimants

The WACG Claimants dataset records the number of working age people who are claiming one or more key benefits. This data can be used as a proxy indicator of worklessness in Leeds.

The latest data shows a rate of 16.6% for this ward (Leeds rate 11.7%), although this data does not include Universal Credit.

JSA/UC Claimant Count 2016/17

Job Seekers Allowance Claimants

During the last year the number of Job Seekers Allowance claimants has dropped. However, this is offset by an increase in Universal Credit claimants, and the overall level remains consistent.

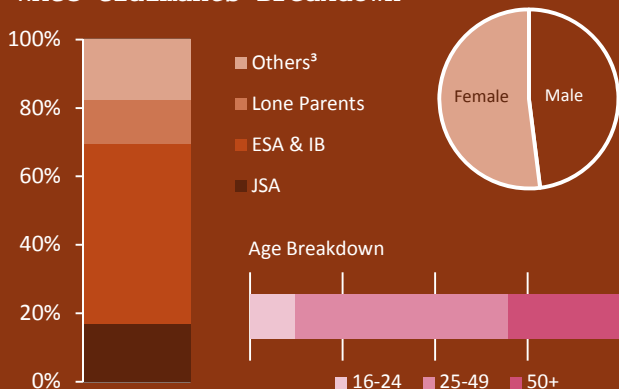

'Out of Work' Claimants

JSA Claimants

WACG Claimants Breakdown

Young People who are NEET or 'not known'

NEET refers to young people aged 16 - 17 who are Not in Education, Employment or Training, or whose employment status is unknown.

NEET and not known

	Ward	Leeds
Number	32	775
Rate	6.6%	5.3%

Adults

Adults & Health Referrals

The number of referrals includes all initial conversations with Adults & Health in relation to the difficulties a person may be experiencing. The initial conversation will determine whether a more detailed assessment of the person's support needs is required, or whether they can be signposted to another external agency, or provided with suitable advice and information, straight away.

Adults Referral Activity.

	Ward	Leeds
New Referrals	1030	29983
Assessments	25.6%	27.5%
Signposted referrals	27.0%	28.0%

Adults - Referral Activity

Health

The health data is shown as an age standardised⁴ rate per 100,000 people (GP registered population) and includes an upper and lower 95% confidence interval⁵ illustrated with the I marker.

Potential Years of Life Lost

This shows a direct comparison between the standardised rate of potential years of life lost due to conditions adverse to health for the ward and the city as a whole.

Smoking Prevalence

In 2017, the proportion of adults known to smoke in this ward was 26948 per 100000 people, which is considerably higher than than the overall proportion in Leeds which is currently 19557 per 100000.

Obesity

The chart directly below shows the progression of obesity in adults recorded by GPs in the ward per 100,000 people. The chart to the lower right shows childhood obesity as recorded by the NCMP and compares reception-aged children in 2009/10 with the same year group in 2015/16 as they started year 6.

Children

In Beeston and Holbeck there are approximately 4100 school-aged children. There are 6 primary schools, and 1 secondary school located within the ward. There is also one special school in the ward.

Within the ward there are 80 children looked after, which equates to 141 per 10,000 people age 0-17.

School Ethnicity Comparison

The charts below show the ethnic breakdown of school-aged people from the 2011 Census compared to the more recent results of the 2016/17 PLASC⁶.

Educational Attainment⁷

	Ward	Leeds
Foundation Stage	52.4%	62.4%
Key Stage 2	40.9%	47.6%
Key Stage 4	56.5%	59.8%

Economy

Notes

NOTES: (1) Mid Year Population Estimate 2015, published by the Office of National Statistics. (2) BME = Black & Minority Ethnicities. (3) "Other" benefits types include, Carers, Disabled, Bereaved and Other claimants as defined by the Department of Work & Pensions. (4) Age standardised rates result from the transforming of data to match a standard age profile. This means areas with differing age profiles can be compared fairly knowing that the ages of the populations are not responsible for any differences in the final rates. (5) Confidence intervals quantify the imprecision that results from random variation in the estimation of the value; it does not include imprecision resulting from systematic error (bias). For health data with complete samples this is considered to be natural variation. (6) PLASC = Pupil Level Annual School Census. (7) Educational Attainment is measured on, *FOUNDATION STAGE* : Percentage of pupils achieving a good level of development at the end of the Early Years Foundation Stage, *KEY STAGE TWO* : Percentage of pupils reaching the expected standard in reading, writing, and maths at the end of Key Stage Two, *KEY STAGE FOUR* : Percentage of pupils achieving a good pass in English and maths at the end of Key Stage Four. (8) In 2015, local and general elections ran in parallel which showed an increase in voter turnout for the local government election. (9) Leeds City Council is not responsible for the content on websites external to the local authority that are referenced in this document.
