Executive Summary

1. The Council Business Plan 2008-11 is a key element of the planning framework and sets out our business transformation, organisational change and financial plan for the next three years. At the heart of this plan are the business outcomes and improvement priorities and these have been revised to reflect feedback from the consultation process and to incorporate key recommendations from the recent corporate assessment. These revised outcomes and improvement priorities are brought back to Scrutiny for information.
2. Another important element of this plan are the performance indicators and targets which we will use to monitor our progress in achieving this plan. In setting ourselves targets which are both realistic and challenging we can ensure that we are expressing a clear desire for change and that improvement is driven across the whole organisation. The performance indicators which will form an important part of this plan are currently being developed and an initial list is presented in this report for early consideration.

1.0 Purpose of this Report

- 1.1 This report provides an update on the development of the Council Business Plan 2008-11. It sets out the revised business plan outcomes and improvement priorities along with the first draft of the performance indicators which will be used to measure our progress in achieving this plan.

2.0 Background Information

- 2.1 The Council Business Plan is a key element of the corporate planning framework for the authority. It sets out what the council needs to do internally to enable the organisation to achieve the Leeds Strategic Plan. That is outlining the business development, organisational change, process transformation and financial planning activities that we will be undertaking over the next three years. At the heart of this plan are the Business Outcomes and Improvement Priorities which were initially drafted from discussions with senior officers across the council. These were then amended as a result of a consultation/challenge process which including input from:

- Trade Unions – via the Joint Consultative Committee;
- Staff – through two focus groups and a written consultation with corporate staff groups representing particular minority groups; and
- Elected Members via all Scrutiny Boards.

- 2.2 At the same time the Audit Commission has been consulting on its proposals for the new Comprehensive Area Assessment (CAA) which will replace the current Comprehensive Performance Assessment (CPA) framework in 2009. As part of this the best value performance indicators, previously used to report our progress, have been replaced by a new set of 198 national indicators. The majority of this national indicator set is focused on the outcomes delivered to local people and very few of them are relevant to the Council Business Plan. However, we can choose to continue to measure best value performance indicators where we think that these are relevant.

3.0 Main Issues

Revisions to Business Plan Outcomes and Improvement Priorities

- 3.1 The feedback from the consultation process has resulted in the restructure and the amendment of the business plan outcomes and improvement priorities. Key changes include:
- The number of outcomes has been reduced from four to three and these improvement priorities have been split across the other three outcomes in order to better align related pieces of work. In particular, the identified improvements around democratic engagement was felt to be strongly interlinked to the overall organisational development work. Similarly the community engagement improvement priorities and the information and intelligence that this provides aligns better with the outcome on business intelligence.
 - It was agreed that outcome around organisational development should not be structured around the council values as the values should underpin everything we do rather than being assigned to any particular outcome. Therefore, this outcome has been re-structured so that it aligns better to the elements of the One Council project.

- Concerns were raised that the business plan outcomes and improvement priorities did not adequately highlight the work still to be done to embed risk management and project/programme management; particularly the need to improve the way we approach, prioritise and co-ordinate major change projects of strategic importance. Additional improvement priorities have been added to cover these areas.
- Some of the improvement priorities were felt to be unclear or ambiguous and the wording of these have been changed to more explicitly set out what we are wanting to achieve.

3.2 In December the Council was subject to a Corporate Assessment by the Audit Commission. Whilst the formal report is still being agreed the feedback given so far has identified a number of areas of weakness and those that are relevant to the Council Business Plan include:

- Ensuring we are engaging with all communities including hard to reach groups
- Linking service plans more clearly to our priorities and embedding business planning
- Improving consistency of scrutiny
- Developing a corporate approach to workforce planning
- Improving consistency of HR practice
- Further reducing absence levels
- Developing programme management capacity
- Embedding performance management and improving the consistency of individual performance management

3.3 Whilst many of these areas were already covered by the draft business plan outcomes and improvement priorities some of the wording has been strengthened to reflect this feedback. The revised business outcomes and improvement priorities are set out in the table below.

Performance Management

3.4 At the same time as the outcomes and improvement priorities have been under consultation a draft set of performance indicators have also been developed through a series of workshops. These workshop considered the new national indicator set, existing best value and corporate plan indicators as well as looking at some new local indicators. This process produced a broad range of performance indicators which are currently being reviewed, defined and refined by the relevant service areas. In some areas, particularly for those indicators which are new, these discussions are on-going and therefore it should be stressed that the current list is still very much work in progress. However, it would be helpful to get members early views on this list especially thoughts on the coverage, balance and if there are any significant gaps. Appendix 1 sets out these indicators in a balanced scorecard format which shows how they would link to the strategic plan and allows us to consider whether we have the right balance in terms of the types of indicators.

3.5 As part of the development of these performance indicators, service areas have also been asked to make their initial suggestions for targets for the next three years. However in most cases work is still on-going to develop and agree these targets. In order to ensure that the target setting process is robust and rigorous the Resources Scrutiny Board has reviewed these initial indicators and targets (where available) and they have identified a small number of targets for more detailed examination at their meeting in April. At this meeting relevant officers will be asked to attend to present the background and context to these indicators and their rationale for the targets.

4.0 Implications For Council Policy And Governance

4.1 The Council Business Plan forms part of the Council's Budget and Policy Framework as set out in the Constitution. All scrutiny boards have considered the initial draft outcomes and improvement priorities. Resources Scrutiny Board are asked for their input into the developing performance indicators and targets to support the delivery of the Council Business Plan. Formal approval of the Council Business Plan will be through Executive Board (11th June) and Council (2nd July).

5.0 Legal And Resource Implications

5.1 The financial element of the business plan has been approved through a linked but parallel process which aligned with the annual budget. The five year financial plan will be incorporated into the business plan prior to its formal approval.

6.0 Conclusions

6.1 The development of the Council Business Plan is on-going and performance indicators and targets which will be used to measure the delivery of this plan are at an early stage of development.

7.0 Recommendations

7.1 It is recommended that the Board considers the draft list of business plan performance indicators and give their views on the overall balance and coverage.
