**Subject:** Re: Washout location on the Calls

Hi Paul,

As per our conversation, the screen print below shows an end washout (WO), blue circle.

This asset is not used for fire fighting purposes. It is used by e.g. road sweepers, jetting wagons, wheelie bin washers to fill their vehicles with a metered standpipe. It will NOT be necessary to build a trap door into the decking for access to the washout. The fire hydrant the fire service would use in an emergency is FH826

**Subject:** Washout location on the Calls

Hi Melanie,

As discussed, we wish to re-install a temporary decking structure for approximately 6 months. The new location will be over the washout close to FH826. Please see attached image with red arrow indicating the one I mean.

Please would you confirm it is okay to do this?

Many thanks for your help.

Paul
