Note: This is a preliminary layout only. NPS are not responsible for the design of building works, drainage and IT elements of this project, or maintenance issues. In addition to this a fire strategy needs to be developed to ensure exit routes (including stairs / door widths, door swings, lifts etc) are adequate for new occupation numbers and current regulations. Therefore the layout may be subject to change following further design by these disciplines. Checks will need to be carried out to ensure layouts are practically achievable. NPS will work with LCC in order to achieve this if requested and commissioned to do so. Dimensions should be checked on site before commencement of any building works or ordering of materials / furniture.
