

**SUGGESTED DESIGN REQUIREMENTS**

Visually promote local route destinations :  
 Neighbouring recreation spaces to the east - **Bowling Green, Tennis Courts Holt Park Health Centre, District Centre and the Supermarket** to the north.  
**Nursery, Library, Leisure Centre, Secondary School and Holt Park** recreation space to the west, and; **Football pitches and Primary Schools** to the south.

Provide a clear and 'accessible' route from the south to Asda, health centre, opticians etc. to the north.

Spaces should have a clear purpose to encourage greater use.

Offer quiet spaces and wildlife friendly areas to improve mental health and well-being.

Promote opportunities for local food production (community orchard, raised beds).

Consider active spaces and recreation for all ages in the form of incidental/natural play, trim trails, exercise stations and open grassed areas.

Offer individual and grouped seating, meeting and lunchtime spaces

Increase natural surveillance from boundaries and avoid creating routes where exit points are not visible.

Establish visually identifiable gateways at boundary access points to improve legibility, safety and create a new public space identity.

Screen poor quality views (infrastructure, walls etc.) and frame/enhance positive outlooks towards greenspaces and distant views of greenspace.

Use planting to create an attractive setting, varied spaces, provide shelter from prevailing winds, attract wildlife, frame and screen views and offer seasonal variation.
