

# Equality, Diversity, Cohesion and Integration Screening

As a public authority we need to ensure that all our strategies, policies, service and functions, both current and proposed have given proper consideration to equality, diversity, cohesion and integration.

A **screening** process can help judge relevance and provides a record of both the **process** and **decision**. Screening should be a short, sharp exercise that determines relevance for all new and revised strategies, policies, services and functions.

Completed at the earliest opportunity it will help to determine:

- the relevance of proposals and decisions to equality, diversity, cohesion and integration.
- whether or not equality, diversity, cohesion and integration is being or has already been considered, and
- whether or not it is necessary to carry out an impact assessment.

The Director of Adults and Health is requested to approve the service go to tender for a replacement digital Alarm receiving Centre". A further report will be presented for the award of the contract giving details on revenue implications and solutions.

The Leeds Tele Care service has used Piper Network Controller (PNC) for the past 12 years supplied by Tunstall Healthcare (UK) Ltd. The Leeds Tele Care Service upgraded from version 5 (PNC5) to version 7 (PNC7) in 2014.

Approval has been given to extend the contract with Tunstall Healthcare (UK) Ltd for PNC 7 for a further 12 months until 1st August 2020.

PNC 7 is an analogue solution relying on analogue lines. This solution will not support the digital switch over.

The current ARC (PNC 7) is a standalone server and is not linked to the internet. This limits the service being able to procure and monitor some of the Telecare products available. The current analogue platform is barrier to innovation and development of the Leeds Tele care service.
