Subject: FW: PREM/04917/001 - Headingley Rugby Stadium premises license application

Hello,

I have spoken to Sue Ward regarding the new premises license application for the Headingley Rugby Stadium (PREM/04917/001), to suggest that additional conditions are added to the premises license stipulating the following:

- That any testing of sound equipment will not take place before 10:00 and will last for a maximum of 2 hours on any one day.
- That waste collection, plant and machinery, deliveries and other activities that might generate noise will be located as far as possible from residential properties and other noise-sensitive properties.
- That the site will be operated in a manner which will prevent odours causing a nuisance to nearby properties.
- The Event Management Plan shall contain a Noise Management Strategy. The Strategy shall identify how noise arising from the holding of the event will be effectively controlled so as to prevent public nuisance. Once agreed the contents of the strategy shall be followed throughout the event. This Strategy shall include proposals for dealing with noise from:
 - Regulated Entertainment
 - Concessions including funfair rides
 - Fireworks and other pyrotechnics
 - How any overrun will be prevented or controlled

The applicant has confirmed that they're happy to accept these conditions (see below email), so given their acceptance of this, EP have no objection to the application.

Kind regards,

Elizabeth Hebbert

Thank you for the below Elizabeth.

We would be happy to accept the below conditions in a new license should the same be approved.

Kind regards,

Sue Ward
Operations Director

Subject: PREM/04917/001 - Headingley Rugby Stadium premises license application

Dear Sue Ward,

The Environmental Protection Team have received the new premises license application for Headingley Rugby Stadium, for consultation.

We would suggest that additional conditions are added to the new license stipulating the following:

- That any testing of sound equipment will not take place before 10:00 and will last for a maximum of 2 hours on any one day.
- That waste collection, plant and machinery, deliveries and other activities that might generate noise will be located as far as possible from residential properties and other noise-sensitive properties.
- That the site will be operated in a manner which will prevent odours causing a nuisance to nearby properties.
- The Event Management Plan shall contain a Noise Management Strategy. The Strategy shall identify how noise arising from the holding of the event will be effectively controlled so as to prevent public nuisance. Once agreed the contents of the strategy shall be followed throughout the event. This Strategy shall include proposals for dealing with noise from:
 - Regulated Entertainment
 - Concessions including funfair rides
 - Fireworks and other pyrotechnics
 - How any overrun will be prevented or controlled

These conditions were also attached to the previous license. Would you be happy to accept the addition

of the above conditions to your new license? Assuming these additional conditions are accepted, we do not otherwise have any objections to the new premises license application.

Kind regards,

Elizabeth Hebbert
