Email 2 Photos of the parade and deeds

Please find attached the following document:

[REDACTED]
Attachment 4: Picture of the parade, birds eye view.
Attachment 5: Picture of the surrounding area.

From these attachments you can see that the main areas they cover are traffic safety, amenities, protecting the footpaths and preserving the residential area.

With an alcohol license, there is the possibility that cars will be left over night and the aforementioned areas will be affected .
Number 112 only has two allocated car parking spaces. If those under the influence leave their cars, this will affect all the above restrictions agreed when the parade was built.
You can clearly see how small the parade is, and how close 112 is to residents if cars and are left overnight, this would affect access for emergency services.
On the plans, you can also see how much smaller 112 is to the rest of the parade. With recorded and live music, it will echo around the premises and the surrounding area.
In addition to this, with later closing times and more people under the influence it could encourage people to congregate on the parade, waiting for taxis etc. which would cause considerable noise pollution to residents in the surrounding area not to mention anti-social behaviour.
