Delegated Decision Notice

This form is the written record of a key, significant operational or administrative decision taken by an officer.

Decision type	Key Decision	Significant		Administrative		
		Operational Decision		Decision		
Approximate	Below £500,000	below £25,000		below £25,000		
value	500,000 to £1,000,000	☐ £25,000 to	£100,000	£25,000 to £100,000		
	🛛 over £1,000,000	🗌 £100,000 t	o £500,000			
		Over £500,000				
Director ¹	Director of City Development					
Contact person:	Chris Way		Telephone nu	umber:		
	Principal Traffic Engineer		0113 378749	493		
Subject ² :	City Region Sustainable Transport Settlement: Casualty Prevention Programme 2023/24					
Decision	What decision has been tak	ken?				
details ³ :	Chief Officer (Highways &	Chief Officer (Highways & Transportation)				
	Noted the contents and recommendations of this report including the continued application of the innovative approach to road casualties looking beyond the traditional 'sites' and 'lengths' processes; and Noted the work undertaken over the 2022/23 financial year with respect to the previously approved casualty reduction programme; and Reviewed and approved the indicative five year programme of casualty prevention schemes and the detailed programme for 2023/24 and give authority to commence the detailed design, consultation and implementation of the schemes described in Appendix A to this report; and Gave authority to incur expenditure of £3.201m, (comprising of £2.377m of new funding and a carryover from the 2022/23 financial year of £824K) to deliver the programme of projects detailed in Appendix B as part of the five year £8.0m City Region Sustainable Transport Settlement; and					
	Regulation Orders (Move Experimental Order) as re for each scheme as detail	st the City Solicitor to draft and advertise any Traffic ement Order, Waiting Restriction Order or required to address/ resolve the problems identified ailed in Appendix A, and if no valid objections are and implement the Orders as advertised; and				
	Highways Act 1980, that	to the powers contained in Section 66(4) of the relevant lengths of footway proposed as cycle adix A) are removed and that following the removal				

¹ Give title of Director with delegated responsibility for function to which decision relates.

² If the decision is key and has appeared on the list of forthcoming key decisions, the title of the decision should be the same as that used in the list ³ Simply refer to supporting report where used as these matters have been set out in detail.

of the footways, cycle tracks are constructed under the powers contained under the provisions of section 65(1) of the Highways Act 1980 for segregated or shared joint use by pedal cyclists and pedestrians; and					
Gave authority to request the City Solicitor to draft and advertise a Notice under the provision of Section 90C of the Highways Act 1980 for the implementation of traffic calming as necessary to facilitate the listed schemes; and					
Agreed to receive such other and further reports as may be required to address any objections received to advertised notices or other matters arising from the detailed scheme proposals; and					
Noted that reports will be submitted on an annual basis over the course of the CRSTS settlement to detail progress and expenditure.					
A brief statement of the reasons for the decision					
Leeds City Council as Highway Authority for Leeds has statutory duties under the Road Traffic Act 1988 (RTA 1988) to prepare and carry out a programme of measures designed to promote road safety. These measures have generally been funded from various iterations of the Local Transport Plan which included annual provisions for road safety works. Projects have been designed based on recorded injury collisions as a way of both tackling known issues and as a way of demonstrating best use of funding. This approach, whilst enabling rational and robust decision making, does not lend itself to projects aimed at anticipating collisions and delivering preventative works as it can be difficult to accurately predict collisions.					
In 2022 Leeds City Council's Executive Board, in conjunction with West Yorkshire partners, adopted the Vision Zero approach aiming to eliminate deaths and serious injuries on roads in Leeds by 2040. The work involved in Vision Zero is expected to require a greater emphasis on preventative work based on anticipated collisions rather than the wholly reactive approach based on demonstrable collision patterns.					
The adoption of Vision Zero coincides with a revised method of funding, the City Region Sustainable Transport Settlement. This settlement covers a five year period with funding for road safety and other works allocated for the duration; this effectively enables a more flexible approach without limits on annual budgets.					
These co-incident occurrences allow a new approach to identifying, designing and delivering road safety works across Leeds to be adopted. This creates a pipeline of project development allowing projects of greater scope to be designed and developed across multiple years with values exceeding the pro-rata limits previously imposed by the Local Transport Plan.					
A limited version of this approach, covering two year design and delivery, has been used for works in recent years – it is proposed to extend this approach to the full five year CRSTS period with annual reviews of progress					

	to date and future plans and projects developed across the period				
	to date and future plans and projects developed across the period.				
	In addition to the reactive works based on collision histories the revised approach identifies a series of preventative projects designed to underpin the Vision Zero approach. These two strands enable a more cohesive approach to improving road safety.				
	This report details the first five year programme and the work done to date to develop projects ready for delivery. It sets out a set of projects that are expected to be delivered in 2023/24, and details some of the feasibility works that will take place to develop schemes for the remainder of the five year programme.				
	Brief details of any alternative options considered and rejected by the decision maker at the time of making the decision				
	Traditional approaches to casualty reduction were based on one or two year programmes of works. This was generally successful but the new CRSTS 5 year settlement allows for more substantial projects to be developed and delivered over multiply years, targeting some of the more complex casualty issues across the city.				
	The alternative to the approach set out in this report would be a continuation of the previous approach, which whilst successful is limited by the available annual budget and restricts the development of more involved or innovative approaches to some of the longer standing issues across the city.
