Appendix A: Bus Infrastructure Investment Identified within City Region Sustainable Transport Settlement (CRSTS)

Bus priority scheme combining bus lane and junction upgrades and active travel improvements to link the city centre to St James Hospital and north-east Leeds. The scheme will provide continuous bus priority, segregated cycle infrastructure, and improved pedestrian provision, to improve bus journey times and reliability and provide safe walking and cycling provision.  East Parade Bus Gate and Calverley Street schemes. Part of a package of schemes that builds on the success of city centres schemes being delivered through other funding programmes (TCF, LP TIP, and the Transport Fund) to enhance the sustainable transport offer in the core city centre by realiocating existing carriageway to more sustainable modes, in accordance with LTN 1/20 and the National Bus Strategy.  A660 - Northern/University Gateway inclusive of the Headrow to St Marks Road. The scheme addresses bus delay through improvements in the City Centre up to the Inner Ring Road. From there, the scheme will remove general traffic from Blenheim Terrace in both directions, creating a bus, cycle and walking only environment, facilitated through the provision of BCAP Committee.  BUSCPC - Woodhouse Lane Gateway be gates and complementing the proposed A660 protected  Change Request to 2019  OBC approved at Sept to 21,300,000  Working towards FBC.  £15,000,000  Working towards FBC.  £15,000,000  Working towards FBC.  £15,000,000  Working towards FBC.  £15,000,000  Norking towards FBC.  £15,000,000  Norking towards FBC.
