Scheme 2: Telecommunications Infrastructure - £550,000.

Telecommunications infrastructure upgrades include additions to the existing fibre network. This will be largely focused on Roundhay Road extending from the Sheepscar Interchange to the Fforde Grene junction. Works will also be undertaken to connect various equipment adjacent to existing fibre infrastructure installed as part of previous work.

This scheme will also include continue the upgrade of wireless telecommunications infrastructure that connects to the fibre network and other third-party telecoms circuits being delivered by LCC IDS. Exact locations are not included here due to flexibility in the LCC IDS programme.
