

Council Housing Growth Programme – Property Buybacks, Batch 94

Date: 7th November 2024

Report of: Council Housing Growth Team / Property Acquisitions Programme

Report to: Director of City Development

Will the decision be open for call in? Yes No

Does the report contain confidential or exempt information? Yes No

Brief summary

The purpose of this report is to obtain Authority to Purchase and Authority to Spend from the Director of City Development to enable additional property buybacks to be progressed through the Council Housing Growth Programme. Details of the properties to be purchased and the costs associated with these acquisitions are set out in Confidential Appendix A due their commercial sensitivity.

Recommendations

The Director of City Development is requested to:

- a) Grant Approval to purchase the properties detailed in Confidential Appendix A at market value, as determined by Land & Property, and authorise their return to Council housing stock.
- b) Authorise the required expenditure to enable the programme to progress the property acquisitions detailed in Confidential Appendix A. These property acquisitions will be funded from the Council Housing Growth Programme budget via a combination of Housing Revenue Account (HRA) borrowing and Right to Buy receipts.
- c) Note that Executive Board granted Authority to Spend for the programme on 24th July 2019.
- d) Note that written approval to bring the properties back into council housing stock was provided by the Chief Officer, Housing on 11 November 2024.

What is this report about?

- 1 The Council Housing Growth Programme is currently working towards a challenging target to deliver 1,230 new Council homes across the city by March 2025.
- 2 This is being achieved through a combination of building new council homes and acquiring existing properties which are refurbished under the Property Acquisitions Programme. The properties being acquired are predominantly former council homes which were bought under the Right To Buy regime, including those of which the statutory Right of First Refusal regulations apply.

What impact will this proposal have?

- 3 The purchase of these properties will help to achieve our aim to deliver 1,230 new homes by March 2025.
- 4 The acquisition of these new council homes directly contributes to delivering the Leeds Best City Ambition pillars of Health & Wellbeing and Zero Carbon by:
 - Providing housing of the right quality, type, tenure and affordability in the right places.
 - Minimising homelessness through a greater focus on prevention.
 - Addressing the challenges of housing quality and affordability, tackling fuel poverty and creating vibrant places where residents have close access to services and amenities.
- 5 The programme will also directly contribute to ensuring that “everyone can have a home which supports good health, wellbeing and educational outcomes” which is key focus under the Health and Wellbeing pillar of the Best City Ambition.
- 6 The Council Housing Growth Programme evaluation assesses whether the property is one which the council would wish to see back in housing stock and includes consideration of the following factors:
 - Housing Management priorities.
 - Whether the property is in an area of housing need - where council housing stock is low and demand for council housing is high.
 - Whether the property is of a type and size which is in demand and will be easily let.
 - The property will normally be a former council property within an area of council housing, or within a regeneration area in the city.
- 7 Value for Money (VfM): The programme will consider whether a property represents a viable investment in terms of how long it will take to repay the associated borrowing based on assumed income generation/savings and VfM. The VfM assessment considers the market valuation and any required repairs/improvements to bring the property up to a lettable standard. This part of the assessment also includes consideration of potential rent levels (estimated based on other similar social housing in the area), and whether any right to buy discount would be repayable.
- 8 Having conducted an Equality and Diversity screening, the programme has concluded that a full assessment is not required. The screening form is attached at Appendix B to this report.

How does this proposal impact the three pillars of the Best City Ambition?

Health and Wellbeing Inclusive Growth Zero Carbon

- 9 As part of the technical inspection of each potential acquisition, the council determines whether additional measures (above bringing the property to the Leeds Standard) can and should be implemented to improve the energy performance (SAP rating) of properties considered. This would be with a view to making the properties more energy efficient and less expensive to heat, positively contributing to fuel poverty and reducing carbon output.
- 10 Further details of how the programme aligns with the pillars of the Best City Ambition can be found in the **What impact will this proposal have** section above.

What consultation and engagement has taken place?

Wards affected:

Middleton Park

Killingbeck & Seacroft

Have ward members been consulted? Yes No

- 11 The Executive Member for Housing was consulted on the Property Acquisitions project on the 17th September 2024 and is supportive of the programme.
- 12 As part of the established process for this programme, the Council Housing Growth Programme engaged with Housing Management, Housing Finance, Land & Property, Housing Leeds Voids Service and other internal stakeholders prior to making an offer of purchase for these potential acquisitions. All feedback received was in support of the proposal.
- 13 Regular updates on progress across the whole programme are provided to the Affordable Housing Delivery Board.
- 14 Local Ward Members are updated on any acquisitions in their ward areas, as they progress.

What are the resource implications?

- 15 Full Council approved an injection of £90.9m into the Council Housing Growth Programme on 27th February 2019.
- 16 A total of c£40.5m funding has been injected into the Property Acquisitions Programme. This is made up of £22.5m funding approved July 2019 plus c£18m realigned funding originally approved for the Off the Shelf scheme.
- 17 Executive Board granted approval to spend for the programme on 24th July 2019.
- 18 All properties considered for potential repurchase are individually assessed using an annuity model to confirm whether they are financially viable. A property is deemed a viable investment if the repayment period for the interest and capital is 40 years or less. A 40-year repayment period allows the authority to meet its obligation under Section 24(1) of the 1985 Act which states that “in the context of setting rents, an important consideration will be to set rents at a level which will enable the Council to meet its 40-year HRA business plan requirements”. The model highlights the financial loss the council could incur if the property were to be sold via RtB after the 15-year period of cost floor protection ends but ensures that the capital receipt would be sufficient to repay any outstanding debt at that time.
- 19 In terms of revenue effects, the cost of servicing the debt incurred purchasing a property may be higher than the initial rental return so the properties could initially be a net cost to the service. However as rental incomes increase year on year, they will start to exceed the annual borrowing cost and produce a positive return. The initial refurbishment and repairs costs will also be capitalised.

What are the key risks and how are they being managed?

- 20 The overarching Council Housing Growth Programme is being delivered using the council's agreed project management methodology and a programme risk log will be maintained and risks managed, monitored, and escalated through the governance process as necessary.

- 21 Delivery of the proposals set out in this report will contribute to mitigating one of the council's corporate risks around failure to meet additional housing supply targets and the consequent lack of homes for people in Leeds.
- 22 The financial viability assessments undertaken in relation to these acquisitions have included consideration of the potential financial risk to the council should there be a further right to buy in future, factoring in the applicable cost floor (the lower of the market value and the purchase/build costs of the property). There is a risk that in the initial 15 years following acquisitions the council could make a loss if there was a downturn in the market and the tenant exercised their right to buy at a point where the market value was lower than the amount the council paid for the property. However, rent will be set at such a level as to help mitigate this risk as far as possible within the constraints of the legislation, and to help ensure the council will achieve an acceptable payback period.
- 23 The viability modelling is based on certain assumptions about the housing market and future movements in house prices/ rents, which may not prove to be accurate. Should rents or housing prices fall, or not rise in line with our assumptions, the payback period could be longer than predicted.

What are the legal implications?

- 25 This is a Publishable Administrative Decision and as such is not eligible for call in.
- 26 Appendix A to this report has been marked as exempt under Access to Information Procedure Rules 10.4 (3) on the basis that it contains information relating to the financial or business affairs of any person (including the authority holding that information) which, if disclosed to the public, would, or would be likely to prejudice the commercial interests of that person or of the Council. The information is exempt if and for so long as in all the circumstances of the case, the public interest in maintaining the exemption outweighs the public interest in disclosing the information. In this case the report author considers that it is in the public interest to maintain the exemption.
- 27 The programme may consider properties offered under the Right of First Refusal obligations which forms part of the Right to Buy (RtB) legislation and were established by The Housing (Right of First Refusal) (England) Regulations 2005, which came into force in August 2005. The regulations require that any homeowner who is selling a property bought from the Council under Right to Buy within the previous ten years must offer it to the Council before putting it on the open market.

Options, timescales and measuring success

What other options were considered?

- 28 Alternative methods of acquiring property have been considered and are being utilised alongside these 'buyback' purchases. For example, buying new build properties from developers.

How will success be measured?

- 29 The purchase of these properties will help to achieve our aim to deliver 1,230 new homes by March 2025.
- 30 Where possible we will obtain a 'before' and 'after' Energy Performance Certificate to enable analysis of the benefits of any energy improvement measures undertaken during the property refurbishment.

31 The final cost of each acquisition will be scrutinised to ensure continuous delivery of VfM.

What is the timetable and who will be responsible for implementation?

32 The properties are currently progressing through the conveyancing process and, subject to approval, will be back under LCC ownership on average within three months.

33 Following this there will be an average 30-day period where the Housing Leeds Voids service or independent Voids contractor CLC Ltd will undertake refurbishment works to the property before the property is handed to Housing Management for letting.

Appendices

34 Appendix A: Confidential appendix containing information regarding the purchases proposed in this report.
