

Capital Programme 2024-2029

Date: 26th February 2025

Report of: Interim Assistant Chief Executive – Finance, Traded and Resources

Report to: Full Council

Will the decision be open for call in? Yes No

Does the report contain confidential or exempt information? Yes No

Brief summary

This report sets out the updated capital programme for 2025-2029, split between the General Fund and HRA, with a forecast of resources available over that period. A specific update of the 2024/25 programme is also provided. The council continues to deliver significant capital investment across the city which will provide improved facilities and infrastructure, whilst ensuring the impact on debt costs within the revenue budget is affordable.

The council is seeking to deliver capital investment of £1,809.4m between 2024/25 and 2028/9. This will utilise £653.8m of borrowing to fund this investment. The council's borrowing includes £123.4m of capital expenditure that is funded by additional income or generates revenue savings. The council will continue to reduce its borrowing by making debt repayments of £347.8m over the period. Borrowing required for 2025/26 can be contained within the agreed 2025/26 debt budget whilst the cost of the capital programme is projected to remain affordable within available resources identified in the Medium Term Financial Strategy. Ongoing reviews will need to consider the continued affordability of debt costs in future years in the context of planned expenditure and the Best City Ambition priorities, projections on interest rates, and the strength of the council's balance sheet to fund capital spend.

An update to the 2024/25 position shows projected spend of £386.7m. **Appendix A** outlines the objective analysis of this spend along with the capital resources required to finance this.

The updated capital programme requires net injections of £234.6m, as set out in **Appendix A(iii)**.

The council's Minimum Revenue Provision (MRP) Policy for 2025/26 is set out in **Appendix C** and Capital and Investment Strategy at **Appendix D**.

Appendix E provides a full list of schemes by capital objective analysis.

Recommendations

As recommended by the Executive Board, this report asks Council to approve:

- a) the capital programme for 2024-2029 totalling £1,809.4m, including the revised projected position for 2024/25, as presented in **Appendix A**;
- b) the MRP policy statements for 2025/26 as set out in **Appendix C**; and
- c) the Capital and Investment Strategy as set out in **Appendix D**. As part of the Capital and Investment Strategy, the council is required to set prudential limits for the total value of its non-treasury investments and, specifically, limits for the total value of service investments and the total value of commercial investments that it holds. Appendix D recommends:
 - the prudential limit for service investments be set at £80m.
 - that a limit of £200m should be set for the carrying value of assets which are classed as commercial investments.

These limits represent no change between 2024/25 and 2025/26.

Council are asked to note that Executive Board have approved the following net injections totalling £234.6m as set out in **Appendix A(iii)**, into the capital programme:

- £32.6m to address Capital Programme Review budget pressures as detailed at **Appendix A(iv)**;
- £53.7m of LCC funded annual programme injections as detailed at **Appendix A(v)**;
- £15.9m of Grant funded annual programme injections as detailed at **Appendix A(v)**;
- £82.6m of Housing Revenue Account (HRA) funding to deliver Council House Growth and the Housing Leeds/Bitmo refurbishment programmes;
- £8.5m of Community Infrastructure Levy (CIL) Strategic Fund monies;
- £41.3m of other net injections, primarily relating to capital grant allocations, one off capital grant allocations, invest to save borrowing schemes and other secured external grant funding as listed in Appendix (Aiii).

The above decision to inject funding of £234.6m will be implemented by the Interim Assistant Chief Executive - Finance, Traded and Resources.

What is this report about?

- 1 The purpose of the report is to provide Members with an updated capital programme for 2025-2029, detailing forecast resources for that period. It also includes an update of the 2024/25 programme as at Quarter 3.
- 2 In preparing the capital programme update, ongoing reviews of the phasing of expenditure on existing capital schemes has been undertaken together with an updated projection of capital resources. Where appropriate, scheme estimates have been revised.
- 3 This update of the capital programme has been prepared in the context of the overall resources available to the council. The provisional local government settlement announced in December 2024 sets out the revenue funding local authorities can expect in 2025/26 and this capital programme is therefore set in line with the level of resources set out in the Medium Term Financial Strategy and in the provisional settlement.
- 4 The capital programme, outlined at **Appendix A**, is split between General Fund and the HRA with **Appendices A(i) to A(v)** providing details across the annual and major programmes and net injections since the Quarter 2 report presented to Executive Board in November 2024. **Appendix E** provides a full list of schemes by capital objective analysis.

Capital Programme Update 2024/25

- 5 The latest projected expenditure for 2024/25 as at Quarter 3 is £386.7m and it is forecast that resources will be available to fund this level of expenditure both within the General Fund and HRA programmes. Table 1 shows the latest position against previous updates to Executive Board.

Table 1 - Capital Resources Position 2024/25

	2024/25					
	February 2024 Capital Programme £m	Restated Capital Programme as at 2023/24 Outturn £m	Capital Programme Q1 £m	Capital Programme Q2	Capital Programme Q3 - This Report £m	Variance - This Report to Q2 £m
Forecast Expenditure	485.9	518.7	503.7	440.1	386.7	(53.4)
Funded By;						
Borrowing	193.7	193.1	183.2	155.7	134.7	(21.0)
Government Grants	164.3	182.3	169.9	157.5	135.6	(21.9)
Gen Fund Capital Receipts	18.9	19.5	19.5	19.0	19.1	0.1
Other Grants & Contributions	12.7	17.8	17.8	17.3	17.9	0.6
HRA Self Financing	60.7	63.4	70.7	58.0	49.3	(8.7)
HRA Right to Buy Receipts	35.6	42.6	42.6	32.6	30.1	(2.5)
Total Forecast Resources	485.9	518.7	503.7	440.1	386.7	(53.4)

- 6 A review of all capital schemes within the programme takes place on a monthly basis, with two quarterly reviews reported to Executive Board in July and November each year. These reviews ensure that where schemes are funded from borrowing, they are still an essential priority for the council in supporting the delivery of the Best City Ambition. Table 1 shows a net decrease in the 2024/25 capital programme since the Quarter 2 report to November 2024 Executive Board of £53.4m, including a £21.0m decrease in borrowing together with a £21.9m reduction in government grants which will now be applied to delivery in future years. There has been significant reprofiling of schemes within Directorates and the slippage since Quarter 2 relates to various schemes across directorates. Underlying market conditions and inflationary pressures have affected delivery of the capital programme and continue to do so, and these difficult financial circumstances we are encountering has led to some significant delays and created budgetary pressures across the programme. There has also been slippage in central services such as the Vehicle Programme, ICT services and Corporate Property Management.
- 7 The Board is asked to note that there are other capital related reports elsewhere on the agenda.

Capital Programme Resources 2024/25 to 2028/9

- 8 The council's revenue funding envelope over the medium term places constraints on the level of debt that the council can afford. As such only those schemes supported by robust business cases and that meet the council's priorities will progress. However, the strategy allows for an additional increase in debt where the cost of this additional debt can be met from schemes that avoid future revenue costs, generate greater savings or provide additional income streams. The council will continue to explore and take advantage of individual investment opportunities as they arise, and these will also be subject to robust business case review in line with financial / governance procedure rules. Table 2 shows the council's level of annual programmes, corporate borrowing within the General Fund and HRA and borrowing supported by income streams and / or cost savings.

Table 2 - Capital Programme Net Borrowing Requirement 2024-2029

	2024/25 £m	2025/26 £m	2026/27 £m	2027/28 £m	2028/29 £m	Total £m
Corporate Borrowing						
Annual Programmes in Year	54.0	67.5	59.1	49.2	52.1	281.9
Corporate Borrowing Gen Fund	28.6	31.9	36.3	5.8	37.3	140.0
Corporate Borrowing HRA	25.8	42.7	31.7	6.0	2.3	108.5
Total Corporate Borrowing	108.4	142.1	127.1	61.0	91.7	530.4
Borrowing supported by revenue	26.3	33.2	35.3	25.9	2.7	123.4
Total LCC Borrowing	134.7	175.3	162.4	86.9	94.4	653.8
Repayment of Debt (MRP)	64.3	65.6	68.7	71.6	77.6	347.8
Net Borrowing requirement	70.5	109.7	93.7	15.3	16.8	306.1

- 9 Overall, the level of borrowing required to fund the 2024-2029 capital programme is £653.8m. Of this, £123.4m or 18.9% relates to capital expenditure that is funded by additional income or generates revenue savings. The council will continue to reduce its borrowing by making debt repayments of £347.8m over the period. The split of LCC borrowing for the full programme is shown in Chart 1.

Chart 1 - LCC Borrowing Split 2024-2029

- 10 Resources of £1,809.4m are required to fund the council's capital programme from 2024/25-2028/29. These are summarised in **Appendix A**, divided between General Fund resources and HRA resources with **Appendix A(i)** and **Appendix A(ii)** providing details across annual and major programmes. Table 3 summarises the overall resources position.

Table 3: Total Capital Resources 2024-2029

	2024/25 £m	2025/26 £m	2026/27 £m	2027/28 £m	2028/29 £m	Total £m
Specific Resources General Fund	164.4	165.6	177.4	68.9	76.0	652.3
Specific Resources HRA	87.6	123.4	104.3	100.0	88.0	503.3
* Corporate Borrowing Resources	134.7	175.3	162.4	86.9	94.5	653.8
Total Resources	386.7	464.3	444.1	255.8	258.5	1,809.4

* Includes £108.5m of borrowing for the HRA programme.

11 Specific Resources General Fund £652.3m - this includes funding which has been secured for specific schemes in the form of:

- government grants such as Learning Places (Basic Need), School Condition Allocation, Levelling Up Fund, Flood Alleviation, Towns Fund & Levelling Up Fund;
- government grants allocated by the West Yorkshire Combined Authority such as City Region Sustainable Transport Settlement (CRSTS), West Yorkshire + Transport Fund (WY+TF), Transport for Cities (TCF), Active Travel Fund (ATF); and
- other government grants and contributions from external bodies and private developers.

This is then passported to the relevant directorate programmes. It also includes some capital receipts that can be applied under the Flexible Use of Capital Receipts Strategy to fund the costs of Transformational Change. This strategy is set out in Appendix 9 of the 2025/26 Revenue Budget and Council Tax Report elsewhere on this agenda.

12 Specific Resources HRA £503.3m - in accordance with the HRA budget, HRA capital expenditure has been set assuming a 2.7% rent increase for 2025/26. This will deliver HRA investment of £416.5m for the Council House Refurbishment Programme and £86.8m for the Council Housing Growth Programme.

13 Corporate Resources £653.8m – of which General Fund is £545.3m & the HRA is £108.5m - these represent resources which the council has more freedom to allocate to its own policy priorities. The main sources are borrowing and capital receipts. The HRA Borrowing of £108.5m as part of the Corporate Resources is split £80m for Council Housing Growth and £28.5m for Council House refurbishment.

14 In terms of capital receipts, a list of land and property sites due for disposal during the period of the capital programme are detailed in the 'Capital Receipts Programme Update' report received by Executive Board at its February 2025 meeting.

15 In deciding on the application of capital funding it is proposed that capital receipts are allocated in the following order:

- To fund expenditure on transformational change which has been capitalised under the flexible use of capital receipts provisions.
- Applied to fund the repayment element of the lease in where capital receipts relate to lease in/lease out finance lease arrangements.
- For any remaining capital receipts, the options are for these to be retained in the Usable Capital Receipts Reserve and applied to redeem debt and thereby reduce the MRP requirement or used to fund in year or new capital expenditure. The Interim Assistant Chief Executive – Finance, Traded and Resources will determine annually the most appropriate use of these receipts, taking into account forecasts for future expenditure and the generation of further receipts.
- Any other general capital income will be allocated to capital schemes with the shortest asset lives.

Capital Expenditure 2024/25 to 2028/29

16 A summary of the forecast capital programme by capital objective is set out in Table 4 and the updated capital programme by individual scheme within these objectives is attached at **Appendix E.**

Table 4: Total Capital Expenditure 2024-2029

	2024/25 £m	2025/26 £m	2026/27 £m	2027/28 £m	2028/29 £m	Total £m
Improving Our Assets	233.2	319.8	344.3	179.4	160.7	1,237.4
Investing In Major Infrastructure	49.9	43.2	9.2	9.1	0.6	112.0
Supporting Service Provision	33.1	21.6	36.2	23.7	28.0	142.6
Investing in New Technology	8.8	11.0	5.0	2.5	2.6	29.9
Supporting the Leeds Economy	12.8	28.1	9.6	2.1	1.8	54.4
Central and Operational Expenditure	48.9	40.6	39.8	39.0	64.8	233.1
Total Resources	386.7	464.3	444.1	255.8	258.5	1,809.4

17 As can be seen from Table 4, investment of £386.7m is taking place during 2024/25 with further investment of £1,422.7m planned from 2025/26 to 2028/29.

18 **Appendix A(iii)** details the injections that this report seeks which have taken place between the Quarter 2 update report and this report. This report seeks a net injection of £234.6m, as follows:

- £32.6m to address Capital Programme Review budget pressures as detailed at **Appendix A(iv)**;
- £53.7m of LCC funded annual programme injections as detailed at **Appendix A(v)**;
- £15.9m of Grant funded annual programme injections as detailed at **Appendix A(v)**;
- £82.6m of HRA funding to deliver Council House Growth and the Housing Leeds/Bitmo refurbishment programmes
- £8.53m of Community Infrastructure Levy (CIL) Strategic Fund monies; and
- £41.3m of other net injections, primarily relating to capital grant allocations, one off capital grant allocations, invest to save borrowing schemes and other secured external grant funding as listed in **Appendix (Aiv)**.

Capital Programme Review

19 The annual Capital Programme Review process considers the affordability of the programme and the capital spending requirements over a 10 year time period, better reflecting a more coordinated approach to capital investment requirements whilst ensuring that affordability remains within the Medium Term Financial Strategy. The review is undertaken under the direction of the Best Council Team - Strategic Investment Board.

20 As reported to Executive Board in November 2024 as part of the Medium Term Financial Strategy 2025/26-2029/30 Report, a Capital Programme Review process similar to previous financial years has been undertaken to identify priority capital schemes. A review of the existing capital programme was also undertaken to ensure all existing borrowing commitments were still required and to confirm the profile of the necessary borrowing, providing a clear base position against which to carry out the review process.

21 Strategic Investment Board (SIB) agreed the importance of limiting any new borrowing to the level of budgeted MRP, with a requirement that should the impact of the review on the revenue debt budget go above this headroom the cost of additional new borrowing would be added to that directorate's revenue savings target. This 'MRP headroom' provided an estimated £30.7m of funding for the review after ensuring that sufficient general contingencies remain available to meet in year pressures in 2024/25 and 2025/26. Subsequent review of the 2024/25 programme, alongside consideration of the 2025/26 proposals identified additional borrowing headroom.

22 Directorates were invited to submit their priority proposals for consideration by Strategic Investment Board, which met in July 2024 to consider and challenge the proposals. Each proposal was considered against agreed Capital Programme Review Prioritisation Criteria, to ensure they were in line with the council's priorities and this involved consideration of both the strategic importance and urgency of the proposals. Outcomes were agreed by the Strategic

Investment Board in late July 2024 for consideration and recommendation to November Executive Board.

- 23 Executive Board in November 2024 identified a future injection from the CIL Strategic Fund to enable a Strategic Highways scheme and Supporting Older People Scheme from within the capital programme with existing matched funding contributions. It was agreed that CIL funding could be utilised for these, allowing resources to be redirected to release Leeds Borrowing to deal with any unforeseen circumstances, ensure sufficient resources are available to fund the capital programme or contribute savings to the overall Financial Challenge by reducing the level of borrowing that the council has to undertake. The Strategic CIL funding is to be used as matched funding contributions, allowing resources to be redirected to release Leeds Borrowing. An injection of £8.53m into the capital programme has been approved as part of the February 2025 report to Executive Board, following a recent review of secured CIL contributions.
- 24 As part of the annual review of the capital programme the general contingency provision has been increased by £4.7m back to £10m to ensure there is sufficient contingency provision for unforeseen circumstances.
- 25 In addition to the general contingency provision, the specific contingency provision has been increased by £3.8m to £9.2m by the injection of additional Strategic CIL Fund monies and annual programme budget realignments. This will fund any future capital investment priorities and opportunities that arise.
- 26 Savings proposals reported to Executive Board between September and December 2024 to address the current Financial Challenge have also been reviewed to ensure that any interdependencies between capital and revenue have been given due consideration.
- 27 **Appendix A (iv)** details the priority capital schemes approved as a consequence of the Capital Programme Review and included in the total injections seeking approval in this report, amounting to £32.6m.
- 28 The 10 year plan, attached at **Appendix A(v)**, identifies annual programmes across the council that aim to provide investment in assets to ensure that the council can continue to operate effectively. Since reporting as part of the Quarter 2 report presented to Executive Board in November 2024, the overall cost of the 10 year plan has increased by £29.5m primarily relating to external grant contributions of £9.8m in our Highways programme a DEFRA grant of £4.8m in our Vehicle Programme and £14.9m increase in borrowing relating to additional pressures and net adjustments to annual programmes. Injections of £69.6m are required to supplement existing annual programmes between 2024/25 and 2027/28 (£6.0m of LCC Borrowing) and our 2028/29 annual programme (£63.6m injection, split £47.7m of LCC borrowing and £15.9m external match funding, as set out in **Appendix A(v)**.

VAT on Expenditure Attributable to Exempt Activities

- 29 The council recovers VAT on expenditure (capital and revenue) relating to the council's statutory functions and on activities which are charged for at the standard rate of VAT. VAT incurred on expenditure relating to activities which are charged for, and which are exempt from VAT is only recoverable if the amount of such VAT does not exceed 5% of the council's total VAT on expenditure in any one year. Examples of exempt activities are culture, land & property transactions, and crematoria. If the council's VAT on expenditure relating to its exempt activities exceeds the 5% limit, all VAT on expenditure attributable to exempt activities is irrecoverable. This would create an additional cost to the council of around £6m. In addition, the council would also have to bring into account a proportion of any VAT incurred in the prior 10 years which was attributable to exempt activities and recovered in full at the time. Scheme slippage implications are being assessed via quarterly monitoring to ensure that the current programme is projected to stay within the 5% limit. Future schemes will only be allowed to progress once the full impact of the VAT implication has been assessed.

- 30 The overall capital investment will deliver against a number of council priorities and objectives. **Appendix B(i)** lists the major schemes contained within each objective in the period 2025-2029 and **Appendix B(ii)** provides a narrative update on these.

Economic Impact Analysis

- 31 An assessment of the economic impact of the council's programme of capital investment has been undertaken using the Regional Capital Expenditure Model and the Regional Econometric Model (REM) which can model construction employment generated and estimate the wider economic impact of the capital programme through multiplier effects. The key points below estimate the economic impact for Leeds and the Leeds City Region from 2024-2029:
- An estimated peak (in 2025) of 4,550 net additional FTE job roles in Leeds will be created from Leeds City Council's profiled capital expenditure generating £475m (at peak in 2025) Gross Value Added (GVA) for the Leeds economy. In broad terms over the 5-year period 2024-2029 the net additional GVA generated could increase the Leeds economy by 1.1% above current baseline assumptions.
 - A further net additional 270 jobs and £48m in GVA (at peak in 2025) will be created in the wider West Yorkshire economy by our capital expenditure over the five-year period.
 - In total, it is therefore estimated that Leeds City Council capital expenditure between 2024-2029 will create a peak of up to 4,870 FTE jobs across the wider West Yorkshire economy and generate £580m GVA across Yorkshire and the Humber.

Capital Strategy – Minimum Revenue Provision (MRP)

- 32 The MRP is an annual revenue charge for the repayment of borrowing and other capital financing liabilities. Local authorities are required by statute to determine each financial year what they consider to be a prudent amount of MRP and are required by statutory guidance to approve an annual statement setting out their MRP policy. The policy should be approved by Full Council, and any subsequent revisions which are proposed to the approved policy should also be approved by Full Council.
- 33 One minor change is proposed to the council's MRP policy for 2024/25, which is explained in **Appendix C**.
- 34 The MRP Policy for 2025/26 which is recommended at **Appendix C** is in line with the latest Regulations and statutory guidance, which come into force on 1st April 2025.

Prudential Indicators

- 35 Under the current self-regulatory financial framework, CIPFA's Prudential Code for Capital Finance, each authority is required to set a number of prudential indicators and limits for its capital plans which will include affordability, the impact of capital investment plans on council tax and housing rents, capital expenditure levels, external debt and treasury management indicators. A number of these indicators relate specifically to treasury management operations and for 2024/25 to 2027/28 these are included in the Treasury Management Strategy report elsewhere on the agenda. In relation to capital expenditure, and in accordance with the prudential code, this report indicates future levels of capital expenditure, forecast resources and the resulting borrowing requirement (before providing for the statutory charge to revenue for past capital expenditure, known as the minimum revenue provision). Full details of the prudential indicators are set out in Appendix A of the Treasury Management Strategy 2025/26 Report elsewhere on this agenda.
- 36 Any unsupported borrowing carried out must be affordable within the revenue budget (i.e. the cost of interest and debt repayments). For 2025/26, the debt cost of all schemes funded through borrowing have been provided for in the revenue budget, approval for which is contained within the revenue budget report elsewhere on this agenda.

Capital and Investment Strategy

- 37 CIPFAs Prudential Code for Capital Finance requires each authority to have both a Capital Strategy and an Investment Strategy, with the option to produce one strategy document covering both of these areas. The council has opted to produce an overall Capital and Investment Strategy, which is attached at **Appendix D**.
- 38 The 2021 updated CIPFA Codes also require the council to set prudential limits for the total value of its non-treasury investments and, specifically, limits for the total value of service investments and the total value of commercial investments that it holds. Appendix D recommends:
- the prudential limit for service investments be set at £80m.
 - that a limit of £200m should be set for the carrying value of assets which are classed as commercial investments.

What impact will this proposal have?

- 39 The capital programme sets out a plan of capital expenditure over future years and further spending decisions are taken in accordance with capital approval processes as projects are developed. This is when more detailed information will be available as to where in the city capital spending will be incurred, the impact on services, buildings and people and equality considerations as part of the rationale in determining specific projects from capital budgets.

How does this proposal impact the three pillars of the Best City Ambition?

Health and Wellbeing Inclusive Growth Zero Carbon

- 40 There are no specific implications for the council's three Key Pillars resulting from this report. However, each of the three Key Pillars will be addressed across the capital programme and these specific implications will be covered in individual capital scheme approval reports when they come forward.

What consultation and engagement has taken place?

Wards affected:

Have ward members been consulted? Yes No

- 41 The council's proposed budget, including the capital programme, was set out in the 'Proposed Budget for 2025/26 and Provisional Budgets for 2026/27 and 2027/28' Report to Executive Board in December 2024.
- 42 The Proposed Budget report was also used for wider consultation with the public through the Leeds City Council website; the results of this consultation are contained in the revenue budget report which is elsewhere on the agenda.
- 43 Specific consultation will be undertaken with Ward Members when individual capital scheme approval reports come forward.

What are the resource implications?

- 44 The resource implications of this report are detailed in the above 'What is this report about?' section.
- 45 For the capital programme to be sustainable, the Interim Assistant Chief Executive - Finance, Traded and Resources must be satisfied that the cost of borrowing currently included in the

capital programme can be contained within the approved revenue debt budget. The updated capital resources position statement set out in **Appendix A** details the borrowing required for 2024 to 2029 which can be contained within the revenue debt budget in the council's approved Medium Term Financial Strategy.

46 For the HRA, the position outlined at **Appendix A** details the borrowing required for 2024 to 2029, which will be managed within available resources.

What are the key risks and how are they being managed?

47 One of the main risks in managing the capital programme is that insufficient resources are available to fund the programme. As the capital programme is fully funded this risk lays within the treasury management of the debt budget. Monthly monitoring procedures are in place for expenditure, resources and capital receipts and debt monitoring to ensure that this risk can be managed effectively.

48 In addition, the following measures are in place:

- ensuring written confirmation of external funding is received prior to contractual commitments being entered into;
- quarterly monitoring of the council's VAT partial exemption position to ensure that full eligibility to VAT reclaimed can be maintained;
- provision of a £10.0m central contingency to deal with unforeseen circumstances and a £9.2m specific contingency to fund any future capital investment priorities and / or opportunities that arise. Individual programmes and schemes will also contain a risk provision for unexpected circumstances;
- compliance with both financial regulations and contract procedure rules to ensure the council's position is protected; and
- ensuring all major programmes are supported by programme boards.

49 The Interim Assistant Chief Executive – Finance, Traded and Resources will continue to ensure that:

- the introduction / start of new schemes will only take place after completion and approval of a full business case and identification of the required resources;
- promotion of best practice in capital planning and estimating to ensure that scheme estimates and programmes are realistic; and
- the use of departmental unsupported borrowing for spend to save schemes is based on individual business cases and in the context of identifying the revenue resources to meet the borrowing costs.

50 The aspiration remains to limit the increase in the level of debt. The council has sought to manage this through its Capital Programme Review process, reviewing priorities, identifying pressures and capital requirements for future years, and ensuring that affordability remains within the Medium Term Financial Strategy. Annual reviews of the capital programme will continue to be undertaken.

What are the legal implications?

51 In accordance with the council's Budget and Policy Framework, decisions as to the council's capital programme are reserved to Council. In addition, statutory guidance requires that policies on Minimum Revenue Provision (see 'Capital Strategy – Minimum Revenue Provision (MRP)' section above and Appendix C) are approved by Council. As such, the recommendations are not subject to call in.

Options, timescales and measuring successes

What other options were considered?

52 In accordance with the council's Budget and Policy Framework, decisions as to the council's capital programme are reserved to Council. In addition, statutory guidance requires that policies on Minimum Revenue Provision are approved by Council. Further, Council is required to set an annual budget. This report provides detail on the borrowing requirements required by the Programme and which are key in the setting of the annual revenue budget. As such, no other options were considered.

How will success be measured?

53 Not applicable.

What is the timetable and who will be responsible for implementation?

54 The council continues to face significant financial challenges over the next few years. Work is ongoing to address these challenges and to identify savings, which may be addressed in part through review of the Capital Programme and the impact on debt costs within the revenue budget. The timetable of future Capital Programme reports is as follows:

- June 2025 Executive Board: Overall 2024/25 Final Outturn report including details of the Capital Outturn position.
- July 2025 Executive Board: 'Capital Programme 2025/26 Quarter 1 Update'
- November 2025 Executive Board: 'Capital Programme 2025/26 Quarter 2 Update'
- February 2025 Executive Board and Full Council: Overall Budget Setting report including a 'Capital Programme 2025/26 Update'.
- June 2026 Executive Board: Overall 2025/26 Final Outturn report including details of the Capital Outturn position.

Appendices

- Appendix A - Capital Programme Funding Statement 2024/25 to 2028/29
- Appendix A(i) - Annual Programmes
- Appendix A(ii) - Major Programmes
- Appendix A(iii) - Net Increase in Funding Since February 2024 to January 2025
- Appendix A(iv) – Capital Programme Review
- Appendix A(v) – 10 Year Capital Programme
- Appendix B(i) – Major schemes contained within each Objective 2025-2029 (Pie Chart)
- Appendix B(ii) - Major schemes contained within each Objective 2025-2029 (Narrative)
- Appendix C - Statement of Policy on the Minimum Revenue Provision for 2025/26
- Appendix D - Capital and Investment Strategy
- Appendix E - Capital Programme - Scheme Details (Organised by Capital Objective)

Background papers

- None.

Major Schemes contained within each Objective 2025-2029 (Pie Chart)

Appendix B (i)

Major Schemes contained within each Objective 2024-2028 (Narrative)

1. Improving our Assets

Housing Revenue Account (HRA)

1.1. Council Housing Refurbishment Programme

The service is working with agility to generate inward investment through government grants to supplement the existing capital programme. These have acted as powerful catalysts and enablers for delivering a more ambitious programme of investment activity to improve the energy efficiency of the HRA estate. The focus of planned investment activity is aligned to the council's priorities and all projects will contribute directly to one or more of the following:

- Tackling fuel poverty
- Promoting Inclusive Growth
- Improving Health and Wellbeing of residents
- Improving the quality of council homes including Health and Safety
- Decarbonisation of council homes

The Housing Leeds refurbishment programmes provide for £379.8m over the coming 4 year period and an additional £6m for BITMO. New capital investment proposals will be prioritised as follows:
High Priority

- Energy efficiency programmes– Improving the thermal performance of homes through the use of both green technology and more traditional measures such as insulation programmes.
- Regeneration activity in Priority neighbourhoods - Re-roofing and EWI (External Wall Insulation) schemes with associated environmental improvements to improve Place and Space
- Health, Safety and Wellbeing - Fire Stopping, Sprinkler Installation, concrete repairs, statutory compliance, adaptations and damp and mould prevention projects
- Maintaining Decency (Regulatory) standards across the HRA estate through a series of lifecycle replacements programmes to improve and maintain the quality of council homes and ensure the number of homes meeting the 'Decent Homes' standards remains at or above 90%. This is achieved through several ongoing core programmes including:
 - re- roofing
 - new kitchens, bathrooms and rewires
 - replacement lifts
 - new windows and doors
 - boiler replacements
 - Emptying and Demolition of a number of High Rise end of life assets

1.2. Council Housing Growth Programme

The council House Growth Programme will continue to support the delivery of affordable housing in the city over the coming years, providing employment and skills opportunities and helping address derelict / problem sites.

The current programme has grown to over 1,200 council homes at various stages of development with over 700 homes delivered already. New homes will be let at affordable rents in line with principles agreed by Executive Board. An acquisition's programme mainly comprising of buy back of ex-right to buy properties is progressing as part of the overall programme targets.

General Fund

1.3. Highways and Transport Programme

Highways and Transportation has continued to deliver its extensive programmes of work despite facing difficult underlying market conditions and inflationary pressures, which are set to continue for the foreseeable future. Scheme issues, delays and budgetary pressures continue to be managed with close working with Finance colleagues and where appropriate West Yorkshire Combined Authority (WYCA). The full Highways programme will deliver £300m+ over the next 4 years 2025-29.

The Highways annual maintenance programmes over the next 4 years provide for £74.6m Leeds Borrowing to address the backlog maintenance on district roads / streets / bridges along with our S278 / S106 obligations of £15.9m. Specific funding of £130.7m from within the City Region Sustainable Transport Settlement (CRSTS) is also provided for Road Maintenance £39.9m, Bridges & Structures £15.0m, Safer Roads £6.8m, Urban Traffic Management & Control £8.5m, together with CRSTS major projects including the A660 Woodhouse Lane Gateway £19.6m, Beckett Street Bus Priority £14.1m, A660 Lawnswood Roundabout £9.8m part funded from CRSTS, Healthier Streets £5.8m, A6110 Elland Rd Churchwell Hill £3.9m and the City Centre North / South Cycle Loops £6.8m.

Flood Risk Management (FRM) has £3.2m of funds currently available and will culminate in Leeds Flood Alleviation Scheme Phase 2 being completed, thus completing the scheme to provide the city with comprehensive flood protection.

The council had been successful in securing DfT's Major Roads Network funding £42.7m approved in Jan 2025 which will develop Dawsons Corner and Stanningley Bypass throughout the next 2 Years. Within our City Centre Package programme, network and junction improvements at Armley Gyratory and City Square will complete in 2025/26. The Corridor Improvement Programme (CIP) £5.4m will deliver the 3 remaining schemes together with a contribution to the major scheme at Lawnswood Roundabout. The Connecting West Leeds Levelling Up scheme has remaining funding of £12.4m, including the completed Fink Hill Junction scheme and will deliver a further 8 schemes over the next year.

1.4. Schools

The programme currently includes estimated future Schools Capital Allocation and Devolved Formula Capital grant allocations up to 2028/29 of £6.7m and £1.4m p.a. respectively based on 2024/25 funding allocations. The next schools capital funding announcement is expected in the Spring, and funding estimates that are already included in the programme will be updated as necessary. The School Condition Allocation will continue to be utilised to fund a rolling 5 year Planned Maintenance Programme to address the highest priority condition works within maintained schools, Foundation (Trust) schools and children's centres on school sites with the ambition to keep them safe, warm and watertight. This funding will also be used to help address essential health and safety issues relating to school buildings across the estate. Several schools will also benefit from continuing decarbonisation works as part of a wider programme across the city. The Council will continue to work with schools to ensure they fully utilise Devolved Formula Capital allocations to exercise their statutory duties in implementing good estate management of school buildings. Five Leeds schools and academies (Wetherby High School, East Special Inclusion Learning Centre - John Jamieson site, Brigshaw Academy, Oulton Academy, and St. Mary's Menston Catholic High School) have been accepted into the DfE's school rebuilding programme. Each have been allocated a group in which schemes will commence, with Wetherby High commencing first.

1.5. Sport & Leisure

Holbeck sports Hub was granted planning permission in June 2024 and will see the construction of a community sports hub with GP Surgery, Fitness Gym and ancillary spaces, together with 3 full size Artificial Grass Pitches and 2 PlayZone multi-use pitches. The scheme is currently at the end

of RIBA stage 3 and design development of Stage 4 is anticipated to commence in February 2025 under the UK Alliance framework. The anticipated costs are currently £17m of which approx. £8m will be funded by the Football Foundation, £4m from the NHS with the remaining funding being met by the council. Construction should commence on site in July / August 2025.

Green Park and Woodhall tenders were considerably higher than anticipated therefore an alternative procurement strategy has now been approved, using the UK Alliance Framework. This should enable the council to reduce the costs of the two projects and deliver them within the agreed affordability threshold. The delays as a result of the re-tendering will mean that works on Woodhall will now commence early February 2025 whilst Green Park will follow on in April 2025. This will enable both schemes to be completed in advance of the 2026 playing season, with some pitches available beforehand, to relieve pressures on existing spaces.

The Football Foundation have provisionally allocated £11.1m towards both schemes (£5.4m Woodhall and £5.7m Green Park), which is lower than expected, therefore continuing dialogue with the Foundation is ongoing to increase the funding contribution to reduce the liability on the local authority. The Woodhall and Green Park schemes include alternative sporting and active lifestyle facilities such as outdoor park activity stations, to enable people to do fitness training whilst running around the park, young person's play areas and significant wildlife habitat improvements. The full funding agreement for the Matthew Murray site has yet to be secured as the application is in progress at present.

The new Fearnville Wellbeing Centre has been granted full planning permission in July 2024 and will see the construction of a new 5000m² building incorporating a 6 lane 25mt pool, learner pool with water confidence area as well as activity studio, ride studio, 2 wellbeing / fitness studios, fitness gym as well as ancillary provision including community rooms and café. Externally the works include a new full size 3G pitch, skate park and children's play areas as well as significant improvements to the footpath network enabling easy access.

The procurement strategy is currently being approved which will hopefully see the appointment of a contractor via the UK Alliance Framework early February 2025 to commence the detailed design stage after which a tender will be submitted. It is anticipated that construction works will commence summer 2025 for a period of 18 months. Upon completion of the new facility, the existing building will be closed and demolished to make way for further sports pitches

Current estimates highlight a construction value of circa £27m with additional costs giving an overall cost of approximately £29m.

1.6. Corporate Property Management

Our annual Corporate Property Management and Fire Risk Assessment programmes will deliver £27.8m of works over the next 4 years.

Works identified following Fire Risk Assessments are required to ensure compliance with legislative requirements and to discharge the Council's legal and statutory obligations for management of fire safety within its buildings. As a result, fire risk prevention work on the civic estate will be delivered by a programme of works on various buildings across 2024/25 2025/26 to 2025/26 2027/28. The completion of this work will also support the Council's ambitions of health and wellbeing and safe, strong communities.

The backlog maintenance programme will address outstanding works in buildings such as sports centres, parks facilities, homes for older people, social care day centres, community centres, children's centres, libraries, community hubs, visitor attractions and operational buildings used as office accommodation by LCC staff. Investment in the operational estate is required to maintain properties and prevent them from falling into a state of structural disrepair, maintain market values, and to achieve a number of the Council's priorities. Work under the programme is proactive and should help ease pressure on the revenue maintenance budget.

1.7. Strategic Investment Fund

George Street Development - Officers worked with TCS to reassess and identify a viable development proposal for the site, that could work in a post pandemic property market, which remains more risk averse than the pre-pandemic period. In September 2022 Executive Board approved a report which sought endorsement for a post pandemic delivery structure for the redevelopment of George Street to include a 143-bed hotel, with commercial units and possibly a Council operated leisure and wellbeing facility at ground floor level, the funding of which is the subject of a separate business case. The Council will take the role of developer and fund the £21.9m cost of the development. The council will retain 100% ownership of the completed scheme. TCS has been appointed to act as development manager for the project on behalf of the Council.

The hotel design work has been completed to the end of RIBA Stage 3 and incorporated in legal documentation for an agreement for lease which has also been agreed and exchanged with the preferred hotelier. Planning and Listed Building consent for the proposed development has been secured. The procurement of a contractor to undertake the works has commenced. The current programme anticipates a preferred contractor will be appointed under a Pre-Construction Service Agreement in August 2025 and, subject to the receipt of an acceptable second stage tender, works are envisaged to start on site in November 2025, with completion scheduled in May 2027.

1.8. LUF 3: Heart of Holbeck

The previous Government announced in November 2023 that the Heart of Holbeck project (bid submitted in August 2022) would be allocated £15.95m in Levelling Up funds. Given the length of time that has passed since the original project development in early 2022 there was a 6 month period of MHCLG project validation checks which the Council successfully passed. With the new Government in July 2024 there was a pause on the project until the Autumn statement confirmed the original Levelling Up funding commitment.

The Heart of Holbeck funding will be to support three key projects including:

- a) The refurbishment of St Matthews Community Centre and an expansion of the Holbeck Together community facilities into an adjoining Leeds Building Society building (Old Box Office);
- b) Regeneration of the Holbeck local centre public realm, highway and greenspaces; and
- c) Retrofit of back-to back housing stock to improve energy efficiency.

Following the Autumn Statement the Council has had confirmation from MHCLG that funding to March 2026 is confirmed. The Council is now awaiting clarity from government in the Spring Budget 2025 on funding confirmation and delivery to March 2028. This will enable full certainty of delivery programme and spend, though initial work is already underway now to ensure we are delivery ready.

A report was taken to Executive Board in April 2024, for the housing retrofit project and July 2024 for the remainder of the programme to endorse the scope and delivery principles and approve the necessary delegations to the Director of City Development.

Design and development will progress throughout 2025 with projects likely to start on site in 2026/27. The retrofit of the back-to-back housing will potentially start from June 2025, once the contract is awarded following previous phases of group repair within Holbeck.

A programme wide communications and engagement plan will be produced to ensure key stakeholders, beneficiaries, local residents and businesses are able to influence the ongoing design and development of the projects.

1.9. Leeds Town Hall / Heritage

Leeds Town Hall is a Grade I Listed Building and Arts venue which delivers a wide variety of cultural events and performances attracting audiences from within the city and beyond. In May 2024, our contractor submitted a commercial offer for the partial refurbishment of this iconic building. Following assessment by the Council's independent commercial advisors and in accordance with their recommendation, the Director of City Development approved the direct award of a contract to our preferred contractor to carry out refurbishment works with the contract commencing in June 2024 with practical completion anticipated in June 2026.

Following consultation with relevant user groups the scheme includes an improved accessible principal entrance providing democratised physical access suitable for all visitors and provision of a 15 person lift for mobility impaired users. The scheme also includes the installation of low carbon lighting and more efficient mechanical and electrical installations which along with recent improvements to the roof and windows will significantly reduce the buildings carbon footprint when it reopens to the public in 2026.

Alongside this major refurbishment, work is also progressing to restore the main decorative features in the Victoria Hall including our organ renewal project. The project brings together leaders in the field of organ renovation to oversee the restoration of this unique Victorian recital and orchestral instrument which represents a significant piece of Leeds' cultural heritage

2. Investing in Major Infrastructure

2.1 Leeds Integrated Station Masterplan

The Leeds Station Sustainable Travel Gateway Project (LSSTG) is the first phase of the Leeds Integrated Station Masterplan delivering a redeveloped station to accommodate the increasing passenger numbers over the next 20 years. Phase 1 was allocated Transforming Cities Funding from WYCA in 2019 and so far has gained Full Business Case Approval to proceed and has already delivered advance works on site including utilities diversions and highway kerb realignment together with improvements to lighting and surfacing in Dark Neville Street. The scheme is now fully designed and together with the Network Rail led scheme, undertaking structural strengthening works to the Mill Goit which sits under New Station Street, the main works for the scheme commenced on site Spring 2023 and will be completed Early 2026. The scheme is circa £46.1m plus the Mill Goit element and will deliver increased pedestrian capacity for the entrance to the station, a circa 500 space cycle hub together with connecting cycleways, improved pedestrian safety and connectivity between the station and the city, better brighter and lighter connectivity for pedestrians using Neville Street and Dark Neville Street. The Leeds Existing Station Programme which includes phases 2-4 of the Leeds Integrated Station Masterplan has now gained outline business case approval and designs, £55.2m has been approved for Network Rail to deliver the enabling works and Full Business Case which will lead to the redevelopment of the existing station to increase pedestrian capacity and improve connections with the South Bank. will be submitted for approval later in 2025 in the region of £235m. Feasibility work is due to commence soon to determine the options for resolving onward travel to and from the station which was originally going to be provided under the HS2 viaduct this study will be funded through mass transit and will be part of a wider CSR ask by WYCA and Network Rail. Network Rail and DfT are undertaking a number of studies to look at capacity on the existing network between Leeds and Sheffield and ways to increase the capacity, frequency and performance of services it is anticipated that further studies will be required and at present the only capacity solution for Leeds in terms of land availability would be the development of a T shaped station.

2.2 Decarbonisation Programme & Energy Efficiency

In September 2024, the Department for Energy Security and Net Zero (DESNZ) confirmed the continuation of the Public Sector Decarbonisation Scheme (PSDS), supporting more public buildings such as schools and hospitals to switch to cleaner heating and cut their emissions, accelerating to net zero. The delivery of this programme will contribute to the Council's vision to improve the resilience of the city's infrastructure, promoting a more competitive, resource efficient,

low carbon economy through reducing the council's carbon footprint and energy expenditure, adapting more of the Council's estate to meet its 2030 net zero vision, while at the same time contributing to the UK target of Net Zero by 2050.

Having successfully submitted a bid for PSDS3C, DESNZ has agreed to provide c£7million towards the PSDS scheme. The current scheme consists of two corporate and seven school sites. Bid one will have a funding expiry date of 31st March 2025, with an expiry date of bid two sites on 31st March 2026. We have recently submitted another application for PSDS4 funding, consisting of three corporate and two school sites. We will be notified of a decision in May 2025

The council has secured £3.1m of grant funding for a £7.49m scheme: the Phase 4 Wellington Street extension to the Leeds PIPES district heating network.

The project is split into two phases, with Executive Board providing approval in November 2024 for the first part of the extension, Phase 4a. 4a has a total cost of £2.98m and will require £1.98m of borrowing on top of the £1m of grant funding provided. Work is due to commence on site at the start of the 25/26 Financial Year, with design work being undertaken in 2024 into early 2025. As the schemes progresses beyond 4a, further updates and approvals will be sought directly from Executive Board. The Leeds PIPES scheme will be income generating and forms part of a wider business case which sees the full capital costs recovered.

2.3 Sustainable Active Travel

The focus of the Active Travel Fund (ATF) programme is to support and grow everyday walking and cycling journeys within the city. Leeds City Council have been successful in securing multiple rounds of funding through the Active Travel Fund to help deliver a variety of measures that are aimed to enable people to make journeys either by walking, wheeling or cycling. To date we have been successful in four separate bids that vary in scale and number of schemes. Tranche 1 was approximately £730k, Tranche 2 had a capital budget of £2.7m, Tranche 3 has now secured £10.4m for works on the A660 and Headingley Lane Corridor. Tranche 4 will deliver £7.9m to 5 specific schemes subject to WYCA approval and most recently Leeds have been awarded and extension to Tranche 4 and Tranche 5 which equate to £350k and £1.1m respectively. The Active Travel Fund Tranche as a whole will continue to build on recent successes with a comprehensive package of active travel schemes that will expand the network, fill gaps and will continue to provide quality infrastructure for sustainable modes.

3. Supporting Service Provision

3.1 Learning Places Programme

The demand for expansion of primary and secondary schools and academies across Leeds has reduced, although future demand for temporary/bulge increases have been identified in certain areas of the city. Continuing capital investment is required to meet the growing demand for Special Education Need & Disability (SEND) school places across Leeds. The authority is not due to receive a Basic Need capital grant allocation for 2025/26 but is expected to receive a High Needs Provision Capital Allocation grant allocation for 25/26, pending confirmation that is expected in the Spring; the capital programme will then be updated accordingly. At primary school level, no increase in reception places are expected for September 2025. Demand for in-year primary places will continue to be monitored, however any increases are likely to be managed via schools admitting over PANs/bulges and using growth funding, without the need for capital investment. For September 2026 demographic projections currently identify additional temporary/bulge and permanent demand in certain areas of the city. At secondary level an additional 4.0fe (120 places) of additional temporary/bulge demand is currently projected to be needed in September 2025, although it is expected that this will be absorbed within existing school capacity without the need for further capital investment. An additional 6.33fe (190 places) of secondary temporary/bulge provision is expected to be needed in September 2026, with the need for additional capital solutions yet to be fully assessed. A review of the Special Education Need & Disability (SEND) estate is ongoing, with schemes being identified to support the expansion and creation of

resourced provisions within mainstream settings across the city. The Executive Board recently approved a proposal to expand specialist places in the south of the city. The projected Learning Places funding deficit is currently estimated at £10.8m, with the deficit projected to first arise in 2028/29. The programme currently includes £16.5m of CIL funding support to assist in cashflowing the expected programme of capital works, with some of this funding being used to finance revenue expenditure that is related to the Learning Places programme. Where possible, the Council plans to recoup cashflow support from future capital grant allocations.

3.2 Kirkland's Bungalows Autism Project

This project will create a high quality, six-bed Registered Residential stay care home for adults with severe learning disabilities and severe autism who display behaviours which challenge. It will be built on the site of the former Kirkland House care home in Northwest Leeds. The proposed six bungalows will also help to prevent future hospital admissions and Leeds citizens, particularly adolescent children, from being placed in residential institutions, out of area and away from their families and communities. The project will be nationally unique as it is recognised through NHS bodies that there is no similar residential scheme in the UK that is established / exists out of a hospital setting that has been delivered and owned by a Local Authority. The project is identified as an Invest to Save project with capital investment being fully funded by a capital grant from the NHS and borrowing that will be funded by West Yorkshire Integrated Care Board. In addition, full occupancy of the bungalows is expected to deliver a minimum revenue saving of £250k per annum from 2026-27 financial year to the Council. A detailed report went the Executive Board on the 13th of March 2024; [Corporate report template for committee and officer decisions \(new\)](#)

4. Investing in New Technology

4.1 Essential Services Programme

Leeds City Council have a complex enterprise architecture which supports 14k users and a large application estate. The organisation has a strategy for Cloud first and is gradually moving applications from on premises Data Centres to the cloud. The technology estate supported by the Integrated Digital Service requires constant review and refresh to ensure it is secure and provides efficient and effective compute for end users. This requires a capital investment through the Essential Service Programme on an annual basis to allow IDS to invest in upgrades in technology to keep the estate secure and compliant.

4.2 Cloud Applications and Compliance Programme

The Cloud first strategy we have adopted incorporates the migration of applications from on premises Data Centres to the Cloud, through various approaches such as full application replacement through to retiring legacy applications. This programme will focus on the application layer of this work and drive digital change, maintain compliance, and move to more modern and secure ways of hosting via application replacement and modernisation. In addition, the Council has an obligation to maintain security of data stored within these applications and to comply with ever changing legislation and guidelines (e.g., Public Services Network (PSN), General Data Protection Regulations (GDPR) and Payment Card Industry regulations (PCI) and therefore it is necessary to replace applications or update them to ensure this compliance is maintained.

4.3 Digital Efficiencies Programme

The DEP aims to improve the quality efficiency and effectiveness of service delivery and realise resource efficiencies, qualitative benefits, and financial savings. The priority work under this programme is on becoming a customer-centric, digital first council that makes the best use of our resources and technology, to improve service delivery that meet customer needs and drive savings. The Customer Contact Transformation (CCT) has formed under the DEP. The CCT will deliver a suite of projects which will transform the way the council delivers customer services and deals with citizens. The programme will introduce new methods of working, make the best use of people, maximise the use of technology and re-engineer business processes to provide greater use of more cost-effective customer access channels. At the heart of the programme is the development and implementation of a single integrated customer relationship management (CRM)

solution and enhanced transactional web services via the Leeds City Council website. This technology will enable greater choice around the services customers consume, be designed through data-led decisions and improve the availability of self service. Data and technology are a critical enabler to the delivery of the CCT. Delivery of these technical capabilities and services is intended to deliver financial savings on the basis that customer-led transformation will generate considerable efficiencies.

5. Supporting the Leeds Economy

5.1 Morley Town Fund

The Ministry of Housing, Communities and Local Government (MHCLG) allocated funding of £24.3m to Morley for delivery by 2026/27.

Leeds City Council developed Business Cases for each of the six projects (Greener and Connected, Station Gateway, Heritage Investment Fund, White Rose Innovation Hub, Morley Town Hall and Morley Adult Learning and Skills Centre), which were approved in August 2022.

Since then, all six projects have now progressed into detailed design and development following outline concept design and public consultation. Some Greener and Connected schemes started delivery with contractors at the end of 2023. The remaining projects are due to start on site in early 2025 with delivery programmes running until 2026/27.

Regular performance and monitoring returns are completed by Leeds every 6 months as part of the Towns Fund governance and assurance process. Reprofiling of remaining spend and some project adjustments to scope and budget are now being undertaken across the remainder of the programme to fit with the updated delivery profiles and project costs.

5.2 Kirkgate Market Strategy

Works to reinstate and refurbish a number of the blockshops in the 1875 part of the Market started in March 2022 with the first of two phases of work. The work is to secure the future of the most historic elements of the market alongside improvements to provide safe access to the roof areas above to address on-going issues of rainwater ingress, phase one of these works completed in August 2023. Funding was secured to complete phase 2 the final stage albeit having to be completed in three stages due to the need of relocating tenants to complete the works. The main focus for these works is to improve the structural integrity of the units and to provide a modern retail environment. Phase one has proven to be a success with nine units being let and five currently under offer and due to open in early 2025.

The work on phase two started in February 2024 with the first part due for completion in March 2025. Units in phase two cannot be fully let until works are complete which impacts on the revenue income of the Market. The units which will soon become available have already been advertised and four units have already been pre-let with new businesses taking keys in March 2025, increasing the Council's income during this final phase of work.

5.3 British Library at Temple Works

Further to Executive Board approval in July 2021, the West Yorkshire Combined Authority (WYCA) provided approval to grant fund the Council £5m from devolution moneys for British Library North. This approval is for grant funding to fund feasibility, design development and temporary stabilisation at the Grade 1 listed Temple Works. This was on the basis of the Council then providing the grant, subject to grant agreements and formal requests from grant recipients, to both the British Library and CEG, the owner at Temple Works. Further to approval by the Director of City Development in January 2024, the first grant payment to British Library progressed to fund stage 1 design work (including LCC costs for administering the grant) and in January 2025 a further grant payment was made to the British Library for a second stage of design work.

It is anticipated that an update will be provided to Executive Board later in 2025, subject to further progress, on the strategy for the delivery of the British Library North at Temple Works, including on how devolution funding will be utilised and on wider considerations such as the use of LCC land and LCC funded grants (further to Executive Board approvals in 2021 on these matters).

6. Central and Operational

6.1 Vehicle Programme

The Council's fleet replacement and improvement plan continues to place us at the forefront of new technology with almost 30% of our entire fleet is electric and shows that as a Council we are prepared to continue to show environmental leadership. The fleet replacement programme provides for the like-for-like replacement for the authority's fleet vehicles and replacements will be informed by the outcomes of the Fleet Review. Individual business cases will be considered for electric equivalent vehicles and required infrastructure. These business cases will also be informed by the outcome of the Fleet Review programme of work.

6.2 PFI Lifecycle Capitalisations

Lifecycle costs within PFI schemes are required to be treated as capital expenditure under accounting standards. The Council funds its PFI lifecycle costs by Corporate Borrowing and applies appropriate MRP charges, based on useful life of capital spend. The value of lifecycle costs to be capitalised each year is updated for the PFI scheme financial models.

6.3 Transformational Change

Legislation provides for the flexible use of capital receipts to fund revenue transformation projects. This funding contributes to funding redundancy costs arising from the Early Leavers Initiative (ELI) and Voluntary Leavers Scheme (VLS), transformational ICT projects including the Core Systems Review (see specific narrative at paragraph 6.5) and other transformational initiatives. Government has also committed to engage with councils to identify and develop options for the use of capital resources and borrowing to support and encourage invest-to save activity and more flexibilities to use capitalisation without the requirement to approach Government. Full details of expenditure funded by capital receipt flexibilities can be found in Appendix 9 of the Revenue Budget and Council Tax Report elsewhere on this agenda.

6.4 Contingencies

The capital programme includes a £10.0m central contingency to deal with unforeseen circumstances and a £9.2m specific contingency to fund any future capital investment priorities and / or opportunities that arise. Individual programmes and schemes will also contain a risk provision for unexpected circumstances. Calls against capital contingencies are managed by the Best Council Team - Strategic Investment Board.

6.5 Core Systems Review

This scheme seeks to bring about fundamental changes in the way Finance, Procurement, HR and Payroll activities are undertaken across the Council, through the procurement of new technology to help realise savings in terms of digitising services and streamlining processes. The new solutions will enable services to standardise and simplify how they work, freeing up capacity by removing manual processes and 'off-line' manipulation and processing of data. It will provide timely, consistent and standard management information in relation to people and finances. An Executive Board report in October 2022 identified that £10.48m of capital receipts are required to deliver Phase 1 (replacement of Finance System). A further Executive Board report in February 2023 identified a requirement for a further £8m of capital receipts to deliver Phase 2 (replacement of HR & Payroll systems). The scheme has an ambition to be using the new HR & Payroll system by April 2025 and the new Finance system by May 2025. Whilst the go live dates have changed slightly, the project is still working within the budget envelope. The scheme is funded under the flexible use of capital receipts legislation.

Statement of Policy on the Minimum Revenue Provision for 2025/26

1. Introduction

- 1.1. The council is required by statute to charge a Minimum Revenue Provision (MRP) to the General Fund Revenue account each year for the repayment of debt. The MRP charge is the means by which capital expenditure which has been funded by borrowing is paid for by council tax payers.
- 1.2. From 2008/09 to 2024/25, the legislation has simply required local authorities to make a prudent level of MRP provision, and the Government has issued statutory guidance which local authorities should 'have regard to' when setting a prudent level of MRP. The guidance states that the broad aim of a prudent MRP policy should be to ensure that debt is repaid over the period over which the capital expenditure is expected to provide benefits (or, for supported borrowing, the period assumed in the original grant determination). Within this overall aim, the guidance has given local authorities considerable freedom to determine what would be a prudent level of MRP.
- 1.3. Updated regulations and revised statutory guidance will apply to MRP policies from 1st April 2025. These clarify the timing with which MRP on capital spend should commence and make some changes to the requirements for MRP on commercial and non-commercial loans and investments and on the timing of the impact of capital receipts in reducing the capital financing requirement (CFR) on which MRP is calculated. The MRP policy recommended below for 2025/26 is in line with the new regulations and guidance.
- 1.4. The revised statutory guidance does not make any changes to the underlying principles of setting a prudent MRP policy, or to the recommended options for calculating it.
- 1.5. The statutory guidance recommends that local authorities draw up a statement of their policy on the MRP, for approval by Full Council in advance of the year to which it applies.

2. Details of Statutory Guidance on MRP

- 2.1. The statutory guidance identifies four options for calculating MRP and recommends the circumstances in which each option should be used, but states that other approaches are not ruled out, provided they conform to the underlying principles of setting a prudent MRP policy.
- 2.2. The first two options are based on the pre 2007/08 statutory method of a 4% reducing balance, and the third and fourth options are based on asset lives. For capital schemes acquiring new assets which take more than one year to complete, application of Options 3 and 4 allows councils to delay charging MRP until the year after the new asset becomes operational. Under the statutory guidance, local authorities should not use Options 1 or 2 for calculating MRP on new capital expenditure.
- 2.3. For balance sheet liabilities relating to finance leases and PFI schemes, the guidance recommends that one prudent approach would be for local authorities to make an MRP charge equal to the element of the annual rental which goes to write down the balance sheet liability. This would have the effect that the total impact on the bottom line would be equal to the actual rentals paid for the year. However, the guidance also states that Option 3 could be used for this type of debt.

3. Implications for the application of capital receipts

- 3.1. One of the implications of the arrangements for MRP is that it is necessary to identify which individual schemes have been funded by borrowing and which have been funded by non-specific capital income (e.g. capital receipts and grants), rather than treating the balance of

the capital funding requirement after specific capital funding has been applied as being met from a general receipts and borrowing pool.

- 3.2. In the case of capital receipts, statute gives local authorities the option to apply these to fund the payment of any liabilities relating to finance leases and PFI schemes. This is a reflection of the fact that such schemes are being treated in accounting terms as the acquisition of fixed assets, and the liability represents the amount being paid towards the purchase of the asset itself, rather than interest or service charges payable.
- 3.3. Local authorities may also use capital receipts to repay any borrowing that was incurred to fund capital expenditure in previous years. Applying capital receipts to redeem borrowing would reduce the level of MRP which the council needs to set aside from revenue as a prudent provision. The latest Regulations state that any capital receipts used to redeem borrowing cannot reduce the MRP charge for the year in which they are applied, other than in specific circumstances relating to properties which are leased in and leased out again, and to capital receipts from the repayment of non-commercial capital loans which are applied to redeem the related borrowing. Therefore, other than in these circumstances, any capital receipts applied to redeem past borrowing would be taken into account in the MRP calculation in the year following the year in which they were applied.
- 3.4. Where expenditure on transformational change which is revenue in nature is permitted under Regulations to be capitalised, currently this must be funded by capital receipts in the year in which the expenditure is capitalised.
- 3.5. The Responsible Financial Officer (the Section 151 Officer) will determine annually the most appropriate use of the capital receipts which are available, including the option to carry them forward in the Usable Capital Receipts Reserve, taking into account forecasts for future expenditure and the generation of further receipts.

4. 2025/26 MRP Policy

- 4.1. In its 2025/26 MRP policy, the council is required to decide how MRP will be calculated for borrowing undertaken for the 2024/25 capital programme and earlier years. It is proposed that Leeds adopts the following MRP policies for 2025/26:
 - MRP for borrowing on capital expenditure incurred between 2007/08 and 2024/25 will be calculated on an annuity basis over the expected useful life of the assets (Option 3 in the statutory guidance). For expenditure capitalised under statute where there is no identifiable asset, the lifetimes used for calculating the MRP will be as recommended in the statutory guidance.
 - For pre 2007/08 borrowing, MRP will continue to be calculated on an asset life annuity basis. As data is not available to identify the individual assets which this borrowing related to, an average asset life relating to more recent borrowing will be used. The annuity calculation is based on the position which would have been reached if this approach had been in place since 2008/09.
 - For PFI liabilities, an MRP charge will be calculated on the basis of the expected life of the asset which has been acquired, using the same annuity basis as is used for borrowing.
 - For PFI lifecycle costs, an MRP charge will be calculated on a 10 year asset life annuity basis, unless a more specific asset life is given in the contractor's financial model.
 - For finance lease liabilities, an MRP charge will be made to match the value of any liabilities written down during the year. For those assets which are leased in and leased out again, any capital receipts received from the lessee will be applied to repay the lease liability, and therefore to reduce the MRP chargeable to revenue for the year.

- If capital receipts have been used to repay borrowing or to fund PFI liabilities for the year, they will be applied to reduce the balance of debt remaining after annual MRP has been set aside.
- 4.2. All of the council's CFR (capital financing requirement) relating to the General Fund will be included within its MRP calculations. The CFR represents the balance of borrowing for capital purposes for which funding has not yet been set aside, and it is split between a General Fund element and an HRA (Housing Revenue Account) element. Separate statutory arrangements are in place for funding the HRA's CFR, and thus it is not within the scope of MRP. MRP on borrowing will commence in the year following the expenditure being incurred, other than where there is specific allowance in the regulations or guidance to delay charging MRP.
- 4.3. These policies will ensure that the council satisfies the requirement to set aside a prudent level of MRP. The arrangements for allocating capital funding set out in paragraphs 3.3 to 3.5 above will help to ensure that the level of MRP is not excessive.
- 4.4. The only change in this proposed MRP policy in comparison to the originally approved 2024/25 policy is the removal of specific arrangements in relation to MRP on the East Leeds Orbital Road – please see section 5 below for details.

5. Amendment to the 2024/25 MRP Policy

- 5.1 One amendment is proposed to the MRP policy for 2024/25. The policy approved in February 2024 contained a specific clause in relation to MRP on the East Leeds Orbital Road scheme, as follows:

“The exception to this approach is for the East Leeds Orbital Road, for which funding is to be received in retrospect from developers, with the timing triggered by progress in the developments which have been enabled by the construction of the road. Subject to regular reviews to confirm that the total funding expected remains sufficient to cover the total borrowing incurred, the council proposes to set aside MRP on this borrowing to match the actual receipt of funding.”

- 5.2 When this clause was first introduced it was anticipated that the associated funding for the road that is due to be received from the developers (often referred to as a 'roof tax') would start to be received by the time that MRP on the road should commence. However, this is not the case, and the first tranche of funding is not now expected until 2025/26. As it would not be prudent to delay the start of MRP for the project, it is proposed that this clause is removed from the 2024/25 MRP policy. This would mean that MRP on the East Leeds Orbital Road would be set aside on the same basis as all other capital spend, i.e. using Option 3 in the statutory MRP Guidance.

Capital and Investment Strategy

1. Introduction and Requirements

- 1.1 This report sets out the council's Capital and Investment Strategy. Local authorities are required to have both a Capital Strategy and an Investment Strategy, with the option to produce one strategy document covering both of these areas. The council has opted to produce an overall Capital and Investment Strategy, given that there is a significant overlap between the two areas.
- 1.2 The requirement for a Capital Strategy is included in the revised Prudential Code for Capital Finance in Local Authorities 2021. The Prudential Code was developed by CIPFA (Chartered Institute of Public Finance and Accountancy) as a professional code to support Councils in taking their decisions. Councils are required by regulation to have regard to the Prudential Code when carrying out their duties under Part 1 of the Local government Act 2003.
- 1.3 In financing capital expenditure councils must also have regard to CIPFA's Treasury Management in the Public Services 2021: Code of Practice and Cross-Sectoral Guidance Notes.
- 1.4 The Capital Strategy sets out the principles that support the council's 4-year capital programme and as such how it supports corporate priorities and objectives. It continues to develop a longer 10 year programme.
- 1.5 The requirement for councils to publish an annual Investment Strategy is included in the current edition of the Government's Statutory Guidance on Local Government Investments.
- 1.6 In recognising the financial challenges that the council faces, the council has undertaken a review of the capital programme during 2024/25 and sought to make further progress on limiting borrowing to the annual budgeted MRP, except where this would prevent the delivery of savings, generate income or lever in grant or external contributions. That review resulted in the injection of twelve priority schemes whilst delivering a saving within the existing Medium Term Financial Strategy (MTFS) envelope. Corporate borrowing has been injected into the Programme for future years in relation to these schemes.

2. Objectives

- 2.1 The Capital Strategy sets the framework for all aspects of the council's capital expenditure and capital investment decisions. It supports strategic planning, asset management and robust option appraisal.
- 2.2 The Capital Strategy is intended to give a high level overview of how capital expenditure, capital financing and treasury management activity contribute to the provision of services along with an overview of how associated risk is managed and the implications for future financial sustainability.
- 2.3 The keys aims of the Strategy are to:
- Ensure that decisions are made within the framework, CIPFA codes and statutory legislation;
 - Prioritise and deploy capital resources in line with the Best City Ambition - specifically to promote health and wellbeing, inclusive growth and net zero carbon commitment;

- Support service plans;
- Address major infrastructure investment;
- Support the review of the council's estate and provide investment to ensure that it is fit for purpose;
- Enable investment on a spend to save basis;
- Pump prime resources to deliver savings downstream;
- Enable investment in transformation of services e.g., automation, artificial intelligence and streamlining services to focus on service delivery;
- Create sustainable income streams through capital investment;
- Support the revenue budget and assist in the delivery of budget decisions;
- Support economic growth and outcomes;
- Build on the strategic partnership that has developed with Ministry of Housing Communities and Local Government and other key central and local government partners to explore and deliver a more sustainable local capital infrastructure model that supports local growth; and
- Attract and maximise investment in the City through Government and other grants, third parties or private matched funding.

2.4 In meeting the above aims the council is working towards the principle of limiting the increase in the level of annual borrowing to the level of MRP, except where this would: deliver savings; generate income; or lever external funding. These would need to be supported by robust business cases.

2.5 Capital investment decisions should be undertaken with regard to:

- Wider Council and service objectives;
- Proper stewardship of assets including life cycle maintenance costs;
- Value for money – through option appraisal;
- Prudence and sustainability;
- Affordability;
- Impact on the Council's partial VAT exemption limit of 5%; and
- Practicality – achievability of the forward plan.

2.6 The Investment Strategy brings together information on all the council's investment activities, covering its Treasury Management investments, other service related loans and investments and non-financial investment activity such as the acquisition of investment properties.

2.7 The aim of the Investment Strategy is to enhance transparency and accountability by presenting a clear picture of all the council's investment activity, including the contribution made by investments to the council's objectives, the decision-making process for entering investments, the exposure to risk, and the risk management arrangements in place.

2.8 The capital programme is updated monthly to ensure that affordability remains within the MTFS. During 2024/25 priorities, pressures and timelines were further reviewed that resulted in the delivery of revenue savings whilst absorbing pressures within the MTFS.

2.9 This capital strategy is also linked to the capital programme principles as set out in Appendix 11 of the of the Revenue Budget report 2025/26.

3. **Governance of the Capital Programme**

3.1 The capital programme is approved in February of each year together with the Treasury Management strategy and the revenue budget. Quarterly capital update reports are provided to Executive Board.

- 3.2 The affordability of the capital programme is considered within the Treasury Management report and the funding requirements are set within the revenue budget planning process and within the framework of MTFS.
- 3.3 The council has a process to ensure that effective decision making takes place that includes:

Democratic decision-making and political approval:

- The council sets the corporate priorities;
- The council approves the capital programme, the Treasury Management Strategy and the revenue budget together;
- The council has an approved scheme of delegation to effect and support efficient decision making;
- The scheme of delegation enables Directors and the Interim Assistant Chief Executive – Finance, Traded and Resources to inject funding and provide authority to spend and changes to the capital programme;
- All schemes progress subject to the council’s constitution, scheme of consultation, financial regulations and procurement requirements;
- The Interim Assistant Chief Executive – Finance, Traded and Resources will report on the affordability, sustainability and risk of capital investment decisions;
- Audit and Governance provide scrutiny on the Treasury Management framework; and
- The Interim Assistant Chief Executive – Finance, Traded and Resources provides assurance on the sustainability and affordability of the Councils financial affairs.

Officer Groups:

- Officers, through the council’s Corporate Estates Management Board (CEMB), Digital Portfolio Board (DPB), Best Council Strategic Investment Board (SIB) and Corporate Leadership Team (CLT) can influence any investment decision before political approval is sought at Cabinet and Executive Board;
- SIB has the overall responsibility for the strategic development of the capital programme;
- Directorate management teams consider the scheme business cases before submission to SIB and CLT;
- Directorate teams manage the monthly forecast spend for their schemes;
- Specific project boards are represented by appropriate skilled officers from within the council and with external specialist engagement as appropriate;
- Monthly reporting of the capital programme to Directorates and the council’s Financial Performance Group (FPG); and
- Monthly reporting of the updated projection of treasury management cost of debt covering the reporting MTFS period is made to FPG.

4. Project Initiation

- 4.1 The Strategy seeks to ensure that the revenue impacts of capital investment decisions are considered when the revenue budget is set for the following year.
- 4.2 Directorates submit their capital programme proposals in advance of the new financial year. Scheme proposals must be underpinned by a clear business case with robust costings and projections of income, where appropriate, that will stand up to scrutiny. The business case and report must be prepared in accordance with corporate guidelines.
- 4.3 These submissions are ranked in terms of:

- Identification of which of the council's Three Pillars the proposed scheme delivers against: health and wellbeing, inclusive growth and net zero carbon commitment; and then:
- Priority 1: Is the scheme essential, i.e., health and safety or statutory obligation?
- Priority 2: Will the Investment deliver a 'return' – to include direct income streams but also indirect benefit such as economic, business or housing growth?
- Priority 3: Will the investment deliver transformation, for example improving service quality or improving the city?

4.4 In addition to the prioritisation of individual proposals and programmes the whole programme will be assessed for:

- Achievability – The Council has or can access the resources and technical expertise to deliver within the timescales;
- Prudence & Affordability – To ensure that the revenue cost of debt remains affordable within the MTFs and that debt levels are anchored, albeit it notionally, to asset valuations;
- Non-monetary benefits – Social well-being, health and environmental benefits; and
- Impact on the Council's 5% partial VAT calculation.

4.5 These new investment programmes are appraised in conjunction with a review of the priorities in the existing programme. This process allows for check and challenge with peer review of scheme proposals before the overall affordability of the programme is considered. This review is overseen by the council's Strategic Investment Board.

4.6 In the appraisal of schemes, the council will make use of internal officer experience but where appropriate seek external independent specialist advice to ensure that business case risks are correctly identified and assessed. This should lead to robust investment decisions that will stand up to subsequent scrutiny.

4.7 It is also important to recognise the need for operational capacity to undertake forward planning of projects particularly in the feasibility phase of proposals.

4.8 The approach to managing the level of borrowing has sought to reprioritise existing schemes, slip schemes and replace borrowing with external funding sources where possible.

5. **Project Monitoring**

5.1 Where appropriate, project boards are established comprising suitably experienced and qualified staff with relevant expertise to assist decision making. Board representation would normally consist of: the project sponsor, programme managers, finance, legal, property, support staff and if appropriate HR, communication and external specialist expertise.

5.2 Monitoring of individual schemes and programmes takes place monthly with financial status reports of actual spend against forecast reports prepared and reported to Directorates. A monthly summary position is taken to the council's Financial Performance Group.

5.3 Quarterly monitoring reports are taken to the council's Executive Board. These highlight actuals spend against forecast, progress on schemes, injections, deletions and the impact on future years.

5.4 As required by the CIPFA code of practice on Treasury Management the council reports on the strategy for the forthcoming year before the start of the year (usually in February to Executive Board and Full Council). Additionally, a half year update report is submitted to Executive Board in November during the year with a final report on the previous year being submitted in June/July following the close of the financial year. A further requirement of the 2021 CIPFA codes is that all forward looking Prudential indicators, as set by Full Council, are reported at least quarterly as part of the Council's financial health monitoring.

6. **Capital Priorities**

6.1 The council has a significant estate to maintain but is also undertaking and facilitating large scale infrastructure development that will underpin the council's Best City Ambition objectives. It remains focused on delivering these ambitions but recognises the financial pressures that the Council is facing. The council will continue to seek to secure funding for the major infrastructure needs of the city.

6.2 The council's capital investment objectives are centred on the council's Best City Ambition, to improve outcomes across the Three Pillars of:

- Health and wellbeing;
- Inclusive growth; and
- Zero carbon.

6.3 These priorities inform the principles established in paragraph 4.3 above and underpin the wide range of projects delivered under the council's 6 capital objectives. The major schemes delivered under each of the following objectives below and are detailed in **Appendix B (i)** of this report. The council's 6 objectives are:

- Improving Our Assets;
- Investing in Major Infrastructure;
- Supporting Service Provision;
- Investing in New Technology;
- Central and Operational, and
- Supporting the Leeds Economy.

6.4 There are a number of other significant initiatives that are based upon sustainable business plans:

- Rationalisation of the council's property estate;
- Reduction in backlog property maintenance;
- Measures to maintain income and reduce costs through spend to save business cases;
- Investment in sporting facilities;
- Investment in technology and Core Business Transformation
- Supporting business growth in the city;
- Investment in heritage assets on a sustainable basis; and
- Investment in initiatives that support the revenue budget.

7. **Capital Programme Priority and Corporate Links**

7.1 The capital programme links into wider processes and plans across the council and should not stand alone. In setting, monitoring and reviewing individual schemes/ programmes and the overall capital programme consideration should be given to the:

- Best City Ambition;
- Estate Management Strategy;
- Medium Term Financial Strategy;

- Treasury Management Strategy including prudential indicators; and
- Internal and External audit.

8. **Revenue implications**

- 8.1 The revenue implication of all capital expenditure should be considered alongside revenue budgets. Capital expenditure decisions should consider:
- The costs of any borrowing required (interest and minimum revenue provision);
 - Future whole life asset planning including capital (future capital maintenance requirements) and revenue implications (running costs and maintenance costs);
 - Realisation of cashable and non-cashable benefits;
 - Impact on the economy and the generation or support of council tax and business rates; and
 - Proportionality.

9. **Funding Strategy**

- 9.1 A range of options are available for the council to fund its capital expenditure requirements. This capital investment must be in line with the CIPFA Prudential Code for Capital Finance in Local Authorities 2021. The total level of borrowing that the Council undertakes must be within the limits approved by Full Council in advance of the year as being prudent, in line with the Prudential Code. The management of borrowing is covered within the Treasury Management Strategy.
- 9.2 The council will ensure that asset purchases funded by borrowing from the PWLB will at all times comply with the lending terms that PWLB operates under.
- 9.3 The council will seek to maximise external funding sources before it undertakes borrowing, whilst ensuring that borrowing remains affordable and within the Medium Term Financial Strategy.
- 9.4 The main sources of funding available are:
- Government grants;
 - Match funding;
 - City region funding including the Local Enterprise Partnership (LEP);
 - Developer funding through Community Infrastructure Levy (CIL), S106 and S278 contributions;
 - Private sector funding;
 - Capital receipts; subject to funding repayment of existing debt, PFI liabilities, etc.;
 - Generation of income streams or the avoidance of costs through robust business cases that meet the costs of required borrowing;
 - Corporate borrowing where the funding is a bottom-line revenue cost;
 - Lease finance; and
 - Revenue funding.
- 9.5 In addition, the council may choose to award capital grants to third parties or provide loans, which is covered in the Investment Strategy.
- 9.6 The council is also working with MHCLG, other central government departments and WYCA in establishing a sustainable approach to local capital infrastructure. The aim is to enable the council to undertake key investment priorities that generate and sustain growth including the delivery of new mixed tenure housing.

10. **Risks**

10.1 The risks associated with this Strategy should be considered in the context of the council's risk and governance reporting framework and the methods for monitoring and escalation.

11. **Knowledge and Skills**

11.1 The Capital Programme is managed separately from the Treasury Management function, but both are managed by a number of experienced and qualified staff. They all follow a continuous professional development plan that forms part of the Council's appraisal process. The section is headed up by a CIPFA qualified accountant and reports to the S151 Officer who is also a CIPFA qualified accountant.

11.2 Individual capital schemes are undertaken by professional qualified staff in appropriate disciplines. External support and advice are also sought through a framework contract as and when required.

11.3 Members are consulted in early stages of project development and provide approval of schemes at Executive Board and Full Council when the capital programme is set. Members are provided with training on treasury and capital management.

12. **Investment Strategy**

12.1 The council's investment activities cover three broad areas – treasury management investments, other financial investments such as loans and equity investments which are made to achieve service objectives, and non-financial investment assets such as property. Whilst the council does not acquire properties purely for investment purposes, it does hold a number of property assets which generate rental income, some of which were acquired to stimulate economic growth within areas of the city and some of which were previously operational assets which are now surplus to operational requirements.

12.2 The council does not hold commercial financial investments, i.e., financial investments which are held primarily to generate a financial return.

12.3 In undertaking investment activity for both treasury management and non-treasury management purposes, the council is required to follow Statutory Guidance on Local Government Investments and to have regard to the Chartered Institute of Public Finance and Accountancy (CIPFA) Prudential Code for Capital Finance in Local Authorities and the Treasury Management in the Public Services Code of Practice. In December 2021, updated versions of these two Codes were published. Amongst other changes, these updates introduced two new classifications for non-treasury investments, so that all investments are required to be classified as one of:

- Treasury investments
- Service investments – those taken or held primarily for the purposes of delivering public services (including housing, regeneration and local infrastructure)
- Commercial investments – those taken or held primarily for financial return.

12.4 All of the council's financial investments which are not treasury investments are classed as Service investments under the Codes.

12.5 Whilst the classification under the Codes of properties where the reasons for holding the property have changed over time is less clear, the council has opted to classify its properties which are retained primarily due to their income stream as Commercial investments.

12.6 Treasury management investments

12.6.1 The council makes investments on an ongoing basis as required for the purposes of efficient treasury management. The scale of these investments, the investment policy and the risk management approach are all covered in the Treasury Management strategy which is published alongside this document

12.7. Contributions made by non-treasury financial investments

12.7.1. The statutory guidance requires councils to identify and disclose the range of contributions which its existing non treasury management investments make to its objectives.

12.7.2. Table D1 outlines the nature of the contributions made to service objectives by the non-treasury financial investments which the council held at 31st December 2024.

Table D1

Investment	Value at 31st December 2024 £k	Cost of Acquisition less Repayments £k	Nature of contribution made	Valuation Basis
Equity Investments				
Shareholding in Merrion House LLP	5,366	1,088	Efficient procurement of office accommodation	Fair value
Leeds City Region Revolving Investment Fund LP	5,696	5,399	Promotion of economic development	Fair value
Total Equity Investments	11,062	6,487		
Loans				
Loan to Leeds District Heating PipeCo LTD (an LCC subsidiary company)	6,975	6,975	Climate change emergency	Cost less provision
Loans to housing associations and other bodies	975	975	Access to affordable housing	Cost less provision
Loan to enable conversion of building to TV Studio	1,600	1,600	Promotion of economic development	Cost less provision
Assisted Homebuy Scheme (equity loans)	1,213	645	Access to affordable housing	Fair value
Loan to enable the development of a new rail station	2,957	2,957	Promotion of economic development	Cost less provision
Loan to a tenant to improve Leeds Media Centre	483	483	Climate change emergency and promotion of economic development	Cost less provision
Loan to Leeds City Credit Union	349	349	Financial inclusion	Cost less provision
Clean Air Zone loans to taxi drivers for purchase of green vehicles	158	158	Climate change emergency and health & wellbeing	Cost less provision
Equity loans to householders	184	184	Various including health and wellbeing, and low carbon.	Cost less provision
Council house mortgages	91	91	Access to affordable housing	Cost less provision
Loans to Leeds Community Ventures Ltd	82	82	Efficient procurement of accommodation	Cost less provision
Total Loans	15,067	14,499		
Total Financial Investments	26,129	20,986		

12.7.3. The table also identifies those loans and investments which are held at fair value and those which are held at cost less any appropriate provision for non-payment. Acquisition costs are shown net of subsequent repayments of principal. It should be noted that for those investments which are held at fair value, the most recent valuation was carried out as at 31st March 2024, and the values shown above reflect that valuation adjusted for any subsequent acquisitions or disposals.

12.8. Investment priorities, decision making and risks for non-treasury financial investments

12.8.1. As regards their treasury management investment policies, councils are required to prioritise security and liquidity, and to only consider the yield that can be obtained within

appropriate levels of security and liquidity. However different priorities apply when considering non-treasury investments. The council will only enter into financial investments which are outside of its treasury management activities where it is seeking to achieve a service objective. This means that the requirements to prioritise security and liquidity which would apply to treasury management investments do not carry the same level of weight in considering such investments. Further, whilst the council's financial investments made for service purposes do in some cases generate a return, any such yield is incidental to the reasons for entering into these loans and investments.

- 12.8.2. Prior to making loans or other financial investments outside of Treasury Management, the council carries out a thorough financial evaluation and due diligence of the risk against the return, including the intended service outcome. In addition to expected cash flows, this will take into account any borrowing costs arising and, where investments fall within the definition of capital expenditure and are funded by borrowing, the requirement to fully fund the investment via the minimum revenue provision over an appropriate number of years. A business case should be produced, to cover:
- Which council objectives are being supported;
 - Financial business case including sensitivity sensitivity/worst case scenarios;
 - Financial due diligence;
 - Legal Powers for the acquisition and legal due diligence;
 - Subsidy Control Act implications;
 - Tax treatment;
 - Type and value of security
 - Procurement issues;
 - Know your customer;
 - Political, environmental and social factors; and
 - Accounting treatment.
- 12.8.3. Where necessary and dependent on the value of the proposed investment, external advice will be sought by officers before entering into financial investments.
- 12.8.4. The council should take a legal charge against the property on which the loan is made. It may also consider legal charges on other properties and companies, financial guarantees, bonds/indemnities, cash securities or any other form of security that the council deems appropriate to mitigate the risks of loans being made. It should be noted that some of these investments have been funded by grants or other third party contributions therefore limiting any direct financial impact on the council.
- 12.8.5. Of the £26.1m of current financial investments shown in **Table D1**, £12.9m (49%) are either secured on property or relate to an underlying property asset. A further £6.9m (27%) is a loan to a wholly owned subsidiary.
- 12.8.6. As regards liquidity, the council does not set any maximum policy limit for the duration of such investments, with each being judged on a case-by-case basis. Indeed, equity loans to homeowners, which are partly funded by grants and other contributions, have no set maturity date. When making non-financial loans and investments the council does so with the understanding that it will not be able to prematurely access the funds which have been committed to these investments.
- 12.8.7. All decisions to enter into financial investments for service purposes are taken within the Council's overall delegated decision framework, with the added requirement included in Financial Regulations for the decision maker to consult with the Interim Assistant Chief Executive – Finance, Traded and Resources before entering such a contract. The requirement to consult the Interim Assistant Chief Executive – Finance, Traded and Resources ensures that the available knowledge and expertise within the council for assessing such contracts is applied to each such decision.

- 12.8.8. Once loans and financial investments have been made, arrangements will be put in place for ongoing monitoring and for ensuring that amounts due to the council are recovered.
- 12.9. **Limits on the total value for categories of non-treasury financial investments**
- 12.9.1. Under the statutory guidance for investment strategies, the council is required to set limits on the total value of the non-treasury management loans and other categories of financial investments which it is willing to make.
- 12.9.2. The council proposes to set the limit for loans for 2025/26 at £45m. The limit for 2024/25 was set at £45m, and from **Table D1** the total value of such loans made at 31st December 2024 is £15.1m. This limit does not relate to financial investments other than loans.
- 12.9.3. The council proposes to set the limit for the carrying value of equity investments for service purposes for 2025/26 at £35m.
- 12.9.4. However, the CIPFA Prudential and Treasury Management Codes require the council to set a single prudential limit for all the service investments it holds. These limits for individual categories of financial investments will therefore feed into the overall prudential limit of £80m as set out above.

Table D2

Investment	Projected Value at	
	31st March 2025 £k	31st March 2026 £k
Equity Investments		
Shareholding in Merrion House LLP	5,366	5,366
Leeds City Region Revolving Investment Fund LP	5,696	5,696
Total Equity Investments	11,062	11,062
Loans		
Loan to Leeds District Heating PipeCo LTD (an LCC subsidiary company)	6,975	6,915
Loans to housing associations and other bodies	975	928
Loan to enable conversion of building to TV Studio	1,600	1,600
Assisted Homebuy Scheme (equity loans)	1,213	1,213
Loan to enable the development of a new rail station	4,452	4,490
Loan to Leeds City Credit Union	250	500
Equity loans to householders	184	184
Council house mortgages	83	75
Loans to Leeds Community Ventures Ltd	74	67
Total Loans	15,806	15,972
Total Financial Investments	26,868	27,034

12.9.5. **Table D2** shows the projected level of service financial investments at 31st March 2025 and 31st March 2026.

12.10. **Commercial Property Investment Strategy**

12.10.1. The council holds a mixed property portfolio spread across the following headings:

- Operational assets that are needed to operate front line and back-office functions;
- Property assets that provide an income stream to the Council, which are split into the following:
 - i) Prime Property Portfolio comprising properties rented out on high yielding commercial terms, such as office blocks, large modern industrial units and multi storey car parks,
 - ii) Smaller commercially let properties including a portfolio of small industrial estates, offices, shops and pubs,
 - iii) Community assets leased or hired to local organisations such as sports clubs and community groups,
 - iv) Economic Development properties held for supporting innovation and job creation,
 - v) Surplus properties that have been earmarked for disposal when market conditions are appropriate to raise Capital Receipts,
 - vi) Agricultural land and property held for long term strategic expansion of the city or protection of the countryside, and
 - vii) miscellaneous properties which include substations and other statutory utilities on council land;
- Regeneration and growth – assets that are acquired to enable transformation of areas, provide confidence to the market where projects have stalled or generate growth;
- Heritage assets – those that are of historic importance to the city; and
- Community assets - that are held to support initiatives across the public and third sectors to the benefit of local communities.

12.10.2. A number of the above properties are classified as investment assets under accounting standards and are therefore deemed to be investments within the scope of the Treasury Management Code. These assets cover commercially leased property, a small industrial portfolio and assets awaiting disposal as set out above. Other properties which generate income through non-commercial rentals and various other rights, for example covenants, access rights and mineral rights are not deemed to be investments within the scope of the Treasury Management Code.

12.10.3. In November 2021, Executive Board considered a report from the Director of City Development which presented the council's Estate Management Strategy for 2021-2025. This document set out the underlying principles which will guide the management of the council's property assets to ensure that its property estate continues to meet operational needs and to contribute to the council's strategic objectives. This document draws on the Best City Ambition three pillars; Health and Wellbeing; Inclusive Growth; and Zero Carbon, with asset decisions taking account of these considerations.

12.10.4. One of the main aims of the council is to bring about economic regeneration in Leeds. The Council has been involved in bringing forward the development of buildings at a time when the market was stalling, and their acquisitions have helped to stimulate the local economy as well as providing a rental income. With the council's ambition to become the best city in the UK, with an economy that is both prosperous and sustainable, further acquisitions may be considered if suitable opportunities arise within the city. However, such acquisitions would be subject to rigorous financial appraisal with the aim of ensuring that taxpayers funds are safeguarded and would not be acquired

purely for investment purposes. Equally, the council may consider bringing forward its own development schemes to support the local economy such as the development of small industrial units. Further details of the approach to be taken are given in paragraph 12.11 below.

- 12.10.5. The declared climate emergency will result in the council ensuring that all capital investment will be in line with achieving a zero carbon city.
- 12.10.6. The council will ensure that a proactive maintenance strategy is in place to safeguard the income that its commercially leased properties generate.
- 12.10.7. The council keeps under review the potential for the sale of investment property assets which it does not wish to retain. However, properties will not be disposed of unless this represents the best value for money to be obtained from the asset. Those assets which are to be disposed of are identified as proposed disposals in reporting to Executive Board.
- 12.10.8. The disposal of properties may be considered to capitalise on market movements and situations where the return available is above market value such as special purchaser and marriage value situations. In addition, certain properties may be held on a short/medium term basis where a resale in the next few years might enable the council to obtain an enhanced value before the asset value might start to fall e.g., to sell the investment before the remaining lease term becomes unattractive to the market.
- 12.10.9. Where previously operational assets become surplus, the council considers on a case-by-case basis whether the best value for money can be obtained by disposing of the properties in the short term or by leasing them out on commercial terms.
- 12.10.10. The council will put in place a strategy to manage and make the best use of historic assets that are expected to be permanently retained by the council. This is part of the council's desire to have a managed efficient estate within the MTFs financial envelope.
- 12.10.11. Once the portfolio is in place it is recommended that the performance of the investment Management Strategy is reviewed on a quarterly basis, and an annual review is undertaken to ensure that it continues to reflect the council's priorities and risk appetite given market conditions.
- 12.10.12. In addition, the Property Manager or external Property Adviser will on a day-to-day basis be actively monitoring market conditions and the management strategy adopted will be adjusted to reflect changes in the market. The monitoring of market conditions is seen as essential if the council is to capitalise on opportunities thrown up by changes in the commercial property sector. Further, an important part of the long-term strategy as the portfolio matures will be to look at portfolio weighting to ensure that the council is not under or overexposed to one or more sectors of the market. To do this a summary of the value of the properties and the income generated will be produced.
- 12.10.13. Where the council considers using borrowing to fund property acquisitions, this will be sourced as outlined in the Treasury Management Strategy but could include the Public Works Loan Board. Where properties are being acquired to stimulate economic development and it is intended that they will be commercially rented out, the projected rental income in comparison to the costs of borrowing should be considered within the overall business case.

12.11. Assessment Criteria for Property Acquisitions

12.11.1. When looking at the potential acquisition of commercial properties to promote economic development the council will have regard, in order, for security, liquidity and then yield. The Council should consider the following factors as part of the evaluation criteria:

- **Covenant Strength:** A full financial appraisal of the ability of the tenant(s) to continue to pay rent to service the council's debt obligations will be undertaken. This may in some cases require external independent advice. Only tenants of good financial standing will be considered.
- **Unexpired terms:** For let properties the council must consider the unexpired length of the lease and break clause to determine the risk to future income assumptions. In addition, the council will consider the costs of a tenant vacating in future income assumptions.
- **Guide Price:** To avoid over exposure to large lot sizes and to avoid the purchase of low price and therefore low return investments that are uneconomical to manage it is recommended that the council invest in properties within a value of up to £65 million.
- **Target Yield Range:** The target return should as a minimum be higher than the cost of borrowing but also be more than returns that could be received on bank deposits. However appropriate adjustments for risk and growth should be factored in. An appropriate Yield minimum in comparison to current interest rates should be established. Lower initial yields should of course be considered for investments offering asset management or redevelopment opportunities or long term guaranteed rental growth i.e., linked to annual RPI or CPI increases which will give higher returns in the long term.
- **Risk:** concurrent with the rate of return the risk of the acquisition / tenant strengths and lease conditions should be evaluated.
- **Location:** Based upon knowledge of the local area and the regeneration requirement only properties in the geographical area of the council's jurisdiction will be considered.
- **Market Sector:** Investments across all sectors will be considered. Particular emphasis should be placed upon acquisitions that complement regeneration or job creation in the council area which may involve the council entering Joint Venture arrangements.
- **Capital Growth:** The property should afford revenue and / or capital growth. Where at all possible, properties selected should offer opportunities by asset management, change of use, reconfiguration or redevelopment to enable the council to produce future returns that will increase in real terms above inflation.
- **Tenant Line up:** To minimise the risk of tenant failure and property voids single occupancy properties should be avoided unless covenant strength is exceptional (institutional single covenants or strong local firms e.g., banks or local legal firms) and there is a significant unexpired term. In terms of multi-occupied properties preference should be given to investments with a variety of uses / trades but ensure the number of tenants is managed to covenant strength.
- **Vacant Properties:** In certain circumstances such properties should be considered, particularly if they adjoin existing council holdings or offer opportunities by asset management, change of use, reconfiguration or redevelopment. Vacant properties will also be considered where they are in areas of strong growth and investment activity such as the Aire Valley where it is anticipated there will be interest from occupiers and therefore good prospects of letting. The advantage of such properties is that they can usually be purchased at a discount to the market and are a way of adding value by letting to strong covenants. Such properties will also provide inward investment opportunities for the City as ready-made sites for new occupiers.
- **Property Condition:** for let acquisitions the age and condition must be sufficiently factored into the price to ensure that the council is able to let or sell the property

in the future and that appropriate surveys are undertaken prior to the purchase of the property. The council should also consider the costs of refurbishment / demolition in the acquisition value.

- **Market Sector:** The council should ensure that it has a balanced portfolio mix spread across the commercial property sector.
- **Prime / Edge of Prime High Street Retail Uses:** It is essential that any retail investments considered should meet the strict tenant covenant strength test. With the rise of internet shopping this has become high risk for tenant failure sector. Care should be taken to avoid over exposure (say over 50% of uses) of the investment to any single use category. In particular, Class A2 retail (banking and professional services) with break clauses or short unexpired lease terms should be avoided as there is a growing trend for banking and financial services companies to pull away from the high street.
- **Car Parks:** Consideration should be given to the acquisition of car parks as these have pre-COVID provided a strong and guaranteed rental growth. Further, in the case of lease expiry, restructuring or tenant failures there is the opportunity for the council to gain full control and take over the operation of the car park.
- **Development Opportunities Adjoining / Abutting Existing Council Holdings:** Opportunities where the council has an interest in a site or owns adjoining land should be considered.
- **Lease Re-gearing, Unlocking of Marriage Value and Purchase of Freehold opportunities:** It is possible to unlock latent value or create new value and income by the extinguishment variation or extension of long leasehold terms. Consideration should also be given to buying in the freehold of council leased in properties where prudential loan repayments are lower than contractual rental payments.
- **Maintenance Programme:** The revenue and capital implications of maintenance of the assets should be considered and reflected in budget assumptions and an adequate budget set aside to cover future maintenance that is not recoverable through a service charge and potential future refurbishment costs.

12.12. **Property Criteria that should be avoided or where additional due diligence is required**

12.12.1. When appraising potential acquisitions, the following property types / situations require additional due diligence given the potentially higher risks to the security of funds.

- **Leasehold:** Due to management issues relating to superior landlords plus diminishing returns such acquisitions should be avoided unless there is a significant lease term remaining, normally more than 100 years, or the opportunity to renegotiate the lease term as part of the acquisition.
- **Speculative Development sites:** Commercial development is a high risk / high return industry and given the need for an immediate income return on investment it is not recommended that the council invest in this area unless adequate pre lets are in place and unless there is a good regeneration criterion linked to the purchase of such an asset.
- **High Risk Complex Joint Ventures:** Such opportunities can present good returns by sharing the risk with others. Such opportunities should be considered carefully and in the context of their regenerative benefits in the longer term.
- **MEES Compliance:** From the 1 April 2018 under the energy efficiency requirements of the MEES compliance, all commercial properties offered to let must have a minimum EPC rating of "E" or above. This is anticipated to become more stringent in future years. Therefore, any properties not meeting this criterion should be avoided unless the seller undertakes the necessary enhancement works to make the property MEES compliant, or the property forms part of a

wider regeneration scheme for which an appropriate business case has been developed.

- Shopping Centres: Such investments require intensive management and frequently impose future cash calls for refurbishment, etc. upon their owners. In addition, Leeds has a very comprehensive retail offer at present and investment in this market is likely to exceed the funds available. The sector is likely to be competitive with other investors such as commercial property companies and funds therefore entry costs could be high with yields lower. Therefore, investment in this sector is not recommended. Where other Local Authorities have acquired retail shopping centres these tend to be acquired either to support the town centre or the regeneration of an area of the city.
- Retail Parks: In a similar fashion to shopping centres such investments carry intensive management obligations and the frequent need to put extra investment into the asset. The retail market has been adversely affected by the way people buy goods and through online purchases of goods and the viability of such retail sites must be very carefully assessed. The DIY sector is also being hit by the rise in “trade park” operators such as Screwfix who can operate from such parks at rents nearer industrial rates than those higher rents seen at retail parks.
- Location: As noted above, property acquisitions outside of the Leeds boundary should not be considered.

12.13. Commercial Property Assets held

12.13.1. As at 31st December 2024 the council holds a number of investment properties which were recently acquired with the aim of supporting regeneration and economic growth within Leeds. The total acquisition cost of these properties was £99.3m, and the carrying value at the most recent valuation was £79.2m. The fair value of these assets will be revalued as part of the 2024/25 closedown process and any resulting reduction in fair value below the level of capital invested would be reported to Full Council as required by the statutory guidance on investments, along with mitigating actions proposed. **Table D3** provides details of individual asset values:

Table D3

Asset	Purchase Price/ Build Cost £	Stamp Duty & Other Fees £	Total Cost £	Latest Valuation £
Harper Street Car Park	10,025,000	503,600	10,528,600	9,650,000
Swinegate	19,840,000	1,339,100	21,179,100	17,650,000
Thorpe Park (Keir)	7,020,000	530,900	7,550,900	5,250,000
Apex View (Hitachi)	8,190,000	504,000	8,694,000	5,700,000
Sovereign Square	43,993,350	1,262,750	45,256,100	33,200,000
Century Way (Paradigm)	10,200,000	781,500	10,981,500	7,700,000
Total	99,268,350	4,921,850	104,190,200	79,150,000

12.13.2. In addition to making a financial return, all the above investment properties were acquired with a view to stimulating economic development in the city, and the Harper Street and Swinegate car parks make a further contribution in providing a parking service to residents and visitors.

12.13.3. **Table D4** identifies the projected net yield from these assets for 2024/25:

Table D4

Asset	2024/25 Estimated Outturn					
	Annual Prudential Borrowing Charge	Other Costs	Gross Income	Net Income	Yield	Return on Investment
	£	£	£	£	%	%
Recent Acquisitions						
Harper Street Car Park	510,000	0	(829,000)	(319,000)	7.87	7.87
Swinegate	664,000	0	(1,082,000)	(418,000)	5.11	5.11
Thorpe Park (Keir)	234,000	7,000	(482,000)	(241,000)	6.38	6.29
Apex View (Hitachi)	338,000	1,400	(576,000)	(236,600)	6.63	6.61
Sovereign Square	1,416,000	101,000	(2,299,000)	(782,000)	5.08	4.86
Century Way (Paradigm)	344,000	3,000	(575,000)	(228,000)	5.24	5.21
Total	3,506,000	112,400	(5,843,000)	(2,224,600)		

12.13.4. An assessment of current values against acquisition values shows that for some assets there has been a loss in capital values. However, the assets were acquired with the expectation that they would be held over the medium to long term, rather than with the aim of generating a capital return via a disposal in the short term. As regards liquidity, the council considered the inherently illiquid nature of property assets in its business cases for the acquisition of these investments and does not anticipate being forced to dispose of them under disadvantageous market conditions. This view is based on the soundness of the council's overall financial governance arrangements, which minimise the risk of any unexpected need to realise funds from the properties. However, the council will continue to monitor the property market to ensure that it identifies any opportunities which do arise to generate a capital gain from the disposal of the assets.

12.14. Disposal of Commercial Property Assets

12.14.1. The council takes a long-term view on its investment and development of assets but will from time to time consider the merits of a disposal. The disposal review will be undertaken by the Director of City Development and will consider whether a disposal will:

- help achieve a balanced portfolio
- enable proactive management of risk
- enable maintenance liabilities to be managed
- mitigate refinancing risk
- consider the notional debt attributed to the asset
- refocus activity on different market sectors and consider the economic case for intervention/support for example where the market is failing
- ensure the asset continues to perform in line with the objectives set and demonstrates satisfactory performance against comparable assets where available
- be disposed in a timely way following an assessment of the current market value of the asset, relative to the revenue generated.

12.14.2. The business case review will need to consider the resulting impact on the council's revenue budget and any impact of operational delivery from the lost income stream, any costs of disposal and lifecycle costs relating to the physical asset. The decision to dispose will be taken in line with existing delegations with agreement from the Director of City Development and the Interim Assistant Chief Executive – Finance, Traded and Resources in conjunction with the Executive Member.

12.14.3. The decision on the use of the capital receipt is covered elsewhere in the strategy, but any costs of re-provision need to be considered in the business case to divest.

12.15. **Limits on the total value of non-treasury investments**

12.15.1. The 2021 CIPFA Codes require the council to set prudential limits for the total value of service investments and the total value of commercial investments that it holds.

12.15.2. As noted in paragraphs 12.9.2 and 12.9.3 above, the council proposes to set statutory limits for the non-treasury loans and for the non-treasury financial investments that it holds of £45m and £35m respectively. It therefore follows that the prudential limit for service investments is recommended to be set at £80m, and this represents no change in comparison to 2025/26.

12.15.3. As regards commercial investments, as previously noted:

- the council does not acquire any assets which fall into this category at the point of acquisition
- however, the council has determined that some of its property assets now fall into this category due to changes in circumstances since they were acquired
- further properties which the council already holds could move into this category in future, but such changes in circumstances cannot always be predicted

12.15.4. It therefore follows that a limit must be set which allows for increases in market value of the existing properties which are classed as investments, and for further properties to be re-classified as commercial investments due to changes in circumstances.

12.15.5. It is therefore recommended that a limit of £200m should be set for the carrying value of assets which are classed as commercial investments. This represents no change in comparison to 2025/26.

12.16. **Proportionality**

12.16.1. The statutory guidance on investment strategies requires the council to disclose the extent to which it is dependent on non-treasury investment activity as a source of income to balance its budget.

12.16.2. The council's income from non-treasury financial investments is negligible in the context of its overall income, and therefore the potential for failure to generate the expected level of investment income presents no risk to the council's overall financial standing. The budget for such income in 2024/25 is £0.7m, and the budget for 2025/26 will be £0.8m.

12.16.3. Similarly, the council is not dependent on the generation of income from its investment property assets to any great extent, and thus the potential for a reduction in the income generated from them does not represent a significant risk to its overall financial standing.

12.16.4. The council is required to report as a prudential indicator, the expected net income from its non-treasury investments compared to its budgeted net revenue income. This is shown at Table D5

Table D5

	2024/25 £k	2025/26 £k	2026/27 £k	2027/28 £k
Service Financial Investments Income	860	804	789	778
Investment Property Income	5,843	6,059	6,120	6,120
Total No Treasury Management Investment Income	6,703	6,863	6,909	6,898
Net Revenue Stream - GF	621,956	655,700	689,700	725,000
Ratio of Income from Commercial and Service Purposes to Net revenue Stream	1.1%	1.0%	1.0%	1.0%
