PLAY PATHFINDER: CAPITAL AND REVENUE GRANT ALLOCATIONS

1. Play Pathfinder Capital Grant

The Play Pathfinder Capital Grant has been calculated using a formula that contains three variables: deprivation, building costs and child population. The formula has been applied to a portion of the available capital to compensate for differences in the three variables between authorities, whilst still ensuring all authorities have sufficient funding to deliver the required pathfinder outputs. Total payments are consistent with the average levels of Pathfinder funding that have previously been publicised.

Allocations for 2010-11 are indicative and the final figures will be confirmed in March 2010.

GUIDANCE

Appendix 3

1. The Department for Children Schools and Families is making its biggest ever investment of £235 million in play over the three years 2008–2011. The Department expects innovative and exciting new public play areas to be developed with this investment, led strategically by local authorities working in partnership with district and town councils, the third sector, children, families and community groups. The result should be no less than the transformation of local play opportunities across the country.
2. In order to deliver effectively, Pathfinders and Playbuilders will need to ensure that they maintain strong partnerships between Directors of Children's Services and senior colleagues in other key departments such as parks and leisure, planning, housing, environment and transport. The Support Body (Play England), will be able to offer assistance in strengthening these arrangements. In two-tier authorities there will need to be very close working between the top tier and district councils and a process must be developed to ensure that the needs of all its districts are considered in a fair and transparent manner. The Department also expects the play investment programme to be embedded into authorities' broad top-tier strategic approach to planning and commissioning. The Department would also like Pathfinders and Playbuilders to engage their MPs and other locally-elected members throughout the process. The play capital programme should be delivered through a local Play Partnership. The Play Partnership should include representation from a wide range of stakeholder including, Transport, Health, Planning, Parks and Leisure, Police and third sector organisations. In particular, Health is a key member as the Play Agenda impacts on obesity, Change for Life and other health initiatives. The exact composition of the play partnership will depend on local circumstances.
3. The Grant cannot be used to substitute existing or planned expenditure on Play.
4. The Department and Play England has published detailed design guidance which sets out principles of good play design and provide examples of them. Alongside the Design Guide there is also the Managing Risk in Play Provision guide. These materials, along with others, can be found at <http://www.dcsf.gov.uk/play/>. The Department expects Pathfinders and Playbuilders to demonstrate best practice in innovative design and production of play sites and to be mindful of this guidance when undertaking their capital investment. Pathfinders and Playbuilders should also be prepared to discuss decisions made on the location and design of sites with Play England.

Play England

5. The Department has appointed Play England to provide a support role for the Pathfinders and Playbuilders. The assistance provided will be proportionate to need, and will include assistance with planning, design, procurement, partnership working and disseminating best practice. The Department expects Pathfinders and Playbuilders to engage with Play England and will be sharing information with Play England, including financial details of predicted spend, project plans etc.

Details of the contents of the Play Pathfinder and Playbuilder Project Plans

6. The Recipient's Pathfinder or Playbuilder Project Plan will need to set out in sufficient detail how the minimum number of play area developments and, where applicable, the adventure playground/playpark will be delivered over 2009-10, and the needs analysis on which this is based. The plans must also show how the Recipient will ensure that these capital assets will have the maximum impact. The Plan should set out in detail how the Recipient will select and develop the play areas in 2009-10, each at an average unit cost of 50k. This should include setting out the procurement process that will develop areas to deadline. 'Development' in this context is taken to mean the complete or substantial replacing of old equipment for new, or the building of a completely new play area. Decisions on whether and by how much variation from this unit cost figure is permissible will be made by the Department in consultant with the Support Body, in discussion with the Recipient, on a case by case basis. For Pathfinders only, the Plan must contain details on how the Adventure Playground will be delivered at a cost of around £800k
7. The Plan should set out how the grant is supporting/complementing existing or planned Play expenditure. What would have been provided without this additional funding and what the overall value/impact will be of the combined funding.
8. The Plan should build on your bid and indicate how the wider deliverables of the Play strategy will be implemented and supported through the delivery of these play areas. These should include activity on volunteering, training and long term sustainability/embedding.

9. The Plan should also indicate how local delivery and construction may involve local unemployed people.
10. The Plan should set out key targets, milestones and risks (and how they will be managed). In addition to setting out which play areas will be delivered by when, the Plan should also contain details of how the Recipient will deliver the investment. This should include the following sections:

Innovation

- The Plan should set out how the Recipient will deliver innovative and stimulating equipment and landscaping on sites that will provide physically active play opportunities, which are attractive to all children, including 8-13 year-olds. The Department expects the adventure playground/playpark to focus specifically on this age range.

Engagement

- The Plan should contain details of how the Recipient intends to involve children and young people, parents, carers and the wider community and locally-elected members in the decisions about where and how the Grant will be spent, particularly in relation to the adventure playground or playpark. This must go deeper than one-off consultation and should seek to engage and involve them throughout the process. It must also include children seen as 'hard to reach', whom the Recipient may need to access through voluntary and community sector groups. Play England will be able to advise Recipients with less experience in this area.
- The Plan should detail arrangements for encouraging bids from community and Third sector groups, given their play expertise and direct experience of working in the community with children, families and other residents. The Department would expect each Recipient to look to fund a number of appropriate Third sector and/or community-led projects, in line with their established procurement procedures.

Access

- The Plan should set out how the Recipient will ensure that sites are open-access (with children generally free to come and go as they please) and free of charge. They must also ensure better access and experiences for disabled children across all the sites that are developed. This must include ensuring that all developments of play areas comply with the disability discrimination legislation.

Safety

- The Plan should show how the Recipient will carry out risk assessments to ensure the safety of play areas developed, and also how the Recipient will ensure that children are able to travel to and from play areas in safety. This may be in the form of making links with other projects aimed at safer travel for children. However, the Capital Grant may not be used for such purposes as traffic-calming.

Operational sustainability

- The Plan should show how the Recipient will ensure that the capital investment is sustainable in terms of protection of sites against vandalism and ongoing maintenance of sites. Approaches will need to vary according to the location of the play area. The Support Body will be able to advise. Recipients should also look to maximise the use of other capital assets to support their play investment.
- Recipients should indicate how they plan to mainstream this funding and support for play beyond 2011. How will the LA sustain the push on Play provision beyond 2011?

Environmental sustainability

- The Plan should set out the Recipient's consideration of the environmental impact of its investment, and the Recipient should give serious consideration to sustainable refurbishment of play areas using natural materials which encourage children to explore the natural environment.

GUIDANCE

PLAY PATHFINDER PROJECTS

Details of the contents of the Revenue section of the Pathfinder Project Plan

1. The Plan should set out key targets, milestones and risks (and how they will be managed). It should contain details of how the Recipient will use the revenue funding to deliver the play investment and should include the following sections:

Safety

- The Plan should set out how the Recipient will develop ways of increasing parental and child confidence, including, for example, awareness campaigns, training for a range of public sector workers (including community police officers, leisure staff, extended schools coordinators and teachers) and a volunteering programme to help provide appropriate supervision of children in public space.

Staffing/infrastructure

- The Plan should detail playpark start-up staffing costs over the 2009-11 period to cover the adventure playground and provide appropriate supervisory support to other sites.
- The Plan should detail training needs and how these needs will be met. In addition how the programme and the Play workforce will engage with the training being offered through Skills Active

Governance

- The Plan should set out the process for appointing a senior project manager with a strategic link to high-level decision-making; and any other required infrastructure to oversee the Pathfinder programme. The Department also expects the Plan to demonstrate that there is Director-level ownership of the programme within the Recipient authority.

Innovation

- The Plan should set out how the Recipient will generate learning on a number of innovative approaches to improving local play offers (as agreed with the Support Body), for example, play acting as a gateway to structured positive activities and support services.

Best practice

- The Plan should show how the Recipient will share experiences with other local authorities on a regional basis, including through networking events arranged with the assistance of the Support Body.

Community engagement

- The Plan should set out how the Recipient will lead a major consultation exercise for the adventure playground/playpark, including children, parents and local residents, as well as consulting on the play areas to be developed, and supporting community-led projects.
- The Plan should set out how the third sector will be involved – expanding on the information provided in bids. This should also include how the Third sector will be supported to deliver elements of the programme.

Evaluation

- The Plan should show how the Recipient will work with evaluators and assist them in data capture to show the impact of improvements to local play offers, for example looking at increased usage,

parental satisfaction, etc.

PLAYBUILDER PROJECTS

1. There are a number of possible uses for the revenue funding, all of which would support the delivery of the Recipient's capital programme. These are as follows:

- interim support for any new and additional maintenance costs whilst longer-term, sustainable funding routes are put in place;
- similar interim support for any supervisory costs, including development of new volunteering infrastructure, associated with creating safer play areas in line with local demand;
- support for additional design costs associated with delivering innovative sites;
- support for community action, for example community development worker costs, linked to capital roll-out;
- Any additional social marketing that authorities really think would add value, for example targeting very hard to reach groups;
- Project management staffing costs needed to run an effective playbuilder capital programme.

2. The Department is not requesting a detailed plan for this funding. However, the recipient will still need to include this revenue in its estimate of expenditure (Annex E) and final statement certificate at Annex F.
