REPORT OF: JILL WILDMAN, DIRECTOR OF HOUSING SERVICES

REPORT TO AREA COMMITTEE CHAIRS' FORUM

DATE: THURSDAY 3 NOVEMBER 2011

SUBJECT: WELFARE REFORM

This briefing note outlines to Members as to the potential implications/risks for the Leeds ALMO's / BITMO as a consequence of the Welfare Reform – particularly relating to the introduction of Universal Credit and Under Occupation.

Universal Credit

- ALMO / BITMO Customers Go live date October 2013 for all new claims. April 2014 thereon to 2017 migration of all other claims.
- ALMO / BITMO Customers Affected: £60 million HB is rebated and currently paid direct to ALMO / BITMO rent accounts for 22,300 working age ALMO / BITMO tenants:
 - 17,800 get full HB
 - 4,500 get partial HB

Potential Issues and Risks

- Once implemented the HB will be paid direct to the tenant, therefore a substantial additional amount of income will need to be collected by the ALMOs/BITMO.
- Customers will have the responsibility to manage their own benefits i.e. paid directly to individuals and they are responsible for making their own rent payments to Landlords.
- Customers managing own finances some do not have a bank account for the payments to be paid into.
- Customers may not view paying their rent as a priority.
- Many customers are financially excluded and do not have sound financial literacy skills which will enable them to budget effectively.
- Reduction in income collection.
- Impact on performance. (Benefits to be made per calendar month in arrears to claimants).
- Increased collection costs / recovery activity / transaction costs.
- Increased arrears / increased evictions / increased legal costs.
- Potential increase in legal high cost lenders/illegal money lending / loan sharks
- Increased number of terminations / void costs / rent loss.
- Increased number of homelessness cases.
- Impact of overpayments in direct payment cases.

- Increase amount of bad debt provision may be required potential increase in number of FTA write offs.
- DWP considering that 5-10% of vulnerable customers rent may be paid direct to ALMO / BITMO rent account (no definition of vulnerable).
- Concerns re vulnerable customers i.e. drugs / alcohol dependencies (additional disposable income).
- Managing the migration for ALMO / BITMO customers to Universal Credit.
- Central administration Universal Credit is to be managed by one single agency to reduce prospect of loss of fraud and error.
- Increased no of enquiries via Face to Face and Contact Centre to clarify issues.
 Additional support needed for customers hence increased staff resources may be required.
- The need to re-skill staff to deal with the new legislation / process.
- DWP will accept, process and decide all claims for UC but are aiming for all claims to be conducted on-line (no paper claims). Initial target is 50% to then reach 80%. Each claimant will have own unique login ID and password to access their own benefit account. Claimants have responsibility of notifying DWP via their own on line account re got a job or off work / sick etc.
 - High percentage of our customers do not have access to computers and have no skills to use a computer.
 - From April 2013 all employers will be required to notify HMRC of the earning of all their employees i.e. if claimant is in low paid employment and has a change in their earnings – this automatically notifies real time systems and account is amended.
 - Process required for Human Resources and an increase in workload.
- Disability Living Allowance to be abolished in April 2013, replaced by PIP (Personal Independence Payment). (21k claimants in Leeds between 16 and 60 receive DLA). Point scoring system DWP predict 20% reduction in claims. Claim assessment targeted at daily living (not care). Mobility (not walking) and what aids / adaptations considered when claims are made.
 - Customers may refuse, delay or even remove aids and adaptations whilst under assessment to qualify for a higher rate of PIP.
 - ALMOs/BITMO will have to notify DWP of every aid and adaptation delivered / installed.

<u>Welfare Reform – Housing Benefit Under Occupation in Social Rented Sector</u>

Potential Implication for ALMOs / BITMO

- April 2013 change to HB rules mean that "working age" social tenants will receive a reduction in their HB where they live in accommodation that is larger for their needs i.e. number of bedrooms.
- Percentage reduction depends on the degree to which the tenant is underoccupying i.e. less reduction for a one bed, more reduction for a 2 bed plus.
- May be some exemptions i.e. homes adapted for disability purposes.
- Estimate of 7,500 ALMO / BITMO tenants that may be affected.

Potential Issues and Risks:

- Increased number of staff resources, realignment of duties to collect income / provide advice / support / collection teams.
- Reduction in income collection.
- Increased rent arrears (those tenants affected are in receipt of benefits and therefore will have less disposable income).
- Communication to both customers and staff as to the future changes.
- Impact on performance.
- Increase in legal costs / evictions.
- Possible impact on number of homeless cases.
- Support required for vulnerable customers hence additional resources may be required.
- Increased transaction costs.
- Potential increased demand for smaller property types i.e. one bed flats and possible reduced demand for larger properties i.e. flats.
- Increased number of voids / rent loss / void budgets and expenditure.
- Implication on current Incentive Scheme (LCC).
- Lettings Policy (LCC) will need to be reviewed to incorporate any changes.
- Tenancy conditions / agreement to be reviewed (LCC).
- LLP's currently age restriction in blocks consideration of future LLPs.
- Consideration where Landlords allowed an additional bedroom i.e. disabled children / medical, access to children, foster carers impact.
- Potential changes in IT systems may be required.

Please note Appendix A the cross ALMO / BITMO Action Plan.

The ALMO's / BITMO and LCC are currently gathering detailed data to be able to have a more detailed understanding as to how many customers are to be affected.
