12a Number of family placement foster carers	104	...	n/a	(New data item)	31 Dec 2012	16	11	5

Commentary

9.3% (130) of the children looked after population comes from the Inner North West area. This figure is virtually unchanged from the June 2012 figure, although the overall city figure has declined by 37. 11% (31) of all children and young people entering care between April and December 2012 come from the Inner North West area.

10.3% of CAFs initiated across the city come from the Inner North West area. 1,804 requests for service, of which 578 met the threshold for being treated as a referral to the Children's Social Work Service, are from the area. The number of children and young people subject to a child protection plan has risen by ten, to 110, since June.

21. 5+ A*-C GCSE inc English and maths	54.3%	53.1%	n/a	(Annual data item)	2011-12 AY	66.0%	52.4%	36.8%
<p>Commentary</p> <p>Primary school attendance was 95.7% in the Inner North West area, unchanged from autumn 2011, and just 0.1 percentage point below the city average. Secondary school attendance is 0.7 percentage points lower than the autumn 2011 figure, at 93.2%, and is 0.5 percentage points lower than the city average. 119 (7.5% of the city cohort) of children were persistently absent (missing at least 15% of school) from primary schools in the area, and 244 (7.8%) children and young people were persistently absent from secondary schools in the area.</p> <p>The number of NEET young people in the Inner North West area at the end of December was 92, 12 lower than the June figure. The level of NEET was 5.4%, nearly half a percentage point lower than June, and over 0.5 percentage points below the city average of 6.0%. Future reports will compare data with a corresponding period from 12 months ago. The total number of NEET for the West North West area in December 2011 was 449.</p>

<p>Commentary</p> <p>There has been no change in both the percentage of primary and secondary schools rated good or better, with the Inner North West area remaining below both the city averages (marginally in the case of primary schools). One children's home has been inspected and has been rated as outstanding, improving the previous good rating. This has not impacted on the overall good or better percentage for the area, but the outstanding rating should be noted.</p>

Data definitions

Indicator	Allocation of data item to area committee	Data source	Notes
1. Number of children and young people 0-19	By home postcode of child or young person	NHS: GP registrations, Jan 2012	<p>The count is the number of young people aged 0-19 (not including 19). This source data is compiled at lower super output area (LSOA). LSOAs cannot be exactly matched to area committees as the boundaries do not match, so this is the closest approximation.</p> <p>Data source as above, expressed as a percentage of the total 0-19 population.</p> <p>A count of all primary schools, including academies.</p> <p>A count of all secondary schools, including academies.</p> <p>A count of all through schools, including academies.</p> <p>A count of all local authority children's centres.</p>
2. Percentage of children and young people	By home postcode of child or young person	NHS: GP registrations, Jan 2012	
3. Number of primary schools	By location of school		
4. Number of secondary schools	By location of school		
4a. Number of through schools	By location of school		
5. Number of children's centres	By location of children's centre		
6. Numbers of children looked after	By home postcode of child or young person at the point when they came into care, not their placement address	ESCR	<p>The result is not a cumulative count of the number of children that have been in care during the reporting period, but rather a snapshot of the numbers recorded in ESCR as being in care on that particular date. The number does not include children who receive respite with foster carers through the Family Support Service (under S17 of the Children Act), or children who are solely looked after under respite S20 Short Term Breaks and Shared Care. There can be delays in inputting a record of a child who has just entered care, or similarly for a child who has just left care, so reported numbers for the same snapshot day but run at a later date may differ.</p> <p>Some records cannot be allocated to area committees because: the postcode is for an address outside Leeds; it is a confidential placement postcode; the record may show no postcode; or the postcode is an unrecognised or incorrectly entered postcode that cannot be matched. The count includes unaccompanied asylum seekers.</p>
7. Numbers of children entering care	By home postcode of child or young person at the point when they came into care, not their placement address	ESCR	
8. Numbers of children subject to a child protection plan	By home postcode of child or young person	ESCR	Notes as per the relevant sections in indicator six.

Data definitions

Indicator	Allocation of data item to area committee	Data source	Notes
9. Numbers of CAF initiated	By home postcode of child or young person, not the location of the agency undertaking the common assessment	CAF database	The number of CAFs is the cumulative total number of CAFs initiated, not concluded, during the reporting period. The result is from the CAF database. Agencies who initiate CAFs need to report this to the integrated processes team in order to have this recorded on the database, so there may be a delay in the recording of a CAF initiated, depending on when the agency passes on this information. Some records cannot be allocated to area committee because the record may show a postcode for an address outside Leeds; or an unrecognised or incorrectly input postcode that cannot be matched.
10. Number of requests for service	By home postcode of child or young person, not the location of the agency/worker making the request for service	ESCR	The result is the cumulative total number of requests for service during the reporting period. Requests for service are handled by the Duty and Advice Team, based at the corporate contact centre, who consider the details of all contacts that are received about a concern for a child's welfare. Social workers in this team decide whether or not each case needs social work input. If a case does need social work input, this is termed a referral. Cases where children can best be supported by other children's services agencies or services, ie no social work service input required, are termed a request for service.
11. Number of requests for service leading to a referral	By home postcode of child or young person, not the location of the agency/worker making the request for service	ESCR	As above, but this is a count of those requests for service that require children's social work service input, and are called referrals.
12. Numbers of LCC-employed foster carers	By postcode of the foster carer(s)	ESCR	This is a snapshot count of all council-employed foster carers, not only those foster carers who have children and young people placed with them.
12a. Numbers of family placement foster carers	By postcode of the foster carer(s)	ESCR	This is a snapshot count of all family placement foster carers, not only those foster carers who have children and young people placed with them.
13. Primary school attendance levels	By school attended, regardless of where the child or young person lives	School census returns for the autumn term 2011	Schools provide, via the termly school census, individual level attendance data for the autumn term 2011 for pupils in years one to eleven. The school census collects the number of possible half-day sessions of attendance and the number of half-day sessions missed. Information on pupil absence counts the number of pupil enrolments, not the number of pupils. Pupil absence is recorded for the period when a pupil is enrolled at a school. If a pupil moves school, then they will be counted more than once as they have recorded attendance at more than one school.
14. Secondary school attendance levels	By school attended, regardless of where the child or young person lives	School census returns for the autumn term 2011	As above.

Data definitions

Indicator	Allocation of data item to area committee	Data source	Notes
15. Number of pupils persistently absent at primary	By school attended, regardless of where the child or young person lives	School census returns for the autumn term 2011	A persistent absentee is defined as having 46 or more half day sessions of absence during the school year, around 15 per cent of possible half-day session. Pupils missing 22 or more half-day sessions in the autumn term are potentially on track to become persistent absentees. This indicator is the count of children and young people enrolled at schools in the area committee boundary whose absence levels in the autumn term hit this threshold.
16. Numbers of pupils persistently absent at secondary	By school attended, regardless of where the child or young person lives	School census returns for the autumn term 2011	As above.
17. Numbers of NEET	By home address of young person	Insight database	The result is the adjusted number of young people who are NEET on the last day of each month, not the total number of young people who may have been NEET during the month. The "adjusted NEET" figure (which is for city-wide data, not area committee data) takes account of the number of young people whose status is not known. A formula is applied so that some young people whose status is not known are assumed to be NEET. This is added to the NEET figure to give the adjusted NEET figure. Because this adjustment is not made at area committee level, area committee results will not add up to the city-wide total.
17a. Percentage of NEET	By home address of young person	Insight database	As above.
18. Numbers of 'not knowns'	By home address of young person	Insight database	This is the number of young people whose NEET status is not known at the point of recording.
18a. Percentage of 'not knowns'	By home address of young person	Insight database	As above.
19. Foundation Stage good level of development	By location of the school, not the home address of the child or young person		A good level of development is achieving 78 points across the Early Years Foundation Stage Profile (EYFSP), including 6 points in the communication, language and literacy strands and the personal, social and emotional development strands.
20. Key Stage 2 level 4+ English and maths	By location of the school, not the home address of the child or young person		Individual school data are available at http://www.education.gov.uk/schools/performance/geo/la383_all.html .
21. 5+ A*-C GCSE inc English and maths	By location of the school, not the home address of the child or young person		Individual school data are available at http://www.education.gov.uk/schools/performance/geo/la383_all.html .

Data definitions

Indicator	Allocation of data item to area committee	Data source	Notes
22. Teenage pregnancy	By home postcode of the young woman. The postcode of the woman's address at time of birth or abortion is used to determine residence at time of conception	NHS	<p>The city-wide result is the latest rolling quarterly average. There is a 14-month time lag in obtaining this data at city-wide level. There is a an even greater time lag in receiving data that includes postcodes and can therefore be broken down by area committee.</p> <p>Conception statistics include pregnancies that result in one or more live births, or a legal abortion under the Abortion Act 1967. Miscarriages and illegal abortions are not included. The indicator is a count of conceptions, so instances of multiple births only count once.</p>
23. 10 - 17 year olds committing an offence	By home postcode of the young person	YOIS	<p>The date from which the offender is included in the count is the date when the offence is proven, not the date of the offence. The measure counts the number of children committing at least one offence, not the number of offences committed.</p>
24-33. Ofsted inspections	By location of the school, children's centre, or children's home	Ofsted website	<p>Inspection results are only included once they are published on the Ofsted website and therefore treated as confirmed. Unconfirmed and embargoed results given by an inspection team to a school immediately following an inspection are not counted. The children's centre inspection framework began in September 2010, so not all centres have yet had an inspection. Children's home inspection grades are the result for full, not interim, inspections.</p> <p>The schools inspection framework changed in September 2012, removing the 'satisfactory' judgement and replacing it with 'requires improvement'.</p>
